Current Comment

Events are happening fast in the campaign for the Republican presidential nomination and they are confirming our opinion that Senator Taft is not a man great intelligence but like his late father, William Howard Taft,will stir up enough ill feeling against himself in the convention that even if he should be nominated he will lose the election. As regards the coming presidential convention W. K. Kelsey, famous Detroit News Commentator, says the dice are loaded against Eisenhower. That the Taft forces control committees and have pulled one trick after another. It is the custom to pick a neutral man for a keynoter but they picked General MacArthur who has declared for Taft and is willing to let himself be used as catspaw.The temporary chairman is Mr.Hallanan of West Virginia, also a Taft man, it will be his duty to rule on the contesting negro delegations of the southern states.The ruthlessness of the Taft forces will kill any chance he had of election. His fathers fate in 1912 apparently carries no warning for him.

There will be a proposal on the ballot this fall to build a county hospital the federal government to put up 45 percent of the funds. If the hospital is built osteopaths will be allowed to practise in it. A similar occurance has cropped up in Bay City where the council voted 5 to 4 to admit osteopaths. The result was that all M. Ds. pulled out and osteopaths now run the hospital. There is a feud between M. Ds. and osteopaths and M.Ds.do not recognize them. At first osteopaths were bone doctors. Then they broadened their field and now prescribe medicine and perform operations.Still they cannot put M. D.after their name Osteopaths go to school 7 years. M.Ds. 7. Later we read the city reconsidered and voted ed to bar osteopaths from hospital. This followed the action of the American College of Surgeons in blacklisting the hospital. During the time the osteopaths controlled the hospital the number of patients dwindled to 53.

A big effort is being made to get out the vote this fall but whether it succeeds this year or not remains to be seen. A similar effort was made in 1948 but only 52 percent of the people Utah had the highest rate, 74 percent. We never could figure out this voting apathy unless it is pure laziness. Back in 1924 when the parochial school amendment was on the ballot there were hundreds of election workers and over 800 votes were cast in Putnam. This total has never been approached although there are many more people here now.

The Roman Catholic Diocese of Detroit has just won a suit again st the City of Orchard Lake. The city then sought to bar the diocese from building a church & school in its limits, claiming it was restricted to residential purposes. The case went to the supreme court. The court ruled a church is not a nuisance and a city has no right to bar them from their limits. The opinion said the constitution reads that religion, moral ity and knowledge should forever be encouraged and the presumption that excluding a church is conductive to public health,morals,safety or welfare is a presumption the court does not indulge in.

In the Lapeer farm seizures the state police have refused to intervene until sheriff has exhausted all local enforcement efforts. According he has asked supervisors for 100 extra deputies to aid in dispossessing the farmers who have so far thwarted his moves. Two men have been arrested for mussing up the sheriff and 4 others are sought. Those arrested are out on bail.

WHEN YOU BUY A

WATER HEATER

Lloyd Morrison, near Peck, owns one of the most efficient milk houses in Sanilac County. And of course, his water heater is electric.

Without work or worry, fuel or flame, he has a full tank of piping hot water every day to speed up dairy chores and to keep his equipment in spotless condition. Economy is another big reason for going electric. Edison's special water heating rates are low. And the cost per gallon is even less when (like Mr. Morrison) you have two electric water heaters: one in your milk house and another in your home.

Better see your plumber, appliance dealer or Edison Farm Service Advisor tomorrow.

Good wiring is always important. So always ask your Farm Service Advisor for his recommendations.

If you're a hay grower who wants to make short work of haying . . . cut 25 to 35 acres per day . . . mow in heavy or down and tangled hay . . . and operate any place a tractor will go, you'll do well to choose the John Deere No. 5 Tractor Mower.

The No. 5 is a proved mower, through and through. It's simple, durable, easy-on and off. It has a steel, welded frame, enclosed drive gears which run in oil, safety slip clutch on the power shaft to protect the entire mower from breakage, and many other quality features you'll appreciate.

See it . . . operate it—and you'll agree—the No. 5 is truly a tractor mower—the best money can buy.
