If above refers to Pinckney it is very nearly true, and we would like to see something better than "talk" simply toward providing a new building which will not be a disgrace to the village. The annual school meeting would be an excellent time to take some action in this matter. Shall it be done?

M. B. Pearson, a somewhat dissinated, vagabond young fellow who has been stopping about town for some fime past, in a half drunken condition, broke into Mr. E. A. Allen's residince, Tuesday night; between 12 and 1 o'clock. He was discovered, arrested and put into the village "cornerib," but the marshal not taking the precaution to lock him into a cell, he in some way loosened a large iron bar which had been fastoned across the door, and with this tore things up pretty generally, making his escape before daylight; and losing no time in getting out of the village, by way of Dexter, at which place he took an early eastward bound train. Young Pearson's career has been rather a checkered one, and this is not the first "indiscretion" he has indulged in. If he will only keep at a safe distance from the village, he will probably avoid arrest, for burglary and the community-will be quite as well off without him.

TOPICS OF THE TIMES.

One of the advantages on the side of the missionaries in Alaska, says the Rev. S. Hall Young, who has recently returned for a short; rest from Fort Wrangell, lies in the fact that the women are in all respects the equals of the men. The principal obstacles to be overcome are superstition and drunksnness. There are at present twenty missionaries in that field and their labor is meeting with a satisfactory reward.

WHAT has become of the law which was to crush out polygamy and make the Mormon mourn? Never in the history of their church have the Latter Day Saints prospered as they do now. Their missionaries are not only more active in this country than ever before, but they are making converts abroad by the thousand. Nearly seven hundred Mormon recruits landed in New York in one Sunday, and they are all represented to be thrifty and well-todo emigrants. It really looks as if the government is not in earnest in its effort to eradicate the twin relic.

THE three-year-old son of an industrious San Francisco mechanic has developed an alarming passion and capacity for climbing in places which would make a wild goat dizzy. After performing in safety several perilous feats of this character, the youngster presently discovered his hopeful perched upon an unfinished building's projecting cornice, his legs dangling over the edge, and his face wearing an expression of complacent enjoyment. To reach his seat he had climbed a tall ladder, walked across an eight-inch plank in a stiff breeze, and scrambled around the high front of the cornice.

Customs officers along the Canadianfrontier naturally become expert in detecing smugglers and have many amusing stories to tell of the devices employed to cheat the Government. UNBELIEF.

There is no unbelief; Whoever plants a seed beneath the soil And waits to see it push away the clod-He trusts in God.

Whoever says, when clouds are in the sky, 'Be patient, heart; light breaketh by and by, Trusts the Most High.

Whoever sees, 'neath winter's field of snow, The ellent harvest of the future grow-God's power must know.

Whoever lies down on his gauch to sleep, Content to lock each sense in slumber deep.
Knows God will keep.

Whoever says, "To-morrow," The Unknown," "The Future," trusts that Power alone He dares disown.

The heart that looks on when the evelids close, And dares to live when life has only woes, God's comfort knows.

There is no unbelief; And day by day, and night, unconsciously, The heart lives by that faith the lips deny God knoweth why!

The Thoughtful Contributor.

From the Cincinnati Saturday Night. "I want to write for your paper,"

said a solemn looking man, as he paused on the threshold of the editorial sanctum.

"That's right," replied the editor, without looking up from his work, for it was publication day and there was a stern demand for copy that could not be denied. "When you write for it be particular and give your name and postoffice address distinctly."

"I will," said the thoughtful man," stepping in and taking a chair.

"And don't forget to enclose the rmoney. Some folks write for the paper and forget to put in any money. Then they complain that their paper doesn't come."

"Do you want money when a man writes for your paper?" asked the solemn man, as his face acquired an additional elongation.

"Of course. What d'ye think we print a paper for? Fun? Not much. If a man writes for the paper we suppose he wants it, and if he wants city. it he must pay for it."

"You don't understand," said the solemn man; "what I want is to write for your paper.

"That's what you said before, and I told you how to do it," replied the Effectic College of City New York, and formerly of Cincinnati, Ohio, used Dr. WM. HALL'S BALeditor testily, swinging around in his chair. "Though I can't see why of his patients, now living, and restored to health by the use of this invaluable medicine, can amply testify. "You will like my letters."

"Can't say as to that. That outweighs a dozez pages of Reflections on the Dying Year,' or 'Thoughts on Discovering the First June Bug. A great many people want to write for the paper who have nothing half so interesting to say as that they find their subscription has about expired and here is the money for renewing it. That is neat and to the point, and no editor will throw the letter into the waste basket-without first taking out the money and duly crediting the embscriber on his account. Write for the paper, my friend, by all means, but don't forget the enclosure."

ABOUT HATS.

The Hat in Literature and Sentiment. "It's strange how hats expand their brims as riper years invade,

As if, when life had reached its noon, it

"Shoot the hat!" cries the youthful street Arab whenever a particu-larly fashionable and elegant tile passes by: His remark is an abridgement of history, and had its origin, no doubt, with the renowned William Tell. Nothing would give the street gamin more pleasure than the destruction of this badge of aristocracy, which to his democratic fancy is very offensive, for he is a reader of character, and at once decides in his own mind that a fine glossy stove-pipe hat must of necessity belong either to a dandy-a creature he despises—or a newly-married man, his legitimate prey. He knows that a man who amounts to anything usually wears shocking bad hat, with dents and disfigurements enough to give it character, and he has great respect for that kind of hat, and can easily distinguish it from the battered and disreputable sort that has been out over night with a "brick" in it. And the boy is right. A new hat has nothing to commend it. There is no individuality in it; it is simply a piece of merchandise; it has no •idiosyncrasies; no magnetism. Let a party of gentlemen go out of a public hall or dining room and ask for their hats; Smith gets Brown's hat. They are both 74 size; both look the same outwardly; Brown puts his on; his head at once becomes as uneasy as the one that wore a crown; he slants it down over his bump of benevolence; he tips it over on combativeness, then he tears it off and says: "This isn't my hat," just as Smith offers his solo: "This isn't my hat." They exchange, and the two hats that are as much alike as two peas fit their respective-heads as if they had been molded into them.

The hat is so much a part of a man that it becomes responsive to his actions ling touch to his barefoot boy: and opinions, and a silent but active expression of his thoughts. "Hats off," cries an authority, and off they go. You will know a gentleman by the manner

Sir Walter Scott's piper, John Bruce, spent a whole Sunday selecting twelve stones from twelve south running streams, with the purpose that his sick master might sleep upon them and become whole. Scott was not the man to hurt the honest fellow's feelings by ridiculing the notion of such a remedy proving of avail; so he caused Bruce to be told that the recipe was infallible; but that it was absolutely necessary to success that the stones should be wrapped in the petticoat of a widow who had never wished to marry again; upon learning which the Highlander re-nounced all hope of completing the

Lady Duff Gordon once gave an old Egyptian woman a powder in a fragment of the Saturday Review. She came again to assure her benefactress the charm was a wonderfully powerful one; for, although she had not been able to wash off all the fine writing from the paper, even that little had done her a great deal of good. She would have made an excellent subject for a Llama doctor, who, if he does' not happen to have any medicine handy, writes the name of the remedy he would administer on a scrap of paper, moistens it with his mouth, rolls it up in the form of a pill, which the patient tosses down his throat. In default of paper, the name of the drug is chalked on a board, and washed off again with water, which serves as a healing draught. These easy-going practitioners might probably cite plenty of in-

AN ECONOMICAL STREAK.

President Arthur has deferrred his trip to the Yellowstone Park until he is a private citi zen, and can with propriety get so far out of the reach of telegraphic communication. When he planned his trip to the hand of the gevers he thought a telegraph line could be put up in about a week and at expense of about \$500 which sum he would have paid out of his own pocket. When he found that it would cost at least \$5,000, he very prudently abandoned the "ROCK AND RYE."

According to the instructions issued by Com missioner Evans, the collector of internal revenue at Chicago will hereafter demand payment of special taxes from the manufactures of the proprietary medicine "Rock and Ryc." A SENSIBLE OBDER.

The following General Order has been issued from the Postoffice Department: "Complaint has been made to this department that second class mult matter (newspapers and periodicals sent to regular subscribers) is not in all cases promptly forwarded to the address's. Such matter is of at least equal importance with the letter mair, and it should be treated with equal care by postal clerks. If it is necessary to withdraw second class matter from its wrapper in order to ascertain its destination it may be done, but this will not be allowed for any other purpose. Second class mixes will be treated as prescribed by the regulations and orders. If postal clerks find any second classmatter improperly directed, that is to say, addressed to the wrong postoffice, they should report the fact on the trip reports so that the superintendent may notify the publisher, but should not change the address or course of the package. The Postmaster-General desires that the practice of reading newspapers and periodicals passing through the mails be discontinued wherever it exists."

ELECTRIC LIGHT WAR.

The City Electrician of Chicago has declared war against certain of the electric light companies in that city by cutting all wires not placed underground. The competition has become so sharp between the companies that it is claimed that they do not use properly insulated wires, and string them at random on house tops which would result in instantaneous death. A number of wires have already been cut. This action has reference to are lights only, no danger being apprehended from wires used for the transmission of currents for incandescent lighting.

IMPORTANT EVIDENCE GONE.

A great sensation has been caused in Nashville, Tenn., by the discovery that some one had stolen from the State Treasurer's office the brak ledger containing the state's accounts with depositaries from May, 1877, to January, 1883. The book was kept for M. T. Polk, now on trial in Nashville, by Capt. J. C. Fleming, and contains the entries relied on the state legislative investigating committee. The book ied on by the prosecution to convict Polk, and its disappearance is greatly commented on. A reward of \$250 is offered for the return of the book or the detection of the person who stole it.

FOREIGN AFFAIRS. VICTORIA'S EXTRAVAGANCE.

Attention is being directed in England to the enormous amount of money spent upon the four royal yachts. These vessels, which are practically idle with the exception of an occasional run to the Isle of Wight-as the Queen very seldom goes to sea-cost in the aggregate £275,528. But the original cost is a small item compared to the charges for maintenance and repairs, which during the last ten years amounted to £570,000. Some of the English journals are calling attention to the extravarance of this outlay, which, as the Glasgow Mail puts it, "is more than ample to solve any difficulty the Royal Commission may find in the way of a patriotic and merciful settlement of the Crofter question, and would rescue an industrious and virtuous population of 30,000 persons permanently from a life of acknowledged privation and misery."

THE NEW HEBRIDES QUESTION.

The Temps says: France, and England made a covenant in 1878 not to annex the New Hebrides. Since then a company of colonists of New Caledonia has bought several of those islands and obtained concessions in others. In order to counteract the covetous designs of Australia, it becomes necessary to supplement the vague covenant by according to that company rights similar to those granted by Great Britain to the British North Borneo Company.

•GRANDMOTHER'S STORY.

MARY SCOTT BOYD, in the Illustrated World No place in the world was better loved than the old homestead of Morton Park. It was far down toward the Connecticut line of Massachusetts, and from the windows of the spacious endroom-the ball-room of the old Colonial days—we could look out upon the day. beautiful banks of the Connecticut, as it flowed swiftly into the state which gave it its name.

That same stream ran by one edge of the Morton estate, scarcely a hundred vards from the house; and many were enjoyed on its blue, rippling surface. Morton Park had been the great place

> "He had returned to America, and upon his father's death had come into possession of this beautiful old place. He was a wealthy and a bright man, respected by all who knew him. Very much of his time was spent in New York practicing his profession as a lawyer. There he frequently met Jacob Vansciver, but a cold bow was the only sign of recognition between them.

"But at last a simple incident occurred which altered the whole course of their lives. It was on one frosty, brightwinter's morning that a stout comfortable-looking colored woman was walking down the street. The pavements were very icy, and the people who hurried and jostled by her found it hard work to keep their footing.

"But she walked leisurely on, carry of them all, no one was more lovely ing a little, golden haired child in her arms— a beautiful baby nearly two years of age, who, looking over nurse's shoulder, laughed and nodded to a gentleman just behind them.

It was very easy to fall into the footing of a familiar and leved guest in the home where Jacob so happily lived, and whither Richard was at once taken.

Over their wine that night I presided, sitting like a queen on her throne. Then it was that Richard Morton said: 'I wish I was lord of a home like this, and father of such a winsome girl. And my father said: 'Well marry my little daughter, and I promise you the happy home. She shall learn of her mother to be a true and loving wife. The day she is fifteen I will give her to you; you will be scarce forty.

" I accept your trust, and I-pray God that I may be worthy of her pure, young love, 'answered Richard Morton, stooping to kiss my dimpled cheek, adding, Why, I loved this little girlie the first minute I looked upon her.'

Grandmother's smile was very tender, and her eyes were bright with tears as she repeated the words of her faith-

A More Favorable Report.

The July report of the department of agriculture indicates a very general improvement in the condition of cotton Rains were general up to the 15th or 20thof June, and local showers have been frequentasince. There has been an excess of moisture, interfering with cultivation and promoting growth of grass. Clear fields are found only in favored districts and on the lands of prompt and pushing cultivators Since June 20 The growth has been rapid. In grassy districts plants are still small, but healthy, and are making great progress with recent cultivation. The only complaint of drought comes from central and southwestern Texas, from the Colorado to Guadaloupe. A few counties in South Carolina and Georgia report present need of rain.

The recent distribution of moisture has been quite unequal. Adams county, Mississippi, has had showers daily for five weeks, and Pike county for six to eight weeks. The general average advanced from 86 to 90. Last June there was an improvement of 3 points, from 89 to 92. The returns of July slace 1870 have indicated a higher condition than in June, rexcept in 1871, 1873 and 1879. Spring weather was too variable in temperature and moisture, as it usually has been in former years, for the highest condition of the plant. The only retrogade is reported for Arkansas, where the loss at three points is made from excessive rain, dool nights and injuries from chinch-bugs, red ants and rust. There is a promise of improvement during July. An English Sale of Shares.

A few days ago a remarkable sale was held of shares in the New River Water Company—the oldest undertaking of 1. assisted the founder, Sir Hugh Middleton, with funds to complete his the company in consideration of an annual payment of £500 forever. The present income of the shares so commuted was last year £92,000. In twenty years the dividend per share has risen from £876 to £2,541, and the company's income from £210,000 to £473,000. At the sale the property was divided into eighty-three lots, the 'King's shares' Deing sold in fractions of one-hundredths, one-hundred and sixtieths, and one-hundred and ninety-seconds. They realized at the rate of about £91,000 for an entire over three days, amounted to upward of £60,000.—London Cor. Philadelphia
