Ells Marriage at the White House to Miss Frank Folsom - Full Details of the Event - The Auxir Very Quiet-Off for the Manathian

THE PRESIDENT MARKED.

Wassington, June 3.—Problem Cleve land and Miss Frank Folsom were married in the Blue Room of the White House at seven o'clock last evening by Rev. Dr. Sunderland. At a few minutes before ten clock they took a special train on the Baltimore & Ohio en route for Deer Park, where they will remain for about one week.

It was a great event, because of the exalted position of the groom—the chief magistrate of a nation of 60,000,000 of people-and because it was the first wedding of the kind that has ever occurred under the roof of the Executive mansion. Yet, notwithstanding the exalted position of the President, and that the opportunity and occasion almost demanded a great and brilliant state wedding, the affair, in all its preparations, appointments and surroundings was a quiet, homelike wedding.

The wedding any was ushered in with bright, beautiful weather, and almost with since the world began. It is not there- by purple pansies. The invited guests-Cabinet officers and their wives, who were not abiding in the mansion—then began to arrive. They were at once shown to the state dining-room, where they at once divested themselves of their wraps and then repaired to the Blue Room, where Miss Rose Elizabeth Cleveland and other relatives of the bride and groom, together with Dr. ring upon the bride's finger. Sunderland, were waiting to receive them. The assembled guests, standing on the eastern and western sides of the oval-

shaped Blue Room, where the marriage ceremony took place, had but a few minutes to wait, for promptly at seven o'clock to the East Room engaged in pleasthe President, with Miss Folsom leaning ant and social conversation for some upon his arm, came down-stairs, and entering through the northern doorway advanced to the center of the room, and there stood facing the background of paims, ferns and flowers on the southern Cleveland, stood facing the bride and

The only invited guests who were not present at the wedding were Miss Bayard and Attorney-General Garland.

Immediately after the entrance of the President and Miss Folsom Dr. Sunderland advanced and proceeded with the marriage ceremony as follows:

"Forasmuch as we are assembled to obnerve the hely rite of marriage, it is needful that we should seek the blessing of the reset Ged, our Father, whose institution is is, and therefore I beseech you now to fallow me with reverent hearts in prayer

"Abnightly and everlasting God, the Mather of our spirits, the framer of our bodies, the giver of every good and perfect tift—Thou Who caust see the end from the beginning, Who knowest what is best for us. Amen.'

After the prayer Dr. Sunderland made the following address:

"Marriage is honorable among all men in that a man shall leave his father and mother and shall cleave unto his wife, and they twain shall be one flesh. It was constituted by our Creator in the first paradiss. It was confessed by patriarch and priest, prophet and apostle. It was confirmed by the teaching and adorned this woman come now to enter. THE TOILETS. President Cleveland was attired in a full evening dress suit and wore a turn-down collar, a plain white lawn necktie, enameled shirt stude and cuff buttons to match. The bride wore an enchanting wedding dress of ivory satin, amply garnished on the high corsage with India maslin crossed in Grecian folds and carried in exquisite falls of simplicity over the petticoats. The orange blossom garniture commencing upon the veil in a superb coronet was continued throughout the costume with artistic skill. Her veil of tulls completely enveloped her, falling to the edge of the petticoat in front and extending the entire length of her full court train. Except the engagement ring, a supphire with two diamonds, and the simple wedding ring which the President placed upon her finger, the bride wore no jewelry what-

Mrs. Folsom were a supurb dress of violet satin, with garniture in white faille and crystalized violet drops in pendants every-

where. Miss Cleveland's costume consisted of an exquisite dress—a combination of Nile green and cameo pink duchesse satin, with silver ornaments, low corsage, garnished with pink roses, short sleeves, and demilength gloves in light tan. She carried a fan of pink curlew feathers.

Mrs. Hoyt, the President's sister, wore a dainty costume, en train, of China crepe in robin's egg blue, most effectively garnitured with rare old lace.

THE FLORAL DISPLAY. The novel features of the floral decorations were confined to the Blue Room. Here the florist's art was mainly exercised. The windows at the southern and outer end of this oval-shaped room were banked with stately palms and ferns extending to the ceiling. In front of this imposing bank of green fifteen feet high, and lower down, beautiful foliage plants were arranged, and at the base of this bower were banks of roses, white, vellow, pink and red azaleas, fuchsias, geraniums and heliotropes, all combining to make the bower a triumph of beauty and fragrance. On every side of the room the decorations were scarcely less elaborate. The mantel with the presence of the Redeemer, various colors, in which the date of the and has been honored by the faithful wedding, "June 2, 1886," was written in keeping of all good men and women letters of white flowers, surrounded rich colored in the center, in which was the monogram, "C. E.," in white moss and hybrid cross. The two large mirrors now speak or hereafter forever hold his above the mantels were draped and festooned with garlands of mixed roses; "If you desire to be united in marriage the doors leading to the adjoining rooms were festooned with heavy garlands, of roses in different distinct colors, and above the corridor door was a seroll composed of flowers, in which was the motto. E Pluribus Unum." in immortelles.

The main table decoration in the wedding supper-room was a full-rigged ship, composed of pinks; centaurea egana, delphiniams, roses and pansies, bearing the name "Hymen." It rested upon a mirror representing a lake, which gave it the appearance of floating. Its shores were composed of different varieties of selaginellas President Cleveland responded firmly: and tiny pieces of corals, and the land was roses. The ship, a three-master, was flying on the center sparthe colors of the United States, while the other two carried white flags with the monogram 'C. F." in gold. At either end of the table were crystal vases, resting upon mirrors, with longstemmed hybrid roses. The two mirrors were festooned with asparagus tenuissimus, interspersed with loose roses. The corners and windows of the room and the four sideboards were suitably decorated with the choicest foilage and flowering plants, with the mantel a solid bank of

THE WEDDING PRESENTS.

The presents were not shown, but some forty packages of presents were carried in during the afternoon. The bride's dismond necklace had a pendant given by Mr. Bissell. Secretary Lamar's present was an elegant and antique smelling bottle, gold mounted and set with diamonds. Mrs. Endicott's gift was four antique solid silver candle-sticks. Mrs. Vilas gave a brooch of etruscan gold, fashioned in a double bow-knot, set in diamonds. Mrs. Whitney's gift was also Rev. Cleveland, the President's brother, a broach, antique fashion, with a large spray of diamonds. The Charleston Democwatic Club sent a present shipped in a large box, but not shown. Mrs. Hicks-Lord, of New York, gave a gold card case. There were an almost innumerable number of other costly presents, but what they were or who they were from nobody seems to know but Colonel Lamont, and he is too busy to tell. None of the presents were exhibited except those described. President Cleveland's gift to his bride

JOHN KELLY.

The Noted Tammany Chief Expires at His Residence in New York City, After a Long Illness-Blograph cal Sketch.

NEW YORK, June 2 .- John Kelly, the chief sachem of Tammany Hall, died March," from Midsummer Night's Pream. | yesterday afternoon. Mr. Kelly had been ill for seven months. During the last few weeks he seemed to feel comparatively well, but on Sunday at eight p. m. he was taken with an attack of fainting and became weaker afterward. Monday he was worse, but this morning an improvement was apparent. At noon, however, he began to sink, and the approach of the end was realised.

Mr. Kelly's death was painless, although he was conscions to the last. Only Mrs. Kelly and her two children were present when he passed away. Mrs. Kelly was prostrated by the blowand is too ill to see any body. No funeral arrangements have as yet been made.

Late last evening it was announced that the funeral would take place on Saturday at the cathedral. A solemn requiem mass will be celebrated over the remains. Arch hishop Corrigan, who called at the house during the evening, will probably officiate.

[John Kelly was born in New York City April 20, 1822. His father died when he was eight years of age. While a mere lad he attracted the attention of the elder Bennett and was taken into the Herald of fice in the character of an office-boy. He became a great favorite with Bennett and when at length he grew older and determined on learning a trade, so as to better support a large family that was depending on him, Mr. Bennett offered him strong inducements to remain, and on parting with him predicted that he would succeed anywhere. The elder Bennett was as strong a friend of Kelly's as the present Bennett was a bitter enemy. Kelly learned the trade of soap

stone cutting and grate-setting, at which he afterward made a considerable fortune. He proved to be a remarkably shrewd business man, and his faith in the future of New York City was so great that with every \$200 or \$300 he would get he bought a lot up-town; these lots are worth to-day from \$5,000 to \$10,000, and Mr. Kelly has died a millionaire. Though his charity was distributed most secretly, it is estimated that he dispensed \$250,000 in that

Mr. Kelly's first appearance in politics was in 1853, when he was elected aldermen. In 1854 he was elected to the Thirty-fifth Congress. He resigned his seat before his last term was completed to take the office of sheriff, to which he had been above the hearth on the east side of the elected. It was while in Congress that Genroom was a solid bank of cut pansies in | eral Cass, President Buchanan's Secretary various colors, in which the date of the of State, spoke of him as "Honest John " which he has been commonly called since. In 1868 che was a candidate for the mayoralty, but the death of his wife and son during the canvass caused him to withdraw, and he went to Europe, remaining there for three years. During his absence the city was given over wholly to the plunder of the Tweed ring, and on his return prominent men like Mr. Tilden, Hewitt, Horatio Seymour and Belmont sought Mr. Kelly to help in its overthrow. He consented, and while Mr. Tilden and Charles O'Conor attacked the Tweed ring in the Legislature and in the courts Mr. Kelly had a hand-to-hand tussle with them in Tammany Hall, their citadel, and routed them, as is well known. This gave him a prestige which he has held

In 1876 Mr. Kelly was appointed comptroller of the city, and not only stopped the debt of the city increasing, something unprecedented, but actually reduced it \$12,000,000 during his term of office. Kelly retired from the comptrollership in 1880. Bitterly engaged in the local political faction fighting for supremacy in the party he was the target for constant and severe criticism and animadversion, but his integrity and ability were never questioned. Bo sides his importance in local politics he possessed great influence in regard to National affairs, and was a member of nearly every Presidential convention after that of 1860. In 1879 he antagonized the regular Democratic nomined for Governor with such force as to defeat him, running as an independent, and polling over 70,000

MURDERED IN THEIR BEDS. Five People Killed in One Night on a Ranch in Indian Territory.

Coffeyville, Kan., June 2.—Dr. George W. Pyle, his wife, two children and a hired man were all murdered or left for dead in their house at Carr's ranch on Coney river, twenty miles southwest of here in the Cherokee nation, Sunday night. Mrs. Pyle and the hired man were still alive when found by the neighbors, though unconscious, and they will probably die. The fiendish work bears evidence of having been done with an axe or some other heavy, sharp instrument.

Upon the same farm, about a half-mile from where Mr. Pyle lived, a widow woman and her son were found killed in their house on the same night as the Pyle murders. They were also killed with an axe. No cause is assigned for these murders, and, far as is learned, there is no clew to the perpetrators. Mr. Pyle formerly lived in Sedan, Chautauoua County, Kan., and is a respectable citizen. The widow woman and her son are supposed to have been formerly residents of this county. Both of these families were white settlers.

ABOUT TRUFFLES.

How Dogs Are Trained to Hunt These Mysterious Hidden Plants.

Truffles, like mushrooms, belong to the great family of the Fungi, but are a distinct and very peculiar genus. They are cryptogamic (hidden) plants, and subterranean in their habits, their position beneath the soil varying from two or three inches to two or three feet in depth. They have no root, stem or leaf, and vary in color from light brown to black. They are somewhat globular in form, and vary in size from a filbert to a large duck's egg. Their surface is watery, and covered with a skin. Their exact method of growth is unknown. They are regarded as a great luxury by the epicure.

Truffles are mentioned by Juvenal, Pliny, Plutarch and Martial. The Athenian epicures were acquainted with them, and a story is told of a bon vivant who manumitted a whole family of slaves for having invented a de-

licious method of preparing them. France has the credit of producing the finest truffles. Dogs are commonly bred to hunt them, and are called

"Loulous." "The method of 'breaking' them," says a writer, "is to give them for a time pieces of truffles every morning, before they are allowed to partake of any other food. After a certain period, when their appetite for truffles increases, pieces are hidden in the ground and they are made to find them. Thus they are gradually taught their business, though it often takes as long as eighteen months before a dog becomes skilled in the practical art. A first-rate truffle-hunting dog will command as much as twentyfive or thirty dollars, and it appears that of late-years the search for the tubers has been pursued by many persons in France as a branch of sport.

"The action of the truffle-man in stirring up the earth is said to stimulate the growth of a future generation of tubers, though, as above mentioned, it is generally considered that such disturbance of their habits late in the season is not beneficial.

"In some parts of France-Poitou and Perigord, for instance—pigs are trained for truffle-hunting, and it seems that they have better noses than dogs for this work, probably because SHEEP-Rest 475 @ 500 the truffle is naturally more esteemed as an article of food by the pig than the dog, and a pig can do quite as long a day's work as the most lesting hound."- Youth's Companion.

WESTERN GAMBLING.

A Poker Game Wherein Nerve and a Hidden Ace Won Over \$8,000.

[St. Paul Globe.] "Yes, I have seen some nice little games out West," remarked a man whose dark hair was slightly tinged with gray, a few evenings ago as he sat with a few friends who had been discussing the closing of all gambling houses in this city. 'Some very good ones in fact. Many people think the East is the only place where gambling is carried on to any extent, but they want to go out in the cattle country and among the gold mines if they want to see some big games. While in Deadwood, in 1877 or 1878, I don't remember which, I saw a game which set me thinking considerably, and made me wonder if human nerve had a limit. Sunday evenings was then the great time in that city, and every thing was wide open, from the lowest dancehouse to the most palatial rooms in the city. Stud-poker, faro, hazzard and Spanish monte were the principal games played. Every one played occasionally, and a man who never touched a chip was looked on with surprise and almost contempt. The men from the mines were always present and ready to Lake their last dollar on their favorite card. But to return to the game of which I had started to speak. I had gone into a big gambling house and there found one of the most motley crowds it has ever been my fate to mingle with. At a stud-poker table in the rear-room sat a large party of men, among them Walt Owens and Lew Palmer, two men well known among the sporting fraternity as hard betters and nervy men. The game was a big one, and soon all the men but Owens and Palmer had withdrawn from the game. Betting ran high and the other tables were soon deserted, the players coming to where the two men sat, and watching the game with almost breathless interest. The game progressed, and the first card turned up for Palmer was a ten spot. Owens also got a ten, and after looking at the card turned face down bet fifty dollars. Palmer staid. His next card was a seven. Owens gaze rested on a five spot dealt him, but he cheerfully saw the \$100 bet by Palmer. Thus matters went on until four cards lay in front of each man, face up, and one turned down. Not a pair was in sight, and every one thought each man had an ace in the hole.' The betting then began in earnest, and each man must have had an idea that the other was 'bluffing,' or at least it looked Soon there was some \$900 on the table, and Palmer made a bet of \$500. Owens looked at his hand, then at his antagonist. Not a word did he say, but reaching into his inside vest pocket drew out a big roll of bills from which he drew \$5,000. After deliberating a moment, he dropped it in the pot, his face not moving a muscle. Palmer laid his hands on the table in front of him, then pulled a similar amount from his pocket, counted it, and found that it took every cent he had. With a smile he leaned forward and called Owens' bet. Silently the two men turned over the faced card. Palmer had a king, Owens an ace. Palmer glanced at the cards, rose from his seat and remarked, in a calm voice: 'That beats me; Walt, lend me a dollar to get a drink, will you?' and sauntered off."

He Fired the Last Shot. [Baltimore American.]

Nap Casby fired the last gun of the war on the Confederate side in General Lee's army. At the time of the surrender at Appomattox the Federals and Confederates were drawn up in lines facing each other and but a few feet apart. The latter were almost starved, having been without food for several days. While the terms of surrender were being adjusted some very good hogs came along near the line, and, as soon as discovered by Casby, he raised his gun and shot one of them. The shooting of the animal created intense excitement for a brief time, as it was generally supposed that a conflict had been opened by the two opposing forces. The facts soon became known, and Casby was allowed to take his "forage" for the benefit of himself and

MARRIED ON HORSEBACK.

How an Impatient Couple of Lovers Excited a Rural Congregation. [Louisville (Ky.) Special.]

The quiet little village of Henryville, Clark County, Ind., was aroused last night from its usual sleepy condition by a romantic elopement, with many unusually exciting surroundings. While Rev. Seymour Guernsey was holding services in his little church at half-past seven p. m. the congregation was startled by a cry from the door: "Hello, the church!" One of the wardens went to the church-door and soon returned, making the announcement that "a couple at the door wanted to get married in a powerful hurry." Rev. Mr. Guernsey went to the door and found there a ludy and gentleman mounted on horses flecked with foam, and blowing as if from a hard gallop. They gave their names as Martin Mall and Sara Pixley. They exhibited a Washington County license, and asked that the minister marry them in haste. After some deliberation Rev. Mr. Guernsey concluded to perform the cere-

So, with the congregation of the church gathered around, the young couple joined hands without dismounting, and were made man and wife. The young groom breathed easier after the knot had been tied and exclaimed that the "old gentleman," meaning Mr. Pixley, was not far behind, and that he had a race of thirty miles in order to get his bride. Mr. and Mrs. Mall, without further delay or preparation, turned their horses' heads and started on the thirty-mile return trip to their home in Washington County.

AN OPIUM EATER'S STORY.

Crawling Over Red Hot Bars of Iron in His Fearful Frenzy-A Scientific Investigation and Its Results.

Cincinnati Times-Star. "Opium or death!"

This brief sentence was fairly hissed into the ear of a prominent druggist on Vine street by a person who, a few years ago well off is to-day a hopeless wreck!

One can scarcely realize the sufferings of an opium victim. De Quincy has vividly portrayed it. But who can fitly describe the joy of the rescued victim?

H. C. Wilson, of Loveland, O., formerly with March, Harwood & Co., manufacturing chemists of St. Louis, and of the wellknown firm of H. C. Wilson & Co., chemists, formerly of this city, gave our report-er yesterday a bit of thrilling personal experience in this line.

"I have crawled over red hot bars of iron and coals of fire," he said, "in my agony during an opium frenzy. The very thought of my sufferings freezes my blood and chills my bones. I was then eating over thirty grains of opium daily."

'How did you contract the habit?" "Excessive business cares broke me down and my doctor prescribed opium! That is the way nine-tenths of cases commence. When I determined to stop, however, I found I could not do it.

"You may be surprised to know," he said, "that two-fifths of the slaves of morphine and opium are physicians. Many of these I met. We studied our cases carefully. We found out what the organs were in which the appetite was developed and sustained; that no victim was free from a demoralized condition of those organs; that the hope of a cure depended entirely upon the degree of vigor which could be imparted to them. I have seen patients, while undergoing treatment, compelled to resort to opium again to deaden the horrible pain in those organs. I marvel how I ever escaped."

"Do you mean to say, Mr. Wilson, that you have conquered the habit?" Indeed I have."

"Do you object to telling me how?"

"No, sir. Studying the matter with several opium-eating physicians, we became satisfied that the appetite for opium was located in the kindleys and liver. Our next parilla is fully confirmed by the voluntary testing the satisfied that the appetite for opium was located in the kindleys and liver. Our next parilla is fully confirmed by the voluntary testing the satisfied that the appetite for opium was located in the kindleys and liver. Our next parilla is fully confirmed by the voluntary testing the satisfied that the appetite for opium was located in the kindleys and liver. object was to find a specific for restoring those organs to health. The physicians, much against their code, addressed their attention to a certain remedy and became thoroughly convinced on its scientific merits alone that it was the only one that could be relied upon in every case of dis-ordered kidneys and liver. I thereupon began using it and, supplementing it with my own special treatment, finally got fully over the habit. I may say that the most important part of the treatment is to get those organs first into good working coudition, for in them the appetite originates and is sustained, and in them over ninety percent of all other human ailments orig-

"For the last seven years this position has been taken by the proprietors of that remedy and finally it is becoming an acknowledged scientific truth among the medical profession; many of them, how-ever, do not openly acknowledge it, and yet, knowing they have no other scientific specific their code not allowing them to

use it, they buy it upon the quiet and pre-scribe it in their own bottles." "As I said before, the opium and morphine habits can never be cured until the appetite for them is routed out of the kidneys and liver. I have tried everythingexperimented with everything and as the result of my studies and investigation, I can say I know nothing can accomplish this

result but Warner's safe cure." "Have others tried your treatment?" "Yes, sir, many; and all who have followed it fully have recovered. Several of them who did not first treat their kidneys and liver for six or eight weeks, as I advised them, completely failed. This form of treatment is always insisted upon for all patients, whether treated by mail or at the Loveland Opium Institute, and supplemented by our special private treatment,

it always cures." Mr. Wilson stands very high wherever known. His experience is only another proof of the wonderful and conceded power of Warner's safe cure over all diseases of the kidneys, liver and blood, and the diseases caused by derangements of those organs. We may say that it is very flattering to the proprietors of Warner's safe cure that it has received the highest medical endorsement and, after persistent study, it is admitted by scientists that there is nothing in materia medica for the restoration of those great organs that equals it in power. We take pleasure in publishing the above statements coming from so reliable a source as Mr. Wilson and confirming by personal experience what TREE TARMS IN SAN LUIS. we have time and again published in our columns. We also extend to the proprietors our hearty congratulations on the results wrought.

The Rabbit and the Goat.

A Goat once approached a peanut stand that was kept by a Rabbit, purchased five cents worth of peanuts, laid down a dime, and received a punched nickel in change. In a few days the Goat came back, called for another pint of peanuts, and offered the same nickel in payment; but in the meantime had stopped the hole in it with a peg.

"I can't take that nickel" said the Rabbit.

"This is the very nickel you gave me in change a few days ago," replied the Goat. "I know it is," continued the Rabbit, but I made no attempt to deceive you about it. When you took the coin the hole was wide open, and you could see it for yourself. In working that mutilated coin off on you Isimply showed my business sagacity; but now you bring it back with the hole stopped up and try to pass it, with a clear intent to deceive. That is

How Long Statesmne Live.

▲ London physician has published some eurlous comparative statistics on the longevity of public and professional men, of the twenty-five most prominent American statesmen during the last three hundred years was sixty-nine. The average of an equal number of English statesmen was seventy years-practically the same. He thought the latter did more work at an advanced age. The difference in favor of English, as compared with American, political life, was brought out by comparing the ages at death of members of the British Parliament with those of the United States Congress who died between 1860 and 1884. Of our Senators, fiftynine gave an average of sixty-one years; one hundred and forty-six Representatives averaged fifty-five years, and the average for both was fifty-eight. The one hundred and twenty-one members of Parliament averaged sixty-eight years at death.

LAND OF THE MIDNIGHT SUN.

Farm Houses Perched Aloft on Iceland Mountains.

A correspondent writes from Iceland describing a voyage around the island. The flords or bays, in which all but the south coast of the island abound, are narrow arms of the sea, running far in between the mountain chains that radiate from the land like the Angers from one's palm, only not with the same regularity. Not more than a few miles wide at the mouth, they grow gradually narrower as they proceed inland, until terminating at the foot of a smail valley beyond. To get some idea of this lay your hand palm downward upon a table and slightly spread the fingers. Now your hand represents the island and the table the sea, and calling the distance from the tips of the fingers to their junction with the hand twenty miles you have some idea of the proportions, except, perhaps, that the mountains are very high. fraud. My dear Goat, I'm afraid the Everywhere these mountains rise abruptgrand jury will get after you if you are not more careful about little things of

ly from the sea, often standing a perpendicular wall hundreds of feet in height, and then sloping gradually back to the peaks above. Here and there along the sides, on some slope less steep than the rest, surrounded by a few acres of ground, which presents no very striking contrast to the lava waste surrounding it, can be seen the turf-covered huts of the Icelandic farmer; and at the end of the flord—on the web between the fingers stands the cluster of well built houses forming the village which supplies the surrounding country with most of the necessaries of life. These houses are generally owned by foreigners and sometimes by one man-a company of Norwegians who work the fisheries about the island during the summer, or a Danish merchant who may have several trading stations along the coast. Often, on passing the end of the promontories which separate the floris, a small farm can be seen lodged on the slope high above the water, or in some small valleys between the mountains, where none but an Icelander-would think it possible to live. Here, on a spot that cannot be reached from the sea, except in very calm weather, and which is inaccessible from the land several months in the year, these people live, contented and seemingly satisfied to spend their days as their fathers have done before them, though well acquainted, by reading, with other and more inviting countries.

To one who has always lived in a country where night and day perform their proper functions, such strange antics of the meteorological phenomena are, to say A FINE LINE OF CANDIESthe least, decidedly novel.

One hardly knows where to go to bed and, indeed, one, two and three often finds us wide awake as ever, pacing the deck, while the sun, after descending from the west and bowling along the northern horizon for an hour or more, is already mounting the heavens with a long, majes- est line in town. Call and see our tic, eastward sweep.

HE WILL REMAIN.

Daniel Manning Tenders His Resignation as Secretary of the Treasury-Ill Health Assigned as the Reason-The President Induces Him to Withdraw His Decision and Take a Vacation of Four Months.

WARHINGTON, June 5.—Socretary and Mrs. Magining, accompanied by Mr. Joseph W. Miller, Commissioner of Internal Revenue, and Mrs. Miller, will leave Washington this afternoon for Hot Springs, Va. The rumor that the Secretary had placed his resignation in the hands of the President was verified yesterday and the correspondence made public. Secretary Manning's letter is as follows:

"WASHINGTON, May 20 .- My Dear Sir: I have decided to place in your hand, my resignation of the office which you did me the honor to ask me to accept fifteen months ago.

"My reasons for this decision are both public and personal. Since the partial recovery of my health has permitted me to reflect upon the demands of the public service, to which I had given, perhaps too freely, all my strength, and upon the conditions of resuming my labors at your side | tions to unite with the Knights of Labor I have not for a moment questioned what must be my present duty.

"It is not befitting that a department of the Government so difficult and so important should be administered by a convalescent studious of parrying its daily exactions, nor that the watchful control of its enormous influence or the direction of its fiscal policies, even under your wise lead, should be attempted by any one concerned about husbanding his strength.

"The reforms in our fiscal policy which you have maintained and which have been framed and commended to the wisdom of the legislative branch are reforms necessary to our safety, binding in honor, obligatory in the traditions of the Democracy set down with promises in our statute book. Our tariff laws are a needless oppress sion instead of an easy burden. Our currency is a chaos, into which we pour from forced purchases of one of the precious metals a mechanical increment, under a coinage law so ill-judged and untimely that it hinders the opening of our mints to the natural and unlimited coinage of both metals and the free expansion of our gold and silver coin, along with the growing

needs of a mighty people. "All our needful customs revenue might be collected by strictly revenue duties upon a few score articles, instead of by extravagant or prohibitory duties upon more than 4,000 articles. The mere machinery of administration, by its own mass and complexity, breaks down and crushes out the enterprise it assumes to protect. A better currency than elsewhere exists might be had by a few lines of repealing and empowering legislation, followed by two or three years of capable administration of the Treasury, and joined with the present sagacious conduct of our foreign policy by

the State Department "Under the operation of currency laws and tariff laws now in force, which you and the Forty-ninth Congress were elected by the people to repeal and reform, the burdened industries of our country are plunging beavily along a miry road toward foreseen dangers. We talk of arbitrating our respective share of disaster instead of knocking off our self-imposed fetters and releasing a general prosperity. This is not, in my deliberate judgment, a time when the President, can delay to provide or afford to dispense with an actual as well as

a titular head of the Treasury Department. "The fiscal policy of the Federal Government in respect to a debt so large, taxation so pervasive, and a currency which is universal, can not fail of being a chief factor in National and individual well-being. Your own duty, to which you have addressed yourself with such clear and unflinching purpose, the duty of Congress in the premises, and the laws which may yet be enacted for the guidance of the Treasury Department, will require that you be assisted in their administration by an officer capable of full efficiency and unwearied circum-

Permit me, therefore, without hesitation, to accept my temporary disability as a summons to stand aside and make way for one immediately, capable of fulfilling every requirement of the public service.

"Very respectfully yours, DANIEL MANNING. "To the President"

The President's reply is as follows: "EXECUTIVE MANSION, WASHINGTON, June 1, 1886.—My Dear Mr. Manning: I have received your letter in which your

resignation is tendered as Secretary of the

Treasury.
"The sentiments therein contained are entirely in keeping with the devotion to public duty and the loyalty to the interests of the Government which have characterized your relations to the present Administration. I am not surprised, though much impressed, by the concern which you evince for the correction of the abuses and the inauguration of the reforms to which in your letter you allude, and which have been so often topics of our anxious con-

sultations. "I have hoped that the day was at hand when the party to which we belong, influenced largely by faith and confidence in you and in the wisdom of your views, would be quickened in the sense of responsibility and led to more harmonious action upon the important questions with which you have to deal.

"In considering your proposed resignation I should be strongly inclined by my personal regard and friendship and by the value of your services to the country to beg you to at once and entirely abandon vour inclination to relinquish your part of ardous duty. But I am convinced that I should not do this, and that in all I suggest and ask I should have much at heart your

welfare and safety.
"You have placed your resignation in my hands. My responsibility here begins, and know that the responsibility will be met and the wishes of the people of the land fully answered when lask you to postpone for a while any insistance upon the acceptance of your resignation, and that your final conclusion thereon may be delayed until the effects of continued rest and freedom from official care upon your condition may be better tested. I therefore earnestly request you to accept a leave of absence until the sire it, the question of your resignation may be resumed with, perhaps, better means of judging all the facts and probabilities which should be considered in its determination.

"Hoping that you will consent to this suggestion, and trusting that your engouraged progress toward restoration to Yealth may continue, I am, faithfully, your friend, "GROVER CLEVELAND. "Hon Daniel Manning, Secretary of the Treasury.

Secretary Manning has accepted the President's suggestion, and will allow his resignation to lie over until his leave of absence shall have expired. Assistant Secretary Fairchild has been requested to continue to act as Secretary until that lieve the President entertains this opintime and has consental to do an

FINISHED THEIR WORK.

Close of the Knights of Labor Convention After a Ten Days' Session-A Proposed Settlement of the Differences with the Trades Unionists Looked Upon with Disfavor by the Latter.

CLEVELAND, O., June 4.-The Knighte of Labor held another session yesterday morning, which was devoted to election of the two members of the executive board to fill the remaining vacancies. It is stated that all dissensions in the order were amicably settled. Joseph B. Buchanan, of Denver, Col., and Ira Aylesworth, of Bultimore, were the successful candidates. These two gentlemen, together with Dakid B. Gibson, of Hamilton, Ont., who was elected Wednesday afternoon, are most ardent I owderly men. The executive board on the subject of centralization, as exemplified by the Home Club principles, now stands seven against the Home Club, three for it and one doubtful. It is stated that something has been

done to stop indiscriminate striking and boycotting, but what are the methods to be used have not been made public. Yesterday afternoon the assembly adopted an address inviting all labor organiza-

in the struggle against the tyranny of wealth. The address, in closing, says: We have received a communication from a committee of the National officers of some of the National and International trades unions requesting certain specific legislation at our hands, but as we believe that the object sought and stated in the preamble to the communication above referred to can best be accomplished by a conference between a committee of this association and a committee of any other organization, and as the propositions contained therein are inconsistent with our duty to our members, we therefore defer

action upon said propositions until a conference of committees can be had. The basis upon which we believe an agreement can be reached would necessarily include the adoption of some plan by which all labor organizations could be pro-tected from unfair mea-men expelled, suspended under fine or guilty of taking the places of union men or Knights of Labor while on strike or while looked out from work, and that, as far as possible, a uniform standard of hours of labor and wages should be adopted, so that men of any trade enrolled in our order and men of trades-unions may not come in conflict because of the differences in wages or hours of labor. We also believe that a system of exchanging working cards should be adopted, so that members of any craft belonging to differentforganizations could work in harmony together—the card of any member of this order admitting to work in any union shop and the card of any union man admitting him to work in any king

Labor shop. We further believe that, upon a demand for increase of wages or shorter hours of labor made by either organization, a conference should be hold with the organized laborers employed in the establishmenta When the demand for increase of wages or reduction of hours is contemplated, action upon a proposed reduction of wages or other difficulty to be agreed upon in like manner, and that in the settlement of any difficulties between employers and employes the organizations represented in the establishment shall be parties to the

terms of settlement. The trades-imionists declare that the address is unsatisfactory to them. The general assembly, before adjourning, issued an address denying that the Home Club was engaged in plotting against the welfare of the order, and saying that the very best of feeling prevailed among all the delegates. An address was also issued to the grangers complimenting them and ask-

ing their aid. The latter part of the afternoon session was given up to a veritable love feast, and at five o'clock the convention adjourned sine die, having in the ten days' session accomplished all that the most sanguine

had anticipated. TAXING BOGUS BUTTER.

His tall, graceful form was still bending over Miss Kent; he did not lose an opportunity of murmuring something in her ear, utterly forgetful that the watchful Chapmans were present. His dark face and gray eyes were animated and pleased. Thus much I could see in the mirror which reflected both their forms. I could not distinguish the expression of Miss Kent's countenance. I fancied, however, that she was distant, yet sweet; that Varens found her indescribably fuscinating, as I had done.

This was several months after Miss Kent had come to our home. Mr. Varens had seen her almost every time he had called. and he had taken occasion to call quite often. When we were out of the hearing of those in the parlor, I said:

"Mr. Varens, are you, engaged to Miss Chapman?

His eyes were clear and honest as he "No. Have I acted as if I were?"

"But the world says so." "Yes; thanks to the machination of Mrs. Chapman, and because I have made it my home there since my return from Europe. > "Promise you! Does not my own life depend upon it?"

"Why had you not, then, offered your life?" I could not resist saying. Did it require a shock to make you know how dear she is?"

The sorrow upon his face haunted me long after he had gone.

"I have offered her the only love of my life, and she refused it?' he said. He bowed over my hand and went away. I feared his task was hopeless. How could be ever find her? I did not know the power and perseverance of the man. I wished that I could have given him some hope of her love. For myself. I felt sure that she loved him. It seemed to me that, if I could see her, I would break down this false pride that prevented her making happy the man whom, she loved, and who was

A learned judge tells an amusing story viction. He says he was trying a murder case a few days ago; down in one of the wire-grass counties, and experienced great difficulty in getting a jury. Eleven jurors had been sworn in, and in the next panel was brought in a small, lean, lank pants being above his knees, his shirt open both back and front, and the aforesaid pants being held up by a single brace. now lies in a very critical condition. The solicitor proceeded to ask the usual questions in some cases, as follows:
"Have you, from having seen the crime

committed, or having heard any of the on the head and face besides internal testimony delivered under oath, formed or expressed any opinion as the guilt or innocence of the prisoner at the bar?" The tatal.—Dexter Leader. single-brace fellow, in a clear and distinct voice, answered: "Not any." "Have you any prejudice or bias resting on your mind for or against the prisoner at the bar?" "I hain't." "Is your mind perfectly impartial between the State and the accused?" "Hit air." "Are you conscientiously opposed to capital punishment?"

The judge did not like the juror much, but, it being late, and the jurors scarce, he was "put upon" the prisoner in the usual manner, the solicitor saying, "Juror, look upon the prisoner; prisoner look upon the juror." The juror was quite near the prisoner, and when this command was given he bent over him, scanning him from head to foot intently for some minutes, and then turned to the judge, and fall. said in a firm, solemn voice, "Yes, judge, I think he's guilty."

LOOK THIS OVER AND SELECT WHAT YOU WANT!

Last spring we offered some bargains in Second Hand Stoves and they went off like hot cakes. Every one seemed ready to take advantage of the exceedingly low prices at which the goods were offered, and in ten days every bargain was closed out. This week we show you some better bargains than was then offered.
