Pinckney, Livingston County, Michigan, Thursday, June 12, 1913

No. 24

## The Farm Name a Trade Mark

The advantage of having the farm home named and using the name on the business stationery has often been discussed in these columns. Desirable as that has been heretofore, a law passed by the Legislature recently adjourned makes it still more desirable, since it is designed to prevent a confusion of farm names in the same section of the country.

This law provides that owners of farms may have registered with the county clerk any name they may select for their farm or ranch, and gives them the exclusive right to use such names in any county. This will prevent confusion of names to a very desirable degree and will also enhance the value of the name of the farm as a business trade-mark.

It has been demonstrated in many instances that where products are grown upon the farm which may be so packed as to reach the consumer in original packages, it pays to have the name of the farm where the commodity was grown on the package, particularly if the quality is kept at high standard at all times, since customers using a satisfactory article so marked will be sure to want more of the same thing. It would be the part of wisdom for Michigan farmers to take advantage of this law when in goes into effect and register their farm trade-mark with the county clerk, and in the meantime it would be well to consider suitable names for the purpose.—Michigan Farmer.

## Michigan Town Booster

Don't work for a bigger town merely—work for a better town. Which are you trying to do—boost this town or bust this town?

Try to say a good word about the town and it will soon be a habit, not an effort.

Don't be satisfied merely to live in this town—help make it a better town to live in.

Don't you ever believe that every knock is a boost; but every failure to boost is to knock.

Sometimes opportunity knocks at a man's door and he doesn't hear it because he is doing so much knocking himself.

## Mrs. Mark Bell

Mrs. Mark Bell, an old and respected resident of Pinckney, died at her home near here, Friday, June 6, 1913, after a lingering illness. The funeral was held from the St. Mary's church, Monday morning, June 9. Obituary next week.

## A Narrow Escape

A bird flew into the barn Tuesday evening as Fred Hemmingway was milking, frightening the cow so that she kicked, striking Mr. Hemmingway in the back of the neck, nearly killing him. The doctor was hastily summoned and he is resting as comfortably as can be expected at this writing.

## Notice

During the months of June, July and August, the Unadilla Mills will grind feed only on Tuesday, Thursday and Saturday of each week. A. J. Gorton.

## Remain in School

### Passing the Eighth Grade Will No Longer Exempt Pupils

Every child in the State of Michigan under the age of sixteen must be in school or regularly employed, without regard to whether or not he or she has passed the eighth grade, according to an amendment of the compulsory school law which Governor W. N. Ferris has recently approved. Heretofore those children who had passed the eighth grade satisfactorily were exempt from the provisions of the law regardless of their age.

Beginning with August 15, any child claiming exemption on account of having passed the eighth grade must secure work permit from the county commissioner of schools or from the graded school superintendent and must be regularly employed at some lawful work if physically able to do so. This law, it is expected, will have a decided tendency to keep boys and girls in school for a longer period and an increase in high school enrollment is insured.

## Local News

See Dancer's suits before you buy. It means dollars saved.

Lotta Winter of Fenton is visiting at the home of her aunt, Mrs. E. G. Fish.

Mrs. C. Lynch, Mary and Bernardine were Jackson callers last Thursday.

There are three things a man cannot do to the satisfaction of other men: make love, poke a fire, and run a newspaper.

Miss Hazel VanSyckle, Mrs. Wm. Nielson and Mr. and Mrs. B. G. Isham of Plainfield were Sunday guests at the home of Mrs. E. G. Fish.

Clifford Dey visited in Handy last Thursday and his sister Mrs. Ivan Fowler returned home with him and visited her parents a few days.

George and Olin Marshall and their families of Gregory were callers at the home of H. A. Fick the first of the week. They made the trip in their new autos.

Mr. and Miss Nichols, Mr. and Mrs. J. M. Hall and Miss Peterson of Handy were callers at the home of C. O. Dey one day last week.

Commissioner Maude Benjamin has been notified by Supt. L. L. Wright, that the teachers would have to be examined in Agriculture at the August examination. That subject can be taken up at Summer School at the State Normal.

Any person who desires to purchase a set of Encyclopedias, international, can find a set of fifteen volumes in dark leather binding and in good condition, for the low price of ten dollars, by calling at the home of Chas. Love, Pinckney, Mich.

Will Dunning was in Charlotte last Friday and while there secured another imported French Percheron Stallion. Will recently purchased an imported Belgian Stallion of the same parties and now has two of the best horses to be found in this part of the country. Those interested are invited to call and see them.

## Commencement Exercises at Pinckney

The commencement exercises of the Pinckney high school will be held at the opera house, Thursday evening, June 19. The following is the program and class roll:

## SMART WITHOUT FUSS.

NEW FROCKS FOR LITTLE GIRLS SLIP ON LIKE COATS.

No Cause to Complain of Lack of Variety in Children's Dresses This Season—Simplicity the Watchword.

Certainly no one will have cause to complain of any lack of variety in children's frocks this season. They are as original and show as much individuality as those designed for their

Frocks and suit for a smart girl.

elders. There is no restriction as to material, and, as to design, both the coat dress and the long waisted effects are about equally popular. Frills and fluffy ruffles do not seem to belong to the children of nowadays, the smartness of their frocks being attained through good lines and simplicity, though not necessarily, severely.

An effective design for a small girl is here sketched. A telling point in its favor is that it slips on like a coat, buttons down one side and is belted in loosely with a soft crushed sash, which, in its treatment, forms the feature of the frock. White sponge or ratine is used, cut in one piece from neck to hem. The opening down the left side is curved from under the collar, and has the lower corners rounded off, leaving a very short notch in the skirt. The sleeves are long and easy fitting, set into dropped armholes under a corded seam. Blue or tan colored ratine may be used for the round turned back collar and cuffs, with the buttons along the side opening to match, or it may be left all white. A nine-inch width of mesaline will be better and softer than ribbon for the sash, which is tied loosely about the waist with one end run through the eyelet in front and knotted under the opening.

## Fashion's Fancies

The light laces—shadows and so on—are the kinds promised for spring.

A tailored shirtwaist of white silk brocade is worn with the carefully tailored suit.

Some of the new negligees are so sheer that it is necessary to wear a soft finished loose slip undergarment.

Some of the newest veils have hexagon meshes and hand run borders—the borders to be worn high on the hat.

A pretty boudoir robe is of a shell pink charmeuse with a half girdle of turquoise blue velvet holding it in place.

Lingerie frocks of embroidered net, batiste, voile or crepe have broad girdles of silk or satin. Frequently this touch of color is repeated at the neck.

Striped materials are extensively used for street costumes; and a Paquin model of gray and brown ribbed material has a modified bolero jacket, with revers, collar and cuffs of brown and white checked silk.

Young girls are wearing long, narrow straw hats trimmed with ribbon stretched in two widths across the crown from the front and extending out behind in two loops. A tiny bunch of bright flowers is placed in the front.

### Awning Choice.

In selecting the awning cloths, green and white is the best color, and is always effective against a greater number of paints than any other color.

## SHOWS SOME NOVEL IDEAS

Handkerchiefs for This Season Are Dainty, and Many Original Designs Are Seen.

All is astir in the handkerchief market. New samples are being received, lines for roadmen arranged and plans completed for the coming season. As usual, absolute novel ideas are few and far between, but the desired element of novelty is found in new and clever interpretations of old motifs.

The one corner idea continues to hold the center of attraction. The features of this season's productions are daintiness of the designs and their careful arrangement so as to extend up into the body of the handkerchief, instead of spreading out at each side, as in former seasons.

One-sided designs are again in evidence, and will find favor by adding the spice of variety.

The Longfellow initial won such widespread favor last season that its position in this season's lines is practically secure. Many new Longfellow designs are shown surrounded by elaborate decorations, but the simpler, daintier effects will have first place in popular esteem.

The oriental initials which made their appearance last spring are again featured, and as the oriental influence is pronounced in women's wear they should find even greater favor than ever before.

The usual big movement in simple initial handkerchiefs, both script and blocked, is expected. The dainty undecorated letters are indicated for a slight preference over the decorated ones. Among the daintiest initialed numbers are those finished with a tiny Armenian lace edge.—Dry Goods Economist.

### In the Nursery.

One of the handiest articles a young mother can have in the house is a low hall tree, which should be cut down to be only three or four feet high, and will be one of the most convenient pieces of furniture, for on it can be slipped the little long dresses and petticoats, which are most convenient when always within reach. Then it is a good way to air the little articles that come from the laundry.

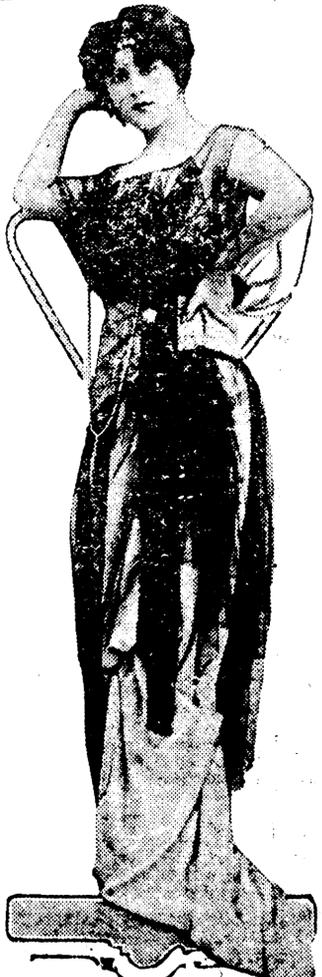

### Old China Revived.

A revival of old china, the original of which an importer saw in a Dresden museum, has led to a cross-stitch embroidery to match its design; the embroidery, of course, appears on the table sets, which are to be used with the china. The cubist note in the decoration accounts for the popularity of these.

### Smart Negligee.

Embroidered crashes and printed linens are the smartest materials for men's negligee shorts. A white or natural ground is best, and the neat, detached fixtures are in strong colors, such as brick tangerine, brown and apple green.

## EVENING GOWN.

Lemon-colored charmeuse covered with black maline. Waist and yoke of skirt trimmed with heavy duchess lace.

## TOOLS FOR A GARDEN

Implements Are Demanded for Proper Cultivation.

Old-Fashioned Hoe and Rake Will Not Supply All the Needs of the Up-to-Date Gardener—Some Good Ones Are Illustrated.

(By C. S. MILLER.)

The growing of vegetables and fruit has become so important that improved tools are now demanded for proper cultivation. In order to get the very best results cultivation must be carried to the limit and the old-fashioned hoe and rake will not supply all the needs of the up-to-date gardener.

Those shown in the accompanying picture are all extremely useful, and as they cost but a trifle nobody who expects to do the best work in a garden can afford to be without them.

No. 1 is the hoe, and is remarkable for the great number of uses to which it can be put in both field and garden.

No. 2 is especially useful for covering seeds and for heavy weeding.

No. 3 is a combined hoe and rake and enables the operator to do either hoeing or raking without laying aside one tool and taking up the other.

No. 4 is a hand weeder to scratch weeds out of flower beds and pots.

No. 5 is one of the most useful tools that can be used. It is extremely

Improved Garden Tools.

useful, not only in spading, but in cutting out weeds close to large plants and trimming walks and beds.

No. 6 is a handy little tool about the flower bed. You can transplant, pulverize and mix earth preparatory to planting, loosen the earth about plants and do numerous other things with it.

### Clover Bloat.

Bloat in cattle generally comes as the result of pasturing clover, though it is a fact that in some cases ordinary grass pasture will produce the same results if it is rank when cattle that have not been used to it are turned in. The importance of getting cattle used to clover while it is dry cannot be overemphasized.

It may be necessary in some instances to turn them in for an hour or two only during the middle of the day, and continue this for two or three days, so that the ravenous edge for the new clover is taken off their appetites. Under no circumstances should they be turned from a dry lot when they are hungry into a clover field.

### Good Bedding for Horses.

A good way to keep a horse clean in the stable is to clean out all dirt, etc., and then cover the floor about three or four inches thick with dry sawdust, as far back in stall as the horse usually stands, then cover the sawdust with straw, or bedding that you may use. The sawdust will absorb the moisture, and therefore make the other bedding last longer in case it is scarce. The sawdust should be replaced by fresh occasionally.

### Fertilizing Properly.

Farmers are paying out millions of dollars each year for fertilizers. Probably the greater part of this money is well spent, but it is possible that it might be better spent by a more careful selection of the goods used, by adapting the fertilizer to the crop and soil, and by buying on the basis of plant food they contain rather than by seeking goods that sell at a low price.

### Good Disinfectant.

The most convenient and cheapest of all disinfectants to use in the cellar is quicklime. It may be placed in dishes or cupboards, or scattered loose in dark, damp corners.

### Crop in Poultry Yard.

Plant the poultry yards to some crop if possible. If this not practicable, keep the yard sweet and clean by plowing and disinfecting.

### Scraps for Poultry.

Bran or middlings and beef scraps should be kept in receptacles to which the fowls have access at all times.

## SUPPLEMENT TO A PASTURE

Feeding Corn Silage is Most Economical Method of Supplying Feed to Help Out Pasture.

(By R. G. WEATHERSTONE.)

Green crops fed as a supplement to pasture may be fed in the pasture or in the barn lot but as a rule are fed most economically in the barn. The cows remain inside long enough at milking time to eat their portions.

As a rule the most economical method of supplying feed to help out the short pastures of midsummer and fall is to feed corn silage. Silage will keep in good condition for summer feeding with no loss except on the surface. If it is not needed during the summer, it may be covered with the new silage and kept until wanted. Corn furnishes a larger yield of dry matter per acre than any crop that can be ordinarily grown for summer feeding, and has the further advantage of being on hand as early as wanted.

It is handled more economically also than soiling crops since it is cut all at once and not every day as is necessary with soiling crops.

It should be remembered that it is only possible to feed a bunch of cows economically when they are fed as individuals and not as a herd. A too common practice, even in the otherwise well conducted herds, is for all animals to be fed the same amount of grain, regardless of the time they have been in milk or the quantity of milk the individual cows are producing. Such feeding always lacks economy, as the high producing cow does not get enough, and while she may milk very well for a time, she soon comes down to a lower level, while the lighter producing cow usually gets too much feed and accumulates fat.

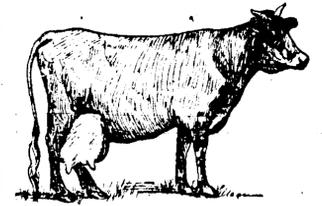

## MAKE-UP OF JERSEY CATTLE

Breed Attracts Notice by "Dairy" Type of Their Bodily Conformation—Some of Characteristics.

(By R. M. GOW.)

The characteristics which mark the present race of Jersey cattle are known to have been notable and prominent in the breed at least one hundred and fifty years ago, so that now they have become thoroughly "fixed," sure to be inherited by their progeny, thus affording the breeder a sure foundation for further development.

The main external characteristics of the Jerseys are the beautiful softness of the various tints of fawn and gray in their coats of hair; their gracefully formed deer-like limbs; their neat, in-curving horns, large limped eyes, small heads and delicate noses; their bright, attractive and intelligent faces; their soft yellow skin, long tails and

Eurotas, 2454. Record for One Year, 778 Pounds of Butter.

well-developed switches; their full, rounded-out udders, straight backs, and the fine proportions of their general conformation. The Jersey cow looks the high-bred lady of the cattle race. Well-developed male animals should weigh from 1400 pounds to 1800 pounds, and females, from 750 to 1200 pounds. Above all else, Jerseys attract notice by the "dairy" type of their bodily conformation, by their large and well-formed udders, and prominent milk-veins. In color they are of various shades of soft fawn, from red to silvery, with more or less white, broken color being unobjectionable except from the standpoint of individual taste.

## DAIRY NOTES

A silo will pay for itself in one year. Be sure that the calves are started right.

A farmer owning six cows should have a silo.

Be sure that the temperature of the milk is right.

It is not possible to grow too much forage on a dairy farm.

A comfortable stable reduces the cost of maintenance and increases the flow of milk.

Feed regularly, not too much at a time, and young calves at least four times a day.

Nothing can be marketed on the farm so successfully or so economically as butter.

The dairyman who does not keep an individual record of his cows is not an up-to-date dairyman.

You cannot fully judge of the capabilities of your cows unless you supply the feed in liberal quantities during the whole period of lactation.

Pollen Oak or Ivy Poisoning. Is quickly relieved by bathing the affected parts in a solution of two teaspoonfuls of Tyree's Antiseptic Powder to a pint of water. 25c. at all druggists or sample sent free by J. S. Tyree, Washington, D. C.—Adv.

### Not to His Taste.

"Why did you put me at dinner between those two women? They nearly talked me to death."

"Why, I thought you were so fond of tongue sandwiches."

Red Cross Ball Blue, all blue, best bluing value in the whole world, makes the laundry smile. Adv.

### Carry Flint.

The Norfolk peasants always regard pointed flints as thunderbolts. So consistent are the simple folks that they will often assure you that they picked them up red hot. They carry flints and stone-arrowheads about with them in the belief that this custom will prevent them being struck by lightning.

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher* In Use For Over 30 Years.

Children Cry for Fletcher's Castoria

### Not Losing So Many.

Bason—I see the population of your town is increasing. Egbert—Yes. They abolished railroad crossings about a year ago.

### Cheese in Quantity.

This country last year imported more than \$2,872,000 worth of Swiss cheese, and the amount is constantly being increased.

### Probably Doesn't.

Foot Lighte—You know she married her press agent. Miss Sue Brette—Why, I don't see how she can believe a word he says!

### Progress.

"Thirty years ago," said a woman of middle age, "it was the custom of demure girls to sit in public conveyance with their silk-gloved wrists crossed. It is now the custom of demure girls to sit in public conveyances with their silk-stockinged ankles crossed."—New York Sun.

### Decline and Fall of the Kiss.

Real kisses soon become monotonous, according to Mrs. Minnie Slentz, who, in her divorce testimony, said: "Some couples may kiss each other right up until they are 60, in an attempt to fool themselves into thinking that their kisses have the genuine heart glow of the first month of marriage, but it is all bosh. Real kissing becomes monotonous during the second year, intermittent from the fourth to the sixth, and stops entirely before the eighth year of married life."—Stuebenville Dispatch to Philadelphia Inquirer.

### Sugar From Wood.

Now they're making sugar out of wood. British chemists have found that they can take a ton of sawdust and get a quarter of a ton of sugar out of it.

The process consists of putting the sawdust into a closed retort and subjecting it to digestion with a weak solution of sulphurous acid under a pressure of from 90 to 100 pounds to the square inch. Eighty per cent. of the sugar thus obtained is fermentable. The product is called "saccharose."

## In Summer—

When the body needs but little food, that little should be appetizing and nourishing.

Then about the best and most convenient thing one can have handy is a package of

## Post Toasties

This food is fully cooked—crisp, delicious and ready to serve direct from the package.

Post Toasties with fresh strawberries and cream are hard to beat.

"The Memory Lingers"

Sold by Grocers.

Postum Cereal Company, Limited, Battle Creek, Mich., U. S. A.

# QUASH CRIMINAL INDICTMENTS

GOVERNMENT DROPS CHARGES AGAINST HEADS OF LUMBER COMPANIES.

EVIDENCE FOUND TO BE INSUFFICIENT.

Five Civil Suits Will, However, Be Pushed by Department of Justice to Dissolve Alleged Trust.

Criminal indictments against 14 secretaries and former secretaries of lumber associations throughout the country have been dismissed at the instance of the department of justice. Five civil suits filed by the government for the dissolution of the alleged lumber trust are still pending. The indictments were returned in Chicago in 1911 and charged the defendants representing 14 associations with conspiracy to restrain trade. An alleged black list figured largely in the testimony given the grand jury. Later the five civil suits were filed and these, it is said, eventually will come to trial. The indictments were quashed by United States Judge Carpenter at the request of District Attorney Wilkerson, who acted on instructions from Washington. According to statements by counsel for defendants, the government found that its evidence bearing on the indictments was insufficient. Most of the men indicted no longer are secretaries of lumber associations.

### Impersonates Woman and Escapes.

George Bogart, a Mexican-American rancher of wealth, attributes his personal safety and the possession of his money to his success at feminine impersonation. Captured near Opu, Sonora, Bogart was ordered to pay \$5,000 for his life. He took the bandits to his ranch house and told them to wait outside while he fetched the money. In the house he put on woman's clothes, and secreting his money, boldly passed through the picket lines which had been placed about the premises. The bandits doffed their big hats as the supposed woman passed, and the rancher safely made his way to the border, depositing his money in a bank at Douglas, Ariz.

### May Not Grant New Rights.

That the war department has no authority to extend water power privileges at Niagara Falls or grant new rights to power companies is the position that Brigadier-General William H. Bixby, chief of engineers, took in a conference with Representative William G. Sharp, of Ohio, ranking member of the house committee on foreign affairs. The chief of engineers also expressed his opinion that the expiration of the Burton act left the power concerns at the Falls without any guarantee or license by which they could continue to use the water at the falls.

### Wm. Wood Is Acquitted.

After deliberating throughout the night, the jury acquitted President Wm. M. Wood, of the American Woolen Co., of the charge of conspiracy to injure the textile strikers at Lawrence by "planting" dynamite.

The jury disagreed in the case of Frederick E. Atteaux, tried as conspirator with Wood. Dennis J. Collins, who turned state's evidence, was found guilty on two counts and not guilty on the other four counts of the indictment. Atteaux is a well-to-do dye manufacturer and Collins a dog fancier.

### Prof. Ford for the Philippines.

President Wilson has decided on Prof. Henry Jones Ford, of Princeton, for commissioner-general of the Philippine Islands. The appointment is expected to be announced soon. The administration plan is to make the Philippines berth the central point from which all Oriental diplomacy shall be controlled. When necessity may arise, the commissioner-general will be the special envoy of the Wilson administration to any of the far eastern countries bringing a diplomatic question to this country.

### Would Seek American Bride.

Washington society will learn with interest that the Duke d'Alba is moving heaven and earth to induce his cousin, King Alfonso, to send him to America as ambassador. The duke is a nephew of Empress Eugenie. It is reported the duke would not be averse to finding an American bride. The queen mother and the Spanish ministers are said to disapprove of his appointment.

## Practical Fashions

LADY'S MATERNITY WAIST.

This model gives a clever idea for a maternity waist that may be worn with separate maternity skirts or that may form part of a complete costume when joined to a skirt of the same material. The waist closes at the front and may be made with or without body lining and plastron. The pattern (6082) is cut in sizes 34 to 42 inches bust measure. Size 36 requires 2 yards of 36-inch material and 1 1/2 yards of 22-inch all-over lace.

To procure this pattern send 10 cents to "Pattern Department," of this paper. Write name and address plainly, and be sure to give size and number of pattern.

 NAME.....  
 TOWN.....  
 STREET AND NO.....  
 STATE.....

GIRL'S DRESS.

This dress closes at the front and may be made with long or short sleeves. The collar, cuffs and belt are of contrasting material. The frock is quite easy to make and may be constructed of wash goods or woolen fabric.

The pattern (6063) is cut in sizes 6 to 12 years. Medium size requires 3 1/4 yards of 36-inch material and 1/4 of a yard of 27-inch contrasting goods.

To procure this pattern send 10 cents to "Pattern Department," of this paper. Write name and address plainly, and be sure to give size and number of pattern.

### Skating Rink in the Home.

Berlin has a new skating rink, which will remain open most of the year, since through a new invention a supply of artificial ice can be obtained which will not melt even in high temperatures. The substance is dissolved in pails of warm water, and then sprayed on the ordinary floor. It dries in the course of a few hours, and then new coats are added until finally it is a third of an inch thick. An excellent skating surface is obtained, and the only effect of heat is to "dry" the ice. The remaining substance can be re-dissolved and used again. A big store at Cologne has already installed a rink with this artificial ice on one of its upper floors. It is intended to place the product on the market, so that all can have their own rink and practice figures of eight and the outside edge at any time of the year.—*Liverpool Weekly Post.*

### Useful Lives.

Any Christian spirit working kindly in its little sphere, whatever it may be, will find its moral life too short for its vast means of usefulness.—*Charles Dickens.*

## MICHIGAN NEWS TERSELY TOLD

Kalamazoo.—His jealousy aroused because his wife, Bernice, danced with another man at a ball in Kendall, Harry Hosaker, proprietor of the Kendall hotel at that place, drank carbolic acid and died 30 minutes later while praying that the attending physician might save his life. According to the story of the affair told in Kendall, the hotel proprietor and his wife went to a dance. When the wife was alleged to have given a number of dances to another man, Hosaker is alleged to have cried: "You will be sorry for this." He is said to have gone to the hotel immediately and was found a short time later by guests. A physician was summoned and the suicide, screaming with agony, prayed that he might live. He died shortly after the arrival of the physician. The wife is said to have declared that her actions were not such that her husband should have become jealous.

Grand Rapids.—Fanned by a strong wind, fire destroyed the plant of the John Knappe Machine company, besides burning eight homes in proximity to the plant. The loss is above \$100,000. The residences belonged to an estate and its loss is \$40,000. The Great Western Tile company's plant with hundreds of barrels of oil was threatened. The Decatur Truck company, across the street from the oil plant, was saved although the flames were carried directly over the building at times.

Cadillac.—Some weeks ago lumber mill men of Cadillac asked for a wage increase of ten per cent. from \$1.90 and \$2. The owners of nine of the largest mills in the city were requested to meet a committee of workmen to consider a new wage scale. None of the employers appeared and a strike was declared. The employers are opposed to an increase in wages and especially so for the reason as they assert, that the I. W. W. is making the demand instead of the individual.

Bay City.—The tinner and sheet metal workers in practically all of the shops in the city struck. All are idle, although some of the employers state that they have men coming from other cities and will be able to take care of all their business within a day or two. The men say the bosses wanted men to agree not to work for any master tinner who does not belong to the association and the employers say the men want an advance in wages.

Holland.—Miss Hendrime E. Hoppers of Ontario, N. Y., a senior student at Hope college, has been given her credentials as a representative of the Reformed church to the South Japan mission. Miss Hoppers will graduate from Hope college this month and expects to leave for the orient in September.

Jackson.—Rose Mullen, the eleven-year-old girl who attempted to end her life by swallowing carbolic acid, will recover, according to the hospital doctors.

Olivet.—Reports from Ann Arbor state that there is a possible chance of the complete recovery of Orville Goodwin, the young Olivet man who had his back broken while driving a load of hay into a shed on May 24. Goodwin was taken to the Ann Arbor hospital recently and there it was discovered that the spinal column was snapped into at a point so low in the back that there was hope of partial or complete recovery.

Battle Creek.—While playing in the street with several other youngsters, Earl Luhrs, eight, was struck and instantly killed by an auto driven by G. H. Stewart, of Schoolcraft, who stopped his car immediately and gave himself up to the police, but it is believed that no action will be taken against him. Eye witnesses declare the lad was entirely to blame.

Grand Rapids.—Speeding their taxicabs at 30 miles an hour, according to witnesses, six persons in a machine owned by the Grand Rapids Taxicab Co. and driven by Jay L. Thomas, overturned at the crossroads two miles north of Alto. All six were injured, none seriously. The taxicab turned completely over and rolled against a fence.

Coldwater.—Mrs. Mary Hershey Harrison celebrated at the home of her son, Benjamin W. Harrison, in Bethel township, her one hundredth birthday anniversary. Nearly 150 people were present.

Saginaw.—At a session of the Michigan Christian Missionary society the delegates elected Rev. M. H. Gerrard of Battle Creek, president.

# LOCAL NOTES

Mrs. M. Dolan spent the past week in Pontiac.

Walter Reason spent last Thursday at Whitmore Lake.

Miss Hazel Smith of Stockbridge is a guest of Mary Agnes McClusky.

Mrs. Geo. Green of Howell spent Thursday with friends here.

Miss Genevieve Alley of Dexter visited friends here Saturday.

Miss Mary Griener of Anderson visited Blanche Martin one day last week.

Mr. and Mrs. F. D. Johnson and son Harvey were Stockbridge callers Friday.

Mrs. Jas. Harris spent a few days the past week at home of John Donohue.

Mrs. Casper Sykes and Mrs. Claude Sigler spent Tuesday afternoon in Howell.

Mrs. D. A. Quelette of North Maldren, Ontario, is the guest of friends and relatives here.

Mrs. L. G. Deveau and Miss Joanna Devereaux visited at the home of Ben White of Howell Saturday.

Monks Bros. are sole agents for Chase & Sanborn's "Seal Brand" coffee—the finest grown—the widest known.

Roy Moran of Detroit was a week visitor at the home of his parents, Mr. and Mrs. W. T. Moran.

John Lennon and Nellie of Mt. Pleasant and Lucy of Detroit attended the Monks-Lennon wedding last Wednesday.

The P. H. S. ball team journeyed to Oak Grove last Saturday afternoon and defeated the first team of that place in a seven inning game by a score of 21 to 1. Gave them just run to make them feel good, because they had secured an outside battery and it would have been too bad to shut them out.

Gov. Ferris last Wednesday, signed House Enrolled Act No. 147, making the publishing in newspapers of any deceptive or misleading advertising by merchants, dealers and others a felony, but the publisher is not to be held responsible for a like offence if ignorant of the deceptive nature of the advertising.

A Lapeer farmer recently hired a lad to help him do the chores. He told the boy to take some salt and salt a calf out in the pasture. The boy took a quart of salt with him and thoroughly rubbed it all over the calf. A gang of colts in the pasture scented the salt and got after the calf. They licked all the hair off the calf and nearly took the hide too. The young man's name it is said was not "Bridget."

If a man had a fifty dollar pup he would look after it carefully and not let it have the run of the town day and night. But if he has a child it is different. They are turned loose at a tender age to go where they please. People wonder where the great army of tramps, dead beats, gamblers and disreputable women come from. They are germinated from the seed gathered in countless homes and sown broadcast upon the streets of our cities and towns. There are thousands of children who are heading in that direction, who, as far as care is concerned are not given equal showing, with a valuable pup.—Exchange.

Raymond Sigler of South Lyon was in town last Friday.

S. G. Teeple transacted business in Mason last Saturday.

Dr. Will Monks of Howell visited his mother here last Thursday.

Mrs. Lottie Winters spent the past week at the home of Mrs. E. G. Fisk.

Mrs. G. A. Sigler and Kittie Hoff spent last Thursday in Jackson.

Born to Mr. and Mrs. Ed. Spears, Thursday, June 5th, a daughter.

Aubrey Gilchrist and family spent Sunday with relatives near Gregory.

Louis Coyle of Northfield spent Sunday with his brother, Rev. Fr. Coyle.

Harry Ayers, wife and son of Detroit spent Sunday at the home of Mrs. Sarah Nash.

Mrs. M. Reason and Mrs. G. L. Teeple were Detroit visitors last Thursday and Friday.

Over 42,000 automobile licenses have been issued by the secretary of state so far this year.

Mr. and Mrs. James Prosser of Michigan City, Ind., are visiting at the home of Chas. Stickles.

Mr. and Mrs. C. Doody of Unadilla visited at the home of A. Monks a few days the past week.

Mr. and Mrs. Arthur Gillette of New York visited at the home of his sister Mrs. M. Mowers the past week.

Mrs. B. H. Johnson and daughter Mrs. Lulu Christie of Jackson are guests at the home of M. B. Markham.

Mrs. Geo. Culey who has been spending some time with relatives in Ypsilanti returned to her home here Sunday.

The Stockbridge Brief Sun wants the villagers there to adopt standard time. It is the only time in use today in any town of any size.

The Michigan Farmer gives it as its opinion that outside of the cement roads being built in Wayne county, the gravel road is the best to build for every use.

The Chilson Grange will give an ice cream social, Saturday evening, June 14, on the lawn of J. D. Appleton at Chilson. Everybody cordially invited.

Landlord Caverly, of the Western House, Brighton, has been elected trustee of the village to fill a vacancy caused by the resignation of one of the members.—Brighton Argus.

The village of Howell has been offered two more motor cars to start from that village one each way in the morning. The Ann Arbor Ry finds that local business warrants the use of these cars.

The ladies of the M. E. church will sell baked goods in their rooms under the opera house, Saturday forenoon and afternoon, June 21. Orders, if left with Mrs. E. E. Hoyt, can be filled in time for dinner.

Summer school at Ypsilanti begins June 30 and ends August 8, 1913. Livingston county is one of twelve counties that is affiliated with that institution. Last year this county stood fourth in representation. This year I wish it might stand first. I have been able in my visits through the county to see a decided improvement in the work as a result of the same. I urge every teacher of this county to attend and come back to your patrons next fall and give them value received, and be able to keep the children of this county in school because you are able to interest them.

Maude Benjamin, Comm'r.

## LOOKING VS. BUYING

We expect no man who enters our store to buy until he is thoroughly convinced that we have more quality and better value to offer than he can obtain elsewhere.

We boast of courteous salesmen, who are at all times prepared to show lookers through our splendid stock of men's and young men's apparel.

We therefore issue an invitation to all to call and look over our showing of

### Gentlemen's Furnishings

We have in our store all of the newest Neckwear, Plain and Fancy Shirts, Handkerchiefs, Collars and Cuffs, Hosiery, Gloves, Hats and Caps for spring and summer.

## MONKS BROS.

### Lawn Mowers

Probably there is nothing as provoking as a lawn mower that bites and chews the grass of your lawn until it resembles a fretful porcupine. Our stock of lawn mowers is very complete and we have them in all grades and would be pleased to show you the merits of the cheapest or the best.

### Bulk Seeds

and Package Seeds.

A complete line of Furniture. Get our prices before buying elsewhere.

## To Keep Your Teeth a Lifetime

You who wish to preserve your teeth—keep them solid and free from discolorations—remember this—

Be attentive to your teeth—keep the shreds of food from out of the crevices—thoroughly masticate your food and avoid as much as possible soft and poorly cooked foods—use the brush regularly and with an up and down motion and use that most efficient tooth cleanser and preservative—Nydenta Cream.

Prevents fermentation arising from the decomposition of food particles, hardens the gums, protects, whitens and polishes the enamel of the teeth, sweetens and perfumes the breath. It renders the secretions and membranes of the mouth thoroughly germ proof.

This is not a mere tooth paste, it is a real tooth preservative. In collapsible tubes, clean and economical, 25c the tube.

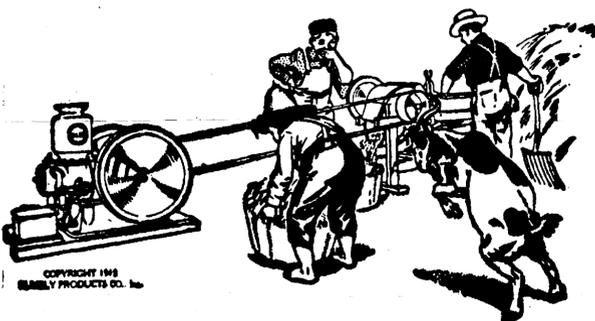

When we had a chance to get the exclusive selling agency for Nyal Family Remedies we jumped at it. They are known among all druggists as the highest quality line on the market, and are prepared by a great firm of manufacturing chemists, famous for fifty years.

To introduce this really dependable tooth paste, for one week we are giving a 25c tooth brush with every tube of Nydenta Cream.

Mrs. John Ruttman and Miss Gladys Yelland called on the Misses Beatrice and Kathryn Lamborne Sunday afternoon.

George Harford and wife and Mrs. Kuhn were Pinekey visitors Wednesday.

Wm. Harrington of Detroit is visiting at the home of Joe Roberts at present.

Mrs. L. T. Lamborne is spending some time with her daughters in Pinckney.

Wm. Harrington, Mrs. Joe Roberts and daughter Gladys were Jackson callers Monday.

Hugh Ward and wife and Miss Edna Ward were Fowlerville callers last Saturday.

Miss Gladys Roberts returned home Saturday after spending the week with relatives in Lansing.

## Guaranteed Eczema Remedy

The constant itching, burning, redness, rash and disagreeable effects of eczema, tetter, salt rheum, itch, piles and irritating skin eruptions can be readily cured and the skin made clean and smooth with Dr. Hobson's eczema ointment. Mr. J. C. Eveand, of Bath, Ill., says: "I had eczema for twenty-five years and had tried everything. All failed. When I found Dr. Hobson's Eczema Ointment I found a cure." This ointment is the formula of a physician and has been in use for years—not an experiment. That is why we can guarantee it. All druggists, or by mail. Price 50c. Pfeiffer Chemical Co., Philadelphia and St. Louis. Also at Myer's drug store.

## WEST MARION.

Mr. and Mrs. Harrington of Stockbridge were Sunday guests at the home of H. W. Plummer.

Fred Wylie and wife visited her parents the first of the week.

Mr. and Mrs. Hath visited friends in Fowlerville Sunday.

Mrs. P.H. Smith and sister of North Lake spent Sunday with their sister in Iosco who is quite sick.

The Misses Ruth Collins and Mildred Hath were Howell visitors Saturday.

Miss Beryl McCollum closed a very successful term of school at the Green school house Friday.

The Ladies Aid society will meet Thursday, June 12th, at the home of Mrs. W. B. Miller. Election of officers.

Lyle Gorton and wife took charge of the three appointments of Rev. Miller, Sunday and Sunday evening.

## Most Children Have Worms

Many mothers think their children are suffering from indigestion, headache, nervousness, weakness, costiveness, when they are victims of that most common of all children's ailments—worms. Peevish, ill-tempered, fretful children, who toss and grind their teeth, with bad breath and colicky pains, have all the symptoms of having worms, and should be given Kickapoo Worm Killer, a pleasant candy lozenge, which expels worms, regulates the bowels, tones up the system, and makes children well and happy. Kickapoo Worm Killer is guaranteed. All druggists, or by mail, price 25c. Kickapoo Indian Medicine Co., Philadelphia and St. Louis.

## NORTH HAMBURG.

Mrs. Joe Stackpole, Mrs. Orville Nash and Miss Una Bennett were Howell visitors Wednesday.

Mrs. Bert Appleton spent the week end in South Lyon.

Mrs. Clyde Hinkle and son were Howell visitors Thursday.

Little Julia Gattrell has the measles.

Erwin Ball and daughter Florence of Hamburg, Miss Gracia Martin of Ann Arbor, Harry Hawkes of Detroit, Mr. and Mrs. Haddock and Harold, W. J. Nash, wife and Marion, Mrs. Hinkle, Miss Frauc Dunning, Una and Clyde Bennett were entertained at the home of Charles Sweitzer, Saturday evening.

Lee Van Horn is on the sick list.

# PINCKNEY DISPATCH

ROY W. CAVERLY, Publisher.  
PINCKNEY, MICHIGAN

## OVER-MODESTY BAR TO SUCCESS.

Don't be afraid to express an opinion, even if it is different from the opinion of the boss. He may like a man with spirit and with brains enough to have an opinion. But don't have opinions unless you have studied from both sides. One of the most annoying types in the business world is the man who always wants to start an argument. Don't let one mistake make you lose your nerve. Lots of times a mistake has helped a man, first by making him more careful in the future, and second, by bringing him into the limelight. It's better to be noticed once in a while, even for a mistake, than to be ignored. If your work has been satisfactory your good work will shine by contrast, and you won't be unduly blamed for your error. A whole lot of men have failed to rise because they were too modest. If you believe you can do a thing, try it. Express belief in your own ability, but first be sure you have the ability. Nobody but yourself knows what you can do, and if you are too modest to let people find out what you know, you have only yourself to blame if the boss doesn't seem to appreciate you. It's all right to learn the duties of the man next higher up in case you get a raise, but there are hundreds of men who never get the raise because they are so busy learning the higher up work that they forget their own duties. Do your own work carefully first, and then after you have finished it's time enough to want to do the work of the other fellow.

The success of the anti-typhoid inoculation in the United States army has been such that the authorities have decided to extend its protection to the families of soldiers. Colonel Surgeon L. Mervin Maus, chief medical officer for the department of the east, who has been stationed at Governor's Island for a year, has obtained typhoid anti-toxin from the army laboratory at Washington. All women under forty-five and all children over ten years of age are to be made immune to the fever. Undoubtedly the confidence of the army in this prophylactic will influence the extension of its employment in civil life. Among the first to resort to it as a class might be expected to be the traveling men, who continually take fresh risks with strange drinking water.

Doctors told the members of the Illinois Society for the Conservation of Vision, at the first public meeting of that organization in Chicago, that inattention of nurses at the time that infants are born is the cause of most cases of congenital blindness. Throughout the country there is activity at the present time in disseminating information regarding the simple method by which the shocking calamity of infantile blindness in most instances can be prevented.

Foreign countries would not wonder at the braininess of Americans could they make a study of our national game. Baseball is a contest of skill, demanding nimble minds and nimble bodies, quick thinking and quick action. No less alert than the players are the fans in the stands, as they follow every play, judging it instantly, and estimating its effect upon the outcome of the game. It's a great mental tonic is baseball.

The health commissioner of New York city asserts that many manufacturers of pies and other pastry are using benzoate of soda more freely than is good for the human stomach. For this reason he proposes to promulgate regulations that will force the restaurateurs and others who sell these viands to display placards or print a line in the bill of fare that will convey notification of the presence of the chemical preservative to the ultimate consumer. It is entirely proper that the individual who pays for what he supposes to be "like mother used to make" and is given something else should know what he is getting for his money.

A Chicago police magistrate declared from the bench that girls are more responsible for flirting than men, and that mothers are responsible for their daughters. The last part of the saying is true, even if the first clause furnishes matter for debate.

# WILSON SELECTS SOME DIPLOMATS

## PRESIDENT SETTLES ON MEN WHO WILL GO TO FOREIGN COURTS.

## JUSTICE GERARD SLATED FOR SPANISH POST.

### William F. McCombs Will Likely Be Minister to France and Former Gov. McMillan to Go to Persia.

President Wilson has settled upon a large number of diplomatic appointments.

Among the men who are on the president's slate are Justice William Gerard, of New York state, who will be appointed minister to Spain. It is understood tonight that William F. McCombs, the chairman of the Democratic national committee, still has the post of Paris under consideration. Mr. McCombs is now in France.

Henry Morgenthau, of New York, is likely to be nominated, it is understood, to be minister either to Turkey or China.

One of the other important foreign missions that President Wilson has decided upon is the ambassadorship to Italy. This place will go to Frederick C. Penfield, of Philadelphia, one of President Wilson's supporters in the pre-convention campaign. Some of the lucky ones on the president's list are:

P. A. Stovall, editor of the Savannah News, probably minister to Switzerland; John E. Lamb, of Terre Haute, Ind., either to Cuba or Argentina; Albert Schmedeman, of Madison, Wis., secretary of the Wisconsin Democratic state committee, minister to Norway; Benton McMillan, former governor of Tennessee, minister to Persia; Colonel Thomas-Burch, of New Jersey, who was Mr. Wilson's aide when he was governor and who was one of his strong supporters in the pre-convention campaign, probably to Belgium.

### To Build New German Town.

The purchase of an entire township and the creation of a new Frankenthum in the upper peninsula near Soo Junction are the plans of 30 farmers and business men of Frankenthum, who left in a special car for the Soo and other points. It is believed that the younger generation should remain on the farm, but as land in Saginaw county is thickly settled and costly, it was decided to start another German settlement where the land is good but cheap. If satisfactory a large amount of land will be bought, a town with German industries built, and the community colonized by Germans. Frankenthum in Saginaw county is one of the biggest German settlements in Michigan.

### Labor Leaders Are Indicted.

President John P. White and 18 other officials of the United Mine Workers of America, were indicted in the federal court at Charleston, W. Va., on a charge of violating the Sherman anti-trust law.

It is alleged the defendants conspired with the coal operators of western Pennsylvania, Ohio, Indiana and Illinois to raise wages in the West Virginia coal fields, so as to prevent its competition with the other four states in the western market.

### Lumber Jack Kills Two Deputies.

Deputy Sheriff Alfred Scribner and James Sutton of Brimley, were shot and killed today by Joseph Tovens, a Russian lumber jack, whom they had arrested for stabbing Joe Teeple, an Indian, in a fight at Brimley. Tovens was found in a lumber camp near Wellsburg and had handcuffs placed on him, but he succeeded in freeing one hand and drawing a revolver from his pocket shot both his captors. Tovens then made his escape.

### Strike Editor Is Sentenced.

Alexander Scott, editor of the Weekly Issue, a paper that has been supporting the cause of the silk mill strikers, at Paterson, N. J., was sentenced to serve an indeterminate prison term of not less than a year nor more than 15 years and to pay a fine of \$250 for "inciting hostility against the government." Scott announced that he would appeal and arrangements were made for his release on bail.

Elizabeth Hunter, three years old, was almost instantly killed near her home three miles north of Benton Harbor, when a motorcycle driven by Albert Hoadley, a farm hand, hit her. Hoadley received slight injuries.

# WILLIAM M. WOOD

President of the American Woolen Company has been acquitted of "planting" dynamite during strike at Lawrence, Mass., to influence public opinion against strikers.

## STATE BRIEFS.

Earl Luhrs, 8 years old, was struck by an automobile driven by G. H. Stewart, of Schoolcraft, at Postumville the blow causing instant death.

Miss Olive Chapin, of the Jackson high school, won highest honors in the state declamatory contest at Traverse City. There were six contestants.

Fire destroyed the big planing mill and other property of the W. L. McManus Lumber company at Petoskey. The loss is estimated at \$200,000 with no insurance.

The new curfew ordinance at Kalamazoo into effect. The parents of children under 16 years of age who allow them to remain on the streets after 9 o'clock may be prosecuted.

The board of education of Pontiac, set June 17 as the date for the laying of the cornerstone of the new high school. Prof. J. B. Davis, of the University of Michigan, will deliver the address.

Work has been started by the Sandusky Drain Co. on the big state drain in the northern part of Colhoum county. It will be the biggest drain ever dug in this section of the state, and will cost over \$40,000.

Mrs. Annie Richardson, 64, of Pontiac, was instantly killed by an east-bound Grand Trunk train between Davisburg and Andersonville. She was walking from Andersonville to Davisburg to visit her daughter.

Kalamazoo county will vote next election on the proposition of bonding for \$15,000 to build a new detention home. The county rents a building to care for the wards of the juvenile court and it is too small.

By the lightest vote ever cast where a public utility franchise was involved, the central heating system was endorsed at the polls in Saginaw. The system will cost several hundred thousand dollars and will be in operation by fall.

Just like its big sisters, Detroit, Toledo and Cleveland, Kalamazoo is going to have a trade extension trip. The Commercial club has decided to send a special train all through that part of the state soon with Kalamazoo wholesalers.

The upper peninsula league of the Knights of Pythias chose Ishpeming as the 1914 meeting place. The following officers were elected: President, John S. Olson, Ishpeming; vice-president, Victor A. Fried, Houghton; secretary, W. A. Ross, Marquette.

John Powell, Detroit, and Frank Bupras, of Hubbell were awarded the first and second prize, respectively, in a French composition contest held at the University of Michigan. The prizes are two silver medals, provided by the Alliance Francaise of Detroit.

Three fires in quick succession in the business section of Jackson, and the manner in which they started, led Fire Chief King to believe they were of incendiary origin. One fire consumed the barn of Scott & Helmers, grocers. Three horses were burned to death.

The Bentley postoffice was robbed by three men, who pried open a window. Postmaster Lefler, who resided over the postoffice, heard the noise and opened fire on one of the yeggmen, and they returned the fire, shattering the window. The men called to their pal in the building and escaped.

Making the promise to take instant steps to force the G. R. & I. railway and Grand Trunk to install the gates ordered for the Houston avenue crossing, where some time ago three women lost their lives in one accident, a letter from the state railway commission has been received by Mayor Moore of Muskegon.

# THE MARKETS.

Live Stock, Grain and General Farm Produce.

## Detroit Live Stock

DETROIT—Cattle: Receipts, 322; market steady; best steers, \$8@8.25; steers and heifers, 1,000 to 1,200, \$7.75@8; steers and heifers 800 to 1,000, \$7@7.50; grass steers and heifers that are fat, 500 to 700, \$5.50@6.50; choice fat cows, \$6.25@6.75; good fat cows, \$5.75@6; common cows, \$5@5.50; canners, \$3.75@4.25; choice heavy bulls, \$6.50@7; fair to good bolognas, bulls, \$6@6.25; stock bulls, \$5.25@5.75; choice feeding steers, 800 to 1,000, \$7@7.25; fair feeding steers, 800 to 1,000, \$6@6.50; choice stockers, 500 to 700, \$6.25@6.50; fair stockers, 500 to 700, \$5.50@6; stock heifers, \$5@5.75; milkers, large, young, medium age, \$5@6.5; common milkers, \$3.5@4.5. Veal calves: Receipts, 280; market steady; best, \$9.50@10; others, \$5@8.50. Milch cows and springers, \$5@10 lower. Sheep and lambs: Receipts, 815; market for dryed grades strong and trifle higher; grass stuff dull; best lambs, \$7.35; fair to good lambs, \$6.50@7; common lambs, \$4.75@6; fair to good sheep, \$5@5.50; culls and common, \$3@4. Hogs: Receipts, 1,857; market 10c lower; light to good butchers, \$8.60@8.65; pigs and light yorkers, \$8.65; stags, 1-3 off.

EAST BUFFALO: Receipts of cattle, 150 cars; market 10@20c lower; best 1,350 to 1,500-lb steers, \$8.15@8.40; best 1,200 to 1,300-lb, \$8.05@8.15; good to prime 1,150 to 1,200-lb steers, \$7.75@8.10; coarse and plain weighty steers, \$7.50@7.75; good to choice handy steers, \$7.80@8; medium butcher steers, \$7.85@8; light common butcher cows, \$6@6.50; light butcher cows, \$5.50@6; trimmers, \$4@4.25; best fat heifers, \$7.50@8; medium butcher heifers, \$7.60@7.85; light and common heifers, \$6.75@7; stock heifers, \$6@6.50; best feeding steers, \$7.50@7.75; light and common stockers, \$5.50@6; prime heavy bulls, \$7.50@7.60; best butcher bulls, \$7.25@7.50; bologna bulls, \$6.75@7; stock bulls, \$5.50@6; best milkers and springers, \$7.5@100; common kind do, \$4@6.5.

Hogs—Receipts, 110 cars; market steady; all good grades, \$9; roughs, \$7.70@8; stags \$6@7.

Sheep and lambs—Receipts, 53 cars; market slow and 15@25c lower; top lambs, \$7@7.25; culls to fair, \$4@7; yearlings, \$6@8.50; wethers, \$5.75@6; ewes, \$5@6.35; cull sheep, \$3@4. Calves low at \$5@10.50.

## Grains, Etc.

Wheat—Cash No. 2 red, \$1.06 1-2; July opened without change at 92 1-4c, lost 1-2c, advanced to 92 1-2c and declined to 91 1-4c; September opened at 92 1-4c and declined to 41 1-4c; No. 1 white, \$1.05 1-2.

Corn—Cash No. 3, 59c; No. 2 yellow 61 1-2c; No. 3 yellow, 1 car at 61c.

Oats—Cash standard, 42c; No. 3 white, 3 cars at 41c; No. 4 white, 2 cars at 40c.

Rye—Cash No. 2, 64c.

Beans—Immediate, prompt and June shipment, \$2.05; August, \$2.10.

Flour—In one-eighth paper sacks, per 196 pounds, jobbing lots; Best patent, \$5.70; second patent, \$5.20; straight, \$5; spring patent, \$5.10; rye, \$b.00 per barrel.

Feed—In 110-lb sacks, jobbing lots: Bran, \$21; coarse middlings, \$21; fine middlings, \$27; cracked corn, \$25; coarse corn meal, \$22.50; corn and oat chop, \$21 per ton.

## General Markets.

Strawberries—Southern, \$3@3.25 per 24-qt case; Michigan, \$4 per bu.

Apples—Steele Red, \$4.50@5; Ben Davis, \$3@4 per barrel; western, \$2@2.50 per box.

Cabbage—New, \$2.75@3 per crate. Tomatoes—Florida, \$3@3.50 per crate, 60@75c per basket.

Dressed Calves—Choice, 10@11c; fancy, 13@13 1-2c per lb.

Onions—50@60c per bu; Texas Bermudas, \$1@1.10 per crate.

New Potatoes—Triumph, \$1.50@1.60 per bu; white, \$4.50 per bbl.

Potatoes—Michigan, car lots in sacks, 45@50c; store lots, 55@60c per bu.

Live poultry—Broilers, 30@32c; spring chickens, 16 1-2c@17c; hens, 16 1-2@17c; No. 2 hens, 11@12; old roosters, 10@11c; turkeys, 17@18c; geese, 11@12c; ducks, 16@17c per lb.

Hay—Car lots, track Detroit: No. 1 timothy, \$14.50@15; No. 2 timothy, \$13@13 1-2; light mixed, \$13.50@14; No. 1 mixed, \$12@13; rye straw, \$9@10; wheat and oat straw, \$8@8.50 per ton.

Cheese—Wholesale lots: Michigan flats, 14 1-4@14 1-2c; New York flats, 15@15 1-2c; brick cream, 14 3-4@15c; limburger, 2-lb cases, 16@16 1-2c; imported Swiss, 25@26c; domestic Swiss 22@24c; brick Swiss, 18c; long horns,

# GOOD TIMES IN CANADA

## BUSINESS PROSPERING TRADE INCREASING AND FINANCES IN GOOD SHAPE.

The present tightening up of money, must not be looked upon as being in any sense brought about by financial stringency. It is really more a period of stock-taking resorted to by the banks to ascertain the true condition of the finances and trade of the country. Legitimate business enterprises are not affected. Throughout the States there are those who if allowed to continue borrowing, would inevitably be a means towards precipitating something a good deal worse than they feel now. In Canada, the conditions are excellent, and it is safe to say business will never be better. The pulse of trade is carefully watched by the Finance Department of the Dominion government, and it is illuminative to read portions of the address of Hon. W. T. White, the Finance Minister, delivered a few days ago before the House of Commons. Mr. White's remarks are in part as follows:

"It falls agreeably to my lot to extend my most hearty congratulations to the House and the country upon the prosperous conditions which it continues to be our good fortune to enjoy. I am happy to announce that the outcome of the last fiscal year, which ended on March 31, will prove even more satisfactory as reflecting by far the highest pitch to which our national prosperity has yet attained. I have every expectation that when the books are closed, it will be found that the total revenue will have reached the splendid total of \$168,250,000, or an increase over the year 1911-12 of over \$32,000,000. Some indication of the magnificent growth of the Dominion may be gleaned from the fact that this increase in revenue during the period of one year almost equals the entire revenue of the country seventy years ago.

"The augmentation of revenue to which I have referred has not been irregular, spasmodic or intermittent in its nature, but has steadily characterized each month of the entire fiscal year. It was of course mainly derived from Customs receipts, but the other sources of revenue—excise, post office and railways—also gave us very substantial increases.

"That in a period of great financial stringency not only have we not been obliged to resort to the congested markets of the world, but have been able to reduce so substantially (\$23,000,000) the debt of the Dominion, must be a matter of gratification, both to the House and to the people of Canada.

"I believe that during this period of exceptional money stringency the credit of the Dominion as reflected in the quotations of its securities has maintained itself among the highest in the world."

Owing to the favorable state of its finances Canada was in a position to pay off a heavy loan in cash without recourse to the issue of bills or securities.—Advertisement.

## Information Wanted.

A little girl listened quietly to the serious conversation of her elders. At last, hearing her father make an interesting statement about the postal situation, she could no longer keep silence.

"But, papa," she asked, earnestly, "if the postoffice department doesn't pay for itself, then it can't have any money, can it? Then why do they keep on advertising postal banks?"

## RASH ON FACE FOR 2 YEARS

Sioux Falls, S. D.—"My trouble of skin disease started merely as a rash on my face and neck, but it grew and kept getting worse until large scabs would form, fester and break. This was just on the one side of my face, but it soon scattered to the other side. I suffered a great deal, especially at night, on account of its itching and burning. I would scratch it and of course that irritated it very much. This rash was on my face for about two years, sometimes breaking out into sores and forming large sores. It kept me from sleeping day or night for a couple of months. My face looked disgraced and I was almost ashamed to be seen by my friends.

"A friend asked me to try Cuticura Soap and Cuticura Ointment. I would bathe my face with hot water and a lot of Cuticura Soap, then I would put on the Cuticura Ointment. In less than two days' time, the soreness and inflammation had almost entirely disappeared, and in four weeks' time you could not see any of the rash. Now my face is without a spot of any kind. I also use them for my scalp and hair. They cured me completely." (Signed) Miss Fanny Hutchins, Feb. 6, 1913.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 33-p. Skin Book. Address post-card "Cuticura, Dept. 1, Boston." Adv.

## Extremes.

"I ran out with my new machine." "What happened?" "I got run in."

# AEROPLANES IN THE NAVY

THE CURTISS HYDRO-AEROPLANE

LEUTENANT J.H. TOWERS, U.S.N.  
HEAD OF THE NAVY AVIATION CORPS

**W**HEN a naval aviator, Lieut. Ellyson was launched in an aeroplane from a catapult recently and his flying machine bore him gracefully aloft without slightest tendency toward stumbling it marked an important advance in the use of airships in the navy.

The aeroplane as an adjunct to military operations has already shown its value both in Tripoli and in Turkey. Besides dropping bombs upon Turks and Arabs it has proved of greater usefulness in reconnoitering the position of the enemy. The Bulgarians have gone a step further and have used the aeroplane for fire control purposes, enabling the battery commanders of the field guns to train their weapons so as to make them tell most effectively against the Sultan's forces. This matter of fire control is as vital to a navy as to an army in action, especially when the guns of a fleet are searching out the weak spots in the land defences. But heretofore the aeroplane has been less available for navy than for army use.

The catapult tested in Washington is the invention of Captain Chambers of the navy, and is the outcome of various lessons learned while trying to adapt the aeroplane to the needs of the navy. The practicability of sending aeroplanes in flight from a suitable platform on board ship was early demonstrated, but there were various minor problems to be solved. The launching platforms employed were both long and cumbersome. They took up space that would not be available in time of war, and they blocked the fire of some of the guns.

The long runway or sloping platform was therefore prohibitive. With a short track substituted which could be easily and quickly put in place and just speedily demounted and stored out of the way, there arose the question of a means of starting the aeroplane effectively. For this purpose Captain Chambers devised the catapult. For years he had specialized in torpedoes and was familiar with the devices successively tried in getting those weapons overboard from a boat. The catapult tried at Annapolis last summer was a sort of modified torpedo launching outfit of the earlier type, and compressed air was employed to give the initial push.

The trial mechanism was of necessity rather crude, but this fact did not deter Lieutenant Ellyson from subjecting himself in a hydroaeroplane to the extreme shock of the device in order to find out the effects of such a concussion, not only upon the air pilot, but likewise upon the motor attachments and other fittings which might be wrenched loose or deranged. That test was entirely satisfactory in its lessons, but the aviator and his machine got a ducking.

The catapult lately tried at the Washington navy yard is devised so that the hydroaeroplane attains its launching speed without violence, and this insures the launching of the machine without fear of deranging any of the apparatus or dislodging the aviator from his seat. The runway or starting track is short and can be put in position in several places on a fighting ship without interfering with the maneuvering of the guns or impeding any other operation of importance.

Of course the demonstration at Washington over the Potomac river under fairly ideal weather conditions is not a counterpart of what may confront the naval aviator at sea, but so far as the actual getting away from the ship is concerned that function can be promised under any circumstances which on shore would warrant an aviator in trying to go up in the air. The other side of the problem is that of returning to the ship again, and here success is likely.

Glenn H. Curtiss has devised a form of float or boat for his hydro which is capable of sustaining the flying machine when waves of considerable size

are running, and this will be taken advantage of when the hydroaeroplane returns from its scouting expedition. The aviator will alight with his machine upon the water on the sheltered side of the vessel, and, thus protected from the stronger sweep of wind and wave, the air pilot and his apparatus will be easily hoisted aboard.

Developments in other directions are increasing day by day the reliability of the aeroplane and its value as a military implement. Just as the self-starter has added to the convenience of the up-to-date automobile, a similar device is contributing to the efficiency of the hydroaeroplane as part of the equipment of a fighting ship. With a good self-starter, by which the air pilot can set his motor going from his seat, and with a launching apparatus like that devised by Captain Chambers, the aircraft will be able to assume its own propulsion the instant it leaves the runway of the catapult.

It is not enough, however, simply to get the flying machine into the air; the scouting aviator has a lot to attend to after he is aloft and started upon his mission.

Until a short while ago the air pilot had his hands dangerously full of things to be manipulated in order to sustain him safely in flight, and a moment's inattention was pretty certain to invite trouble if not disaster. He had no opportunity to make observation of the land beneath him or to release bombs intended to hit a certain spot on the landscape below. The aviator therefore needed a companion whose duties should be limited to reconnoitering and to dropping projectiles upon the enemy.

Now it happened that the machines used by the Italians in Tripoli were not weight carriers, and it was therefore out of the question to support a second person in them. Accordingly the aviator had to do all the work himself, and this explains why bombs dropped from aeroplanes so often failed to hit their mark. The Italian dirigible balloons, on the other hand, because they could be maneuvered deliberately and could lift a number of persons, were successful as bomb throwers, and what they did showed what could be expected of a flying machine properly built for military work.

As a result of study a number of devices have been developed which make it possible now to insure to a large degree the automatic control of an aeroplane's equilibrium, and other apparatus is being perfected which reduces the demands upon the aviator. Quite apart from the military importance of these later inventions, the physical and nervous stresses upon the aviator are fewer. These have proved so exhausting during the war between Italy and Turkey that the pilots have become incapacitated after six months of service, and doctors declare a rest period of at least two years is needful in order to insure their recuperation and fitness again for duty with the flying squadron.

Among the helpful apparatus now being developed by an American firm is a gyroscopic device which gives promise of success in maintaining the stability of an aeroplane in flight. Captain Chambers is engaged in the construction of an aerial compass which will not only give directional guidance, but will also compensate for the drift or sidewise movement of the flying machine.

On the other side of the Atlantic instrument makers have been working away at the same problem with more or less success. The market supply of such apparatus is not large. That there is need of just such an aid to aerial navigation is evidenced by the fact that a German firm was suddenly denuded of its supply by the demands of the war in the Balkans. It is safe to say that no small share of the effective aid rendered by the Bulgarian flying corps has been directly due to these instruments.

In the past aviation generally has been encouraged more as a sporting

proposition than an art susceptible of practical benefits, and this has really hurt aviation more than it has helped. Speed has appealed pre-eminently to racing men and to what may appropriately be termed the nautical acrobats, and in some senses this speed has saved more lives than it has sacrificed under the hazardous circumstances of its employment. The victorious Vedrines strongly advocates speed on the score that it makes for safety by offsetting or combating more successfully atmospheric vagaries while in flight, but this element of high velocity multiplies the hazard or the difficulty of alighting as well as increasing the danger of engine trouble and shortness of the life of the motor.

For war purposes an aeroplane motor should work efficiently at different speeds because varying drive power will be needed for dissimilar services. A motor of this sort would lend itself to relatively low speed so that the flying machine could return to the ground much as a vessel slackens her headway when coming up to her dock. Captain Chambers has a very definite opinion upon this subject, which he explains as follows:

"A weight carrying aeroplane, such as a hydroaeroplane, necessarily needs a motor with considerable range of speed, and the same kind of motor is needed to reduce the danger of alighting. I think aviation would be improved if the terms of future speed contests were arranged so as to require each contestant to go over the course twice—the second time at an average speed 20 per cent. lower than his highest average."

The layman has heard so much of anti-balloon guns and other weapons for the annihilation of all kinds of aircraft, that he pictures the flying machine as being knocked into bits by the precise fire of these weapons. As a matter of fact, during the war in Tripoli the Italian aeroplanes were but seldom hit, never disastrously, and when up in the air three thousand feet they were not touched at all. American naval aviators, with their hydroaeroplanes, have proved that it is entirely feasible for them to reach this height, and so far as endurance of flight is concerned, they hold the record—Lieutenant Towers of the navy having traveled for six hours ten minutes and twenty seconds in a standard navy Curtiss hydroaeroplane. Inventors have developed an aeroplane wireless outfit of very moderate weight, and with this equipment aviators are able to cover a range of fifty miles.

The next naval conflict is likely to find hydroaeroplanes a feature of the essential equipment of all large men-of-war, and the flying machine must be considered seriously and not as a mere fad or a mechanical achievement of no material value. In peace-time maneuvers the French have clearly shown that the aeroplane is capable of doing scout duty of an important character, detecting not only ships upon the water, but the presence of submarines supposedly hidden below the surface of the sea; and recent experiments with armor piercing bombs—dropped from aircraft—have turned a new page in the art of warfare.

Old Fight Renewed.  
"My old barber has left the city."  
"You seem very regretful."  
"Yes; he had been trying to sell me a bottle of hair tonic for the last 15 years, and so far I had succeeded in standing him off. Now I shall have to start the battle all over with a new man."

## TEST OF COOK'S SKILL

PROPER PREPARATION OF THE SWEET POTATO AN ART.

At Least an Hour in the Oven is Necessary Properly to Bake Potato—Some Useful Hints and Recipes.

If you would know the sweet potato in all its sweetness and goodness, you must leisurely tour the sunny south in "sweet tater time," when the entire clan of sweet is in its glory and prime. While the Jerseys are a very superior class, they lack the variety found in the southern family. Color and flavor range from the sleek, smooth red-coated sweet to the thin-skinned pale yellow and less sweet variety which will be sold you as white potato in some markets of the south unless you ask for Irish potatoes. The great coarse yam that looks like an overgrown sweet, and sometimes weighs five or six pounds, is not a sweet potato at all. However, it is a good substitute for the potato; is mealy and dry, and contains a large amount of starch. It is not sweet, and is a wholesome food, though most people have to cultivate a taste for it.

To bring out the delicate flavor of the sweet potato is an art. Most cooks spoil it by cooking too quickly. At least an hour in the oven is essential to properly bake a sweet potato.

To Boil Sweet Potatoes—Wash the potatoes well without breaking the skins. Clip the roots that adhere, put them in a kettle of boiling water and let them cook until they can be easily pierced to the center with a fork, without being actually soft. Drain off the water and set the kettle back on the stove, or in the oven, with a cloth thrown over the top and let steam about five minutes, so they will be mealy. Peel them at once, and serve plain with roast pork or beef. When served with fried or broiled fish, accompany them with a drawn butter sauce, or cut them in thick slices, butter well and set the dish in the oven a few minutes.

A Fast Day Dish.—This is a popular creole breakfast dish served on fast days: Take rather large, smooth potatoes, peel them and fry in round slices and fry in deep, hot fat, same as Saratoga chips, until a fine brown. Serve in a hot dish with plenty of butter poured over them.

Aunt Laura's Way.—Boil the potatoes as directed, then peel them and cut in rather thick lengthwise slices. Lay them in a deep dish and pour over each layer of slices a sauce made according to these directions: Take a cup each of sugar and butter and half a cup of hot water and boil until this is thick. Some like a little grating of nutmeg; others a small piece of stick cinnamon boiled in the sirup.

Caramel Sweet Potatoes.—Boil the potatoes until just done; drain, peel and cut in halves lengthwise and fry a rich brown in lard and butter mixed. Sprinkle generously, while frying, with granulated sugar.

Sweet Potato Biscuit.—Take one square of dry, mealy sweet potatoes boiled and grated, half cup lard, half a cake of compressed yeast dissolved in half a cup of lukewarm water; mix with milk or water to a batter, and let rise twice. Bake the same as tea biscuit and break open and butter hot.

Leftover Sandwiches.  
Sandwiches left over from an afternoon tea or reception need not be looked upon as just so much wasted material. The careful hostess utilizes them in many ways.

Ham sandwiches can be transformed into a breakfast dish simply by toasting them to a golden brown and pouring over them a cream sauce into which have been stirred minced ham and parsley. Where a more hearty breakfast dish is desired allow one poached egg to two small sandwiches arranging the eggs on the toast before covering with the cream sauce.

Will Not Curdle.  
To prevent milk from curdling in tomato soup: To those who find it difficult to make tomato soup and keep it from curdling I think this will be valuable, writes a contributor to the New York Press. Have your milk and tomatoes boiling in separate pans one quart of milk to one quart of tomatoes. Put about a teaspoonful of soda in your tomatoes and while they are foaming up pour them into your milk. If you do this your soup will never curdle. Never put your milk into your tomatoes.

To Clean Knives.  
A good knife cleaning board is made by taking a piece of board ten inches long and six inches wide. Tack on to this piece of Brussels carpet and sprinkle with fine emery. Knives rubbed on this will clean well and with little labor.

To Moisten Citron.  
Before slicing citron, lay it in a small strainer and place on top of the teakettle for a few minutes. The steam will soften the citron and make it easier to cut.—National Magazine

## EXPERIENCE OF MOTHERHOOD

Advice to Expectant Mothers

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at such times, but many approach the experience with an organism unfitted for the trial of strength, and when it is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under the right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, and with ample time in which to prepare, women will persist in going blindly to the trial.

Every woman at this time should rely upon Lydia E. Pinkham's Vegetable Compound, a most valuable tonic and invigorator of the female organism.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

## The Army of Constipation

Is Growing Smaller Every Day. CARTER'S LITTLE LIVER PILLS are responsible—they not only give relief—they permanently cure Constipation. Millions use them for Biliousness, Indigestion, Sick Headache, Sallow Skin.

SMALL PILL, SMALL DOSE, SMALL PRICE. Genuine must bear Signature

W. D. Wood

## DR. J. D. KELLOGG'S ASTHMA

Remedy for the prompt relief of Asthma and Hay Fever. Ask your druggist for it. Write for FREE SAMPLE NORTHROP & LYMAN CO., Ltd., BUFFALO, N.Y.

## PATENTS

Some people might just as well be crazy for all the sense they have.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, cures colic, soothes a sore throat.

Many a married man has made his wife happy by leaving home.

Red Cross Ball Blue will wash double as many clothes as any other blue. Don't put your money into any other. Adv.

A Prerequisite  
"Where would you advise me to go for my vacation?"  
"Why not try Shoreville?"  
"Can I have a good time there?"  
"Yes, if you take it with you."—Judge.

## THOSE RHEUMATIC TWINGES

Much of the rheumatic pain that comes in damp, changing weather is the work of uric acid crystals.

Needles couldn't cut, tear or hurt any worse when the affected muscle joint is used.

If such attacks are marked with headache, backache, dizziness and disturbances of the urine, it's time to help the weakened kidneys. Doan's Kidney Pills quickly help sick kidneys.

A Michigan Case  
Joseph Hoover, 225 E. Catherine St., Bay City, Mich., says: "My back got so bad I couldn't bend over. I often became so stiff I had to sit down and rest. Doctors had failed to help me, and I was growing thin and weak. Doan's Kidney Pills went right to the spot. Three bottles cured me completely. I have no more trouble since."

**GUSHING GIRL IS OBNOXIOUS**

Superlative Degree and the Loud Pedal Should Be Held Somewhat in Check.

There are few things so fine as enthusiasm, and the world wants all it can get.

But there is a difference between healthy enthusiasm and that effusive sentimentality known by the uglier and shorter word "gush."

Every girl has her "gush" period when everything is "adorable" and "perfect."

It is fine, in a way; we should be careful how we check the exuberance of the girlish nature. At the same time caution must be exercised against letting the habit be formed of flying into a febrile ecstasy about every small thing that comes our way and making as much of it as though it were an affair of the largest consequence.

It takes experience to hold in check the superlative degree and the loud pedal for the proper time and the deserving object.

But caution in the direction of not being too intense should not be withheld from the young. "Adorable" is too strong an adjective to be indiscriminately bestowed on poodles, china cups, opera singers, and matinee idols.

"Love" is another strong word that needs all its strength to keep from worn out by its use to express, for instance, a liking for ice cream or delight in a week end invitation.

It is not necessary to explode into raptures to prove one's self well pleased. Nor is it physically good to be too intense.

**TROUBLE NOT ON HIS MIND**

It Was New Woollen Underwear That Caused Mr. Twinkle to Leave So Suddenly.

"What's the trouble, Mr. Twinkle?" asked Miss Hooker, giving him all the encouragement she could. "Is there something on your mind? You are so uneasy! It can't be that your chair doesn't suit you, for it's the same one you always sit in, so it must be something else that is making you restless. Stop fidgeting and tell me what it is. I'm sure I'm a sympathetic listener."

"I-I-I guess I'll have to be going, Miss Hooker. I-I-I somehow or other I do feel uneasy tonight, and know a long walk in the cold air will do me a world of good."

Then he rushed for the door, made a hasty adieu and was alone under the cold, cold stars.

"Oh dear!" he sobbed, in bitter anguish, "and I'd just worked up my courage to pop the question tonight, too! Ding it all, why did I buy that cheap suit of woollen underwear!"

**Barnum's First Circus Exhibit.**

P. T. Barnum launched his career in the show business by exhibiting a remarkable negro woman, believed to be 160 years old, and said to have been a nurse to George Washington. An old bill of sale was exhibited, properly dated, concerning Joyce Heth, then 54 years old, and evidence was also furnished that she was nurse to George Washington. Everything seemed so straightforward to the young man that he was eager to become the proprietor of this novel exhibition, which he purchased for \$1,000, \$500 of which he paid down, selling out his interest in the grocery business, and the other \$500 he borrowed. He saw that the thing to do was to make people talk and become curious and excited over rare spectacles. Regardless of expense he advertised in New York, Boston and Philadelphia, and the halls were thronged until Joyce Heth died.—Joe Mitchell Chapple in National Magazine.

**Straight Talk From a Sea Dog.**

For several minutes a Plain Civilian had been trying to interest one of Uncle Sam's bluejackets in a conversation on the steps of the federal building, when a portly man slipped and fell on the lower step.

"Ah, see the dreadnaught party strike a reef," the P. C., laughingly said. "See what?" the sailor replied, with an ominous accent on the "what." Then the lecture began.

"You plowmaker's mates who try to heave the deep sea talk give me a bows' on pitch in the slumgullion locker," the seaman said. "In the first place dreadnaught doesn't mean large," he added in a condescending tone. "It's a class term that is used to designate any warship that carries a primary battery of large caliber guns of one caliber. And a reef bears about as much resemblance to a granite step as—"

But the Plain Civilian was gone.—Kansas City Star.

**Athletes' Blood Temperature.**

There have been made at the London College hospital some curious observations on the blood temperatures of athletes. The normal blood temperature of man is about 98.11 degrees Fahrenheit. A young man after a run of 200 yards, showed a temperature of 100.76 degrees; another a temperature of 100.94 degrees; a third a temperature of 102.2 degrees after a run of half a mile. A mile run produced an internal temperature of 103.8 degrees with one athlete and 103.6 degrees with another. After a three-mile run one young man had a temperature of 105 degrees, but this runner's normal blood temperature was 101 degrees, although he was in perfect health.—Harper's Weekly.

**Animal Friendships.**

Animals are often known to form very strange friendships. Cats become very fond of horses, and even of birds. Goats and horses are frequently great friends. Even a lioness has been known to be so much attached to a little terrier that it was miserable at its absence. A gentleman in Scotland kept several peacocks, one of which, instead of roosting with its mates in the trees or on the walls, always went to the kennel where the collie was tied up, and squeezed itself in with the dog. The peacock's tail sticking out of the kennel had a very funny appearance.

**Deafness Cannot Be Cured**

By local applications, as they cannot reach the deceased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.
