MRS. FANNELIA C. LOVE

Passed Away At The Home of Her Daughter, Mrs. P. G. Teeple, Thursday, Nov. 16.

Mrs. Fannelia C. Love, wife of the late Chas. Love, for many years a much respected resident of this vicinity passed away on Thursday, Nov. 16th at the home of her only daughter, Mrs. P. G. Teeple at Marquette, Mich., and was brought to Howell, Mich., where she was buried on Saturday, the 18th inst. The remains were accompanied by Mr. P. G. Teeple and his daughter Helen of Marquette, and the services at the grave were attended by many old and intimate friends.

In the passing away of Mrs. Love, this community loses one of its oldest and most respected citizens.

Ottis Howe of North Howell, Robbed of \$150

Last Friday evening Mr. and Mrs. Ottis Howe of North Howell, attended a social at the home of Wm. Joy. They returned home the next morning about 10 o'clock. Mrs. Howe went up stairs it is said to bed. Mr. Howe remained beside the fire and fell asleep in his chair. Burglars, so the story says, entered the house in the meantime, gagged bound Mr. Howe and removed \$150 from his pocket and departed for parts unknown. Mrs. Howe heard some moans down stairs and found her husband on the floor struggling to release himself. Mr. Howe it is said, is unable to identify the assailants. The officers were summoned but thus far have been unable to find any clue. —Liv. Dem.

Many Deer Hunters

State Game Warden, Wm. R. Oates estimates that 10,000 hunters were in the woods in the northern peninsula when the deer season opened Nov. 11th. Many of the hunting parties left for the north several days before so as to be on the ground for the opening day of the season. According to the game warden's department more licenses were issued this year prior to the opening of the season than ever before in the history of the state. —Chelsea Trib une.

A Pleasing Entertainment

The young people of the Congregational Church have received many compliments this week for the way in which they carried out their parts last Friday evening, when they presented the play, "The Little Politician" at the Pinckney opera house. A fairly good crowd was in attendance, about \$20 being taken in at the door.

Special musical numbers between acts added much to the entertainment. Vocal solos were given by Mrs. H. D. Brown and Mrs. Fred Swarthout, an instrumental duet was given by Miss Blanche Martin and Mrs. J. G. Pearson, and a violin solo by Clyde Sibley accompanied by Miss Cordelia Dinkle. Everyone seemed well pleased with the entertainment.

BRONZE BEST LIKED

Beautiful Plumage and Large Size Has Given This Turkey First Place.

THE bronze turkey holds the place of honor among its tribe. It is a cross between the wild and the tame turkey. Its beautiful, rich plumage and its size have come from its wild progenitors. To maintain these desirable qualities crosses are continually made. In this way the mammoth size has been gained. Their standard weight ranges from 16 to 36 pounds, according to age and sex. Probably more of this variety are grown each year than of all others. The coloring of this variety is a ground of black, blazoned or shaded with bronze. This shading is rich and glowing, and when the sun's rays are reflected from these colors they shine like polished steel.

The Narragansett turkeys are next in size to the bronze. They are of black ground color, each feather ending with a band of steel gray, edged with black. This imparts a grayish cast to the entire surface plumage. Mixed with this is the finish of metallic black and bronze luster.

The standard weights of this variety are, for males, from 24 to 30 pounds; for females, from 12 to 18 pounds. Some old males of both this and the bronze variety weigh over 40 pounds.

The buff turkey is not generally known throughout the country. In many localities it is almost unknown. The standard calls for a pure buff color throughout, but this shade of coloring is seldom seen. As bred for market these turkeys are of a reddish buff or light chestnut color mixed with white and some dark shadings. They are highly valued in some localities for their quick growth and for their attractiveness when dressed. Their average weight is several pounds less than that of the Narragansett.

The slate turkey might be called a blue turkey. They about average in size with the buff and blacks. They range from 10 to 25 pounds, according to age and sex. The black color ranges from small spots to larger markings, but the less of this the better for exhibition purposes. It might be surmised that the slate turkey originated from a cross of white and black tur-

LECTURE COURSE

For 1916 and '17 First Number, Thursday Evening, Nov. 30th.

Thursday evening, Nov. 30, (Thanks giving) will occur the first number on the Lecture Course at the Pinckney opera house.

Shorland F. Fannon, one of the most popular lecturers of the day. This is the only lecturer on the course, don't fail to hear him.

The 2nd number on the course Dec. 28th, is the Shawmut Male quartet in their solos, duets, action songs and a short play in which all the members of the company appear. The 3rd number Feb. 5th, 1917, Marion Ballou Fisk, cartoonist and entertainer. This one number is recommended to be worth the price of the entire ticket.

The 4th and last number on the course, March 16th, is the Hampton Court Singers. This splendid company comprised of five artists can not fail to please in their entertainment of old English Motion songs, readings and other attractive features.

RESOLUTIONS

Livingston Lodge, No. 76, F. & A. M., tender through the undersigned committee the following resolutions:—

Whereas—The Great Ruling Architect of the Universe has called from our circle our worthy brother, M. H. McMahan, thereby severing all earthly ties which bind us together, therefore,

Resolved—That in this dispensation of Divine Providence the community has lost a faithful citizen, his wife a devoted husband and the Masonic Fraternity an ever present and appreciated brother.

Resolved—That in the time of their bereavement, we tender our kindest sympathies and in the attendant sorrow of the friends, commend them to Him who will fold the arms of his love and protection around them who put their trust in Him.

Resolved—That as a testimony of our esteem and regard for the member of our departed brother, M. McMahan, the hall of the Livingston Lodge, 76, F. & A. M., be draped in mourning for sixty days, and further, that these resolutions be signed by the proper officers of this Lodge filled in the records thereof and a copy of these resolutions be forwarded to the relatives of the deceased brother.

keys. In America the white turkey is called the white Holland turkey. The reason for this is not apparent, though some think it is so called because it originally came from Holland. White turkeys were formerly quite delicate and rather small, but now are more generally developed. The standard of weight is less for the whites than for other varieties. They range from 10 pounds for young hens to 26 pounds for old toms. In color of plumage they should be white throughout (except that each has a black beard on the breast), with shanks and toes pinkish white.

TEUTONS IMPERIL FOE'S ARMY IN DRIVE

GIANT "STEAM ROLLER" OF VON FALKENHAYN'S SWEEPING RUMANIA ARMY BEFORE IT.

TEUTONS ARE NEAR CRAIOVA

Rumanian Armies in the Transylvanian Alps in Danger of Being Cut Off From Their Native Country.

London—Field Marshal von Falkenhayn's "steam roller," sweeping down into northwestern Rumania toward Bucharest, made further important headway according to statements by the Berlin war office, which, in the essential point, is corroborated officially by Petrograd. "In the valley of the river Jiu," said the Car's war office, "the Rumanians, under the pressure of superior forces, still continue to retire to the southward."

"Our troops," Britain reported, "are approaching Craiova, capital of the western Wallachia."

It is this city for the possession of which all the furious battles of the last few weeks have been fought in the Jiu valley and for the drive against which the Teuton commander has asked and received reinforcements which were denied the crown prince at Verdun.

Craiova, situated a little to the east of the Jiu river, is the most important strategic railway intersection in western Rumania. It lies less than 115 miles west of Bucharest. It is the converging point of four railroads.

The capture of Craiova and the subsequent Teuton control of the railway communications in four directions would threaten the entire Rumanian armies in the Transylvanian Alps with being cut off from all connection with the interior of their native country and with a flanking attack on a large scale from the south and east.

Such is the outlook of the Rumanian situation as revealed by the official reports from both sides—an outlook which military critics here admitted to be even more ominous than had been looked for by pessimists.

GIRL MAKES 590 MILE A'R TRIP

Also Sets Record for U. S. Distances, Lands Covered With Ice.

Binghamton, N. Y.—Ruth Bancroft Law broke the American cross-country non-stop record in her attempted sunrise-to-sunset acroplane flight from Chicago to New York.

Driving her antiquated Curtis through a 45-mile gale, she flew from Chicago to Hornell, 590 miles, (air line) in 8 hours and 55 minutes. She thus captured the brief honors held by Victor Carlstrom, who, on November 2, flew from Chicago to Erie Pa., 452 miles, in an attempt similar to that made by Miss Law.

Thrice she flew straight into the face of death and didn't quiver. She landed at Hornell because she had used all the gasoline in the tanks. Had her supply of fuel lasted, it is likely the nifty girl would have clung to her levers until her goal had been reached. She had hoped to make Governors' Island.

She made her first stop on the snow-quilted acres of the Hornell fair grounds. She fell rather than stepped out of her leather seat. A mask of ice glazed her face. Her eyes were fixed like those of a marionette. Her arms remained at right angles as though she had not yet let go the wheel. It was several minutes before she could walk erect or talk connectedly.

DEUTSCHLAND IS LIBELED

Owners of Boat Sunk in Crash File Suit Against U-Trader.

New London, Conn.—The German submarine merchantman Deutschland was libeled in a suit for \$12,000 brought by the T. A. Scott company, owners of the tug T. A. Scott, Jr., sunk by the submarine with the loss of five lives. Service was made by Deputy United States Marshal Timothy Hawley, of Hartford, on the owners of the Deutschland, the Eastern Forwarding company, and a keeper was put in charge of the submarine, pending the filing of bonds which are expected to be given by the owners of the Deutschland. The suit is brought by Edward E. Blodgett, of Boston, and Samuel Park, of New York, proctors for the Scott company. The papers state that the tug was of 36 gross tons and her value is given as \$12,000.

Why the Baby Cries.

Now we know why the baby cries. For a long time the cause was veiled in obscurity. It might be an inaccessible pin, or it might be the helpless discrepancy betwixt the heavenly kingdom and this world, or it might be a plain case of colic, called by what now-fangled term you please. It has remained for George B. Hotchkiss of the University School of Commerce, addressing editors and publishers of trade journals in New York, to discover that the baby cries in order to advertise. It is the baby's effective announcement, in the imperative mood, that he wants to be taken up and petted, or he wants the moon, or he wants something else, and "he won't be happy till he gets it." There is no denying that for an infant industry the baby's advertising is a great success. Nearly every time he gets results, and the most astute and alert professional solicitor cannot show a higher percentage of success.

DO IT NOW, GOOD WATCHWORD

Habit of Procrastination Has Never Yet Failed to Bring Train of Evils in Its Wake.

"Sometime" is a useful word that is often overworked, remarks the Milwaukee Journal. One says, "Sometime I will do it," but the time never comes. Sometime is no time when a kind deed is to be done. Sometime is no time when a definite task is to be done. A thing put off beyond its rightful time encroaches on time allotted by right to other duties. One may think he is gaining time by postponing the duty of the hour. In fact, he is wasting time. "Tomorrow" and ever "tomorrow" has been the ruin of many. Do now the thing that should be done now. Have you had a quarrel, and are you ready for a reconciliation? Do not postpone it. The other person may get hardened in his views and become unwilling to be reconciled. He may die and leave to you a lasting regret that you had not made friends. Would you help someone? Do not wait till help is past being help. Put off till "tomorrow" mending the fence, and your neighbor's cattle will have found the weak place and made havoc with your grain. Put off paying your insurance, and perhaps a fire will destroy all you have. Debts do not grow less by postponing payment. "Do it now" is a good watchword. Say the kind word, do the kind deed, perform the duty of the hour.

Super's Blunder Merely Served to Show the Resourcefulness of Hamilton Footlites.

Dewey, discussing the naval battle of Skagerrak, said at a Washington luncheon:

"A naval officer, to succeed, must be very quick-witted and resourceful. In fact, he must be like Hamilton Footlites."

"Ham Footlites leaned on the rail of his sea-going yacht soliloquizing about love while the blue waves rolled and heaved splendidly, each blue wave being a super under a roll of canvas."

"But the waves were here and there threadbare, and suddenly a wave ripped and a head bobbed up in the midst of the heaving sea and stared around in bewildered fashion."

"Ham, Footlites silenced the audience's titters with one stern glance."

"Man overboard!" he yelled in stentorian tones.

"Then the super, managing to draw back his head through the hole in the wave, disappeared. Ham Footlites heaved a stormy sigh."

"Another victim seized by the relentless sea, alas," he said.

Meat Eaters' Backache

Meat lovers are apt to have backaches and rheumatic attacks. Unless you do heavy work and get lots of fresh air, don't eat too much meat. It's rich in nitrogen and helps to form uric acid—a solid poison that irritates the nerves, damages the kidneys and often causes dropsy, gravel and urinary disorders. Doan's Kidney Pills help weak kidneys to throw off uric acid. Thousands recommend them.

Harroun Motors Stock

LISTEN:

The man who bought this stock at \$5.00 per share last month bought it when the company had no orders for cars to speak of, only an option on their proposed plant at Wayne, and no car on exhibition.

Who bought this Stock? Largely the automobile man, and those interested in the business of building cars. Why? Because they know Ray Harroun and his associates and had faith in his and their ability and honesty. They knew he had the car. The car was a winner and the price was right.

RESULT, a large sale of this stock; the price advanced as it should; and today you find the Harroun Motors Corporation with orders on its books for over 91,368 cars from 259 dealers. Eleven Million dollars worth of cars ordered for export, thirty acres of the plant at Wayne bought and paid for and the balance of twenty-five acres awaiting only perfection of title—contract let for buildings costing \$400,000 and erection started. Money in the Detroit banks for the contract payments.

Can you beat this record? Is not the stock at the present price a bargain?

You have only until next Tuesday, the 21st, to secure this stock at \$5.50; after the 21st it advances again. We have bought and paid for a large block of this stock at the same figure others paid.

We recommend it and believe in it.

Place your order before the next advertisement appears. We have turned down thousands of dollars' worth of orders offered us at the \$5.00 rate since November 1st, when the price went to \$5.50. Order now and don't ask us after November 21st to sell you stock at \$5.50 for we can't do it.

Inquisitive Neighbor's High Hopes of Juicy Morsel of Gossip Came to Nothing.

An inquisitive neighbor who has an inordinate fondness for gossip recently overheard the little daughter of an acquaintance talking about affairs in her home that seemed to have a spicy smack.

"What was that you said, Alberta?" she inquired.

"I was talking about papa and mamma."

"Yes—"

"And I said papa beat mamma up the other day."

"Did he, indeed?"

"Yes, he did."

"Well, what did he beat her with?"

"With an alarm clock."

"Ah, did your papa hit your mamma with the clock?"

"No, indeed, my papa never hits my mamma."

"Then who do you mean when you say he beat her up the other morning?"

"Mamma usually gets up first, but papa wanted to go fishing, and he set the clock so he could beat her up in the morning."

"His grandmother died, see, and he had no place to go, so he came to me and said, 'Say, if you want to get married, here's your chance, take me or leave me.' He was great and full of pep when out with the bunch, but in his own home he had no conversation."

"Are you sorry you had to leave him?"

"Well, I had lovely furniture, but life is not all furniture, and what is the use of the costliest carpets if your husband has no conversation?"

"Do you think you'll ever go back to him?"

"I'd go back tomorrow if he wouldn't sit behind a newspaper like a stuffed dummy in bedroom slippers."

Kidney Disorder

CLEVELAND NEWS

(By DR. V. M. PIERCE.)

The most simple methods are usually the most effective ones when treating any disorder of the human system. The mere drinking a cup of hot water each morning, plenty of pure water all day, and a little Anuric before every meal has been found the most effective means of overcoming kidney trouble. Death would occur if the kidneys did not work day and night in separating poisons and uric acid from the blood. The danger signals are backache, depressions, pains, heaviness, drowsiness, irritability, headaches, chilliness, rheumatic twinges, swollen joints or gout. Since it is such a simple matter to step into your favorite drug store and obtain Anuric, anyone who earnestly desires to regain health and new life will waste no time in beginning this treatment.

Cleveland, Ohio.—"Anuric has certainly been of wonderful help in relieving my limbs and joints of rheumatic pains. At the time I commenced to take Anuric I had sharp pains in my shoulders; my knee joints were so bad that they made a cracking noise as I walked, and my right limb became so rheumatic that I could not depend upon it at all in going up or downstairs. Water was of a milky consistency and at times showed a brick-like sediment. Anuric has cured me of all these symptoms of kidney trouble and has restored me to a healthy physical condition once more. I would advise every man and woman who suffers with any kidney ailment to give Anuric a fair trial. It will surely repay them."—MRS. DO YOU GET UP WITH A LAME BACK?
Have You Rheumatism, Kidney, Liver or Bladder Trouble?
Pain or dull ache in the back is often evidence of kidney trouble. It is Nature's timely warning to show you that the track of health is not clear.
Prevalency of Kidney Disease.
Most people do not realize the alarming increase and remarkable prevalence of kidney disease. While kidney disorders are among the most common diseases that prevail, they are sometimes the last recognized by patients, who very often content themselves with doctoring the effects, while the original disease may constantly undermine the system.
Regular fifty-cent and one-dollar size bottles at all drug stores.
Don't make any mistake, but remember the name, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., which you will find on every bottle.
SPECIAL NOTE—You may obtain a sample size bottle of Swamp-Root by enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y. This gives you the opportunity to prove the remarkable merit of this medicine. They will also send you a book of valuable information, containing many of the thousands of grateful letters received from men and women who say they found Swamp-Root to be just the remedy needed in kidney, liver and bladder troubles. The value and success of Swamp-Root are so well known that our readers are advised to send for a sample size bottle. Address Dr. Kilmer & Co., Binghamton, N. Y. The price of food-stuffs still soars! We have read of arctic explorers who chewed pieces of leather to allay the pangs of hunger when their regular rations were exhausted, but the recent announcement that shoes would soon advance to \$15 and \$20 the pair removes even that solace.—Chelsea Tribune.

HIS CARGO BECAME ALIVE.

But Part of It Wasn't Displeased With What Was Happening.

Kansas City—Harry Deutsch, a baggage man, got a bill that almost set him up in the poultry business.

A commission house on the north side had thirty cases of bad eggs it wanted dumped into the river. Deutsch backed his wagon to the river and began leaving the eggs into the water. Cakes of profit came from one of the cases. Deutsch found two live little chickens and in another case two ducklings. The ducklings tumbled and tossed until they got into the water and floated away. He has the chickens.

REAL CAUSES FOR GRATITUDE

Thankfulness for the Vaster Blessings of Life Should Be the Duty of All.

To give thanks for the more particular benefits, valuable in a small way in our own lives, would seem to me dispensable, and of proportionately little value; but to show gratitude and appreciation for the vaster blessings with which the life of each one of us is enriched, this, it would seem to me, is indispensable.

We are usually down on our knees, thankful if some project of our own succeeds, or for our friends comes to pass; but high noons and sunsets, stars and great rivers, cities glittering in the night, plains and valleys silent under the moon, dawn across the sea, the mantle of the storm and fringes of the rain, and a world made new each day, and that large companionship of joy and sorrow and hope shared with men and women whose lives merely brush ours in passing, and in whose faces we may perhaps not look again—for these, these royal gifts, what gratitude of high and noble living do we offer?—From the Dellneator.

Turkey-Producing States.

It may be surprising to learn that only 3 per cent of the New England farms produce turkeys. Texas leads in raising this food with over 264,000 to her credit, while Missouri, Indiana, Illinois and Kentucky follow her closely.

Just a Thought.

The Puritan fathers couldn't really have been such asses as they made themselves out to be according to the fact which they left in their descendants, one of their chief memorials.

JACKSON PRISON SUSTAINS ITSELF

No Money Drawn From Treasury for Current Expenses in Two Years.

YEARLY BUSINESS \$1,500,000

Warden Simpson Recommends That Capacity of Twine Plant Be Increased and Other Activities Undertaken.

Lansing.—Jackson prison is now doing a business of \$1,500,000 yearly, according to the biennial report of Warden N. F. Simpson, who will soon retire as head of the institution.

During two years the institution has increased its assets \$200,206. The prison farms show an increased valuation of \$87,083 for the period ending June 30, 1916.

In his recommendations for improvements Mr. Simpson urges the remodeling of the east-end cell block, the construction of another warehouse and providing for railroad sidetrack facilities and drainage of the Lowden farm. The warden also recommends that the convicts construct houses to be sold to private individuals.

The warden would increase the capacity of the twine plant from 12,000,000 to 15,000,000 pounds a year. A total of 2,137 acres of land is now under cultivation. Five hundred and seventy-one new inmates were received in the two years, 682 were paroled and 161 violated their paroles.

No money has been drawn from the state treasury for current expenses by the prison during the period.

Predicts Prices Will Soar.

"Meat will be selling at the highest prices in history before the winter is over," said J. N. McBride, state markets director. "Small pigs are already being put on the market in large numbers and this means that the supply of grown stock will be greatly reduced. Farmers are anxious to get rid of their stock, young and old, because of the shortage and high prices of foodstuffs.

"The shortage of meat is a great problem, but there is far greater shortage in other food products. Cheap vegetables are extremely scarce. The potato crop is so limited that we now find five buyers in Michigan to one in former years. This means a serious shortage before the winter is over.

"Our great problem now is to make the farmer realize that it is absolutely essential to keep a good supply of seed for planting next spring, otherwise we are bound to have a still greater shortage next year. Every farmer should set aside at least five bushels of seed potatoes.

"I recommend that people start right now to boil potatoes with the skins, as is being done in Germany and other countries where there is a shortage of food products. We must conserve our supply if we are to avert a food famine in 1917."

Fuller Pleads For Economy.

"Please tell the legislature to pare all special appropriations to the bone. Keep them down to the minimum, the absolute necessities."

"Such will be the message of Auditor General O. B. Fuller to Governor Ferris and Governor-elect Sleeper, the former for use in his exaugural and the latter in his inaugural address to the incoming legislature.

Mr. Fuller has shouted for economy in the state affairs in the past, but this time he expects to make an exceptionally strong request to the legislature through the executive office, not to run wild when it comes to special appropriations. The regular appropriations for the current expenses of the state government and the current expenses and maintenance of the various state institutions, will go up by leaps and bounds. In order to keep everything in the limit, Mr. Fuller wants the specials to be dropped as far as possible.

While it is true that the state today has in its general fund about \$2,000,000 more than it had at the same time previous to the opening of the 1915 legislature, all indications are that the expenses of the state government are going to be much higher.

"I have not received the estimates from all of the hospitals as yet," said Mr. Fuller, "but one estimate I got staggered me somewhat. A certain state hospital gave the money needed for potatoes alone for the next year \$50,000 more than what it has been allowed for the population of the institution has not increased to any substantial extent.

"I will ask both Governor Ferris and Governor-elect Sleeper to call the attention of the legislature to the fact that special appropriations at this time, unless they are absolutely necessary, will simply be adding more to the load the state may have to carry."

The legislature of 1915, for all purposes, practically appropriated \$14,000,000, exclusive of deficiencies it had to make up. The \$14,000,000 figure was the general running of everything connected with the state for the last two years, including the special appropriations for some of the institutions.

Object to Hospital Charges.

Resentment among state officials against the University hospital at Ann Arbor crystallized when Superintendent of Instruction Fred L. Keeler was authorized by the state board of auditors to take up with the board of regents of the University of Michigan some of the bills that the hospital has been charging other state institutions.

The specific instance which caused the matter to come to a head was the bill rendered the state public school at Coldwater by the hospital for the treatment of a four-year-old boy named Lester Ford. This bill totalled more than \$300, and Superintendent J. B. Montgomery of the Coldwater institution, insisted that it should be cut in two. This Superintendent Greves of the hospital refused to do and Mr. Montgomery, in referring the bill to the board of state auditors, sent the correspondence along.

Several months ago Auditor General Fuller, who has to approve all bills rendered by the hospital for children sent from various counties under the law for indigents, complained that the hospital was charging top notch prices and that the state was really paying retail prices for treatment there, whereas by the nature of the cases, it should be given actual cost rates. Objections of Mr. Fuller were met by officers of the institution with a straight denial. They insisted the state was not being charged too much, not even as much as the private patients were charged.

Boy Farmer Makes Big Profit.

Verner Pelt, an upper peninsula youth, has just been awarded the state potato-growing championship by the boys and girls' club department of M. A. C. By raising 402.8 bushels of potatoes on an acre of ground, the prize winner cleared a net profit of \$503.30, or something like 500 per cent on his original investment of capital and labor. Efficient agricultural methods, which gave him a record crop in a year when his neighbors were suffering from the drought, explain the success of Verner, whose home is at the National mine, in Marquette county.

Verner's record was made in competition with several thousand boys and girls throughout the state. Each year the boys and girls' club department of M. A. C. through juvenile clubs organized in every part of the state, induces young people to plant an acre of ground to some crop, such as potatoes, corn, or beans. Then each fall, when the crops are harvested, the records of each of the boys and girls who competed are gathered by the clubs' headquarters at M. A. C. and the winners are picked on the so-called four-point basis, which takes into consideration the quality of the crop, yield, profit and report, and the story of the project. The upper peninsula boy scored an average of 93 points.

In growing this crop, Verner employed the intensive methods which the club department of M. A. C. outlines for the small plots cultivated.

Other winners and the yields of their plots, were: Mattie Franz, Loretta, Dickinson county, 332 bushels; Clyde Manita, Tapiola, Houghton county, 301 bushels; Richard Grandgood, Tapiola, Houghton county, 296.6 bushels; Cleo Farm, National Mine, Marquette county, 277.1 bushels; Edward Nelson, National Mine, Marquette county, 276.9 bushels; Welkko Lukkarinen, Palmer, Marquette county, 256 bushels; Howard LaFrance, Morsey, Osceola county, 252 bushels; William Skog, Metropolitan, Dickinson county, 250 bushels, and Joseph Dziedzic, Loretta, Dickinson county.

Most of the prize winners were upper peninsula boys for the reason that unfavorable conditions were more pronounced last summer in southern Michigan than they were in the country north of the straits.

Accuses Bean Buyers.

J. N. McBride, state director of markets, sent dispatches to his representatives in the various parts of the state to prepare to fight buyers, who, it is said, are attempting to lower the price of beans by issuing false reports as to the bean crop.

According to the circulars, which have been widely distributed by certain jobbers and canning companies, the Michigan crop this year is 7,500,000 bushels, or more than the total yields for 1915 and 1916 combined, as given in the government figures.

The state crop report gives the bean yield this year at 2,920,333. The federal figures for the same year at 3,750,000 bushels.

The market director says that copies of the circulars will be sent before the federal authorities that they may determine if there has been any misuse of the mails.

"In addition, the invoices include war and destructive tools, directed against Germany, to the value of many millions more. This statement includes statistics from Philadelphia, Boston, Newport News and Bridgeport."

To the mind of the average layman in Germany, who is often the soldier in the trenches, this supply of Y.—Few things have made a deeper impression on German opinion than the publication in the Lokai Anzeiger of statistics purporting to prove that the United States is furnishing virtually half the ammunition discharged by the French and English against the Teutonic forces.

"The supply of war materials furnished by the United States to the enemies of Germany is daily taking on larger proportions and is now 50 per cent of the value of the total exports from the port of New York, which represents half the total American exports, all ports, of war materials," says the newspaper.

"The total of half the New York exports, according to September customs figures, made in the declarations, is \$270,000,000. Of these explosives, death-dealing instruments to the enemies of Germany is the crux of the whole situation. The Teutonic mind cannot understand why a "neutral" nation continues to supply half of the instruments to enable one set of belligerents to continue the war.

RACING CAR KILLS FOUR

Driver and Three Others Meet Death When Auto Strikes Tree.

Los Angeles—Four persons were killed outright and two others seriously injured when Marmon car No. 24, driven by Lewis Jackson, making his thirteenth lap in the classic international grand prize race, crashed into a tree at Seventh street and San Vicente boulevard and then plowed into a group of spectators. Johnny Aitken won the race; Earl Cooper was second, and Patterson third.

SHOOTS MAN WHILE HUNTING

Rifle Accidentally Explodes While Cleaning—Ball Strikes Companion in Back.

Trout Lake—James Nickles, of Sault Ste. Marie, was shot and killed by a young man named Warner at Fiborn quarry, about six miles west of here. Nickles and Warner had been hunting all day. Warner was cleaning his weapon when the gun exploded, the ball striking Nickles in the back and coming out just below the heart. Nickles lived for about 30 minutes after the accident.

Thirteen hunters have been killed in Michigan since the hunting season opened October 1.

ALLIES CAPTURE MONASTIR

Serbian Colors—Red, Blue and White Again Flutter Over Monastir's Governmental Buildings.

London—Monastir has fallen to the Allies. To the strains of the Serbian national hymn, the remnant of King Peter's army marched through the shell-riddled gates of the Macedonian city, whence a year ago they fled in panic and hunger before the great Teuton-Bulgarian steam roller. At the head of the victorious troops rode Crown Prince Alexander, rejuvenator of the little Balkan kingdom's soldiers, and side by side with them marched French regiments, with whose aid this first great step toward the reconquest of Serbia was accomplished.

Here and there in the long line of the triumphal march a row of Muscovite "tchakos" towered above the helmets of steel. Their owners were members of the Russian contingent, which also co-operated in the encirclement of the great Bulgarian stronghold.

A few minutes after the first battalions had entered, the Serbian colors—red, blue and white—once more fluttered from the mast tops on Monastir's governmental and municipal buildings.

The French war office was the first to tell the news of the great success. It was flashed broadcast by telegraph and radio and a few hours later messages from all Entente capitals told of unbounded jubilation.

"Troops of the army of the Orient," said the French official announcement, "entered Monastir on the anniversary of the taking of the town by the Serbians in 1912."

Word came from Berlin that the German war office had conceded the loss of the Macedonian base.

\$375,000,000 FOR U. S. NAVY

New Naval Appropriation Bill Asks \$30,000,000 More Than Last Year.

Washington—Exceeding last year's total by more than \$30,000,000, the new naval appropriation bill to be introduced in congress at the forthcoming session will call for an expenditure of \$375,000,000, Chairman Padgett of the house naval affairs committee, stated. Of this sum \$275,000,000 will be devoted to new ships and to payments on contracts already existing and \$100,000,000 for purpose of departmental administration.

The Fore River Shipbuilding Corporation, Quincy, Mass., will construct eight and the Union Iron Works Co., San Francisco, six torpedo boat destroyers authorized in the last bill.

The two big bidders for battleships, the New York Shipbuilding Co. and the Newport News Shipbuilding & Drydock Co., stood out at first at the navy's stipulation for electric propulsion, but finally surrendered to the department's wishes. Each company will build two battleships, reaching its own understanding with the electrical equipment companies furnishing the propulsion machinery.

"The Sucker" List

When the Post Office authorities "pulled" the Standard Securities Co., in New York, awhile ago, among a wagon-load of "literature" telling how to make a budding dollar blossom into many thousands quickly, was found a list of 100,000 names of people who have bought or might be induced to buy get-rich-quick stocks. The inspectors call this the most valuable "sucker list" in existence. The Standard Co. actually sold more than \$2,000,000.00 worth of their worthless stock to the public.

It would be an insult even to presume that your name was on that list. But are you sure your money is so carefully invested as to be immune from the lure of such concerns' wild promises? Is it as safely invested as it would be in one of our \$100, \$500 or \$1,000 5% Guaranteed First Mortgage Bond Certificates—every \$1 of investment secured by more than \$2 of actual, income-producing Detroit Real Estate—and both principal and interest guaranteed by a company with \$200,000.00 paid-up capital?

DATES FROM 1865

National Thanksgiving Day is comparatively new in Country's History.

It is just 51 years since the last Thursday in November was adopted by the president of the United States as the day set apart from all others of the year to be observed by the people of the nation as Thanksgiving day. It was the first Thanksgiving celebrated after the close of the Civil war, and the proclamation by President Johnson a few weeks prior, appointing such a date, was issued because it was a generally understood fact that Lincoln had planned, during the dark days at the end of the struggle, to have some one day in November reserved yearly by all states in the Union.

Throughout the war the celebration had occurred only here and there in scattered communities. And always before, in the various states which did celebrate the day, it was purely a sectional affair, for which the governor issued a proclamation upon his own initiative. November, 1865, witnessed the beginning of the holiday as a national institution. Since that date the governors of all states and territories, upon receiving the president's proclamation, publish their own, naming the day in formal fashion. It is an American festival day, unique in more than one respect, but most perhaps because it is the only religious festival celebrated in this country upon the recommendation of the government.

Idea Borrowed From the Dutch. It had a tangled beginning. A score of origins are claimed. And one is rather at sea in selecting his particular belief. In the congressional library it was a happy chance which discovered these various sources and their grave and gay histories outlined in a chain of sketches.

In the middle states the day is observed more as a religious matter than as a holiday, but in New England it is a festival, a domestic feast day and the chief of all holidays. Americans like to believe that Thanksgiving day is purely and simply American, and it is, but as instituted in New England the idea was borrowed from the Dutch, among whom the Pilgrims had dwelt for ten years after leaving British soil

and before emigrating to America. The Hollanders had been accustomed to celebrating October 3 both religiously and socially, in honor of their deliverance from the Spaniards, and when the first harvest in the new home of the English emigrants had yielded well it seemed the natural thing to rejoice in a period of public thanksgiving.

Some deserted Indian huts stored with corn had furnished the nucleus of that harvest, and an Indian chief who had once been in England and consequently trusted Englishmen gave the Pilgrims instruction as to the planting of the grain and the procuring of game as well. Upon this first harvest rested the wellbeing of the little colony, so many of whose members had perished in that first fierce winter which followed the landing of the Mayflower in December, 1620. The hardest, who survived, were humbly grateful for the rich harvest in October, which followed the neighborly native's suggestions and Governor Bradford ordered a three-day feast and celebration as recognition of such plentitude. The Indians who had first extended the hand of welcome to the pale faces there were invited to attend and bring their friends.

New Thanksgiving Foods.

In Holland the settlers had partaken of Spanish stew as the common dish of the Thanksgiving day, but in a new country, with new foods to use, geese, turkeys, water fowl and ducks were eaten. Bread made of barley and corn took the place of wheat bread, as a necessity, and codfish had its first inning as a matter of both history and gastronomy among white people. The guests of the forest brought deer as a friendly contribution toward the feast. And this is presumed by many persons to be the first real Thanksgiving day in America. Yet, since there was no special religious service upon this occasion, recognized authorities disclaim this theory of the origin.

Rather, they point to July 30, 1623, when Miles Standish returned from a voyage with sadly needed provisions and the glad tidings that a ship was nearing the shore. When this ship, the Anne, had anchored, and relatives and friends necessarily left behind in Holland because the Mayflower could not accommodate all those seeking religious freedom in the new world, had joined the little colony at Plymouth, the colonists were so overjoyed that a public service of prayer and thanksgiving considered meet. This,

holding both religious and social elements, is in the minds of New Englanders, the basis of the national celebration today.

Long Time Between Celebrations.

But two centuries and a half elapsed before the nation as a unit followed the early example. Local celebrations throughout Massachusetts became common meanwhile, and in 1630 a public Thanksgiving day was held in Boston by the Bay colony, though the first-written record of such a day still remaining in the colonial records of the Bay state credits February 22, 1631. This had been appointed as a fast day by Governor Winthrop on account of the severe reverses with which the colony had met. The weather had been unusually cold the entire winter, game was scarce and the Lyon, which had been dispatched to England for food, was given up as lost on the high seas. The children had come to digging mussels out of the frozen ground as help in sustaining life, and finally five kernels of corn were given out as the daily ration of each colonist. The fast day appointed then was not merely for abstinence from food, for that was practically imperative anyway, but it was to be a special day of supplication for food and greater comfort. A day or two before the appointed time the long-looked-for Lyon came sailing into the harbor laden with provisions and the fast day became a feast day instead.

PINEAPPLE SHERBET.—Take one pint of grated pineapple, one pint of sugar and one and one-half pints of water. Boil the sugar and water until the former is thoroughly dissolved. When cool add the grated pineapple and the juice of two lemons and freeze fast. When partly frozen add the beaten whites of two eggs, mix thoroughly, take out the dasher, pack well and let stand for an hour or more.

Peach Sherbet. Fill the can of the ice cream freezer about half full of peach juice, and when it is almost frozen put in the beaten whites of four eggs. When frozen the sherbet will be a delicate pink color. Use four eggs for a six-quart freezer.

Mint Sherbet.—Mint sherbet is delightful and is easily made. Have ready the juice of five lemons, one pint of sugar, a quart of water, half a cupful of mint leaves pressed down hard and a tablespoonful of gelatin. Add the water and sugar come to a boil, add the gelatin and take from the fire. Crush the mint leaves and stir them into the boiling water with the lemon juice. When cold strain and freeze.

Peach Ramekins.—Cook half a cupful of rice in milk with a quarter of a cupful of candied orange peel and half a teaspoonful of salt until the kernels are soft. Then stir in one-fourth cupful of sugar. Half fill buttered ramekins, place two peach halves in each, add a little more rice and pile on top a moderate amount of the whites of three eggs, three or four spoonfuls of powdered sugar and a few drops of orange extract. Bake in a moderate oven and serve with orange sauce if desired.

Prune Whip.—Take about six prunes for a person and wash and stew till very soft. Then take a knife and cut in very fine pieces when cold enough to handle. Then add three-quarters cupful white sugar, and for the pulp of eighteen prunes take the whites of two eggs beaten stiff; add the prunes and stir till well blended. Set one side till near the meal you want them for, then whip one-quarter pint of cream very stiff and put over each order.

Anna Thompson

and even to buy feed to supply his live stock than to engage in diversified farming. These conditions are exceptional, however, and such a farm is always subject to disaster through the failure of that single crop as well as through failure of market conditions.

LIVE STOCK USUALLY HELPS IN FURNISHING CONTINUOUS EMPLOYMENT.

And, further, no single cropping system offers an opportunity for continuous employment throughout the year, while with a diversified agriculture the leaks caused by idle seasons can be largely overcome.

Live stock on the farm usually helps greatly in furnishing continuous employment. Live stock is primarily a method the farmer employs of marketing his produce, and the live stock yield must be equivalent to the market price of the feed or a loss is occasioned, but if live stock yields even a small margin over current prices of feed, yet the labor employed in caring for the stock would be otherwise idle, then the industry becomes highly desirable and contributes to the profits of the farm.
