> ed dangerous. In the band contest held in Marshall during he firemen's tournament, the Battle Creek band took first prizé.

> Mrs. Almira flyle, au Eaton county pioneer died at her home in Eaton Rapids on the 17th Bay county crops are exceeding expectancy. Wheat will yield splendidly and oats are above the average. Potatoes are not so good, as they suffered on account of the rain.

> way for a division of Bay county and the formation of the new county of Arxnac. The debts, liabilities and assets of the two counties are being determined and an equitable arrangement will be agreed upon.

A big suit is in progress in Rescommon growing out of the damming of the Muskegon river which caused the averflow of lands. J. A. B. Stone is complainant and C. B. Flelds defendant.

The union trust company of Grand Rapids, so often denounced as a fraud, is now believed been locked up in jail, and the safe, desks, etc.,

### Michigan Prohibitionists

The prohibition State convention met in Eaton Rapids on the 15th inst. After the usua work of organization had been performed, the state central committe was chosen as follows Chairman, Merritt Moore, of Ionia; secretary, Wm. A. Taylor, of Lansing: A. D. Power, J. T. Baer, Porter Beals, O. R. L. Crozier, D. P. Sagendorph, S. A. Strong, H. H. Bowers, Jas. A. McKay, S. A. Jewell, A. B. Cheney, Alfred Wise, D. H. Stone, Robert King, R. B. Moore, J. P. Adems, B. N. Stone, Robert King, R. B. Moore, J. P. Adems, B. N. Stone, Robert King, R. B. Moore, J. P. Adems, B. N. Stone, Robert King, R. B. Moore, J. P. Adems, B. N. Stone, R. B. Moore, J. R. Moore, J. R. Moore, R. B. Mo J. B. Adams, P. N. Saunders, J. F. A. Raide, Rev. E. P. Clark, Prof. A. M. Webster, Rev. John Hamilton, J. C. Tunston.

The convention voted to raise \$100,000 for a two pins from which she had suffered nothing | campaign fund by selling stock at \$10 cach, payable in four equal annual justailments; indorsed the platform of the national convention she coughed up one of the pins. It was rusty at Chicago; declared in favor of constitutionaland statutory prohibition of the manufacture of liquor as a beverage; arraigned the republican party for bad faith in not submitting the question to the people, and declared that the party is incompetent to deal with the liquor luestion...

### Shocking Accident in Watertown.

A frightful accident happened James Hoard Sr., while driving from Mayville with his son James. On the road home Plin Brown was a short way ahead of them, driving a colt in a buggy; the Hoards had a lumber wagon. Jas. Hoard Jr. was driving and informed his father that he was going to give Plin a tight run, or words to that effect. The father remonstrated, but at any rate the son started up the horses, which were going at a very lively gait.. In the neigh borhood of Thomas Briggs' farm, near Hurd's Corners, there is a log culvert in the road somewhat lower than the road grade. In passing over this culvert the wheels struck it with such torce as to raise the wagon clear off the ground. James junior grabbed his father's coat and the Heistermann's Island, in Wild Fowl Bay, and piece was left in his grasp, for the old gentleman was thrown from his seat. In falling he struck his breast on the rapidly revolving Yowl Bay, six miles from Sebawaing and four wheel which dashed him to the ground with miles from Bay. Port. It contains about 300 the velocity of a ball shot from a cannon. His acres of good land, is from three to fifteen feet above the level of the bay and is mostly covered with natural growth of oak, maple and beech trees. The island was purchased by Messrs, Lawrence and Webber for the purpose indicated, and an agreement has been circulated and already signed by about sixty of the best citizens of Saginaw, to carry the project into effect.

Farmers about Marshall are now complaining of protracted drought. The oat crop in that section is nearly barrested and years.

875. At the time he was/sentenced to be demissed from the service, but eight members of the court which tried him recommended elemency in his case on account of his excellent military record. Although it was Lieutenaut Col-onel Ilges's second offense, the President, in his order approving the findings and semimore of the court-martial, said that the view of some palliating circumstances he had, been induce 1 for the secong time to extend clemency to this officer." h also remarked that the duplication of a pay account by an officer involved "falsehood, fraud and an act of dishonor," and that "elemency in such a case cannot be expected by any officer after this warning." Under these circumstances probably Lieutenant-

Colon liges does not expect to be leadently dealt with at this time. There is some reason to believe, however, that he will not rest easy vice, if the case of Colonel Morrow, late of General Sherman's staff, shall be persistently ignored by the War Department. It appears that some of Colonel Merrow's creditors in Washington are indignant at the position of ale. fairs in relation to that officer. It is said while certain of his creditors are to participate in the benefits accruing to the "Syndicate" which took up his dishonored accounts and formed a trusteeship with the consent of the War Department, other creditors whose claims are equally good-some of them even stronger-have been ignored entirely. There is some reason to believe that this is true. Meanwhile Lieutenant Robertson, an ambitious young toffleer who loves his profession, is to be tried by court-martial for a duplication of his pay accounts which, as explained, happened in a way which reflects

very little discredit upon him. HOW THE GUILTY ESCAPE.

Alpha B. Beal, who was arrested a short time ago on a charge of taking an excessive fee from a widow for obtaining a pension, has been dismissed, the court holding that there had been no violation of the statute. The judge holds that the check having been cashed by the bank, and a portion of the amount placed with the bank on deposit the money was no longer under the protection which is placed by the statute over money received, on account of pensions, and the fact that defendant received part of it on account of service rendered does not constitute a violation of the statute.

A MODEST CLAIM.

S. B. Edmonston et al., of St. Louis have put in a modest claim for about \$3,000,000 for property in the the city of Washington, much of which is now the capitol grounds.

#### ENCOURAGING!

Inspector Haworth, who has general charge of the government schools for the Indians, has just returned from the west, and submits a very encouraging report as to the work being done for that people. The schools now in process of construction will be ready for use in January, and when completed the Indian schools throughout the country will accommodate 10.250 pupile. ENOTHER VICTORY FOR THE NEGRO.

the Washington police court in the civil rights. case of the Rev. George II. Smith, colored, of Norwich, Conn., against James W. Bell, proprietor of a restaurant. The ground of the complaint was that Bell had denied the accommodation of his restaurant to the plaintiff on account of the latter's color, and suit was brought to enforce the criminal provisons of the act of March 1, 1875. The court holds that. under the common law an inn-keeper is bound to take in and receive all travelers and wayfarers, and that by the act of March 1, 1875, it is made a misdemeanor to discriminate against a traveler on account of race and color regard- on the Kentucky Central at Winchester crossess of any previous condition of servitude: A restaurant-keeper has a right to establish certain regulations as to hours for meals and to designate certain places or seats for customers, but such hours and such seats must be the same for all, or if any discrimination be made it must be made upon some principle or for some reason that the law recognizes as inct and reasonable, and not on account of color, race or previous condition of servitude. All guests of an innor restaurant must be given the. usual privileges, and the places designated for them must be accessible to all respectable persons at a uniform rate of charge. From these principles it follows that the defendant in-discriminating against the complainant on account of his race and color was guilty of a misdemeanor and incurred the penalty prescribed by the second section of the civil rights act of 1575. Judgement is entered accordingly. This case is in some respects a novel one since it is the first attempt to enforce a penalty underthe second section of the civil rights act which makes violation of the law a misdemeanor, and it is the first effort made to enforce the criminal provisions of the law in territory where the congress of the United States has exclusive and absolute legislative jurisdiction.

### **NEWS NOTES**

A SENATOR'S WIFE SUICIDES. The wife of United States Senator W. B. Allison, of Iowa, committed suicide by drowning herself in the Mississippi River at Dubuque. She left home in the afternoon shortly after 1 o'clock, informing her servant that she was going to one of her neighbors, instead, however, taking her gos amer under her arm, she went in an opposite direction towards the country, where she has been accustomed to take almost a daily walk. It was ascertained that she wandered around in the outskirts of the city during the afternoon. She was seen by several persons walking rapidly, and apparently very much excited. Not returning by 9 o'clock from the place she was supposed to be an alarm was given and search instituted and maintained throughout the night. The next morning her body was discovered by an out-going train at 7 o'clock in the river about a mile below the city. She had cut her gossamer, placed some stones in it and tied them about her neck, and then walked and deliberately into the river about thirty-five feet from the bank, laid down and was drowned where the water was only two and a half feet deep. Mrs. Allison was of a highly nervous temperament, and during the past two or three years has suffered from and been treated for mental disease. While at a water-cure establishment in Western New York in 1881, under medical treatment, she attempted to commit suicide in much the same manner, but she was rescued. She was a niece and adopted daughter of the late Senator Grimes. of lows, and has been married for ten years.

ATLANTA'S LOSS.

only a nominal insurance. The prompt action of the proprietor enabled all the guests and employes to escape, and so far as learned no were lost / incendiarism is alleged

MILWAUKEE BLAZES. A fire in Milwaukee the other day destroyed

the Passavant Hospital and a building adjoin-ing, in which were confined 23 patients. Many of the inmates were severely burned. Dr. Boyd. proprietor of the hospital and his son, lost their lives while attempting to rescue the patients. Loss about \$40,000, with no insurance. The fire was incendiary.

THE ACRES from t

a small picket of state troops, killing five picket guards. At daylight next morning Marcho marched with twenty men and found the sayages to the number of 150 menistrongly intrenched, and he was compelled to retreat. He place a second recompossance, accompanied by armed villagers, but amminition becoming exhausted made a second retrest. Several indians were killed and Marengo slightly wounded. After the skirmish the eavages had hings all their own way and drove of lower boards. all their own way and drove off large herds. A SERIOUS SMASH UP.

A serious accident occurred on the Iron

Mountain railroad, about 60 miles from St. Louis, Mo., the other day. It appears that a freight train broke down at Cadit and an engine was sent down from DeSoto to bring it up. When about a mile from Cadit the relief engine collided with a gravel train coming north, badly wrecking both engines and several cars. Jerome Pinston, fireman of the relief engine, was killed outright and Broome Williams, its engineer, very seriously scalded about the head, take and body, and will probably die. John Stevenson, engineer of the gravel train, had an arm broken and ribs fractured. Henry Moore, brakeman, arm broken, internally and perhaps fatally injured. Pat Glean, freman of the gravel train, foot crushed. Williams, Stevenson and Moore, were brought to Cadit and taken to the railroad company's hospital. Glenn was taken to his home at Irondale. The accident occurred in a deep cut on a sharp curve, and the train in collision with the freight was not a gravel train, but was laden with pig iron and watermelons, and more than half of it was badly wrecked. Both engines were nearely demolished. The boller of one of them exploded and large pieces of it were thrown over 100 yards. All the engine men were more or less scalded by escaping steam. The damage forced loans. by the accident will amount to several thous-

THE RESULT OF VIGILANCE. It is stated that by reason of the vigorous ac tion of the government in prosecuting the opium smugglers on the Pacific coast the duties collected at San Francisco on opium the last fiscal year were more than \$1,000,000 in excess of the collections from that source the previous year.

STRUCK OIL

and dollars.

For three years or more capitalists have been City, Colorado, but with indifferent result. A few days ago a vein was struck in the Land investment company's well, which has since yielded at the rate of forty barrels per day, and of excellent quality, thereby demonstrating to serious disorders in fourteen symnasia. The a certainty that coal oil exists in paying quantities in that vicinity.

THE STRIKERS.

Western Union reports Indicate that the strike is practically a failure. From various places come reports that operators are returning to work at the employer's terms.

The telegraph strike is practically ended. A decision was rendered by Judge Mills in The striking operators are feturning to their keys in many places, 27 leaving the Brother-hood in one day in New York city. One of the best operators in the city said on abandoning the Brotherhood: "I believe in the Brotherhood, and stood by it as long as I could, but we are beaten and may as well give up first as last. I have signed the frontlad oath and will country of a British Jew. return to work to-morrow, and I know many others who will return at once." A COLLISION.

The Mt. Sterling, Ky., accommodation going to Lexington ran into the rear car of a train ing, exploding 400 kegs of giant powder. The Engineer Schuler is not found, Yardmaster Randall was killed, Conductor McMichael fatal-

#### AN EGS OF INFLUENCE.

The Almost Wonderful Work of a Hen of Good Reputation.

Syracuse (N. Y.), Standard,

ling in the barn in a strange and op : precedented manner. Upon F vyning tonous country under heaven. the nest she found an egg of regimery size, but emblazoned with raised charactors, which nearly caused her to faint. Staggering from the harn into the house she displayed the hen's miraculous product to her sons and daughters, some of whom rushed out and spread the alarm among the populace. All further work on that day was suspended. Men working in the fields put up their horses and tools in the barns, after which they gazed anxiously at the Whitnal residence. The excitement was intensified Samuel Curtis, an honored shoemaker and a brother of Mrs. Whitnal, had become so unnerved at the sight of the egg that he had taken to his bed in ularm and refused to be comforted.

The most skeptical were convinced of the sacred hen's genuineness when it was taken to the hotel and exhibited by two of Mr. Whitnal's sons. The characters were simply raised upon the shell, as if they had been made upon the inside and puffed out by some interior the figures "1884." On another side was a cross, and on a third side was a strange symbol, which some thought was a letter "C," while others held that it was a half moon, The latter theory was more generally accepted, since, when the egg was held to the light, something which resembled a face was aster. This was inferred to represent the man in the moon.

On that night the morals and manners of the village of Erieville were excellent beyond parallel. New resolutions were formed and bad habits sworn off. Husbands and wives no longer exchanged doubtful compliments and flatirons, but tenderly embraced each other and agreed to await the coming of the Lord in a commendable manner. Mrs. Whitnal's household was too excited to sleep. Her daughter Sarah was quite ill, and it, was feared that the sacred egg would tend greatly to shorten her life. Alarmed at this, Frank Richardson, a clerk in the postoffice, acknowledged that the miracle had been performed through his instrumentality. He explained that to get even with one of Mr. Whitnal's sons he traced the characters on the egg with tallow and then placed it in vinegar. After the acid had sufficiently eaten the shell to allow the parts traced with tallow to become prominent, he visited the Whitnal barn, deposited the egg in the nest, scared an innocent hen and decamped. Mr. Richardson's expose has had the unfortunate effect of dispelling the moral influence of the egg. The villagers have returned to their former ways.

### A Delightful Snarl.

Albany Law Journal:

Mr. Bright, in a recently, published letter says: "A man may have a legal wife in the colonies, and another legal wife in England. He may bring his Canadian legal wife to England, where, when she touches our shores, she is not a legal wife, and where her children born here are not legitimate. If you can justify this. I will not argue with you. Upon this the London Law Journal remarks: "The statement may or may

ot be justified, on the ground that we are not bound to alter our laws to suit the taste of those who visit us, but it may safely be traversed. If a Canadian, married to a deceased wife's sister in Canada, were to come to England, his wife would not cease to be his legal wife, and his children born here would be legitimate. In fact, the legality of a man's marriage does not depend on the place where he happens to be, or the legitimacy of his children on the place where they are born. It depends on his domicile at the time of his marriage. A man is not married and unmarried as he crosses a frontier.". And yet the House of Lords held, in Brook vs. Brook, where an Englishman met and married his deceased wife's sistar in Denmark, that the marriage, although not forbidden in Danmark, was invalid in England., And so, although Mr. Bright's statement was too broad; yet suid have been correct if he imagined a Londover marrying his deceased wife's sister in Canada. That makes a

An English Veterinary Surgeon and Chemist, now traveling in this country, says that most of the Horge and Cartie Powders sold here are worthless trash. He says that Sheridan's Condition—Powders are absolutely pure and immensely valuable. Nothing on earth will make it is lay like Sheridan's Condition Powders. Dose, I tessp'n-ful to I pint food. Sold everywhere, or sent by mail for 8 letter-stamps. L. S. Johnson & Co., Boston, Mass.

In olden times it was thought that evil spirits came in through cracks and keyholes. The generally approved way to keep them out was to plug up the keyholes and stop the cracks with cotton. Notwithstanding these preventive measures, the evil things had their own-way and often came in as they pleased.

So comes malaria now-a-days. We try to keep it out of the keyhole and it comes in by the crack. We stop up the crack, and lo! it comes from a leak in the plumbing, or an opening from some neglected drain, or from some unsuspected source and unguarded direction.

We cannot always keep malaria out, but we can give it battle and drive its effects from our systems. If BROWN'S IRON BIFTERS is taken in time, malaria has not a ghost of a chance. This is the great family medicine. Your druggist sells it, and you ought to keep a bottle in the house.

FLIES, roaches, ants, bed-bugs, rats, mice, crows chipmunks, cleared out by "Bough on Rats" 150 MENSMAN'S PEPTONIZED BEEF TOME, the only preparation of beef containing Ms entire nutritious properties. The Magnolia Balm conceals every blemish, removes Sallowness, Tan, Redness. Eruptions, all evidences of excitement and every imperfection.

Its effects are immediate and so natural that no human being can detect its applica-

### PINCKNEY DISPATCH

THURSDAY, AUGUST 23, 1883.

The boy of the future will hesitate to become President of the United jed by Norman Hugger as a saloon." States or Captain of a base ball club.

weather of this season to the spots on the sun. If old Sol doesn't behave better we shall be obliged to send Sullivan up there to "knock the spots off him."

The disgraceful quarrel between rector and people in Grace Church, Detroit, is only one more of those incon' Christian charity under the sun." We recently. will not attempt to say which party is most at fault in this case. Where charity were in town soliciting a bonus with might have covered a multitude of sins, the want of it discloses petty failings' magnified to mammoth proportions.

The Stockbridge Sentinel believes that the liquor traffic could be better regulated by public sentiment than by any, law which could be devised. While we are not prepared to endorse such an opinion fully; we do recognize the sound commonsense of the following extract from the article in

Is any one illogical enough to suppose that a law to prohibit will not be evaded, if a law simply to regulate is evaded? We say again, as we have said a hundred times before, and as we hope to keep on saying as long as we can print a line or wag a tongue Corbet is unoccupied and bears the sign -if there is one humbug above another in this day and generation it is the blind craze for law as the principal remedy for evil.

Detroit Hotel has a card con spicuously posted in the office, bearing the text of the following State law. printed in large type:

"If any person shall willfully blaspheme the holy name of God. by cursing or reproaching God, he shall be punished by imprisonment in the county jail not more than six months, or by a fine not exceeding fifty dollars. If any person who has arrived at the agerof discretion, shall profanely curse, or danyn-or swear by the name of God. Jesus Christ, or the Holy Chost, he shall, on conviction thereof before any justice of the peace, be punished shall be commenced within five days meeting. after the commission of such offense.

We suppose it is intended to counteract the strong temptation to profanity which besets the customer when he walks up to settle his bill.

Twenty of the leading stocks quoted on Wall street have suffered a shrinkage of value during the past year spire nearly completed, and though averaging 25 per cent. In view of not many feet high, is a beauty, and this it might be asked if those stocks have fallen below their real value, or the money investment they represent second church Mr. Williams has built We very much doubt if this is the case. There are few railroads at the present time which are not paying a fair profit on the actual cost of construction and ing. It seems that willie Larkin, a equipment. But the tendency to swell stock and debt liabilities far beyoud the cost of property is a growing River, was left alone during the afterevil. For example, take the railroads noon with a smaller brother, and toof our own State. The stock and debt of the various corporations owning lines within the State exceeds the reported cost of construction, &c., by \$10,-150,000 + and the reported cost of construction in all probability exceeds the

Thus it will be seen that Michigan has not less than \$20,000,000 of ficand dividends along with the genuine-

When it is also considered that from ten to twenty per cent. of the money way of bonuses from people receiving no stock or other interest in return, the speculative value of stocks is raised to a still higher percentage above first cost thereof-so that in many instances a six per cent. dividend means ten or twelve per cent in reality.

This is one of the evils that tend From the Citizen to unsettle the financial and business interests of the country, and promote speculative investments which so often

It is to be hoped that many years may elapse before another panic strikes the country, but this speculation, together with the gambling in "grain" and other imaginary products, do not tend to decrease the chances for such a

#### ANN ARBOR.

From the Register.

The thirty-fifth annual fair of the Washtenaw County Agricultural and Horticultural society will be held from Tuesday till Friday, October 2nd to 5th, inclusive, on the society's grounds.

Miss Jane Halsey, an aunt of Mrs. W. W. Wines who lives with the family, and familiarly known as "Aunt Jane, was 93 years old Friday. She was surprised at dinner by a number of friends and relatives who had been invited for the occasion and a merry dinner-party was the result. In the afternoon she rode down town and had her picture taken. Miss Halsev is as spry and active as many a lady of many less years and she is to be congratulated unon having reached such a hale and hearty old age.

Last Wednesday night, a German named John Six, living ten miles beyond Dexter, was attacked and knocked down in the lumber yard near Arden saloon by Geo. Stephens, a hard case from Chicago who has been hanging around the city for some time. Six claimed that the robber took from him \$75 in money and a revolver. Stephens was arrested and the revolver and forty cents in money was found on his person. He was hauled up before Justice McMahon and his case adjourned till next Thursday. Stephens' brother is here from Chicago trying to patch up the case; whether he succeeds or not remains to be seen.

the bot the simple fact. We are the programmumbered parasitical animals, as finall that only the most powerful microscope reveals them to the eye. When one class of these minute creatures finds a home in our bodies, smallpox is the name we give to the malady they produce. Another class causes scarlet fever, another measles; another consumption. The diseases produced by germs developed in consequence of defective drainage are various, chiefly theria, tonsilitis and typhoid disorof manifold development. / The sechee of these germs in the system may result in a reduction of the vitality to such a degree that any infection will be readily absorbed and the hapless victim fall an easy prov to any slight derangement. We often use-the expression "to throw off disease" and correctly, for when one is in perfect health the germs of disease find no congenial soil to sprout-and grow in. We never find moss on vigorous healthy trees, or even on shingles until they begin to decay—the healthy fiber fesists the attacks of floating organisms. For the same reason those who obey the laws of health posess sound fiber, in which mararious and infectious germs find no place to lodge.

The worst month in the year for typhoid pneumonia is April; and why? Because the cold weather has kept people in doors and they have breathed in their dead selves over and over again, until the typhoid germs have fastened on the vitals, multiplied in the tissues and absorbed more or less the life of the individual A slight cold still further depresses the vitality and makes the increase of these germs more and more easy, until the fight for-life becomes alarming and ends, we all know in too many cases, how sadly. While every-thing is frozen up it is difficult to take proper care of sewage: refuse piles ac-cumulate, drains become choked, cellars gather decaying matter, waste-pipes become foul, and all these agen-cies combine, unless, counteracted very early in the spring to increase the tide of parasites floating into the body with every breath. The subtle poison can not be detected often by the most acute offactory nerve, and there are no chemical tests that can be applied by the non-professional to determine their presence. "Eternal vigilance is the price of liberty," and not of liberty alone, but of health. And this vigilance must be exercised, not only upon the "outside of the cup and platter," but it must go to the heart of things, to the foundations, and search every nook and crevice with cleansing power.

with cleansing power.

In removing offal from our premises we need to remember that the wet earth does neither deodorize nor disinfect it; dry earth alone can do this, and feet it; dry earth alone can do this, and there must be sufficient dry earth to absorb all the moisture, or exhalations dangerous to life will be given out. A little leaven feaveneth the whole lump. One foul pipe in a house is enough to kill its inhabitants if it has a good chance at them. One neglected refuse heap may bread postilence enough to destroy a whole neighborhood. A broken brick in a sewer just under a closet opening

in a sewer just under a closet opening into the rooms of Prince Albert caused his death. What we term "modern conven-

iences" include many conveniences that are often very detrimental to health. If the bath-rooms in our houses could be so contrived as to open on a piazza, which might be latticed, instead of opening into the house and infecting it, as they do, great gain would result to the health of its inhabitants. Well people do not suffer so much from immediate exposure to malarious influences as do invalids and little children.

Depotless our pallid city children would be less ball, carried out every day, superseded the clegant marble basin and rose-

the care of servants, become elegant causes of disease and death.

Supshine is the great healer, sunshine supplemented with abundance of fresh air. "In Him was life, and the supplementation of the supplemen

fresh air. "In Him was life, and the life was the light of men." In many senses are life and light interchangeaties words. When we put seeds in the words. When we put seeds in the point out that one advantage is that their plan permits people to contemplate their ancestors and thus perpetuate filial piety and sentiment de race. They are down on cremation, which, they develop life. The same conditions in our houses develop active life in all malarious and infectious germs. Therefore, when the searching sun ray penetrates and illumines our interiors, and the purifying air absorbs moisture and the purifying air absorbs moisture and cause of fatal epidemics.

When the small-pox threatened to carries off poisonous effluvias, our rooms \_\_Whan the small-nov other fundamental sanitary conditions Orange to an end, nothing, the doctor being complied with. There is certainly enough light and air and dry healthy young man became his, bedfelearth for all uses of health. What is low, and by enfolding him closely in his meeded is intelligence to utilize them in arms, should impart sufficient heat to such a way that health shall be pro- his body to force the obstinate disease to moted and disease prevented .- N. ### Umbrellas.

"This has not been a good year for umbrellas, 'said a large dealer yesterday to a Tribune reporter; "the rain cains too late in the spring, and this had his adoption.

a depressing effect on the trade. When the demand for any line of goods is de-Much as has been written concerning layed, you know, the trade is just as

After laying down this axiom of commercial philosophy the gentleman led the reporter into a department where precept are continually needed to keep | umbrellag of all sizes and prices were arranged on counters. "Here," he said, "we have everything in the umbrella line from a thirty-five-cent article to one tal as bullets; that stagnant water and for twolve dollars. These goods," he said, picking up a couple of coarse, looking umbrellas, "are what are sold any form taken back into ourselves are on the street-corners for fifty cents. We sure death to us. This is no figure of can afford to sell them for thirty-five cents. You see they are marked 'ging-

ham,' but they are really of an inferior sort of cotton, known as sixty-four qloth. Notice the edge and you will see first they are not even bound. We have several grades of this article, from sixty-four-cloth to 108-cloth. Now here is an umbrella known as the 'reed frame," because its ribs are made of reeds instead of steel. This, however," he said, opening out an umbrella with a bamboo stick handle, "is only of the lightest and most satisfactory things in the market. It is known as a Ferguson Scotch, paragon frame, and sells from \$1.10 apward. I always use this umbrella myself when I do not carry a silk

The next umbrella opened was as capacious as a circus tent. This said the gentleman who was initiating the visitor into the mysteries of thetrade, "is what we call a Storm King." You see it has sixteen ribs and is made of eighty-four cloth. Oh, yes, we send lots of these to different parts of the country. They arecused exclusively by countrymen. A man walking on one of the city's streets with one of these things would be worse than a cyclone."

"Talking of eyelones,", he continued, \*there is something built especially to resist the winds of the Far West. We call it the 'Prairie King.' It has sixteen ribs and four wire braces. No matter how strong the wind may be, the braces will keep the umbrella from turning inside out."

The next article picked up was described as a "Star 140," and the gentle-man in explaining its merits said that it had patent inetal tips and was waterproof. The latter quality is one that should recommend itself in an umbrella.

"You have seen prefty near everything that goes under the name of gingham," said the gentleman who was wasting his time on the reporter, "and wasting his time on the reporter, "and now I may tell you that we have alpace umbrellas ranging in price from \$1.25 to \$3.50. Silk ambrellas are luxuries, and there is not a very large demand for them. We have them from \$1.25 up to \$5 in natural kandles. Ivory handles add from \$1.50 to \$5 to the cost. All these superior grades are provided with paragon frames, which make them light. Silk umbrellas vary in price from \$6 to \$12."

"What sort of umbrella does the pub-lic prefer?"

eWell, a silk umbrella costing \$3 seems to be high enough for the crowd. A strong, common, \$1 umbrella, however, is what is bought by the multi-tude. You see," he added, with a touch of sadness in his voice, "people don't like to invest much in umbrellas, because, somehow or other, an umbrella is always regarded as common property, and sooner or later it is bound to be and sooner or later it is bound to be stolen. Now it's strange, isn't it, that ladies don't steal each other's parasols? I sell twenty times more parasols than umbrellas. Talking of parasols," he said, returning from his general view of the subject, "here's one we sell for ten cents. You wouldn't believe it, would you but it's a fact. It's made soon. cents. You wouldn't believe it, would you, but it's a fact. It's made somewhat on the plan of the thirty-five-cent umbrella. But that is nothing to the Japanese parasol which sells for two cents. We sell these at two cents apiece," he said, opening a gorgeously-colored paper shade, "and we make a quarter of a cent' profit at that. These things, of course, 'are mostly used for decorating rooms."

"Where is most of the carving on umbrella handles done?"

"Formerly it was done almost exclusion."

"Formerly it was done almost exclusively in Europe, but during the last year Philadelphia has turned out some

are cleansed and made fit to live in, bring the life of Prince William of said, could save the patient unless some volunteered for the dangerous office. The experiment succeeded, and the faithful voith escaped unharmed, to east of Howell Street, and 6 lots on Howell South share his master's rising fortunes, became Prime Minister of England, and founded a Ducal house in the Land of onable prices. Apply to his adoption. JAMES PEARSON, PINCKNEY, MICH.

1883.

To the Farmers of Livingston and Adjoining Counties:

If you want to purchase a Reaper this year, examine the "Hero," look it over carefully and you will see it is up to the times. 1st. It is simply constructed, 2nd. It has no side draft. 3d. It is not liable to get out of order. 4th. It has no weight upon the horses' necks. 5th. It is a very light draft reaper. 6th. It is easily managed. 7th. It is just the machine you want. It can be had of our agents, on trial, and is warranted to give satisfaction. I refer you to the following named farmers who have purchased and are using the Hero Reaper, some of whom for the past four years, and they can testify to its merits:

#### TOPICS OF THE TIMES.

THE colossal skeleton of a man who must have been twin brother to the Cardiff Giant has been dug from the shelving bank of a ravine near Barnard, Mo., by a farmer named John W. Hannon. Twelve feet was the height of the pre historic gentleman, and his longest ribs measured four feet in length. The fact that his relies have been dug up in Missouri suggests the probability that he was the original "border ruffian."

be, have been vainly warring over the- of the situation. ological abstractions, this unknown woman has been illustrating in her life An Old Seal Follows Her Captive the true spirit of the Christian religion.

TEN medals are about to be presented by the Mayor of Baltimore to men who showed "heroism and daring intrepidity" in saving lives at the time of the Trivoli dock llisaster, and a number of public. The first medal is for Christopher Doyle, who saved tifteen lives made you." replied the priest, and so was noticed near by:

WILLIAM H. VANDERBILT did a grace ful and generous thing in handing his check for \$3,000 to the proprietor of a hotel in the White Mountains to be diswho are acting as waiters there. This is one of the ways adopted by poor year at the same time that they are getting the benefit of a vacation. It is not same time: / and, indeed, a great many young men would rather not try But Mr. Vanderbilt's gift was prompted, it is said, by the self-reliant spirit and gentlemanly bearing of these young men. This is a proof that they were highly successful in this difficult role, and is a remarkable compliment.

Nor the least of the blessings which French people is the great encouragement given to the cause of popular education. The school system has been so of the masses far better educational faever before enjoyed. A late and imporlyceums or colleges for young girlsthat is, girls from twelve to eighteen years of age-in fourteen of the larger is will be established. ### Offspring Eighty Miles.

Santa Barbara (Cal.) Press.

An interesting incident, illustrating the maternal affection of an animal for its young, was brought to notice during the visit of an excursion party to Ana capa Island off the coast of California. A young seal pup only a few months others are to be honorably mentioned in old was brought away from the island by little Ernest Whitehead, who desired to take it home for a pet. Shortly before sailing a large seal was noticed and spent the rest of the night in diving swimming around the sloop anchored for the bodies of the dead. He was off the cave where the capture was made, standing near the Roy. William E. Starr uttering loud barks and at times howl- Marshall Jewell has been made by do more effective work if unimpeded by in response to the old dam's plaints. from a photograph his clothing, he asked Father Starr if it The boat sailed away, making for the would be right to strip before the wom-en and children. 'Go in. man. as God the speed of the boat, when a large seal

On reaching the wharf at Santa Barbára a large seal was again discovered swimming about the bont. To better secure the pup until daylight the rope was taken from its fin and it was tied up in a jute sack and left floose on the sack. Soon after coming to anchor the tributed among the thirty college boys seal responded to its mother sinvitation by easting itself overboard, all tied up as it was within a sack. It is asserted by the man on deck that the seal mother young men in New England colleges to seized the sack and with her sharp teeth make a little money for the following tore open the prison of her-offspring. This, however, is a mere conjecture. If it did the little pup was saved; otherwise it would drown tied up in the sack. The an easy part to play-that of gentle-incident was the more interesting from man and scholar and waiter at the the fact that the old seal had to follow the sloop at least eighty miles over the be done." ocean in a hopeful endeavor to rescue

### Science vs. the Boy. -

An exchange says that 'no boy will claim that he can eatch more fish than a scientific angler." No, perhaps the boy will not claim that, and it is hardly necessary that he should. But let the scientific angler with a superboatfit of the Republic has conferred upon the rods and reels, and silk fish lines and ler is being discussed in Germany and gold-plated hooks, and patent flies, the France. Prof. Welckers of Halle, after of the Indian and the song of the sixusual accompanying combination pock- a eareful comparison of the skull in the shooter, now there are railroads and et flask, and other first-class articles tomb at Weimar with the plaster cast churches, and commercial men, and that go to make up the outfit of the taken immediately after Schiller's extended as to place whithin reach of scientific angler, let such a fisherman go death, has come to the conclusion that out to the fish pond to fish, and when the person buried in the ducal vault is cilities than the youth of the country he has sat all day in the sun, emptied not Schiller at all the flask, and has not caught a fish, he will quietly crawl around and commune tant feature of the governmental plan with the boy, who sits with a battered of public instruction is the creation of straw hat on, and one suspender, his pants rolled up, and both feet dabbling own. "Me catch?" (understand—"catch" on") "cyclone," he says. "Big wind in cloud. Blow wigwam 'way off. Spit years of age—in fourteen of the larger of fishing-tackle, except a tamarac pole, cities and towns. senger informed My Sould, who h d her shown in. I suppose, Mr. Gould said she, "when you know my business

you will kill me. Lambel ing books. But after some persuasion he burchised a volume, and gave her a list of names of his friends to whom he thought she could self. Russell Sage was the only one with whom she was not successful.

"The Pope is now seventy-four," says There is none of the saturnine caducity, the depressed mouth and prominent chin, or spectral smile. Leo XIII, is tall; he wears his years well; walks upright and thus makes the most of his inches. His hair is snow-white and naturally forms into a crown about his. finely developed brow. His long face is serene, his small eyes dancing with intelligence, add to this a harmonious sonorious voice and a wide knowledge of languages, which he speaks with the correctness of a professor.'

### Past, Present and Future of Wyom-

of the globe is at this time so full of ery of America, and not to hold the cele- | mighty possibilities, or so rich in promises for the future, as the broad stretch of Mr. G. R. Blanchard, of Boston, has brought home from Paris the last work pi, and this assertion comes as near the truth as a newspaper man dare get. But a few years ago this portion of the Union was very appropriately termed a wilderness. The coyotte squatting in the shelter of the umbrageous sage tree sang his tuneful lay, and the cactus stood sadly in the midst of the wide expanse of country known as the Laramie plains, with no human being to love it and cherish it—and sit down on it. The very thought of an orphan eactus being doom-ed to sit in eternal silenge, with no kind word or look for centuries, and with no picnic party and no soft eyed young Miss Nellie Hunt, daughter of the man with ice-cream pants on to come and nestle lovingly down upon its fuzzy bosom; is sad enough to draw tears from the eyes of Bob Ingersoll himself -at the usual Star Route price. Until lately, too, the Westerner who ventured across the Missouri River was looked upon as a curiosity, and the people on the outer edge of the pier when the was possite to the angular the time of the pier when the was possite to the angular the time of the pier when the was possite to the angular the time of the pier when the was possite to the angular the time of the pier when the was possite to the angular the time of the pier when the was possite to the angular the time of the pier when the was possite to the angular the time of the pier when th erash came. Realizing that he could the little captive, which at times barked portrait, and was modelled entirely half score of years, however, the West, -particularly this portion of it, has waltzed to the front and demanded recognition among the countries of the world, and got it, too. The only objection to farming on these plains is that the land comes pretty high-about 8,000 feet. The assertion, however, that there is alvass a sea breeze blowing at that elevation just moving the leaves of the trees and blowing the cellars out from under

> lots with big mortgages on them, have been blown away that we eyer heard of. Raising cattle is Wyoming's chief industry at this writing. With a good branding iron the humble randingan can get up a pretty nice little herd in a few years. One man who went into the eattle business up in the Sweetwater four or live years ago with an I. C. mule and a healthy branding-iron is now worth a million. He carried a charcoal furnace with him, and haddine brand tied to a rope. He kept the fron hot, and could throw it so as to leave his brand on every maverick he saw, if he could get within twenty yards of it He just branded all the cattle he could find every

the houses occasionally, is false. True,

sometimes a whisper of wind springs up on the starboard jib and blows about

due west by galley-west for an hour or two, but nothing heavier than corner

spring and let nature take her course. "I tell you, pard," said old Jimmy Cannon, the guide, to the writer recently, "the West has lost its romance. Only a little while ago, it seems to me, where once there was nothing but the whoop churches, and commercial men. and high schools, and three-card-monte men, and lecturers, and daily newspapers. and, every little while, a natural death. Why, within the past two months, if the blasted papers tell the truth, several men have died in Wyoming of disease.

I tell you, it looks as though us oldtimers would have to move away. When we have to wait for lingering disease to snuff us out, it's time to light out for the

### Why He Did-Not Succeed.

Probably the most surprized man of

Peck's Sun.

the season, was the postmaster at Orange, this state, who prepared to commit suicide a few days ago. He sent his bired man to New Lisbon for some morphine, to kill himself with, His family, suspecting all was not right, changed the morphine to quinine. The doomed man took one of the powders, and laid down to die. He felt a buzzing in his head, but death did not approach with that rapidity he desired, so he got up and took another powder, and laid down with a feeling that death would soon relieve him of all troubles. The buzzing in his head continued, and after waiting an hour on death which did not arrive on schedule time, he got up about as mad a man as could be found. He got the balance of the nowders, procured a microscope and examined them, and when he found they were only quinine, the trifling conduct of relto Jay Gould. She hid it under her atives was clear to him. He thought cloak and seemed mysterious. "No the matter over for a few days and then one but Mr. Gould would do," she told shot himself in the head. As he was the messenger. Mr. Gould was not in. alive at last accounts he no doubt feels she would come again. She kept on that the bullet had been changed—I the calling daily until, in despair, the messenger.

### PINCKNEY FLOURING & GUSTOM MILLS

GRIMES & JOHNSON, Proprietors.

wis't to make known to their old and new custom are that they are now prepared to do better work of all kinds in their line of business than ever before. Their mills having been thoroughly refitted inside, The Pope is now seventy-four," says the London Globe, "a tall, thin, ivory-complexioned man, with a bentgmant expression and smiling lips, hearing the stamp of indelible firmness—the express sion of a man to bend, but never to break. Some one has said he has the mask of Voltaire, but this is nonsense. repaired and improved outside, making it convenbringing grown or musty wheat must expect flour from the same. #### The Important Part it Played in Mysterious Murder. Jacksonville (Fla.) Cor. N. Y. Mail.

Archibald W. Newton, a young mar who belongs to a wealthy family which stands high in England, has just been cenvicted in Orange County of the murder of Samuel McMillan. The case was sensational, and when the jury brought in the verdict, "We find the prisoner guilty as charged in the indictmentt,' there was much excitement in the court room. In the spring of 1881 Newton appeared at Sanford, bearing a letter from Mr. Gray, one of the London stockholders, to J. E. Graham, the manager mentioned in the letter as a nephew of Mr. Gray and Manager Graham was authorized to pay him \$83 per month. Newton, a youth of fine appearance and pleasing manners, was popular at first, but his good reputation was soon blasted. There were reasons to suspect him of forgeries, and then came news that he had left England because of an outrage against Miss Polly Bowron. Sub-Kate Bowron, a sister of his alleged victim, and meeting her in New York married her, and the couple returned to Crystal Lake Orange County. While this was going on another topic

of suspicion presented itself. There lived in Orange County, near Crystal Lake. a man named Samuel McMillan, who bore the reputation of being a miser, and was supposed to carry a large sum of money on his person. He owned a valuable grove, the sale of which he was negotiating with Newton, who with his wife lived near by. Newton knew the habit of McMillan of carrying money. On Saturday evening, September 39, McMillan was last seen alive just after sunset, in company with Newton, walking toward Newton's house. He never returned to his home and after some days his neighbors became anxious and instituted a search for him. On the 17th day of October his headless body was found in Crystal Lake, partly consumed by fishes. Around the waist was a rope, to which was suspended a sack, in which was found an iron pot full of nails. A few days later the head of the murdered man was found near the same spot and moved a bullet dropped out, which appeared to fix exactly a pistol Newton

Wylly testified that he had found in the canal, and the absurdity of driving chapel, and the Rabbi arose to give his blood spots on a handkerchief found in cattle from Texas, away up to Kansas "There's the lover!" cried Delia, as discourse. Just then it occurred to him Newton's pocket the morning after the and Arkansas, to be thence shipped by Lill at radiantly dreaming over the letthat it was a very delicate matter to murder a single red hair. The hand-rail to Eastern markets, would also address his audience, as he wished to kerchief was examined last October by cease. There is no enterprise now contake for granted. Now, if only old spare them humiliation, by calling them Dr. Wylly. He testified that at the first templated or in progress, that would witch Merrydeer would supply the Convicts. Said he 'I do not know examination he found a single blood confer greater benefits upon the comhow to address you—you people. If I crystal. Supposing that he might have merce of the world than the Florida scratched his finger and caused the ship canal, or that could depend upon crystal to get on the handkerchief he a larger business." #### ANNAMESE IMPALEMENT.

An Inconceivable Torture of the Ori-

The Annamese have brought the science of impalement to a much finer point than might be inferred from the process heretofore described. A French officer, who witnessed an execution in Tonkin before the recent troubles, gives a very curious account of the apparatus of impalement. A lofty stake, with sharp point, is fixed into the ground as firmly as a telegraph pole, and with the upper part a chair of iron, having an oritice in the center of the seat, is connected. The point of the stake fits the orifice in the chair, and the latter is lowered or raised by machinery set is motion by a crank—so that several feet of the pole can be forced through the body of any one seated in the chair. There is a lofty platform, rising to the same height as the pole and reached by a ladder. The executioner compels his victim to mount and take his seat in the chair, whereon he is immovably chained. Then the crank is turned forty or fifty times—the stake being buried further and further in the criminal's body at each tarn.

All this appears unutterablably horrible to Europeans; but the Orientals are not constituted as we are. They fear ordinary forms of death very little: and decapitation or hanging has as little terrors for them as the Work House for the common Anglo-Saxon criminal. Moreover, their nervous system—especially that of the Chinese and kindred races—is not altogether similar to the nervous system of Ayran races. The French officer who witnessed the method of execution above described avers that the criminal continued to eat a banana until the operation was half completed: and many travelers concur in bearing evidence that the Chinese exhibit under torture a degree of fortitude equal, if not superior, to the well known stoicism of the American Indian. But it is ratherstrange to learn that the part of the iron machinery used in the impaling process referred-to bears the trade-mark of a French-iron-master.

#### The Florida Ship Canal.

#### The Agricultural Editor.

Dyke Forteseue rambled into the office of a rural newspaper published in the interest of a small class of rural readers and named the Farmers' Friend and Cultivators' Champion. Dyke was fresh from Denver, where he had been doing local work on a daily. He wanted a situation—he wanted it badly, and he seen closed a hargein with the propries. soon closed a bargain with the proprietor of the Farmers' Friend and Cultivators' Champion. The proprietor intended to be absent for two weeks, and Dyke undertook to hold the journal's head steadily up stream until his re-

'You will receive some visitors, quite likely," said the proprietor. "Entertain 'em in a manner which will reflect credit upon the paper. They will want to talk stock, farming, however the control of t horticulture, etc., you know. Give it to 'em strong."

Dyke bowed, borrowed a half-dollar, got a clean shave and a glass of beer, and soon returned to face the music and solit the first agricultural journal with which he had ever been connected.

"I can feel that, with my journalistic experience, it will be just fun to run an agricultural paper," said Dyke to himself.

At two o'clock p. m. the first visitor showed up at the door of the office, and Dyks cordially invited him inside. The farmer entered hesitatingly and remarked that he had expected to meet the proprietor, with whom he had an appointment to discuss ensilage.

"I am in charge of the journal," said

"Q, you are. Well, you seem to have pretty clean office here." "Yes," replied Dyke. "But about

this ensilage. Ensilage is a pretty good preed, isn't it?" "Breed!" exclaimed the farmer,

"I mean its a sure crop; something that you can rely—" "Crop! Why it isn't a crop at all?"

"Yes, yes, I know it isn't a grop," said Dyke, perspiring until his collar began to melt away down the back of his neck, "but you can do better and cleaner work with a good sharpensilage on stubby ground than-

"Take it for a sulky plow, do you?" "No, no," said Dyke. "You don't seem to understand me. Now, if a farmer builds an ensilage on low

"Builds an ensilage! You seem to have got the thing mixed up with some kind of a granary.
"Pshaw, no," continued Dyke. "I

must make myself plainer. You see, this ensilage properly mixed with one part guano and three parts of hypophos- | Ever shown in the town, at prices phate of antimony, with the addition of a little bran and tan-bark, and the whole flavored with chloride of lime. makes a top-dressing for strawberry beds which—"

"No, certainly not," said Dyke. "I know it is not often used in that way. You don't catch my drift. When I said top-dressing I meant turkey dressing stuffing, you know-for Thanksgiv-

"Great heavens, man! Ensilage isn't a human food!"

"No, not a human food exactly," said poor Dyke, grinning like an almshouse idiot, "it isn't a food at all, in the true sense of the word. My plan has always been to lasso the hog with a trace chain and after pinning his ears In town. Notions Novel'es and back with a clothes pin, put the ensilage into his nose with a pair of twees-

"My good lands! You don't use en silage to ring hogs." "I never believed that it should be At your own prices. Clocks, Clocks, used for that purpose, but when you want to ring hens, or young calves to keep them from sucking

The farmer gravely shook his head. "Did you ever try ensilage on the hired girl," said Dyke, desperately. and winking like a bat at 11:30 a.m. The farmer slowly arose, and with some evidence of rheumatic twinges in

"Young man," he said, solemnly, you are a long ways from home, ain't

"Yes," replied Dyke, dropping his eyes beneath the stern glances of the farmer. "In my ancestral halls in England, sad-eyed retainers wearily watch and wait for my return."

"Go home, young man, go home to your feudal castle, and while on your way across the rolling deep, muse on the fact that ensilage is simply canned food for live stock—nut up expressly for family use in a sile, which is nothing less than an air-tight pit where corn stalks, grass, millet, clover, alfalfa and other green truck is preserved for winter use, as green and verdant as the sub-editor of the Formers' Friend and

Cultivators' Champion. And Dyke Fortescue sighed as he remarked to himself: "There ain't so blamed much fun in running an agri-cultural paper as 1 thought."—Texas

-M. Pasteur tells the Academy of Sciences at Paris that wonderful results are being obtained in the work of vaccinating live stock as a preventive against disease. During the last year 80,000 sheep, about 4,000 head of cattle and 500 horses have been vaccinated. Before this system was introduced the annual loss from liver-rot in one department was nine per cent., while the loss since then has been reduced over onehalf.

-The Cleveland, Akron & Columbus Railroad now counts its time from one to twenty-four o'clock. Thus two p.m. is fourteen and 10 p. m. twenty-two: The plan avoids possibility of confusion between forenoon and afterno

#### AN OATH

Chawrohd Co., Pa., City of Titusville.

Personally appeared before me, Peter Phillips, who, being sworn according to law, deposes and says: That he has been affected with rheumatism more or less for the past four or five years. That last winter he had a very severe attack, and that the pain was excruciating, and he could only meet about in his own room by taking hold of something for support. When the disease was in the most scute form, and the pain almost unbearable, he took a dose of Wilson's Lightning Remedy, which caused immediate relief, and the second dose, taken five hours after, made a perfect and permanent cure, and that since taking the two doses he has been free from the disease, or any symptoms thereof.
