### Local Dispatches.

#### Christmas

Two weeks from Sunday.  
The rain spoiled the skating.  
So Lyon is talking electric lights.  
The Dorcas society will meet with Miss Myrtle Finch on Saturday afternoon.

The skating has been very fine on the pond the past few days.  
Mrs. Ed. Ball of Webster has been visiting her sister, Mrs. I. J. Cook, for a few days.  
Mrs. Thos. Brough of Kalamazoo spent the last of last week with Benj. Allen's family.

Chas. Grimes is teaching school in the Hicks district, the school he taught last winter.  
There are 23,000 papers published in America, through which 200,000 men find employment.

Miss Grace Young spent Monday night with her friends, the Misses Laura and Mollie Wilson.  
A quilting bee at Miss Etta Martin's last Saturday afternoon was well attended and all had a pleasant time.  
Mrs. Wm. Hendee and daughters Flora and Blanche are visiting friends and relatives in Ann Arbor this week.

Nellie Conner who has been in Deerfield for some time, has returned to her home near here to spend the winter.  
G. A. Sigler has something to say this week to his patrons and all who are in need of furniture, etc. Read his adv. on page 5.

Miss Dealie Allen returned to her home at Lansing on Monday after a two week's visit with friends and relatives at this place.  
A man near South Lyon paid out \$7 to have his beans re-threshed, and received just \$4 worth of beans. He does not think it pays to thresh beans the second time.

Now that the cold weather is upon us, and much fire is needed to keep the house warm, see to it that the stove pipes and the chimneys are all safe. To be burned out of house and home is not at all pleasant.  
From the Musical Faculty of Albion College, Michigan.—We can most heartily recommend Mr. George W. Oles as a musician of most excellent talent and ability, and one who will please not only lovers of the violin but all who are least interested in good music.

As announced last week, the Kir-mess was to be held on Friday and Saturday, Dec. 9 and 10, but it has been decided to hold it only on Saturday, Dec. 10, afternoon and evening. Tea will be served from 5 to 8, at 15 cents. Everybody remember the date, and come.

The first lecture on the Dorcas lecture course was given in the Cong'l church last Tuesday evening by Z. Grenell, D. D., of Detroit. It was illustrated by many stereoptical views, the pictures being taken by him in his travels in the Holy Land last year. Mr. Grenell's subject was "Palestine." Although the day had been very stormy and the night very bad the church was full, and the lecturer had a very attentive audience. The pictures were thrown on a canvas and were very large and fine, the light used being the calcium light and the machine used was of the finest make. The Rev. spoke for one hour and fifty-five minutes, yet it did not seem to be more than an hour, and all were sorry when he had finished. Any society that desires a grandly illustrated lecture can do no better than secure Mr. Grenell. We not only see the country, but feel almost as if we were traveling the roads of the Holy Land and Palestine.

New mortgage sale in this week's issue.  
Read the village ordinance on page eight.

J. Bowers purchased a very fine Plymouth rock cockerel from the A. Tucker poultry yards. The bird took first premium at the Jackson county fair, and is a fine one.  
Have you seen that magnificent doll in F. A. Sigler's window? It is a beauty, and will be given away before the holidays to some purchaser of a dollar's worth of goods. Read his adv. on page 8.

F. L. Andrews,  
Dear Sir:  
Not having of late read in your worthy paper, any proceeding of our Common Council, and believing that when they, who are elected by the people to work for their interest, perform some noteworthy and honorable deed, should receive notice. I ask you, through the press, to inform the citizens of this place that our Council on last Thursday evening, having the happiness and prosperity of Pinckney in view, accepted the bond presented by Mr. Turner, thus allowing a saloon to be opened in the basement of the hotel. The law says the securities shall justify in real estate situated in the county, in a sum equal to the amount of the bond, over and above all indebtedness, and all exemptions from sale or executions; also that the bar in the saloon shall be in full view from the street.  
We are to be congratulated that we have a body of men so powerful as to annul the laws made by the legislature. The members of the Council are men whose heads are silvered with the frosts of time; who are standing with one foot in the grave, and the other on the brink; realizing it may be that they have not many years to work for the good of mankind, wish to perform as many grand and noble deeds as possible in the short time they remain with us. Pinckney should be proud of its City Dads.  
Oh, that we could see ourselves as others see us,  
CITIZEN.

#### Do not miss the Oles concert.

Fenton is to have a gold cure institute.  
The skating rink was opened on Saturday evening.  
Mrs. I. J. Cook and daughter spent the last of last week in Webster.  
Some Brighton young men are investing their money in Detroit city lots.  
Dexter young people will organize a banjo and guitar club in the near future.  
Pontiac's new bank will open its doors on or about Jan. 2.—Pontiac Initial.  
About \$300 was received by the township treasurer in taxes on Friday last.  
It has been decided that no State Fair will be held next year, owing to the World's Fair.  
The supplement of the supervisor's proceedings of this county will appear with our next issue.  
Three young men, tramps, were arrested in Chelsea last Friday evening for a theft in Dexter.  
Leap year is rapidly drawing to a close. Girls, you have only a short time left in which to propose.  
J. Bowers says he knows it pays to advertise, as his advertisement in the DISPATCH brought him many purchasers.

We issue a supplement this week to give F. E. Wright the space he desires in which to inform his patrons of big bargains. Do not fail to read the supplement, both sides.  
A very pleasant evening was spent at the millinery social at Miss Lillian Brown's last Thursday evening. The trimming of the hats by the men made a great deal of sport.  
This office has been turning out a large amount of job work the past two weeks. Our business men evidently begin to believe there is money in using printer's ink.  
The residence of Dick Shehan in Genoa burned on Saturday last with nearly all of its contents. The fire caught from a defective flue in the attic. Insurance a little over \$300.  
By the way the holiday goods are arriving at this place, one would suppose that our dealers expect a big trade this year. They do expect it in fact, and are prepared to supply all customers with whatever they want in the holiday line. Look over our adv. department for big bargains.

#### An Encouraging Letter.

Mr. Editor:  
Enclosed find one dollar, for which send me the DISPATCH one year to—, address the same as ever. Absence from home, and sickness is why I did not renew before. I cannot get along without the DISPATCH for it is like getting a letter from home each week, as Putnam is my native town. A merry Christmas to you all.  
An old Subscriber.

#### Viola Concert.

At the M. E. church Saturday evening, Dec. 17, 1892. Mr. Geo. W. Oles the young American violinist, who gave us a recital under such unfavorable circumstances two years ago (inclement weather and short notice) has consented to come here from Jackson the evening of the 17th. All who heard him before will not fail to hear him again, and those who have never heard him should not fail to be present. Mr. Oles is a violinist of wonderful genius, and that he is appreciated is shown by the fact that he is called back for return dates, he having been at Grand Rapids and Three Rivers four times and many other places in the state two or three times. Do not miss this chance of hearing one of the great violinists of the age.

Mr. G. W. Oles showed remarkable technique, rivaling the great Remyeny and Ole Bull.—The Daily Telegraph, Kalamazoo, Mich.

And now, my boy, if men tell you that trades are crowded, and so many carpenters, and blacksmiths and SHOEMAKERS and painters, and shoemakers, and other trades keep wages down, pay no attention to such talk. Take the trade which you seem fitted for. Begin with a determination to learn it thoroughly, and to become the best workman in the shop. Don't be satisfied to skim along from one week to another without being discharged, but make your services so valuable by being such a thorough workman, that your employer cannot afford to let you go. There is always room at the top.

Recently the finding of some 50 skeletons on the farm of Luke Kelly at Ironton, Ohio, attracted wide attention. At first it was supposed the remains were victims of river pirates, but the late discovery of prehistoric implements fixed them as the skeletons of mound builders. Interest in the discovery spread, and it is now an established fact that at Proctorsville, a few miles above Ironton, are the ruins of a buried city. The streets were paved; there were aqueducts and many evidences of refinement. The city must have been large, though a large portion of it must have slipped beneath the bed of the Ohio river. It is believed that proper excavations would reveal a world of treasures.—Ex.

While conversing with a prominent school instructor recently, he informed us that the greatest drawback and hindrance to practical education today was the light, trashy reading that some of the scholars indulge in after school hours. The country is flooded today with reading, books and papers, that are fit only for the stove. The more one reads of them the worse off they are. A great many of the crimes that are committed today are caused by the low reading that is indulged in by the young—it fills their minds with nothing but what is vile—blotting out any spark of good that might have been in them. On the other hand there are thousands of books and papers that are full of good wholesome reading, interesting to both young and old. The scholar, when he enters the school or college, cannot but show out the kind of reading he has been in the habit of indulging in. The scholar who has been in the habit of reading good books, newspapers and magazines, will have a knowledge of things in general, that the one who reads dime novels, Saturday Night's, Police Gazette's, etc., cannot or will not have. The parents of the children today can do much toward educating them in furnishing them nothing but good books and papers, and forbidding their reading trashy stuff that is worse than no reading at all. The child may rebel, but in after years he will be thankful that his mind has been stored with useful information.

**THE CORONA OF THE SUN.**

**Its Origin May Be Due to Some Electric Manifestation.**  
One of the greatest mysteries of science is the magnificent display of coronal streamers and soft banners of light that is seen around the totally eclipsed sun. Several recent investigations tend to show that this wonderful phenomenon is of electric or magnetic origin. M. L. Pupin, of Columbia college has just furnished most suggestive facts bearing on the question through a series of experiments on electric discharges in imperfect vacua. Photographs of such discharges, made by Mr. Pupin, bear an astonishing resemblance to the solar corona, says Youth's Companion. Inasmuch as the space immediately around the sun must always necessarily contain large quantities of vapors and meteoric dust, it does not seem difficult to conceive that a condition of things exists there which is suited to electric manifestations on an immense scale.

Yet, after all, when we think of the tremendous energy of the sun, which is able to make daylight upon the earth, to warm with its life-supporting rays planets that circle around it at a distance of tens and hundreds of millions of miles and to awaken the magnetism of our globe until the air is aflame with auroral lights, we can hardly wonder that it should cause the nearer regions of space around its own sphere to glow with strange radiance.

**An Important Invention.**  
A recent English invention of great importance to navigators is a hermetically sealed chronometer to prevent the detrimental effects of the atmosphere and moisture on the mechanism. The invention consists of hermetically closing the casing of the chronometer, doing away with the keyhole through which the air and the moisture gained access to the works and effecting the winding up of the chronometer by providing a flexible elastic diaphragm.

**Pronounced Hopeless Yet Saved.**  
From a letter written by Mrs. Ada E. Hurd, of Groton, S. D., we quote "Was taken with a bad cold, which settled on my lungs, cough set in and finally terminated in consumption. Four doctors gave me up saying I could live but a short time. I gave myself up to my Savior, determined if I could not stay with my friends on earth, I would meet my absent ones above. My husband was advised to get Dr. King's New Discovery for consumption, coughs, and colds. I gave it a trial, took in all eight bottles; it has cured me and thank God I am now a well and hearty woman." Trial bottle free. F. A. Sigler's drug store. Regular size, 50c and \$1.00.

**Cleveland's Cabinet.**  
Politicians are already figuring on the personnel of President-elect Cleveland's Cabinet. They are good for the purchaser and members of his family and are now on sale at all ticket offices of the Company—Price, \$20.00. 47-52

Mortgage Sale.

Default having been made in the conditions of a certain mortgage (whereby the power therein contained to sell has become operative) executed by Samuel M. C. Hinchey, unmarried, of the township of Putnam, Livingston County, Michigan, to Marquis Nash of the same place aforesaid, dated the seventh day of November, A. D. 1892, and recorded in the office of the register of deeds of the County of Livingston, State of Michigan, on the eleventh day of November, A. D. 1892, in Liber 59 of Mortgages, on pages 572 and 573 thereof. It being expressly provided in said mortgage that should any default be made in the payment of the interest or any part thereof, or of any installment of principal or any part thereof, on any day whereon the same is made payable, and should the same remain unpaid and in arrears, for the space of sixty days, then and from that date, that is to say after the lapse of the said sixty days, so much of the principal sum of two thousand dollars, mentioned in said mortgage, as remains unpaid, with all arrearage of interest thereon, should at the option of said mortgagee, his executors, administrators and assigns, become due and payable immediately thereafter. And default having been made in the payment of one installment of principal of one hundred dollars, which by the terms of said mortgage became due and payable on the first day of November, A. D. 1891, and more than sixty days having elapsed since said installment of principal became due and payable, and the same nor any part thereof not having been paid, the said mortgagee, by virtue of the option in said mortgage contained, does consider, elect, and declare the principal sum of two thousand dollars secured by said mortgage, with all arrearage of interest thereon, to be due and payable immediately. There is claimed to be due on said mortgage at the date of this notice, the sum of Two Thousand one hundred thirty-two dollars and thirty six cents (\$2132.36); and no suit or proceeding at law or in equity having been instituted to recover the debt secured by said mortgage or any part thereof, notice is therefore hereby given that on Saturday, the fourth day of March, A. D. 1893, at ten o'clock in the forenoon of said day, at the west front door of the court house in the village of Howell, in said county (that being the place of holding the mortgagee's premises to be sold or foreclosed by sale at public vendue, to the highest bidder, of the premises contained in said mortgage) for so much as may be necessary to satisfy the amount due on said mortgage with interest and legal costs) that is to say: All that certain piece or parcel of land situate and being in the township of Putnam, in the county of Livingston, and state of Michigan, and described as follows, to-wit: The East half of the South East quarter section number one (1) north of range number four (4) East, and containing eighty acres of land according to the United States survey thereof.

A POPULAR FAMILY.

JENNIE: "How is it, Kate, that you always catch on to the last new thing? Do what I may, you always seem to get ahead of me."

KATE: "I don't know. I certainly do not make any exertion in that direction."

JENNIE: "Well, during the last few months, for example, you have taken up painting,

without any teacher; you came to the rescue when Miss Lutzger deserted her Debarte class so suddenly, and certainly we are all improving in grace under your instruction; I heard you going to the circus, and I saw the chair made mistakes in playing baseball; you seem to be up on all the latest fads, and know just what to do under all circumstances; you entertain beautifully; and in the past month you have made me feel so comfortable, you take me to your physical culture exercises. Where do you get all of your information from in this little cut-of-the-way place—for you never go to the city? Is your "why" ready, you will make me yearn. I have only one source of information, but it is surprising how it meets all wants. I've seldom heard of anything new but what the next day I have my magazine full of information on the subject—magazine? Not Magazine! A great treasure it is to us all, for it really furnishes the reading for the whole household; father has given up his magazine that he has taken for years, as he says this one gives more and better information on the subjects of the day; and mother says that it is that that makes her such a famous housekeeper. In fact, we all agree that it is the only really FAMILY magazine published, as we have sent for samples of all of them, and find that one is all for men, another all for women, and another for children only, while this one suits every one of us; so we need no other one instead of several, and that is where the economy comes in, for it is only \$2.00 a year. Perhaps you think I am too lavish in my praise; but I will let you see some of the better stuff, so I'll send to the publishers, Wm. Jennings Demorest, 15 East 14th Street, New York, for a sample copy, and I shall always consider that I have done you a great favor; and may be you will be cutting us out, as we say we have the reputation of being the best informed family in town. If that be so, it is Demorest's Family Magazine that does it."

Also the southeast quarter of the southwest fractional quarter of section number thirty (30) in township number one (1) north of range number four (4) east, containing forty acres of land more or less. Also beginning at the south quarter part of said section number thirty (30) running thence north seventy-three rods and six feet on quarter line, thence east five rods and six feet on quarter line, thence south on line of lot to section line, thence west to place of beginning containing thirty-five acres of land more or less. # DISPATCH SUPPLEMENT.

## "Editing with the Scissors."

A mistaken idea prevails that the use of the scissors at the editor's desk is mere child's play, a sort of hit or miss venture, requiring hardly any brains and still less judgement; that the promiscuous and voluminous clippings are sent in a batch to the foreman and with that the editor's duty ends and that of the foreman's begins.

Instead of this the work requires much care and attention, with a keen comprehension of the fact that each day's paper has its own needs. The exchange editor is a painstaking, conscientious, methodical man, always on the alert quick in apprehension, retentive in memory, shrewd in discernment. He reads closely, culls carefully, omits and amends, discards and digests, never ignoring the fact that variety is a great essential. There are sentences to recast, words to soften, redundancies to prune, errors to correct, headings to be made, credits to be given, seasons to be considered, affinities to be preserved, consistencies to be respected. He knows whether the matter is fresh or stale, whether it is appropriate, and whether he has used it before; he remembers that he is catering for many tastes; he makes raids in every direction; he lays the whole newspaper field under contribution; he persistently "boils down," which with him is not a process of re-writing, but a happy faculty of punging without destroying sense or continuity.

His genius is exhibited in the departments, the items of which are similar and cohesive—in the suggestive heads and sub-heads, in the sparkle that is visible, in

the sense of gratification which the reader derives. No daily paper can be exclusively original. It would die of ponderosity. Life is too short, and hence an embargo must be laid on the genius of its rivals. A bright clipped article is infinitely better than a stupid contributed article. The most successful paper is the paper that is intelligently and consistently edited in all its departments, whether by pen or scissors.

The great-business world is constantly calling for volunteers. The faithful effort, the inflexible purpose, the indomitable will, always find a field of labor. In the professions, in every mart of trade, in every avenue of industry there is an increasing demand for young men of energy, ability and character. No idlers are wanted. No McCawabers waiting for something to turn up, are ever sought for. None but those who are anxious to roll up their sleeves and put their shoulder to the wheel need venture to apply. Leaders are wanted. They who now rule and manage, will soon pass away, and their places must be filled from the ranks of the young men to-day. And who shall be the lucky ones? There is no royal road to success. He who would

win must work. Then arise young man and look about you. Quit the society of the idler. Choose an honorable calling. Educate yourself for a life of usefulness and rest not until you become a leader in that calling, whatever it may be.
