Current Comment

You have to hand it to Mayor Hubbard of Dearborn for novel ideas. His latest was to have city purchase land in Florida and build homes there for aged Dearborn residents, mostly city pensioners. He said they could live cheaper there. The matter was taken to court and Judge Fitzgerald ruled it must first be submitted to a vote of the people as it involved expenditure of municipal funds.

The Arctic owls are beginning to appear in this section. These are the birds from the north with the beautiful white plummage who live in the Arctic circle but appear here at intervals. Old timers say their appearance means a hard winter but scientists scoff at this and class it with the woodchuck and muskrat legends. The owls live on lemings a rodent which inhabits the north. Like many animals this animals life runs in cycles. When there is a shortage of lemings the owls have to go further south for food.

The president's request for congressional approval to send troops to troubled spots in the Middle East has caused much controversy. Some say he already has such authority. That President Wilson sent troops to Mexico, Truman to Korea and other presidents to Cuba, Haiti, China and to Florida and California when the two latter belonged to Spain and Mexico without asking permission of congress. Others are disposed to question the wisdom of it. Senator Flanfield wants to know how many troops? To what countries will they be sent? For how long and what the cost will be? The president now seems to want to do just what he condemned Great Britian and France for doing. Sending troops into foreign countries.

Michigan's 2 great universities received 2 big gifts recently. The University of Michigan was present with the Henry Ford estate at Dearborn, valued at $3 million to be used for an engineering college. The next week Mrs. Alfred Wilson whose first husband, John Dodge made a fortune in the auto business [illegible] Michigan State College her [illegible] Hills estate valued at $4 [illegible] for a college. They will [illegible] but the next question is [illegible] the millions coming from to [illegible] these estates into colleges? [illegible] sole recourse for funds [illegible] and all funds they [illegible] must be raised by taxes so [illegible] people will pay the bill in the [illegible]. We imagine these estates were [illegible] white elephants and the [illegible] was getting bigger every year.

[illegible] hailed by the midwestern [illegible] had very little difficulty [illegible] the attempt to abolish the filibuster by a 55 to 35 vote. According to the present status quo they can keep on killing it indefinitely. That [illegible] refuse to give Alaska and Hawaii statehood. It would reduce their power. The south is anti civil rights and the mid west isolationist. By combining they can kill it by talking it to death as filbuster means unlimited debate. One filbuster lasted 3 month. Last year Senator Wayne Morse talked 22 hours.

The baby crop in Michigan broke all records last year, 203,000 being born. No letup is expected this year. Mothers between 20 and 24 have the most babies 235 per 1000. 30 year old mothers have 120 per thousand. Average marriage age for a woman is 20 and a man 23. In 1930 only 88 babes were born to each 1000 women.

There seems to be some confusion over the new driver law passed bby the legislature which goes into effect Feb. 1 1957. It provides that all persons under 18 who apply for a drivers license must pass an approved course in driver education. This means those out of school as well as in school. The cost to each pupil is a dollar for an operator's license and 35c for a chaffeur's license. In addition the school receives $25 from the state for each pupil. Jerry Ledwidge has been taking a special course at at Lansing and will teach this course at Pinckey high school.

For the heart of your home, buy a MYERS WATER SYSTEM

When you remodel, build or buy beyond the city water mains, plan for future water needs. Think of all the "extras" you may want to add later on. Dishwashers, automatic laundry equipment, new fixtures will make a small pump work too hard, reduce water pressure, cause costly breakdowns.

When you are making plans, we will be glad to recommend a thrifty Myers water system with adequate capacity for expansion. It may save you expensive changes later.

Write or phone today. No obligation.
