### SMERIDAN AND WALSH.

In an interview with a New York reporter, concerning the indictments filed in Dublin, Walsh said: "I am, of course, not guilty of any connection with the Poenix Park tragedy. The investigation at Paris proved that conclusively. I thought when I came to this country I would be secure. I would not care at all I they would only bring informers over to this country and try me here with an American judge and a jury. But the mere fact of my being tried in Dublin will convict me, as they have the happy inculty of convicting anybody there they want to. I can procure the most convincing evidence that I was in a small village in England at the time of the Dublin trag-edies." To the same reporter P. J. ### WOULD NOT STAND TRIAL.

A great sensation was caused in court in Dublin, when Patrick Delaney and Thomas Caffrey waived trial and pleaded guilty of the murder of Lord Frederick Cavendish in Phænix park. In pleading guilty Delaney, who is the same man convicted of several attempts to shoot Judge Lawson, said: "I was in the park, but didn't commit the murder. I was brought into it foolishly, not knowing what it was. I was forced from work to go to the park. We had to obey the orders of the society or take the consequences. When we got to the park I could not get away. I say the murders committed, but took no part in them. The mur-ders were committed by Joe Brady and Timothy Kelly. No one else. I saved Lawson's life the part of the shoe makers, and there is not likely to be. ## The Power of Conscience.

Anything, even the assassination of Gambetta monument fund has been the moral sense, rather than its rebukes, These are intolerable. They embitter life, they undermine health. They lead to madness. ### CHAPTER IV.

A week has gone by, and it is Saturday evening at Llandudno-fine and warm and bright. The day has been hot and close, and when evening comes with its cool breeze and welcome shade, the people turn out of the hotels and lodging-houses unto the parade, like bees out of a hive.

The parade is thronged from one end to another. Every chair is occupied round the band, and the people are standing wound in one great crowd,

listening to the music. Miss Somerville is sitting down by the band, and, as usual, a little coterie though she talks merrily and gayly, her eyes ever and anon quickly scan the masses of passers by, as if looking out for some one.

Bye and bye, a tall, dark, handsome, broad-shouldered man comes carelessly up. Miss Somervilla greets him with a gracious smile of welcome; Mr. Lorrimer gives up his seat to him at once; Charlie Vernon strolls off; the others depart, one by one; and, as usual, Maor Herbert is left a clear field. Somehow, it has come to be quite understood that when he makes his appearance no one else is wanted.

"Have you been sitting down some time?" he asks. "Would you like to

In the inquiry—Which is the best Liniment for Man and Beast?—this is the answer, attested by two generations: the MEXICAN MUSTANG LINI-MENT. The reason is simple. It penetrates every sore, wound, or lameness, to the very bone, and drives out all Inflammatory and morbid matter. It "goes to the root" of the trouble, and never fails to cure in double quick time.

## Horr's Harangue.

Congressman Horr was in Lansing a few days ago, and while at the capitol was invited to address the Senate after the adjournment.

He said that his experience was that the best

legislation was the least legislation. More good was done by Congress than it would ever be credited with for not passing bills. It was better to have any law even a bad law well enforced than to be forever tinkering with existing laws or making new ones. He illus-trated the point by the tariff law upon which so

could be obtained to fill them as it is. The offices ought to pay enough to commend the best talent. Then he complimented the Senaters on their dignity and falthfulness, and Historic tendency to consider measures on their rits without much talk but with careful de

illieration. The Senate was intended to be a log wheel on the reckless helter-skelter. glad to know that the Senate of Michigan was fulfilling its mission in that respect. He hope their session would be pleasant and

### Jefferson Davis at Home.

Chicago Times.

Mr. Davis' estate dovers an area of about five hundred acres, a considerable portion of which is devoted to grape culture—the scuppernong and the table grapes of France and to the cultive tion of orange trees. Arrived at the residence, your correspondent was ush ered-into the parlor, a handsome apartment, the walls of which are tinted and elaborately frescoed. It is such a par-For as one would expect to see the cultured and dignified chieftain of the lost cause eccupy. Fine old oil paintings hang from the walls, and shine out in all their warmth of coloring from massive gilt frames resting on easels. Pictures and portfolios, bric-a-brac, articles of virtu, vases of choice cut flowers, and all the costly knick-knacks that tell of refinement and culture are placed about the room on tables, brackets and ations are conspicuosly displayed, and books, old and new, seen in convenient places. And to complete the picture, a large Newfoundland dog, with long black curly hair, was sprawled out on a rug fast asleep. There was about the room a subdued and reposeful tone, which was only broken when Mr. Davis entered it, clad in black, and with a thred took in his face, and greeted your correspondent. But he politely though firmly announced that he would not

hospitality," said he. "I shall be only too happy to extend to you; but we must let politics alone. I am not a pubin 1882; lie man, nor am I public property. I am not a seeker for office, nor is any office seeking me, I am plain Mr. Jefferson Davis a private citizen, who in the evening of his life desirés to live in quiet and in peace with his neighbors, without molestation or outside interference.'

His voice trimbled as he spoke, and his tone was quite pathetic. He looked very weary, and his pale, intellectual face seemed almost bloodless, sura snowy white beard. In a moment, however, a smile passed over his features, he grasped your correspondent's ward, said, with great warmth: "But that is not here nor there. Come to my study. I feel more like myself there. It is my den, and I extract a tion 5263 C. L. relative to service of summons: pood deal of comfort, consolation and pleasure from my books. The collection is not so large as it once was, but, like sibyline leaves, they have grown in value since they have been re-

duced in bulk." We entered the wide hall which runs through the middle of the house, and which is furpished with easy chairs and sofas that invite restfulness, and passed down a flight of steps into a gravelled walk leading to an octagon-shaped, verandaed building with a conical roof, standing about one hundred feet to the left and in advance of the manor house. This is, Mr. Davis' sanetum. It is what a literary workshop should be—cosey, well lighted; well ventilated and with an open fireplace. Three sides of the octagon interior are a state road in Crawford and Misaukee coun lined with books, an oaken table is in the center of the room, and three or four wooden chairs occupy as many corners. Between this table and the book-shelves is a lounge bed, which Mr. Davis sleeps upon occasionally. There is nothing luxurious about the appointments to woo him from his work; on the contrary, the furnishings present all the rude reality that actual work always imparts. In this building Mr. Davis, thought out and wrote his history, "The Rise and Fall of the Confederacy." which is considered by many critics, North as well as South, the best which

The Elephant in the Guarded Tent.

It was the hour of night when churchyards yawn and everybody except newspaper men is asleep that a Tribune reporter approached the big tents in Brooklyn in which Barnum's big show lay sleeping; The cheerful calm of the cemetery had fallon over the city, and except in the vicinity of the tents no sound was heard save the last sob of an East River wave as it died among the piers. The moon was full -unusually full. Not even the thunder of the policeman's foot broke the calm. Having some curiosity to see and hear the animals in a menagerie at midnight, the reporter aroused the watchman and entered the tent. The watchman betrayed some surprise at the early hour of the call, and assured the reporter that the entertainment would not begin for some time yet. . Having finally warmed the cockles of the watchman's heart the reporter started with him on a tour of inspection. All of the lights had been put out, and only the flicker of a lantern prevented the watchman and the reporter from stumbling over the elephant's

the way past the oudad.
"Cheese it," broke out the watchman again. "Do you hear that?" An elephant had evidently kicked his companion out of bed. "Are the elephants apt to be very

restless at night?' rt)h, verv. - And when an elephant is restless, there's a good deal that's restless. They sleep on ene side till that's tired and then they flop over on the other. That was a flop over we just heard."

"What's this?" asked the reporter, pointing to something in the path.

"That," replied the watchman, following up the obstacle with his lantern, eseems to be part of a camel. But where's the rest of him? Oh, here it is. They stretch out well, don't they? Those are magnificent humps—made express-ly for this circus, too. They are harm-

.What the maker receives for them I leave you to imagine, for the German wholesale dealer must obtain his profit, then comes the cost of sending them to this country, and the custom-house Juty, and a profit for the American dealer who disposes of them at eight cents per thousand. As there are twenty to twenty-five lines or varieties of German marbles, it is not to be wondered at that they hold their own against even the labor and time saving machinery of America.

After all the small gray marbles come the largest-sized marbles, or bowlers, now called "bosses" by the New York boys. These are one and a quarter inches in diameter, and cost from \$6 to \$7 per thousand. The next grade of marfiles includes the "china alleys," "burnt agates," "glass agates" and "jaspers," though with the trade these are all called marbles. China alleys are painted in fine, circles of various colors, or in small broad rings, in which ease they are known as "bull's-eyes." some of these are pressed in wooden moulds, after which they are painted and baked. These cost from 50 cents to \$7.50 per thousand, according to the size. The better and more highly finished alleys are made of china, carefully moulded, painted, and fire-glazed. These cost from \$2.75 to \$15 per thousand, the largest being an inch and a half in diameter.

Next come the jaspers, or, as the boys call them, "Croton alleys," consisting go and of-glazed and unglazed white china dyke. handsomely marbled with blue. The "burnt agates" are also china, and highly glazed; in color they are a mixture of dark and light brown with splashes of white; when green is introduced—with the above colors they are known as moss agates; by the dealers they are known as "im-itation agates." The prices of these range from \$2 75 to \$7 50 per thousand. Then comes a very large and beautiful class or variety of alleys known as "glass marbles." These range in size from two inches in diameter down to the small "peawees," and are of every conceivable combination of colored glass. Some contain figures of animals and birds, and are known as "glass igure marbles." These are pressed in polished metal moulds the parts of which fit so closely together that not the slightest trace of them is to be seen on the alleys, for if one looks over a number of them sharply he will detect learned on the subject that is interesting a small ridge encircling some of them. and new.

"Well, well," cooed Mrs. Spoopendyke, "don't excite yourself. Keep quiet and you'll get well."

"Much you'd care," muttered Mr. Spoopendyke, turning, on his side and resting his cheek on his hand, an attitude generally assumed by martyred spirits on the approach of dissolution. "Will you take your drops again, dear!" asked Mrs. Spoopendyke. "It's time for them."

### ARTEMUS WARD.

Critical and Not Over-Complimentary Acof the Positier Humorist.

I met Artemus, Ward, introduced to him, I believe, by Arnold, and I got to know Ward protty well. One night I went to Yonkers to thear him lecture, and several times took dinner with him at the Jones House, near where Stewat's up-town store now stands. He was surious mixture of the improvident Robemian and showman and the shrewd Tankee. For several years he muit shows as good a living as one of the better class of star actors; but it was nnoertain, and his health was also unstable, and he finally died with little more than enough to bury him. I saw nothing in his life to be an example to any one. He was never serious an hour at a time, generally preferred the company of some loafer or time-killer to that of any earnest man, and even as humorist was a little of a fraud.

While his pieces read most laughthe way he made them was sheer the work. They were not the nations of an occentric nature full Limources, but were laboriously devised, and I have often had him recite to me some partial paper he was going to print, and ask what I thought of this or that joke. He told me that writing ferced humor to order was killing business. Therefore, he went in the company of natural men, like Eph Horn and Frank Bower, the minstrels, who had wild peculiarities and no reverence for each other and were always drop ping some bit of slang or coarse incongruity, which Ward picked up, turned over and polished and put into a corner somewhere. Among this class of men Charley Brown was a great Javorite.

I remember one night Neil and Dan Bryant gave Ward a diamond ring at the De Soto, which was big enough for the top of a cane, and probably cost a thousand dollars or more, but to wear # outside of a certain circle would have been to incur a hard reputation.

Brown's audacity was very uncomfortable to modest men. I was walking he stopped a gentleman and addressed ganizations the visible use of the toothwith him on Broadway one day, when him with an interest almost affectionate, Pick is a source of disgust. A man who and I supposed for several minutes that uses a toothpick in public shows either he knew the man well, until I found that stranger growing a little distant and then looking half indignant, yet amused, and in the midst of his confusion Ward down indelicate and gross. The same started off with me. I said: "Who was rule applies with double force" to a he?" "Why, I had never seen him before;" said Ward.

He had been playing some practical joke on the man. One of his familiar sayings used to be: "George, sit down here on this step two hours and let me tell you what kind of a fellow I am. If he could not amuse himself with clean wit he would go very far into indecency to find something effective.

For a man of his bringing up he had superior address. He generally clothed himself in fine black cloth, having his clothes made by the bost tailors. His hair was carefully attended to, and his linen and jewelry thoroughly groomed. His manner on meeting gentlemen was full and fine, and there was a light in his eye always attractive; and he could laugh almost at will so enjoyingly that others wanted to laugh too. He was very well informed about current celebrities, and advised me to lectare on the crime of Booth, having been interested in my description of it. I never desired, however, to make money at the expense of my dignity, and when I came to lecture in after years had evcrything to sell but myself.

One night when Ward lectured at a hall on Broadway, and I had met him at the close of the lecture by appoint ment, he said: "Here is Josh Billings, who has come to hear me." Billings was an auctioneer up about Poughkeepsie, with a desire to make some money in Ward's field and had come down to New York to see Ward, already possessing considerable of that kind of reputa-Hon. Ward seemed really to enjoy paceting him, and made an appointment for the following day, which Billings aflerward told me he never kept-probably through his volatility and forgetfulpess. There was no dependence to be placed upon Brown in anything serious. -George Alfred Townsend

## Not Large Enough.

In response to an inquiry for courtester a Detroit druggist handed out a piece about six inches square and asked the boy if he thought that would do.

"I dunno," was the doubtful reply.
"Who is it for?"

"For father."

"Didn't he say how large a piece?" "No; but I know that isn't half enough. Ma his him with the whole ide of the wasa-board at once, and that pon't begin to cover the clip."

## Some Sanguinary Encounters.

At Cyrene the Romans and Greeks were slain to the number of 220,000 In the reign of Trajan 240,000 overrand Germany, in the territories of Usiper 400,900 men were slain in one battle. ### Froebel, Founder of Kindergartens.

Friedrich Wilhelm August Froobel born, Oberweissbach, April 21, 1782 died Marienthal, June 21, 1852. Youtl neglected, educated at village school o Stadt-Ilm by an uncle, but being ap parently stupid was not allowed in uni versity education; instead was appren ticed to a forester in the Thuringian for est for two years. Studied nature, and there worked out the history of the one great unity in nature. Longed to study the sciences, and had leave to visit his brother at Jena university. Here he spent a year, when his studies were cut short by the lack of money and imprisonment for debt, of nine weeks, for 30 shillings. For several years he led a shifting life, but while studying architecture at Frankfort-on-the-Main, met a disciple of Pestalozzi, who convinced him that he was born to be an educator. From that time his thoughts were occupied with plans for educating children,

In 1807 9 he studied at Pestalozzi's school, near Neuchatel, and then detprmined to continue his university education. In 1811 he again entered college at Gottingen and later at Berlin, but the call for soldiers to defend the Prussian Empire came, and he obeyed, fighting till peace in 1814, when he was appointed Curator of Museum of Miner alogy at Berlin. With Langethal and Middendorf be began in 1818 to put in practice his theory of education. Keil han became their headquarters, and for thirty-six years Froebel labored unceas ingly to establish his model schools not only in Germany, but also in Switzer land. Though he himself was always poor, his theories spread, and from their have spring many of the school reforms of our time. In 1848 Froebel was no cused of entertaining socialistic and ir religious ideas, and forbidden to estab lish any more schools. He died at Marienthal.—Inter-Occan.

### The Toothpick in Public.

Every civilized man, woman and child has the right to use a tooth pick; but have they the right to use toothpicks to the discomfort of others? And to fine orwhich he gives to others, or he defies good manners and prefers to be set woman, for women are the natural and conventional guardians of good manners. When sensible mon are in doubt on a matter of politeness or fine propriety, they consult a lady. What, then, can be said of a lady who carries r toothpick in her month? She might as well rinse her mouth or brush her teeth in public.

The truth is, that the associations of a toothpick are necessarily indelicate, for the toothpick reminds one of bad teeth or food particles held in the wrong place. The toothpick is, therefore, a toiles article, and ranks with the toothbrush, the nail-cleaner or the earspoon. These articles have to be used, but not in public. Every hand is marred by unclean finger-nails, but the nails ought not to be cleaned in public. Nor should teeth be brushed or picked inpublic. In hotel lobbies there are always men-not really gentlemen; and, same persons eat with their knives and cut their finger-nails at the dinner-table. But in this matter their example is not commendable.—Boston Advertiser.

The Baker's Dozen. "A baker's dozen" is thirteen, and owes its place among numbers to a custom that sprang from an old English law, which attached a heavy penalty to the offense of selling bread under weight. Prudent and conscientious men added another loaf to the twelve to avoid injustice or punishment. But the custom did not outlast the law, nor was introduced into other arithmetical calculations until recently in Delaware, where the Sheriff added an extra lash to the number named in the sentence. The case is not parallel to that of the English bakers, and their custom cannot, even in Delaware, be cited as a precedent. When this outrage was called to the attention of the presiding judge that officer smiled, as judges ulways do before being de ivered of a witticism, and suggested that the extra lash should be deducted from any future sentence. For this arrangement there is no provision by statute. Besides, it suggests not only that whipping is not reformatory, but that in order to avail himself of the judicial method of satisfaction the prisoners must start a fresh account on the wrong side of the ledger. How can he get credit for the thirteenth lash unless he does something to deserve another dozen?

## A Cruel, Cruel World.

John Stuart Mill wrote a book, chargfell; and in the reign of Adrain 580,000 ing nature with all manner of cruelties. Jews were slaid. After Julius Cæsar Sentient life in every department was susceptible of exquisite suffering, the great bulk of human beings were murdered, that is, they were poisoned by malaria or fever, or some defective organ killed the whole organism; so that not five per cent, of the human race die what is called a natural death. Then there are earthquakes, storms at sea, cyclones, and other natural disasters which kill and maim their thousands every year. Nature is red in tooth and claw. Then, in the human world, see what tragedies take place; the wars and pestilences and then the crimes which are committed. - Denorest's Monthly.
