

Pinckney Dispatch.

Vol. XXXII

Pinckney, Livingston County, Michigan, Thursday, April 16, 1914

No. 16

Circuit Court Jurors

The April term of the Livingston county circuit court convened at the court house on Monday, April 13, at eleven o'clock with Judge Selden S. Miner on the bench. There are two criminal cases on the calendar, one for violating the local option law and one for larceny.

There are also nine issues of fact, seven chancery cases and five divorce cases on the calendar. The list of jurors for the coming term is as follows:

Tyrone, Chris. Dowd, Joseph Dexter.
Unadilla, George Arnold, Wm. E. Connor.
Brighton, James Bitten, Chas. Standfield.
Ochoctah, Alva Ellis, William Tock.
Conway, John Finlan, Henry C. Benjamin.
Deerfield, Marvin Gould, Wm. Green.
Genoa, Edward T. McDonald, Thos. Papworth.
Green Oak, Leon Westphal, William Duncan.
Hamburg, E. N. Ball and B. T. Gartrell.
Hartland, C. M. Parshall and Cyrus Gardner.
Handy, A. E. Canfield.
Howell, John Fawcett.
Iosco, Bert Hart.
Marion, Guy Borden.
Oceola, Robert Bergin.
Putnam, Alfred Monks.

Communication

The following letter from I. W. Kennedy of Milwaukee, Wis., we are sure will be of interest to the many Pinckney Old Boys and Girls who are subscribers of this paper and we are taking the liberty of publishing the same. We would like to hear from others.

Editor Pinckney Dispatch
Pinckney, Michigan

Dear Sir:—

Inclosed find check for payment of Dispatch. I am looking in every issue for a letter from some of the "Old Boys or Girls" in regard to the Home Coming and hope they will soon start the "ball rolling" as I like to read their letters as it brings back the old days of fun and frolic. I hope to be there again this year. I, like many others probably used to think I could not afford to go but I am getting over that and would like to say to each and every one of such, that they can not afford to miss it and if they attend they will find it will make them so much better men and women and so much happier that it will pay a thousand fold for the time and trouble.

I hope to meet many more there this year that were not there at the last meeting and am looking forward to a grand old time.

So, Mr. Editor, stir them up a little and let every subscriber hear through the Dispatch the sentiment of each and everyone of the Old Guard.

Yours truly,
I. W. Kennedy
Milwaukee, Wis.

The O. E. S. held their annual election of officers April 10th and the following officers were elected: W. M., Mrs. Georgia Van Winkle; W. P., C. V. Van Winkle; A. M., Mrs. Villa Richards; Secy., Mrs. Mary Reed; Treas., Mrs. Netty Teeple; Con., Mrs. Marian Pearson; A. Con., Miss Florence Kice.

Anderson

Chas. Bullis was in Pontiac Tuesday.

Mrs. Glenn Gardner and daughter visited her parents Mr. and Mrs. Ed. Sprout Wednesday.

Miss Elva Hoff spent a few days last week at the home of Mrs. Thos. Howlett of Gregory.

Catherine Driver went to Gregory Thursday to visit her sister Elizabeth of Detroit who is spending the Easter vacation at the home of Jas. Stackable.

Ed. LaFevre of Hart, Oceana county, was a guest of G. M. Greiner and family over Sunday.

Mrs. Alice Hoff and daughter Elva were Sunday guests at the home of Clyne Galloway.

Ray Reason of Detroit is home. Mrs. Olive Donaldson and granddaughter are moving to their farm.

Miss Dede Hinchey has returned to her school work in Minnesota, Saturday.

The Misses Eliza and Pearl Hanes visited at the home of Orlo Hanes Sunday.

Phillip Sprout was a Stockbridge visitor Wednesday.

Mrs. Julia Pangborne spent part of last week with Mrs. Alice Hoff.

Chas. Frost and family spent Sunday at the home of her parents, Mr. and Mrs. Schackleton.

Wm. Ledwidge and family spent Easter at the home of Max Ledwidge.

Mrs. C. Hinchey and daughter Dede were Stockbridge visitors one day last week.

Faye McClear of Adrian is enjoying a short vacation.

Warren Schackleton of Howell spent Saturday at C. Frost's.

Liam Ledwidge visited at the home of John Ledwidge of Dexter the first of the week.

Margaret Greiner and Clare and Justine Ledwidge were Stockbridge visitors Saturday.

Margaret and Cynthia Hanes gave an Easter party to a number of their girl friends Saturday. Many Easter games were played and prizes awarded. A delicious supper was served, the center piece being a large nest of various colored eggs. Other Easter decorations adorned the house.

South Iosco

Mrs. Geo. Mowers and daughter Lucy of Pinckney spent the week end at L. T. Lamborne's.

Mrs. John Grindling and daughter Edith of Battle Mts., Nevada, are visiting her sister, Mrs. Joe Roberts at present.

Nate Watters and wife and Bertha Watters spent Sunday at Mr. Isham's near Plainfield.

Elmer Risdon died at his home in this place Thursday, April 9th, being ill but a few hours. Funeral services were held Tuesday afternoon from the late home.

Wm. Caskey and wife of Anderson spent Sunday at the home of Bert Roberts.

David Smith and wife of Detroit visited at Geo. Hartford's the last of the week.

Read Dancer's adv. on Boys Xtragoood Suits.

Teachers examination for first, second and third grade certificates will be held at the Howell high school building, April 29-30 and May 1st.

ROYAL BAKING POWDER

Absolutely Pure
Absolutely has no substitute

Many mixtures are offered as substitutes for Royal. No other baking powder is the same in composition or effectiveness, or so wholesome and economical, nor will make such fine food.

Royal Baking Powder is made from pure, Grape Cream of Tartar. No alum, lime or acid phosphates.

North Hamburg

Mrs. Ralph Teachout and son of Unadilla returned home Friday after visiting her aunt, Mrs. R. Bennett.

Miss Florence Kice spent Easter with her parents.

Married, April 8th, at the home of the bride's parents, Mr. and Mrs. Ralph Bennett, Una Mae Bennett of N. Hamburg and Edwin W. Rounsifer of Genoa, Rev. Ostrander, officiating. Mr and Mrs. Rounsifer left for a short wedding trip after which they will be at home to their many friends in Genoa where they will make their home.

The Ladies Aid were entertained at the home of Mr. and Mrs. Stephen VanHorn, April 9th. After a good substantial dinner the society proceeded with their program. Officers were elected for the ensuing year. Rev. Ostrander was called upon for remarks after which he presented Mr. and Mrs. Ed. Rounsifer with many beautiful and useful gifts which the ladies had brought for the occasion.

The P. H. S. base ball team play their first game of the season with the Howell H. S. at Monks Park, Wednesday, April 22.

South Marion

Irving Abott, wife and son Guy and Mrs. Nora Galloway were guests of friends at Fowlerville Sunday.

Miss Veronica Brogan was the guest of Detroit relatives the past week.

Mr. and Mrs. Haller of Genoa spent Sunday at Guy Blair's.

Mrs. Ray Newcomb and Harriet of Howell spent several days of last week at the home of John Gardner.

Mrs. L. Newman of Fowlerville spent the first of the week with her parents here.

Mrs. LaVerne Demerest visited Mrs. Hoisel of Chubbs Corners one day last week.

Chas. Dey of Fowlerville spent a couple of days last week with friends in this vicinity.

Mae and Kit Brogan of Howell spent the week end with their parents here.

Mr. Hudson of Hartland is assisting Geo. Bland with his work.

The old picture gallery that formerly stood near the hotel and but recently moved to the Will Dunning farm was brought back to town Tuesday. It was placed in the rear of Mr. Dunning's home on Mill street where it will be made over into a garage.

HOPES to RAISE the TITANIC

CAN the Titanic be raised? The question has been asked more than once since the ship sank two years ago. Nearly every time the subject has been broached some one has come forward with an array of figures that apparently placed the project in the realm of the impossible. Of late the idea has been revived, and now comes an engineer with a scheme that can boast an element of the probable, provided the circumstances are quite as favorable as he imagined them to be.

Paradoxically, the man that offers the present solution has his home pretty nearly as far away from the sea as it is possible to get here in the United States. Charles A. Smith, the author of the plan, lives in Denver, says the New York Sun. Briefly it is his purpose to make use of a great many powerful electric lifting magnets, which when energized will cling to the steel body of the Titanic like so many monster leeches.

When these magnets are firmly attached to the skin of the ship lines leading surfaceward will be secured to buoyant caissons, or camels, of steel built especially for the purpose, and then the inventor counts upon the cumulative lifting force of all these cylindrical tanks to raise the Titanic clear of the bottom so that the wreck and the floating camels can be towed into shallower water.

Each time the Titanic is halted by the rising sea bed the connecting lines will be shortened, the vessel raised a few feet, and with this clearance she will be towed nearer land. Thus step by step the foundered ship is to be raised and moved shoreward until the next to the last stage of the operations finds her in water of such moderate depth that the ordinary diver can be employed.

This would involve bringing the Titanic from her present supposed resting place, two miles down below the surface of the sea, and transporting her to some point near the Nova Scotian coast, where a temporary resting place could be found at a depth of not more than 100 feet.

But great physical obstacles lie in the path of Mr. Smith's project. To begin with, it would take an immense amount of hunting to locate the wreck. Wrecks have a way of shifting even after they reach the ocean bed, and this is one of the puzzling aspects of a submarine problem of this sort.

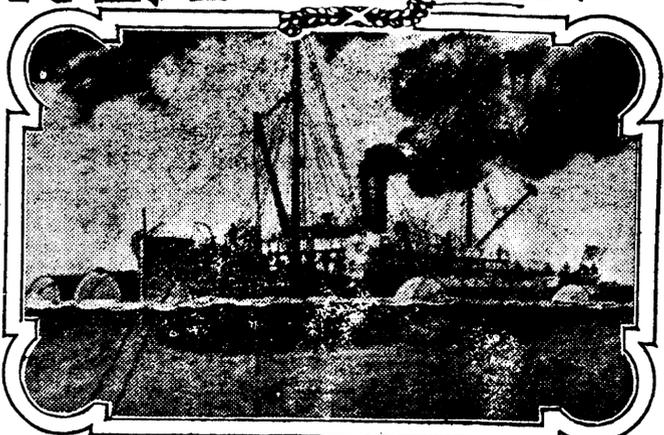

Take your atlas and trace the course of the Gulf Stream as it branches just about where the White Star liner collided with that death-dealing iceberg. You will find that this current of warm water sweeps at that point off to the southeast, and somewhere below the Gulf Stream the great volume of the Labrador Current flows to the south and west, bringing with it an unceasing burden of sand. In this fashion both of these ocean rivers have carried sand to the point where they meet in conflict south of Newfoundland, and thus out of this battle has grown that steadily rising submarine mountain or plateau called the Grand Bank. It is possible that the Gulf Stream and the Labrador Current have in the past two years substantially buried the wreck of the Titanic. If such be the case, the hulk may never be located.

Again, it is not certain that the Titanic lies on a sandy bottom. There is a reasonable probability that the ocean bed at that point may be rocky. This brings us to the question of her probable condition as a likely subject for salvage, assuming that it be humanly possible to get down to her and to attach lines or cables for her lifting.

The question is, so far as the salvager is concerned, which of these ways was the one in which the Titanic was finally halted at the bottom of the Atlantic? If she lies upon a rocky bed, then, if Mr. Smith can secure his magnets to her and command sufficient lifting force, the chance of her ultimate recovery brightens considerably. On the other hand, if the ship has forced a goody part of her body into the sea bed the situation is entirely changed. There is no reasonable hope of dislodging her from that anchorage.

The Titanic, like her sister ship, the Olympic, measured upon her longest deck, 882 feet and her beam was 92 feet. A rectangle of these dimensions would have a total area of 81,144 square feet. Of course, a plan view of the Titanic's body was ship shaped and not rectangular, and let us suppose that a goody part of it is buried how first in the sand, and that only 60 per cent rises above the bottom. In that case approximately 7,000,000 square inches would be exposed to the downward thrust of the overlying two miles of sea water.

At a depth of 10,500 feet there is a hydrostatic pressure tending to crush us, to be amounting to a force of 1,540 pounds to every superficial

ONE OF THE SALVAGE STEELERS WITH A FLEET OF BUOYANT PONTONS OR CAMELS

square inch. If you multiply the 7,000,000 square inches by this pressure and divide by 2,240—representing the pounds of a long ton—you will find that the superposed sea has laid its hand upon the body of the Titanic with weight of more than 14,000,000 tons.

When afloat and fully laden the great liner represented a dead weight of 85,000 tons. If she be held in the grip of the ocean bed, with the sea further aiding that hold, the salvager would have to exert a lifting force of more than 215 times her service tonnage in order to free her from the bottom. In other words, Mr. Smith would have to provide salvage caissons or camels with an amassed buoyancy equivalent to an assembled fleet of floating Titanics more than 215 strong! From a financial and engineering point of view an undertaking of this sort would not be alluring.

But it may be that the wreck of the ship is not in this unpromising predicament. How is the Denver inventor to satisfy himself upon this point?

Mr. Smith has planned as an auxiliary a type of submarine boat which is to be strong enough to withstand the deepest submergence required for the reaching of the Titanic wreck. In this direction the inventor is practically elaborating on the work of the noted Italian submarine engineer, Signor Pino.

The latter designed a type of globular submarine, which, because of its particular form and the nature of its fabrication, would stand up under the crushing stresses of very deep submergence. In fact, the boat—if such it could strictly be called—was so arranged that increasing pressure actually served to make the craft more watertight.

According to Mr. Smith's plan, these submarine auxiliaries will be lowered from big wrecking steamers and will obtain their limited propulsive energy from the electric power plant of the surface craft. Their purpose will be two fold: That of locating and exploring externally the shattered wreck, and to assist in guiding and in pushing the powerful magnets into contact with the steel hull. It would be of the utmost importance to place these mechanical leeches where the internal structure of the Titanic would be best able to support the lifting strains.

Lifting magnets are extensively employed nowadays in big steel plants, and lately have been used also for the recovery of iron and steel scrap which has been lost overboard in harbors. A well known English firm has built some of these with a diameter of five feet and with a magnetic grip strong enough to raise a solid mass of iron or steel weighing 12 tons.

One of the main difficulties in the use of magnets is to avoid overheating them by reason of the electrical current turned into them. This element of temperature has hitherto placed limits upon their attractive powers, and especially upon prolonged continuous service, something that would be absolutely needful in dealing with such a project as the lifting of the Titanic and holding her during the towing into shallower water. However, news has come from Paris of late announcing an important discovery in this matter of increasing the strength of magnets without adding materially to their size.

Unquestionably the temperature of the sea water where the Titanic now lies is very close to the freezing point, and it may be that the Denver engineer counts upon this condition to promote the efficiency of his magnets when first gripping of the wreck and starting it surfaceward. As the matter stands, however, the present state of the art calls for a magnet weighing about sixty-eight hundredweight to lift a burden of 15 tons. If the Titanic broke just forward of the bridge, and if the after section represents two-thirds of her total weight, then the load to be lifted would be equivalent to something over 41,000 tons were the vessel afloat. The buoyancy of the

sea would cut down the load to be lifted to approximately 39,000 tons, which would call for 3,250 electro magnets, representing a dead weight in themselves of fully 10,000 tons. That is to say, that the special pontoons, or camels, must be equal to providing a total buoyancy of a good deal more than 49,000 tons, because the magnets must be suspended by chains or wire ropes, and here again is an additional load.

If you are fond of figures you can while away your time calculating the number and the size of the caissons which Mr. Smith would have to use under the most favorable circumstances, and when that conclusion has been reached you will find some difficulty in getting anchorage space for the necessary fleet in New York harbor. If you are at all familiar with the practical difficulties of towing you will realize what it would mean to convoy these squadrons to the site of the wreck, and when you have got them there and have crowded them over the Titanic's hulk, imagine what would happen if a storm arose! It will be seen, therefore, that Mr. Smith has many difficulties to overcome.

Even if it were possible to recover the whole or any part of the hulk it is hard to conceive how the salvagers would have anything but an irreparably damaged mass. Remember that if any air pockets or chambers filled with air survived for a while during the vessel's sinking, they ultimately were burst in by the increasing hydrostatic pressure as the craft plunged deeper and deeper to her grave. Probably this happened in a large number of directions, and thus successively the ship's steel honeycomb was ruptured if not flattened into a veritable pancake.

Of course, Mr. Smith may have an answer for every point raised; but even so the salvage of the Titanic would in no wise pay for the labor and the enormous expense involved. True, an achievement of this sort would be of the utmost engineering significance, inasmuch as it would herald the feasibility of dealing with treasure ships and other profitable wrecks that lie in shallower water. If Mr. Smith can do this latter work he will do something well worth while.

DESTITUTE IN NEW YORK CITY

There Has Been a Big Increase During Recent Months in Demands for Charity.

There is more poverty and destitution in New York now than in the last 40 years, according to reports received by the Charity Organization Society, says the New York World. Never before in its history has the society been called upon to help so many families. A few days ago it had 2,781 families in its care, an increase of 548 over the same season last year. During February, 1914, it helped 3,313 families, an increase of 642 over February, 1912.

"Each month since last October," said W. Frank Persons, director of the society's general work, "we have cared for 25 to 30 per cent more families than the year before. The snowstorm has brought us families who ordinarily would not have to ask for help. They have been able to withstand hard times for weeks, but the pressure now has become too great.

"We expect to have for the next month an increasing number of such families as apply for aid. Indications are that there will be much suffering from throat and lung diseases, as is always the case when the snow begins to melt. This will affect day laborers, drivers and men in other outdoor occupations."

The Splendid Paupers.

Second Turkish Official—I don't know who gets the dread, but I know we've got the naught.—Punch.

SAVING ON MEAT BILL

IDEA OF RETAIL BUTCHER AS TO HOW TO DO IT.

High-Priced Cuts, He Asserts, Are Not Necessarily the Best—More Nourishment in Many of the Cheaper Grades—About Chops.

In the Woman's Home Companion a retail butcher writes an article entitled "Reducing the Meat Bill," in which he shows how people who buy the high-priced cuts don't get the best meat. He says that some of the cheaper meats are the best. He takes an itemized weekly meat bill of \$4.62 and shows, item by item, how that bill can be reduced to \$3.21, just by using cheaper cuts, which he says are better cuts. After dealing with the various kinds of steaks—in which, by the way, he tells about the steak that the butcher eats himself—he goes on as follows about roasts and chops:

"A roast of beef costing \$1 or \$1.50 at the present time is not much; a hungry and healthy family will probably finish it in one meal. You can still enjoy good roast beef, and surely for less money, only buy the right cut. From past observation the writer has found that nine out of ten customers ask for the first cut of the rib roast. Of course, they are the most expensive cuts. The fifth, sixth and shoulder ribs are hardly in demand, and the butcher has a hard job selling them. These end ribs or shoulder ribs of roast beef are not only considerably cheaper to buy, but are richer in nourishment and food value. When buying one of the three or four ribs of beef, say, for instance, weighing five pounds, you will find that you hardly have sufficient meat left after it is carefully trimmed and the bone taken out. The difference in price between the first cut on the rib and the last two cuts is at least six cents a pound, and when you ask for a shoulder rib roast ask the butcher to insert a piece of suet in the center of the roast, or, if he has time, to lard it with thin pieces of fat. Another good piece of meat for roast beef is the top sirloin, which is not so cheap, but it is recommended because it has no waste.

"The next important item on the meat bill is chops—either lamb, pork or veal chops. Lamb chops, however, are the kind mostly demanded, and, of course, the demand is for loin and rib chops, the most expensive. There is the same solution as with steaks—buy shoulder chops; they cost less and are sweeter. This same principle applied again to pork chops. The shoulder chops are very sweet and tender, and the butcher will sell them for less, but very few people know about them."

To Make Okra Soup.

Okra soup, or gumbo soup, can be made in a good many ways. For one kind make a rich stock from beef and veal bones strain and skim. Add to a quart of the stock a pint of okra cut in small pieces and stewed with a pint of tomatoes and a pint of water until tender. Put in three or four teaspoonfuls of rice and simmer until it is tender. Then serve very hot. This soup, of course, does not equal chicken gumbo soup, which is one of the most delicious soups made, but which takes four or five hours in the making and calls for chicken, beef, okra, potato, onion, rice, tomato, green pepper, bacon and several other ingredients.

Linoleum Polish.

Odds and ends of candles will make an inexpensive polish for linoleum. Use about equal parts of candle scraps and common turpentine. Place in a jar and stand where it is warm, until the grease is quite melted, then allow to cool, where it will be soft and creamy. Use with a soft cloth and polish with a second soft cloth. A little of the grease will go a long way.

Cream of Corn Soup.

One can grated corn, one pint boiling water. Cook gently 20 minutes, then rub through a sieve. Melt two tablespoonfuls butter. When bubbling add two tablespoonfuls flour, one teaspoonful salt and dash white pepper and stir in a smooth paste, then add gradually to it one pint milk and cook until smooth and creamy. Stir all the time. Cook five minutes on back of the stove, where it will not burn, and add cream; heat thoroughly and serve.

Soup From Corner Beef.

Corned liquor from very freshly cornered beef is a very fine soup stock, but the over salted and long pickled or salt-petered cornered beef is practically spoiled for use as meat and the water in which such meat is boiled is absolutely worthless for soup stock.

Keeping Flatirons Smooth.

Flatirons can be kept clean and smooth by rubbing them first with a piece of wax tied in a cloth and afterward rubbing them on a paper or cloth strewn with coarse salt.

Rubbing wears clothes out—wears you out—wastes time—wastes work. RUB-NO-MORE WASHING POWDER saves clothes—saves you—saves time; because it loosens dirt without rubbing.

RUB-NO-MORE WASHING POWDER is a sudless dirt remover for clothes. It cleans your dishes, sinks, toilets and cleans and sweetens your milk crocks. It kills germs. It does not need hot water.

MEANT FOR TRAVELER

DESIGNERS HAVE SUPPLIED ALL SORTS OF APPAREL.

One of the Handsomest of the Tourist Coats, in Tweed, is Shown—Shepherd Checks and Plaids Also Popular.

No department of woman's dress is more complete than that of traveling apparel, and most of the garments are, like the modeled sketch, suitable for general touring purposes, whether by motor, seamer or rail.

Here the material is tan Scotch tweeds with a hair-line check in black. Plain tan cloth is used for the collar, cuffs and belt sections back and front, and plain covered buttons for further trimming.

The coat is comfortably large enough to get over a suit and its lines are exceedingly graceful. Like the majority

few folds, lifted and draped up from the hem.

Some scant fullness in the back is caught under another high belt section, buttoned to the coat at either end.

Shepherd checks and plaids are quite as much to be considered as ever, for they, like navy serge, never actually go out of style; but this year they are entirely dependent on cut and graceful hanging from the shoulders for success. All coats, whether for separate wear or accompanying skirts, are hung from the shoulder blades instead of the top of the shoulder. It is an important note, since it at once stamps the design as modern, and, moreover, is much more graceful than the latter.

Three-quarter lengths are very much in order and are smart looking. All variations of the Norfolk are popular. Most of them are quite high in the neck, with good-sized turnover collars and long and very moderate-sized sleeves that finish with turnback cuffs or bands. There are always pockets in these, but instead of the patch variety, they are made inside with the outside flap serving a purely decorative purpose.—Washington Star.

RESTORATIVE FOR THE SKIN

Bathing Face, Neck and Arms With Hot Milk and Water is One of the Best Known Processes.

You will enjoy a wonderful skin restorative if you bathe the face, neck and arms every night with hot milk and water, which is a wonderful skin restorative, dry gently, with a very soft and fine face towel, and then apply a very little good face cream, with circular and upward massage movements of the finger tips.

Smooth the eyebrows and lashes with a modicum of pure white vaseline.

In the morning again bathe the face with hot milk and water, then rinse with cold distilled water to which a few drops of toilet vinegar or laet virginal have been added.

Dry thoroughly, always using upward movements, apply a little toilet cream, wiping off any superfluity with a soft handkerchief, dust on some good powder and smooth with a fine wash leather.

This simple treatment has really astonishingly beneficial effects in a very few days if persevered with. Ailing ones must, of course, be very careful to build up the general health; not by "cossetting," but by common sense precautions. A nourishing but digestible diet, including plenty of milk, eggs, fish, poultry and beef once a day, as much fresh air and sunshine as possible, judicious but not strenuous exercise and plenty of rest in between, provide an excellent restorative regime to those below par.

A Few Large Hats.

Some of the newest hat models are large and flat and very elaborately garnished with flowers, lace and ribbon. Moline is a very important factor in the construction of these models, black and the most delicate tones of pink and amber having the preference. Ostrich plumes of contrasting color are favored by this designer, who also achieves remarkably beautiful results by brightening up her black models by giving them exquisite-tinted tapestry or chiffon crowns.

HOPE FOR RAIN-SOAKED HAT

Generally May Be Trimmed Freshly and Worn for Second Best, at the Least.

Because you are disgusted with the wretched appearance of your unfortunate rain-drenched hat, don't throw it away. Having allowed it to dry gradually by placing it on a flat surface out of reach of the sun's rays, study it carefully and see what can be done to make it wearable—if not for best—at least for general running about. If the trimmings are of flowers and ribbons, they won't be worth the saving and the chances are that the crown will be dented and discolored. But as the brim of a hat rarely gets badly injured by a drenching rain you can face it freshly and then cover the crown with a length of broad sash ribbon. Beginning at what is destined to be the low side of the hat, tack one edge of the ribbon close to the joining of the rim and the crown, then draw it in soft rippling folds all about the top and toward the high side, where the two ends of the ribbon may be shaped and wired to form a pair of rabbit ears. Join these under a bow of narrow velvet ribbon.

Beard Neckties Very Popular. Attention at the present time is principally focused on beard neckties, says the Dry Goods Economist. These are being offered in an almost endless variety of styles, colors and materials. The latest offerings in this line are extremely long beard neckties, ranging in length from 75 to 90 inches. When placed about the neck these reach almost to the hem of the gown. Various

materials are employed for these chains, including wood, glass, etc. One of the foremost types is constructed entirely of extremely small beads, in braided or rope effects.

FRILLY SPRING CHAPEAU

Made of horsehair lace, with blue velvet band and quaint bouquet of flowers in Chinese design.

TO REMEMBER WHEN IRONING

Matters of Consequence if One Would Do Good Work and Preserve the Clothes Handled.

First of all the irons must be immaculately clean and suited to the article to be ironed. Irons come now in all sizes, for all purposes.

Heat the irons slowly, but have them very hot before starting, even if they must be cooled later. Try them on a soft clean cloth.

The ironing sheet also must be clean. For fine lingerie cover the ordinary ironing sheet with thin material; for embroidery and lace use a Turkish towel, pinned tightly around the board. To stiffen articles slightly without starch rub them on the wrong side with warm water and borax.

To clean the irons if starch sticks rub them over fine emery paper, then with a little paraffin wrapped in muslin. If an iron becomes rusty scrub it with hot water and soap, then rub it very lightly with lard. Wipe it carefully with absorbent cotton to remove all traces of the lard.

Never allow irons to get red hot, as it takes the temper out. Do not put a hot iron in water to cool it; stand it on one side for a few minutes.

It is unwise to put irons directly over the gas flame, as it spoils the iron. In the absence of a special device for holding them use an asbestos mat.

When possible colored goods should be ironed on the wrong side, then pressed on the right. This brings out the coloring. All-wool underwear ought not to be ironed, as ironing causes it to shrink.

HASH MADE WITH SALT FISH

Something of a Novelty, and One of the Best of Dishes for a Light Lunch.

Cover one-half pound of salt fish with cold water, bring to a boil and drain. Do this three times. Cover again with cold water and boil until very tender. Pare six good sized potatoes and boil until soft. Drain. Add to the fish and chop together, not too fine. While the fish and potatoes are cooking cut two or three slices of fat pork. Put in a fry pan, cover the pork with cold water, bring to a scald and drain. Return to the pan and fry until a nice brown. This makes the pork crisp. Take the pork from the pan and put it where it will keep hot. Now put the chopped fish and potatoes into the pork fat and return to the fire. Cook until well blended with the fat, stirring lightly. When well heated through set back to cook slowly, running a knife around the sides and under the cake, which must be patted out nice and smooth and size of the pan, but do not stir again. When it is a nice rich brown on the under side fold it over, exactly like an omelet, and serve on a hot platter. Garnish with the fried pork cut in small strips. This is fine and is rich and hearty enough with a vegetable of some kind and a dessert for dinner.

Braised Veal.

Take a piece of shoulder weighing five pounds. Have bone removed and tie up meat to make it firm. Put piece of butter size of half an egg, together with a few shavings of onion, into a kettle and let get hot. Salt and pepper the veal and put into kettle, cover tightly and put over a medium fire until meal is brown on both sides, turning it occasionally. Then set kettle on back of stove where it will simmer slowly for about two and one-half hours. Before setting meat on back of stove see if the juice of the meat, together with the butter, makes gravy enough, and if not, add a little hot water. When gravy is cold it will be like jelly. Serve gravy hot with hot meat or cold with cold meat.

Prune Kringles.

Half pound dough, one teaspoon each of butter and sugar kneaded into it; chop six or eight pruned in four tablespoonfuls sugar, chop first the meat of three or four prunes very fine; mix, shape the dough into sticks the size of the little finger, roll in the prunes, bake in oblong rings.

Sugar kringles are made in the same way, substituting 12 dozen bleached and chopped almonds for the prunes; roll the sticks rather smaller; make oblong rings with one end crossing at the middle to the opposite side.

Veal Scallop.

Chop cold roast veal very fine, put a layer in the bottom of a pudding dish, season with salt and pepper; cover with a layer of rolled crackers and bits of butter; wet well with milk and continue until dish is full. Wet the whole with broth and milk; insert a pan over it so as to retain steam and bake half-hour.

Making Floors Easy to Clean.

Kitchen floors are much more easily cleaned when painted with boiled linseed oil.

Polarine
Insures Perfection in Lubrication
Improper lubrication is often the cause of motor troubles for which the motor car, motor boat or motor truck itself is blamed.
Use POLARINE—perfect lubrication. It develops every motor's maximum efficiency, maintaining the correct lubricating body at any motor speed or temperature—flowing freely at zero, and obviating the necessity of changing oil for cold and hot weather driving.
STANDARD OIL COMPANY
(AN INDIANA CORPORATION)
Makers of Lubricating Oils for Locomotive, Engineering and Industrial Works of the World.

But a girl who is an expert at making angel cake may have a demon disposition.

PIMPLES ALL OVER FACE

1413 E. Genessee Ave., Saginaw, Mich.—"Cuticura Soap and Ointment cured me of a very bad disease of the face without leaving a scar. Pimples broke out all over my face, red and large. They festered and came to a head. They itched and burned and caused me to scratch them and make sores. They said they were seed warts. At night I was restless from itching. When the barber would shave me my face would bleed terribly. Then scabs would form afterwards, then they would drop off and the so-called seed warts would come back again. They were on my face for about nine months and the trouble caused disfigurement while it lasted.

"One day I read in the paper of the Cuticura Soap and Ointment. I received a free sample of Cuticura Soap and Ointment and it was so much value to me that I bought a cake of Cuticura Soap and a box of Cuticura Ointment at the drug store. I used both according to directions. In about ten days my face began to heal up. My face is now clear of the warts and not a scar is left." (Signed) LeRoy C. O'Brien, May 12, 1913.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address postcard "Cuticura, Dept. L, Boston."—Adv.

Don't imagine the world is all wrong just because your liver is.

GO TO, WESTERN CANADA NOW

The opportunity of securing free homesteads of 160 acres each, and the low priced lands of Manitoba, Saskatchewan and Alberta, will soon have passed.

Canada offers a hearty welcome to the Settler, to the man with a family looking for a home; to the farmer's son, to the renter, to all who wish to live under better conditions.

Canada's grain yield in 1913 is the talk of the world. Luxuriant Grasses give cheap fodder for large herds; cost of raising and fattening for market is a trifle.

The sum realized for Beef, Butter, Milk and Cheese will pay fifty per cent on the investment.

Sportsmen who have looked forward to spring duck shooting are up against a snag this spring, for there is no escape from the federal law, which prohibits the shooting of the fowl this season.

The bill which puts a damper on the sport, was signed by President Wilson, October 28, and all game wardens have been instructed to enforce this law. Any person who violates this law, and is apprehended will have a chance to explain why in one of Uncle Sam's courts and excuses are not likely to have much weight.

Supervisor J. W. VanRiper ordered 500 pounds of coal sent to his residence, Saturday, to finish out the season, and the coal was duly delivered by a local drayman who was temporarily helping the coal dealer. Later in the day when Mr. VanRiper went to his basement he was unable to find the coal, but a hasty call to the dealers revealed the fact that it had been delivered. The drayman was asked to explain and declared that he had delivered the coal to the VanRiper residence and put it into the cellar through a window. A still hunt was instituted with the result that the coal was found in the basement all right, but the joke was on the drayman, as he had mistaken the cold air eye of the furnace for a coal chute and had dumped the whole 500 pounds of coal into it.—Chelsea Tribune

Walter Dinkel spent Sunday at Detroit.

George Coleman was in town Monday with his arm in a sling the result of a fall from a load of wood at Stephen Van Horn's in Hamburg, a few days ago. He feels that he got out easy even with a broken arm as he had to hurry some to keep his legs out from in front of the wagon wheels.—Howell Republican.

Every line in a newspaper costs the proprietor something. If it is for the benefit of the individual it should be paid for. If the grocer were asked to contribute groceries to one abundantly able to pay for them he would refuse. The proprietor of the newspaper must pay for the free advertising if the beneficiary does not, and yet it is one of the hardest things to be learned by many, that a newspaper has space to rent in its columns and must rent them to live. To give away space for anything less than living rates is as fatal to a newspaper as for a landlord to furnish free rent.

Guard Your Children Against Bowel Trouble

Many children at an early age become constipated, and frequently serious consequences result. Not being able to realize his own condition, a child's bowels should be constantly watched, and a gentle laxative given when necessary. Dr. Miles' Laxative Tablets are especially well adapted to women and children. The Sisters of Christian Charity, 531 Charles St., Luzerne, Pa., who attend many cases of sickness say of them:

"Some time ago we began using Dr. Miles' Laxative Tablets and find that we like them very much. Their action is excellent and we are grateful for having been made acquainted with them. We have had good results in every case and the Sisters are very much pleased."

The form and flavor of any medicine is very important, no matter who is to take it. The taste and appearance are especially important when children are concerned. All parents know how hard it is to give the average child "medicine" even though the taste is partially disguised. In using Dr. Miles' Laxative Tablets, however, this difficulty is overcome. The shape of the tablets, their appearance and candy-like taste at once appeal to any child, with the result that they are taken without objection.

The rich chocolate flavor and absence of other taste, make Dr. Miles' Laxative Tablets the ideal remedy for children.

If the first box fails to benefit, the price is returned. Ask your druggist. A box of 25 doses costs only 25 cents. Never sold in bulk. MILES MEDICAL CO., Elkhart, Ind.

Beauty Lesson

No. 8

Washing and Shampooing the Hair

Nature's gift to woman should have the most careful attention in washing and shampooing as this has much to do with the beauty of the hair.

For those whose hair is dry and brittle, it is well to follow this method of washing: The night before you wash it, rub into the scalp plenty of white vaseline, leaving it overnight. This will soften the scalp and give life to the almost deadened roots of the hair.

If the hair is oily, use a small quantity of borax, ammonia, or salts of tartar in the water you shampoo the hair with. Great care should be exercised in the selection of the soap or shampoo paste to be used. Tar soap is good, also pure castile.

If possible, dry the hair in the sun as this does more to promote the growth beauty of the hair than anything else. Be sure the hair is thoroughly dry before allowing it to be put up.

RESERVE CLAUSE HELD TO BE VOID

JUDGE SESSIONS DENIES INJUNCTION TO FEDERAL LEAGUE.

IMPORTANT BASE BALL POINT

Organized Base Ball is Hard Hit By Ruling of United States District Court of Grand Rapids.

Grand Rapids, Mich.—Judge Clarence W. Sessions, in the United States district court, denied the application of the Chicago Federal league club for an injunction enjoining Catcher William Killifer, Jr., from playing with the Philadelphia National league club.

The judge denied the application upon the grounds that the Chicago Federal league club did not come into court "with clean hands."

Killifer made a contract with the Federal league club on January 8th and on January 20th made another one with the Philadelphia club. Both contracts are in form valid and binding, but the court held that a willful wrong was done the Philadelphia club owing to the fact that the reserve clause of their 1913 contract with Killifer would have been carried out if the Federal had not tempted him with a much greater salary.

The reserve clause is, however, held to be invalid under the law. This is the important point of the decision as organized base ball has regarded it as a bulwark against the invasion of new leagues. The release clause is that part of a ball player's contract that gives his team an option on his further services at the termination of the contract. On this point the decision reads:

"The leading authorities, with possibly one exception, are agreed that executory contracts of this nature can neither be enforced in equity nor form the basis of an action at law to recover damages for their breach. The reasons for the decisions are that such contracts are lacking in the necessary qualities of definiteness, certainty and mutuality. The 1913 contract between these defendants, relative to the reservation of the defendant, Killifer, for the season of 1914, is lacking in all of these essential elements. It is wholly uncertain and indefinite with respect to salary and also with respect to terms and conditions of the proposed employment. It is nothing more than a contract to enter into a contract in the future, if the parties can then agree to contract. Although it is founded on sufficient consideration, it lacks mutuality, because the Philadelphia club may terminate it at any time on 10 days' notice while the other party has no such option and is bound during the entire contract period. A contract exists, but, if broken by either party, the other is remediless, because the courts are helpless either to enforce its performance or to award damages for its breach."

Railway Improvements for Manistee.

Cadillac, Mich.—The Manistee East & West railway, formerly the Manistee & Grand Rapids, is planning extensive improvements on its line from Manistee to Marion to give direct passenger service between these points. At present a local runs from Manistee to Dighton, 20 miles from Marion, the roadbed making it impossible for the train to proceed nearer the eastern terminal. Thirty-five thousand ties have been purchased for the purpose of improving the roadbed, and these will be placed in May and June. By July 1 Manager Morey promises that a motor or a passenger will be running daily between Marion and Manistee. The road purposes to put about \$75,000 in improvements.

Township to Own Railroad.

Manistee, Mich.—Garden township, Delta county, voted \$25,000 bonds for "highway purposes" to keep itself "on the map." The highway will not be the usual road of stone and gravel, but is of ties and steel and is 14 miles long. In other words, the proceeds of the bonds will be used to purchase a railroad and Garden will be the only township in Michigan owning a railway.

MICHIGAN NEWS IN BRIEF

John C. Buhl, 25, of Marquette, is dead from being hit on the head by a falling tree. His skull was fractured.

Gov. Ferris has appointed the following as jury commissioners for Saginaw county: William H. Greenville, and Thomas B. McDonagh, of Burt.

FORMER BAY STATE GOVERNOR IS DEAD

EBNER S. DRAPER.

Greenville, S. C.—Eben S. Draper, former governor of Massachusetts, died here late Thursday. He was 65 years old and a prominent manufacturer of textile machinery in New England. Gov. Draper was prominent in both the industrial and political life of Massachusetts. Previous to his election as governor in 1909, he served as lieutenant-governor of the state from 1909 to 1911.

PALMER IS FOUND GUILTY

Jury in Federal Court Decides Against Former Head of Defunct Kalamazoo Buggy Co.

Grand Rapids, Mich.—Victor L. Palmer, ex-secretary and treasurer of the defunct Kalamazoo Buggy Co., was found guilty in federal court here Friday of using the mails to defraud in sending out false statements concerning the assets and liabilities of the company. The jury was out 55 minutes.

Eleven banks were concerned in the case which grew out of disclosures made when the officers of the concern were being heard before a referee in bankruptcy.

Palmer's attorneys have until April 20 to file a motion for a new trial.

The accused was unmoved when the verdict was announced. Palmer must face charges in Kalamazoo, his home, of obtaining money under false pretenses.

MEXICANS ARREST MARINES

Federals Seize Detachment From American Gun Boat But Apologize Later.

Mexico City—A launch from the United States gunboat Dolphin, carrying the paymaster and a small detachment of marines, put in Friday at Iturbide bridge at Tampico. The Americans were after a supply of gasoline. They were in uniform, but unarmed. The launch flew the American flag.

Col. Hinojosa, commanding a detachment of Mexican federals, placed the paymaster and his men under arrest. They were paraded through the streets and held for a time under detention.

Admiral Mayo made vigorous representations to the authorities, and the men were released. Gen. Ignacio Zaragoza expressed to Admiral Mayo his regret.

DROWNED IN AUTO MISHAP

Machine Plunges Through Gates On Ferry Steamer.

Norfolk, Va.—Two men were drowned and five others were more or less injured when an automobile plunged through the gates on a ferry steamer into Elizabeth river Thursday night.

The dead are: John Tully of New York and W. J. Canavan of Norfolk. The survivors are William Fintzer, L. Hanff, Nathaniel Vogel, Burt Johnson and Richard Smith, all of New York. Smith received a bad wound on the head.

Tully and Johnson, who were arrested Tuesday in the raid on the Jamestown race track, had just secured bail for their appearance in court next month and were returning from Portsmouth to Norfolk, when the accident occurred.

MICHIGAN NEWS ITEMS

The State Fair commission has decided to select one boy from Huron county to attend the state fair in Detroit in September, where he will be instructed in stock raising, soil testing and dairying.

EAST BUFFALO—Cattle—Receipts 4,000; market 10c higher; prime steers, \$8.60@9.10; shipping steers, \$8.25@8.60; best 1,100 to 1,200-lb steers, \$7.85@8.35; coarse and plain weighty steers, \$7.40@7.65; fancy yearlings, baby beef, \$8.25@8.50; medium to good, \$7.60@7.85; choice handy steers, \$7.60@8.35; fair to good, \$7.25@7.50; extra fat cows, \$6.75@7.25; best cows, \$5.75@6.25; butcher cows, \$5@5.50; cutters, \$4.25@4.75; trimmers, \$3.50@4.25; stock heifers, \$7.50@8; medium butcher heifers, \$6.50@6.75; stock heifers, \$6@6.25; best feeding steers, \$7@7.25; fair to good, \$6.50@7; fancy stock steers, \$6.50@7; common light steers, \$6@6.25; extra bulls, \$7@7.25; bologna bulls, \$6.50@7; stock bulls, \$5@6; milkers and springers, \$4@8.00.

Hogs—Receipts, 14,000; market slow; heavy, \$9.20@9.30; yorkers, \$9.30@9.35; pigs, \$9.15@9.25.

Sheep and lambs—Receipts, 16,000; market 25c lower; wool lambs, \$8.25@8.40; clipped, \$7@7.10; yearlings, 7@7.50; wethers, \$6.75@7; ewes, \$6.25@6.50.

Calves—Strong; tops, \$12; fair to good, \$10@11; grassers, \$6@7.

Grain Etc.

DETROIT—Wheat—Cash No. 2 red, 87 1-4c; May opened at a drop of 1-2c at 98c, advanced to 98 1-4c, declined to 98c and closed at 98 1-4c; July opened at 88 1-2c, advanced to 88 3-4c and declined to 88 1-2c; No. 1 white, 96 3-4c.

Corn—Cash No. 3, 68c; No. 3 yellow, 2 cars at 69 1-2c, 1 at 70c; No. 4 yellow, 1 car at 67 1-2c, closing at 68c.

Oats—Standard, 4 cars at 42 1-2c; No. 3 white, 1 car at 42c; No. 4 white, 41@41 1-2c.

Rye—No. 1 Michigan, 69 1-2c; No. 2 Michigan, 68 1-2c; No. 2 western, 64 1-2c.

Beans—Immediate and prompt shipment, \$1.98; April, \$2; May \$2.02.

Clovers—Prime spot, 75 bags at \$7.50; April, \$7.50; sample red, 30 bags at \$7, 15 at \$6.50; prime alsike, \$9.75; sample alsike, 20 bags at \$8.50. Timothy—Prime spot, 50 bags at \$2.30.

Alfalfa—Prime spot, 25 bags at \$7.50 Hay—Carlots, track Detroit: No. 1 timothy, \$15@15.50; standard, \$14@14.50; No. 2 timothy, \$12.50@13.50; light mixed, \$14@14.50; No. 1 mixed, \$12.50@13; No. 1 clover, \$12@12.50; rye straw, \$7@7.50 per ton.

Flour—In one-eighth paper sacks, per 196 pounds, jobbing lots; Best patent, \$5.30; second patent, \$5; straight, \$4.75; spring patent, \$5.10; rye, \$4.40 per bbl.

Feed—In 100-lb sacks, jobbing lots; Bran, \$29; coarse middlings, \$28; fine middlings, \$30; cracked corn, \$30; coarse cornmeal, \$29; corn and oat chop, \$24.50 per ton.

General Markets.

Apples—Steele Red, \$6@6.50; Spy, \$5.50@6; Greening, \$4.50@5; Baldwin, \$5.50@6; Ben Davis, \$4@4.50 per bbl. Tomatoes—Florida, \$3.00@3.75 per crate, 75c per basket.

Dressed Hogs—Light, 10@10 1-2c; heavy, 9@9 1-2c per lb.

Sweet Potatoes—Jersey kiln-dried, \$1.25 per crate.

New Potatoes—Bermuda, \$3.25 per bu. and \$9.50 per bbl.

Potatoes—In bulk, \$2@2.40 per bu; in sacks, \$6@7c per bu. for carlots.

MAKE KITCHEN WORK EASIER

Cleaning of Pots and Kettles Need Not Be the Bugbear That it is for So Many.

It is quite possible to go into many kitchens the first thing in the morning and find an alarming array of dirty pots and pans on which the remains of food cooked the night before has hardened and become encrusted on the inside. This means an enormous amount of really unnecessary work in the morning. Now, though it may not be possible for the cook, after a late dinner with guests attending, to set to work and to clean thoroughly all the utensils used, yet it is possible for her, as each is used, to fill it three parts full of boiling water, putting in with this a small lump of soda. Then after dinner is served all that it is necessary is to empty the contents, rinse the pans well to remove all scraps of food left on the sides, dry them and hang them in the draft where the air can reach them.

Next morning when the girl has more time, she can have some hot water and soda ready in a large dishpan. Then the pans may be dipped into this and rubbed off thoroughly with a cloth soaped and dipped in fine sand; then they should be well rinsed and dried and put back in their places.

Should a pan have been allowed to burn and there are still some burnt fragments clinging to it, a little soda water should be boiled up in it until all the fragments are loosened and then the pot should be scoured.

RICE DUMPLINGS A DELICACY

Cooked With Apples and Served With Cream or Other Sauce They Make Ideal Dessert.

Pick and wash a half pound of rice and boil it gently in one quart of water till it becomes dry, keeping the pot well covered and not stirring it. Then take it off the fire and spread it out to cool on the bottom of an inverted sieve, loosening the grains lightly with a fork, that all the moisture may evaporate. Pare half a dozen pippins or any other large, juicy apples, and take out the cores. Then fill each cavity with marmalade or with lemon and sugar. Cover every apple all over with a thick coating of the boiled rice. Tie up each in a separate cloth and put them into a pot of cold water. They will require about an hour and a quarter before they begin to boil, perhaps longer. Turn them out in a large dish, and be careful in doing so not to break the dumplings. Serve them with cream sauce, or with butter, sugar and nutmeg beaten together.

Swiss Lemon Pie.

Even during warm weather this tid-bit will be found palatable. Line a pie-dish with short pastry; slice one large lemon or two small ones very thin, removing skins, seeds and every vestige of white outside skin. Spread one-fourth of a pint of sugar over the pastry, then the lemons, evenly spread over sugar, sprinkle with dried currants and the grated rind of the lemon. Cover this with one-fourth pint of sugar, then lay strips of pastry in lattice form over this filling, baking about 15 minutes in moderately hot oven. When cold arrange a border on pie of seasoned cottage cheese moistened with thick, sweet cream.

Mutton Roll.

Pass one pound of lean cooked mutton and a small quantity of lean bacon through a fine mincer and place in a mixing bowl. Add half a teaspoonful of fine bread crumbs, a little finely minced onions, and a teaspoonful of chopped parsley. Season with salt, pepper and nutmeg. Whip one egg until light, mix together with the prepared meat, and roll into an oblong cake on a floured board. Tie this roll in a piece of buttered muslin and stew in thick brown sauce for an hour.

Graham Pudding.

In mixing bowl, one cup milk, one cup molasses, one level teaspoon soda dissolved into molasses; sift two cups graham flour, little salt, add to the above mixture and one cup raisins, steam four hours, serve with whipped cream. Delicious and inexpensive.

To Remove Finger Prints From Piano. To remove finger marks on a highly polished piano, wipe with a cloth wet in pure cold water. It does not injure in the slightest if wiped dry, and restores the new look at once.

When Stewing Fruit.

When sweetening sour fruit, less sugar is needed if a pinch of carbonate of soda is added to the fruit when stewing it.

For Your Kitchen Range.

Add six or eight drops of turpentine to your stove polish and you will find it much easier to get good results.

To Keep Cheese from Molding.

Cheese will not mold so readily if the cut parts are rubbed with butter and covered with greased paper.

Have You a Bad Back?

Whenever you use your back, does a sharp pain hit you? Does your back ache constantly, feel sore and lame?

It's a sign of sick kidneys, especially if the kidney action is disordered too, passages scanty or too frequent or off color.

In neglect there is danger of dropsy, gravel or Bright's disease. Use Doan's Kidney Pills which have cured thousands.

An Indiana Case

Mrs. John D. Whitaker, 408 N. East St., Madison, Ind., says: "Dark circles appeared under my eyes and my ankles were inflamed and swollen. I was all crippled up with rheumatism. My back ached constantly and I was a physical wreck. Doctors and expensive treatment of specialists failed. Doan's Kidney Pills helped me from the first and before long restored me to good health."

Get Doan's at Any Store, 50c a Box. DOAN'S KIDNEY PILLS FOSTER-MILBURN CO., BUFFALO, N. Y.

ABSORBINE

TRADE MARK REG. U.S. PAT. OFF.

Reduces Strained, Puffy Ankles Lymphangitis, Poll Evil, Fistula Boils, Swellings; Stops Lameness and allays pain. Heals Sores, Cuts, Bruises, Boot Chafes. It is an ANTISEPTIC AND GERMICIDE (NON-POISONOUS)

Does not blister or remove the hair and horse can be worked. Pleasant to use. \$2.00 a bottle, delivered. Describe your case for special instructions and Book 5 K free.

ABSORBINE, JR., antiseptic liniment for mankind reduces Sprains, Painful, Knots, Swollen Veins, Milk Leg, Gout. Concentrated—only a few drops required in application. Price \$1 per bottle at dealers or delivered. W.F. YOUNG, P. O. F., 310 Temple St., Springfield, Mass.

With more justice comes less desire to talk about it.

Rushing Business.

"Well," said the business manager to the new salesman, "how many orders did you get yesterday?" "I got two orders in one place." "That's the stuff! What were they?" "One was to get out and the other was to stay out."

Gentleman or Churl?

Be a gentleman, young man, for it will pay you a golden rate of interest. You will never get anywhere by returning surly answers. You might be surprised to know that if you should meet the president of a railroad and ask him a civil question that you would get a most courteous reply. Walk into the biggest concern in any city and ask for the manager. He will meet you with a smile and return the blandest answer to your query. It is the ignorant cub in the country depot or the window washer in a big office who hand back the discourteous answers. That's why they always remain cubs and window washers. The fellows who reach the presidency of railroads and the management of large concerns do so because they are gentlemen and always return the soft reply. It costs nothing to be a gentleman and besides you will find that such a route leads down beside still waters and up through green valleys. The churl plows through the mud of serfdom and breathes the dust of slavery. You choose the path—gentleman or churl.—Kansas City Star.

UPWARD START

After Changing from Coffee to Postum.

Many a talented person is kept back because of the interference of coffee with the nourishment of the body.

This is especially so with those whose nerves are very sensitive, as is often the case with talented persons. There is a simple, easy way to get rid of coffee troubles and a Tenn. lady's experience along these lines is worth considering. She says:

"Almost from the beginning of the use of coffee it hurt my stomach. By the time I was fifteen I was almost a nervous wreck, nerves all unstrung, no strength to endure the most trivial thing, either work or fun."

"There was scarcely anything I could eat that would agree with me. The little I did eat seemed to give me more trouble than it was worth. I was literally starving; was so weak I could not sit up long at a time."

"It was then a friend brought me a hot cup of Postum. I drank part of it and after an hour I felt as though I had had something to eat—felt strengthened. That was about five years ago, and after continuing Postum in place of coffee and gradually getting stronger, today I can eat and digest anything I want, walk as much as I want. My nerves are steady."

"I believe the first thing that did me any good and gave me an upward start, was Postum, and I use it altogether now instead of coffee."

Named given by the Postum Co., Battle Creek, Mich.

Postum now comes in two forms: Regular Postum—must be well boiled. 15c and 25c packages.

Instant Postum—is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, with cream and sugar, makes a delicious beverage instantly. 25c and 50c tins.

The cost per cup of both kinds is about the same.

"There's a Reason" for Postum.

Sold by Grocers.

HOLTON OF THE NAVY

A STORY OF THE FREEING OF CUBA

SYNOPSIS.

Lieutenant Holton is detached from his command in the navy at the outset of the Spanish-American war and assigned to important secret service duty. While dining at a Washington hotel he detects a waiter in the act of robbing a beautiful young lady. She thanks him for his service and gives her name as Miss La Tossa, a Cuban patriot. Later he meets her at a ball. A secret service man warns Holton that the girl is a spy. Miss La Tossa leaves for her home in Cuba. Holton is ordered to follow her. They meet on the Tampa train. Miss La Tossa tells Holton she is a Cuban spy and expresses doubt regarding the sincerity of the United States. Holton is ordered to remain at Tampa to guard the troop transports. He saves the transports from destruction at the hands of dynamiters and reports to Admiral Sampson for further duty. Holton is sent to General Garcia's command in the guise of a newspaper correspondent to investigate Cuban plots against the American troops and to learn the plans of the Spanish navy. He detects a trusted Cuban leader in the work of fomenting trouble among the Cubans in the interests of the Spaniards. Holton is seized by friends of the spy and later ordered to execute a spy. He escapes and saves the American troops from falling into a Spanish ambush. He learns from General Garcia that the spy is Jose Cesario, one of the most trusted leaders. Holton takes part in the battle at San Juan. Disguised as a Spanish soldier he enters Santiago, goes at night to the home of Miss La Tossa, where he overhears a discussion of the Spanish plans by leading army and navy commanders. He learns that the Spanish fleet will leave the harbor at Santiago on July 3. Holton escapes and arrives in sight of the American fleet in time to see the admiral's flagship sail away. After frantic signaling he is answered by the Brooklyn. He warns Schley of the intentions of the Spanish fleet.

CHAPTER XII.—Continued.

Two or three faint cheers drifted shoreward, but for the most part there was silence. Boats manned by American sailors were about all the Spanish vessels, which, having left the harbor so proudly and so defiantly but a little while before, were now merely smoking, burning wrecks.

"Well, it was over. What would happen now? The harbor forts were still to be subdued, and it was out of the question that Sampson would attempt to rush them this day. No, Holton could see that the army still had its part to play, and that, as a consequence, his work was far from completed.

His duty was perfectly clear; and while he was able to drag one foot after another, its stern behests were to be obeyed. His place was at Garcia's headquarters—the sooner he took it the better.

After a last, lingering look at the scene below he turned inland, but had not gone more than two hundred yards when he realized that his sore feet were not adapted to rapid progress.

In short, he felt that, as compared to his normal condition, he was but half a man, and a very miserable and pitiful half at that. Still, with frequent halts he made his way toward the American lines, and by dusk he was again among the rifle-pits of the army.

A flag of truce was wandering over the hillside, and in answer to Holton's query an officer told him that General Shafter was sending in word to Toral that, now the fleet was destroyed, he had better surrender and have done with further bloodshed. So everyone waited until the truce party returned from its mission.

They had not made, it was learned, great progress with the Spanish commander. He was quite content with the situation, he said, and, moreover, he had good information that the men from the United States were not doing very well in this climate.

In a word, he thought it advisable to oppose to the utmost extremity the advance of the Americans. A reply similar in its nature had been sent to Admiral Sampson, who, as though in spite, dropped a few shells into the city, and then desisted in order to give Toral time for the thirteen-inch messengers to sing home.

The destruction of Corvera's fleet was regarded as having simplified the task that lay before the Americans, but no one knew exactly what the developments would be. The general surmise was that Toral would eventually surrender, and if that was the case there was disinclination on the part of the brigade commanders to shed unnecessary blood.

In the morning Holton was awakened by a bombardment which continued for half an hour. The men in the trenches got into action with their Krags and the Spaniards responded. The result was a spirited session, which ended as abruptly as it began. The next development was the inevitable flag of truce floating toward

the Spanish lines, borne by messengers from Shafter sent to inquire of Toral if he had not yet changed his mind about holding out.

As Holton could see no special reason why the Spaniard should have changed his mind, he was inclined to regard the truce business as a joke, a sentiment which most of the officers shared with him. Toward noon he made his way along the lines, and, eventually, he located the Cuban contingent.

Garcia was seated in front of his tent with General Castillo. He remembered Holton and greeted him pleasantly. Yet he appeared to have something on his mind, and after welcoming the navy man he turned to his brother general and continued a conversation which the officer's arrival had evidently interrupted. Holton, not wishing to appear as an intruder, moved to one side.

The soldiers were sullen and regarded the new-comer with evident dislike. He tried to engage several of them in conversation, but with no success.

To a sergeant, who had turned his shoulder upon him, he said with some impatience:

"What's the matter with you, anyway?"

"You will find out soon," was the reply.

CHAPTER XIII.

A Night Rendezvous.

Before Holton could make answer, a young Cuban galloped by on horseback. So lithe was he, so clean-limbed, his uniform so spick and span, his face so handsome, that Holton turned to glance after him. He, too, was turning to gaze at Holton, and now brought his horse to a sharp halt. Noting this, the navy man walked toward the fellow, feeling that he had seen him somewhere before but puzzled to know where.

The young soldier, with head turned over shoulder, nodded to Holton, and then, with a sweep of the hand, beckoned him toward a group of small palms, whither he urged his horse at a slow walk. The naval officer followed and came to a standstill beside the beautiful animal.

The boy—he was little more—bent down and looked at Holton a moment. Then he smiled and held out his hand. "You have been pointed out to me as Lieutenant Holton," he said. "Are you he?"

Holton looked at the other steadily without answering. A thrill passed over him.

"I could almost say," he replied finally, "that you are Miss La Tossa in disguise."

"You would be pretty nearly right," was the laughing response; "I am her brother."

"Oh!" Holton reached up and seized the lad's hand. "I am very happy to see you. Where is your sister?"

"At home. I stole in to visit her last night. She wished me to find you and to ask you to accompany me to a place beyond Sevilla at once. She will await us on the road and will have something of importance to say to you. I do not know what it is."

"But—" Holton hesitated. "I have just come in from Santiago at some peril. I have work to do here."

The boy smiled at him.

"There will be no peril in returning with me. We Cubans," he grimaced, "have a secret route into the city which has always been kept open. It is open now. You must come with me; my sister has news of great importance you must hear."

Holton needed no great incentive to accompany the other. He still wore his Spaniard's uniform, with the addition of an army hat bearing the insignia of the Fifth Corps, and he felt himself sartorially well qualified ones more to penetrate the ranks of the enemy, if that were necessary. With the young Cuban for a guide, he felt that danger was reduced to a minimum.

"I have a pony you may ride," continued the boy, mistaking Holton's silence for hesitation.

"Oh, I'll go, even if I walk," returned Holton, "but I certainly shall appreciate the horse."

Sunset was the hour and the Cuban camp the rendezvous—agreed upon by the two, and after shaking hands with the young man, Holton returned to his own lines and made his way to Shafter's headquarters. The com-

mander-in-chief was in wretched physical condition, and the able and energetic Lieutenant Miley was attending to many of the executive details. To this officer Holton made his way.

"Did you receive any word from the President?" he asked.

The naval officer some days previously had requested General Shafter to solicit a message from the President disclaiming any idea of holding and annexing Cuba after the close of hostilities. It was well understood by Shafter, or rather by his aide, why Holton proffered the request.

Now, in reply to his question, the aide dived into his tent and emerged bearing a cable dispatch sent from Washington via Key West and Guantanamo. It was addressed to General Shafter and read as follows:

"The President states herewith that hostilities against the Kingdom of Spain were instituted with the sole purpose of liberating Cuba from Spanish rule. It is our wish that, thus free, she shall take her proud place among the republics of America."

"Good!" exclaimed Holton, after reading the message. "Nothing ambiguous about that, is there?"

"Not a thing," laughed Miley. "I suppose you want this."

"It would be invaluable," responded Holton eagerly. "May I take it?"

For reply, the tall, weather-beaten army officer handed Holton the cablegram.

At sunset he proceeded to the spot suggested by young La Tossa, and found him already mounted and holding another pony by the bridle.

"You are on time," he said. "This is your horse, and I suggest we start at once."

For an hour they rode in silence, and finally paused in a cove of woods outside the little settlement called Sevilla. Here the young Cuban dismounted, and Holton did likewise, looking inquiringly at the boy. The latter smiled half mockingly, and Holton, advancing to him, placed his hand upon his arm, while he regarded the youth with curious eyes.

"You make me think very much of your sister," he said.

"Do I?" The fellow laughed. "You care for my sister, then?"

Holton flashed back a quick glance at the boy.

"Care for her! Look here, youngster, I care for her so much that if she doesn't look out I'm going to be your brother some day."

A laugh broke from La Tossa.

"I have heard her say pretty much the same thing," he chuckled.

Holton took both his shoulders in a mighty grip.

"You have!" he cried. "Quick now, boy, are you joking?"

The other wriggled away and placed his hand ruefully upon his shoulder.

"You needn't crush my bones in," he grumbled. "Of course it's true."

Holton leaped upon the pony.

"Come on. Let's go to her." His tone was as ardent as a cavalier's.

"Not now," was the laughing reply. "We must stay here until it is dark."

Young La Tossa pointed toward a crumbling building.

"Do you notice the peculiar shape of that roof?" he asked. "Well, I have

Holton took both his shoulders in a mighty grasp.

an idea you will be in this vicinity later. If you are, remember the shape of that roof. Inside that very building—" He paused. "But my sister will tell you," he added.

The darkness grew rapidly denser, until at last it was sufficiently black to suit the wishes of the young Cuban. Mounting their ponies, the two turned in the direction of Santiago, and had just entered a trail leading through low bushes, covering an immense area, when a man, gun in hand, stepped out in front of them.

Holton's revolver leaped from its holster, but his companion put out a restraining hand.

"Well, Pierre?" he asked sharply.

"Miss La Tossa," responded the man, "is here."

A thrill shot through Holton, and he was on the ground in an instant. The brother followed suit, and the next instant the form of the girl confronted him.

"Rance!"

As they embraced it seemed to Holton as though he would give up ten numbers of his rank as senior lieutenant if he could be in the youth's shoes. Moodily he saw the girl regarding him with luminous, smiling eyes.

"I am so happy to know you escaped," she began.

"Yes, thanks to you," was Holton's warm reply.

She walked close to him, then turned to her brother and to the Cuban.

"Will you please leave us for a few minutes?" she commanded. "I must speak with Mr. Holton alone."

Holton said nothing, but waited while the two, thus adjured, moved into the bushes out of earshot.

"Mr. Holton," she said then, with a little catch in her voice, "I don't know why I am doing this, but it is because I believe in you and in your country."

"You are justified, I am sure, in believing in both me and my country," replied Holton.

"I am sure of it. Tonight, Mr. Holton, at Sevilla, in the building which my brother pointed out to you—he did point it out, as I asked him to, did he not?"

"Yes," nodded Holton, "he pointed it out."

"In that building," she continued, "tonight, there is to be a meeting of officers high in the Cuban army, at which an immediate outbreak against the soldiers of the United States will be discussed."

Holton started.

"Garcia—will he be there?" he asked.

"Garcia will not be there, nor Rabi, nor Castillo."

Holton laughed.

"Then," he declared, "the meeting will not amount to much."

"Do not be fooled," was the warm rejoinder. "It will amount to a great deal. You know—or do you?—the condition of your army. Sickness is beginning."

"Yes, but a majority are well, and I myself know the straits of the Spanish army, for I have been in Santiago. I myself have informed General Shafter that Toral can muster at most not more than twelve thousand men, if that."

"Yes, yes," she responded, tapping her foot impatiently. "I do not come here to argue, Mr. Holton. I tell you only this: Toral has not surrendered, because he knows of the threatened revolt of the Cubans against your men. He is waiting for that to happen, and will take what advantage may be gained from the result. This may be serious. There are six thousand Cubans immediately upon the field. Their attack upon the American flank, coupled with the attack of the Spaniards upon the front, will drive your countrymen to the sea."

Holton shook his head. "Why, Miss La Tossa, this deed is suicide for your country. It can mean but one thing—the wiping out of the Spaniards and the Cubans, and in the end the very colonization you dread. For if this happens I cannot see but the United States will have the best sort of object-lesson to show that the last thing of which you are capable is self-government."

"That is true," she agreed. "I have come to realize it. I had been led astray in my views. But now, thanks to you—and to others—I see more clearly."

He looked at her face, dim in the darkness.

"And that is why you wished to see me?"

"Not altogether," she replied.

"Well, you must hurry, because I wish to say something to you, too," he reminded her.

The girl moved impatiently toward him. "To night—I wish to ask you what I should do about the meeting. I alone of those not in the conspiracy know of it. What shall I do? Shall I send word to General Garcia? Is it better that you should inform Shafter?"

Holton interrupted.

"No, no, not Shafter," he cried. "The Americans must take no action that might precipitate any sort of a fight with the Cubans."

"Well, Garcia then?"

"A fight with the Cuban ranks would be almost as bad."

"That is true. What then?"

Holton thought a moment. Then he looked up.

"I will go to the meeting," he announced.

"You! It is impossible. An American officer! No, it cannot be!"

"Then, what?" Holton's voice was impatient.

He took from his pocket the cable dispatch from Washington.

"I have here," he resumed, "a message from President McKinley to General Shafter, sent him at my request. If read at the meeting it should not be without effect."

He quoted to her the contents. She seized the paper and kissed it. Then she stamped her foot as a sudden thought took possession of her mind. "I have it!" she cried. "I will go to the meeting myself. And I shall take this dispatch with me."

Putnam Fadeless Dyes will last until the goods wear out. Adv.

It takes a woman to conceal the things she doesn't know, but a man's ignorance is always cropping out.

TWO WOMEN AVOID OPERATIONS

By Taking Lydia E. Pinkham's Vegetable Compound.

Chicago, Ill.—"I must thank you with all my heart for Lydia E. Pinkham's Vegetable Compound. I used to go to my doctor for pills and remedies and they did not help me. I had headaches and could not eat, and the doctor claimed I had female trouble and must have an operation. I read in the paper about Lydia E. Pinkham's Vegetable Compound and I have taken it and feel fine. A lady said one day, 'Oh, I feel so tired all the time and have headache.' I said, 'Take Lydia E. Pinkham's Vegetable Compound,' and she did and feels fine now."—Mrs. M. E. KARSCHNICK, 1438 N. Paulina Street, Chicago, Illinois.

The Other Case.

Dayton, Ohio.—"Lydia E. Pinkham's Vegetable Compound relieved me of pains in my side that I had for years and which doctors' medicines failed to relieve. It has certainly saved me from an operation. I will be glad to assist you by a personal letter to any woman in the same condition."—Mrs. J. W. SHERER, 128 Cass St., Dayton, Ohio.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Neuralgia

sufferers find instant relief in Sloan's Liniment. It penetrates to the painful part—soothes and quiets the nerves. No rubbing—merely lay it on.

SLOAN'S LINIMENT

Kills Pain

For Neuralgia

"I would not be without your Liniment and praise it to all who suffer with neuralgia of any kind."—Mrs. Henry Bishop, Helena, Missouri.

Pain All Gone

"I suffered with quite a severe neuralgia headache for 4 months without any relief. I used your Liniment for two or three nights and I have never suffered with my head since."—Mr. J. A. Beinger, Louisville, Ky.

Treatments for Cold and Croup

"My little girl, twelve years old, caught a severe cold, and I gave her three drops of Sloan's Liniment on sugar on going to bed, and she got up in the morning with no signs of a cold. A little boy next door had croup and I gave the mother the Liniment. She gave him three drops on going to bed, and he got up without the croup in the morning."—Mr. W. E. Sprague, Chicago, Ill.

Don't Persecute Your Bowels

Cut out cathartics and purgatives. They are brutal, harsh, unnecessary. Try

CARTER'S LITTLE LIVER PILLS

Purely vegetable. Act gently on the liver, eliminate bile, and soothe the delicate membrane of the bowels. Cure Constipation, Biliousness, Sick Headache and indigestion, as millions know.

SMALL PILL, SMALL DOSE, SMALL PRICE.

Genuine must bear Signature

Warranted

Relieves Tired Eyes

HUMAN HEREDITY.

It is Confined, So It is Asserted, to a Likeness to Parents.

There are few subjects on which so much "scientific" nonsense is talked and written as on heredity. Not very much is known of it as regards plants, less of animals and almost nothing as regards humanity. To read books on heredity, especially those of the Eugenic society, is to read a mass of suppositions and hazardous inductions where most of the facts are negative and only the exceptions are positive.

The very meaning of "hereditary" is not understood. If any quality is truly hereditary then it is always hereditary. It never occurs except as the result of heredity, and it is constant—that is to say, it invariably follows. But there is no quality of which this can be said. That genius is not hereditary is known. Even talent is not. Nor is any aptitude. A lawyer's son more often wants to be a soldier or an artist than a lawyer, notwithstanding the environment, and it is so with most professions. The exceptions seem to be due to training and influence, not to hereditary transmission.

A superficial likeness to parents seems hereditary, but that is all that we can assert, and that outward likeness by no means infers an inward likeness. There is nothing so easy and nothing so fatal as this tendency to attribute to heredity what is due to training or want of training. It excuses supineness in governments and professions.—H. Fielding Hall in Atlantic Monthly.

Thin Cutting.

When Irvin Cobb, the writer, was on the World he attended a ball game at the Polo grounds. The yard was packed. Just before the game Harry Stevens, who had the refreshment privilege, strolled by the press box and called out to a group of which Cobb was a member:

"Great crowd, eh, boys? I'll bet there's 6,000 more people here than they expected. I guess that means I'll have to go in and prepare about 4,000 more ham sandwiches."

"Well," remarked Cobb, "that will pretty nearly necessitate the cutting of another ham, won't it, Harry?"—Everybody's.

Green Liquid Soap.

Green liquid soap, which is recommended by skin specialists for fine skins or for those which have the pores extended, can be made at home. Take equal parts of glycerin, water, alcohol and green castile soap. Shave the soap into the water and stir over the fire until the mixture is smooth. Add the glycerin and lastly, after the kettle is removed from the fire, the alcohol. Add a tablespoonful of eau de cologne, if perfume is desired.

Antiquity of Leather.

Leather was early known in Egypt and Greece and things of manufactured hides were used for ropes, harness and the like by ancient nations. The Gordian knot was made of leather thongs. A leather cannon was made at Edinburgh, fired three times and found useful in 1778.—Kansas City Times.

His Job.

Hall—What are you doing now? Gall—Oh, I'm making a house to house canvass to ascertain why people don't want to buy a new patent clothes wringer.—Chicago News.

Dad's Excuse.

"Papa, why don't you dress as well as other men do?"
"Because, pet, you insist on dressing better than any other girl does."—Chicago Tribune.

Two Husbands.

The foolish husband says, "Let us do this or that."
The wise husband says, "Shall we?"—Louisville Courier-Journal.

Clears Complexion Removes Blemishes

Why go through life embarrassed and disfigured with pimples, eruptions, blackheads, red rough skin, or suffering the tortures of eczema, itch, tetter, salt rheum? Just ask your druggist for Dr. Hobson's Eczema Ointment. Follow the simple suggestions and your skin worries are over. Mild, soothing, effective. Excellent for babies and delicate, effective skin. Stops chapping. Always helps. Relief or money back. 50c Recommended by C. G. Meyers, the druggist. adv.

Even in That Day.

From Bee's dictionary, published in 1825:
"Shopping—Among women, going about from shop to shop, buying little articles perhaps, perhaps not, but always pulling about great quantities of goods."—Boston Transcript.

Cautious.

Mrs. Peck—Mr. Highlier never takes the wife out in his automobile. Peck—I guess he doesn't care to have two unmanageable things on his hands at one time.—Boston Transcript.

"While you are dressing of the fashions act in the present."

CRAFT ON THE GRIDIRON.

When the Carlisle Indians Outwitted Harvard's Highbrows.

In football a full field run from kick off to touchdown is a rare play. Once it was made by a Carlisle Indian, who covered the long distance in a game against Harvard, Oct. 31, 1903, and did so by the craftiest, wildest stratagem ever perpetrated by a redskin upon his pale faced brother.

The first half had closed with the Indians in the lead five points to none. Harvard opened the battle by sending a long kick to Johnson on Carlisle's five yard line. The Indians quickly ran back to meet Johnson and formed a compact mass around him. Within the recesses of this mass of players Johnson slipped the ball beneath the back of Dillon's jersey, which had been especially made to receive and hold the ball. Then, the ball thus secretly transferred and hidden, Johnson uttered a whoop such as Cambridge had not heard since the days of King Phillip's war, and instantly the bunch of Indians scattered in all directions. Some ran to the right and some to the left, some obliquely and some straight up the center of the field, radiating in all directions like the spokes of a wheel.

The crimson players, now upon them, looked in vain for the ball, dumfounded, running from one opponent to another. Meanwhile Dillon was running straight down the field so as to give his opponents the least opportunity for a side or rear view and conspicuously swinging his arms to show that they did not hold the ball. Thus, without being detected, he passed through the entire Harvard team, excepting the captain, Carl B. Marshall, who was covering the deep backfield.

Obedient instructions, Dillon ran straight at Marshall. The latter, assuming that the Indian intended to block him, agilely sidestepped the Carlisle player, and as he did so he caught sight of the enormous and unwonted bulge on the back of Dillon. Instantly divining that here was the lost ball, Marshall turned and sprang at Dillon, but the latter was well on his way and quickly crossed the line for a touchdown.—Parke H. Davis in St. Nicholas.

Strengthens Weak and Tired Women

"I was under a great strain nursing a relative through three months' sickness," writes Mrs. J. C. Van De Sande of Kirkland, Ill., and Electric Bitters kept me from breaking down. I will never be without it." Do you feel tired and worn out? No appetite and food won't digest? It isn't the spring weather. You need Electric Bitters. Start a month's treatment to-day; nothing better for stomach, liver and kidneys. The great spring tonic. Relief or money back. 50c and \$1.00. Recommended by C. G. Meyers, the druggist.

A Sensitive Soul.

Owen Mudge was a very sensitive man. More than once at a harsh word he had forsaken profitable work and gone home for sympathy to his wife. One morning Owen started out to help Glenn Butler, who had bought a new stump pulling machine and was preparing to clear a field. Toward noon Owen came back. Mrs. Mudge sighed and waited sympathetically for the explanation.

"I just couldn't stand it," said Owen, rubbing his jaw. "When I see that stump puller twist them roots out it reminded me of the times I got my back teeth extracted. The first thing I knew I was limp as a rag, and I just ached all over and had to quit."

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. K. Cheney & Co., Toledo, O. Sold by all druggists, 75c. Take Hall's Family Pills for constipation.

Wanted the Solids.

Tommy went out to dine at a friend's house one evening. When the soup was brought Tommy did not touch his and the hostess, looking over, said: "Why, Tommy, dear, what's the matter? Aren't you hungry tonight?" "Yes," replied Tommy, "I'm quite hungry, but I'm not thirsty."—Judge.

Subtle Scheme.

First Jeweler—Aren't you afraid to leave those diamonds in a front window at night? Second Jeweler—Not with my scheme. Just before I go home I put in a little sign on them reading, "Anything in This Window 10 Cents."—Chicago News.

After taking Dr. Miller's Laxative Tablets children ask for "more candy." Yours will too. [Advertisement.]

We are Unable to State Positively

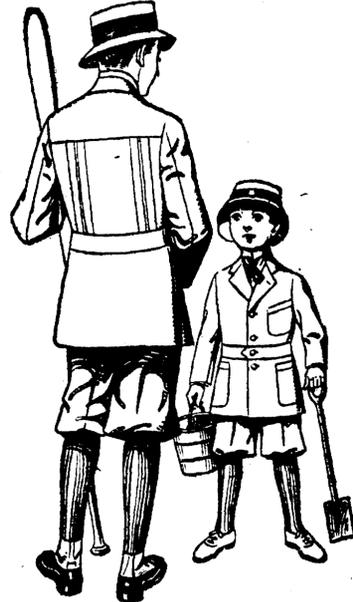

Just how many years, boys clothes have been made from BLUE SERGE, but we can truthfully say that in all the years we have recommended

XTRAGOOD

Blue Serge Suits we have yet to find a criticism. These suits are all wool; they are cut roomy; they hold their shape and wear the best of any boys clothes made.
