**W. W. BARNARD**

REPUBLICAN CAUCUS

A caucus will be held at the Putnam township Hall on Saturday, March 12, 1927, at 8:30 P. M. for the purpose of nominating candidates for the township offices and transacting such other business as may come before it. By order of township committee

DEMOCRAT CAUCUS

The Democrats of Putnam township will hold a caucus for the purpose of nominating candidates for township offices and transacting any other business that may properly come before it at the Town Hall, Saturday, March 12th, 1927, at 2:30 P. M. By order of township committee

**CARL BOWEN**

Carl Bowen, the fourth child of the late Emerson and Francis Bowen was born June 30, 1884 in Handy township Livingston county where he spent the greater part of his life until moving on the farm in Stockbridge township where he departed this life March 6, 1927 after a lingering illness of about two years. On January 17, 1906 he was married to Clemeia Wylie and to this union were born eleven children, three having gone on before.

He leaves to mourn the loss of a kind and loving husband, father and brother, the widow, six sons, two daughters, five brothers, two sisters and a host of friends.

The funeral services were held at the Pinckney Congregational church Tuesday at 2:00 P. M., Rev. H. E. Maycroft officiating. Burial was in the Gilkes Cemetery.

**RECORD OF MERIT WORK**

The record of merit work was started by a number of sheep breeders two years ago which makes it possible to make official shearing records on sheep. This was put into the hands of the Michigan State College. W. C. Hendee and sons have been in the work since it started and sheared nine ewes last week which show the amount of 171 lb of wool. They also shorn a ram from which was shorn 36.1 lbs of wool. These records are placed on a basis of 365 days and the inspection and weighing of fleeces are in the hands of the M. S. C.

**LEGISLATIVE NOTES**

The legislature still continues to mark time with the most important bills languishing in the committees. The capital punishment bill is in the hands of the judiciary committee where it is claimed a majority are opposed to reporting it out. The Howell Sanitarium bill still continues to draw sparks. The U of M. and the State Medical Association have now entered the fight on the side of those favoring the Ann Arbor location and are flooding the legislators with petitions. The side who is the most successful trader when the bill reaches the floor of the house will probably win.

Various bills favoring a higher gas tax have been proposed and some such bill will probably be passed. A law relating to the control of apieries and the suppression of diseases among bees has been proposed by Rep. Bryant of Traverse City.

A bill has been passed providing \$200,000 a year for the next two years to fight the corn borer.

Senator Horton has a bill requiring hunters to obtain the written permission of farmers to hunt on their lands.

The old reapportionment issue is up again. Rep. Warner of Ypsilanti proposes a constitutional amendment which would apportion the representatives on the basis of the number of citizens rather than the number of inhabitants as at the present.

**LAKELAND CIRCLE MEETS**

The Lakeland Kings Daughters were pleasantly entertained by Mrs. F. J. Mahler last Wednesday afternoon, 23 being present.

The meeting was called to order by opening by singing "God Will Take Care of You." This was followed by the reading of the secretary's report and the treasurer's, the latter showing a balance on hand of \$44.04.

Most of the 60 garments which the circle has been making for the boys at the U. of M. Hospital were finished and 47 garments for the girls at hospital were started; nine more dolls for the children at the hospital were completed making a total of 47 completed.

The following committee was appointed for the county convention which is to be held at Lakeland in May, refreshment: Mesdames-Bourbonais, Hinckley, Shipley, Docking, Gauslin, Worman; decorations-Lee and Whitlock.

The next meeting will be held at the home of Mrs. B. Haight in Hamburg village with Mrs. Haight and Mrs. Reuben Kisby as hostesses.

**PAST MATRON'S ASSOC. O. E. S.**

Five of the Past Matrons of the Pinckney Chapter O. E. S. met at the home of Mrs. Marion Pearson in Howell Wednesday P. M. and formed a past Matron's Assoc. with officers as follows: Pres., Mrs. Nettie Vaughn; Vice Pres., Mrs. Marion Pearson; Sec'y-Treas., Mrs. Florence Baughn. Past Matron's night will be observed in the local chapter rooms, Friday evening, March 25th.

**KING'S DAUGHTERS**

Members and guests to the number of twenty five were entertained at the home of Mrs. Fred Read Wednesday, March 2.

The afternoon was spent in making rag dolls for the children at the U. M. Hospital and hearing the reports of the sewing and sick committees. A dainty luncheon was served by the refreshment committee consisting of Mrs. M. Darrow, Mrs. Fred Lake and Mrs. Fred Read.

**DON'T WORRY OVER SPILT MILK**

Feed Calf Chow and save the milk waste. It is unlike any calf meal on the market. It's balanced like whole milk. Calves thrive from the first on Calf Chow and it keeps them growing. So easy to feed that boys or girls are assured of success. And it saves \$10 to \$15 by taking the place of milk. R. E. BARRON, Howell

**TWO RUM RUNNERS CAUGHT**

Several weeks ago the state police arrested some eighteen people including several members of the Jackson county sheriff's office who were smuggling liquor from Detroit to Chicago by way of M-17. This put a damper on M-17 as a route and forced the runners to use other routes. M-49 was one of these new routes used and as a result the state police have been hovering around this section. Last Friday they were tipped off that two loads of booze were enroute to Chicago via M-49 and they lay in wait for them at Pinckney. About 3:00 P. M. a heavily laden Olds sedan and a Ford sedan hove in sight and the state police in their big Lincoln at once gave chase. The Ford was overhauled and its driver captured about two miles west of town but the Olds turned down the road that leads past the R. G. Webb farm. This road is narrow and at this time of the year full of deep ruts and very rough. The rum runner hit this at a 50 mile clip, losing a part of his load whenever he hit an extra rough spot, with the state police on his heels. Just this side of the John Martin farm there is a long cause way built through a marsh. Here the Olds skidded and plunged down the eight foot embankment. The police nabbed the driver and told Slayton & Parker to pull the sedan out of the marsh. They endeavored to do this with their wrecking outfit but were unable to do so and got the assistance of Bert VanBlaricum and his house moving paraphanelia who succeeded in pulling it out of the mud. Both cars were laden with thousands of dollars worth of Canadian beer and whiskey and were sent Lansing, the prisoners being removed to the county jail at Howell.

**SERVICE STATION ROBBED**

The Sinclair Service Station located at the junction of M-49 and the Howell Road was entered last Friday night or early Saturday morning and about \$200 worth of Goodyear Tires and tubes taken. Entrance was gained by forcing the door with a wrecking bar. The Pinckney Eastern Star Chapter held a banquet that night and there was a dance at Hamburg. Consequently quite a few Pinckney people were about and it is definitely known that all was well at the service station at 4:00 A. M. At 6:15 A. M. W. H. Meyers who drives a milk truck passed the station and saw a red Nash sedan parked there but did not think anything of it as it is often used during the night as a place to change tires or get air. Before he got to the Dexter corners the Nash passed him and there were two men in it. The station is run by Lee Lavey and the tires were not insured. With the exception of the Nash sedan no clues have been discovered.

**THE PRESS ASSOC. MEET**

The Livingston-Genesee Press Association met with Mr. and Mrs. A. Riley Crittenden of Howell last Friday. Dinner was served in the Central High School by the domestic science class after which a musical program was rendered by choruses from the grades and several instrumental numbers by Emily Mutter and Director Williams of the High School musical department on the violin and trumpet. The press members were then invited into the auditorium to hear the preliminaries of the oratorical and declamatory contests to decide who should represent Howell in the district contests. These contests were won by Elizabeth Pettibone and Miss McKel. The High School orchestra then favored with several selections after which the editors proceeded to the residence of Mr. Crittenden where their business meeting was held. The April meeting will be held at Flushing. Those present were Messrs. Beebe and Ransome of the Flushing Observer; McMullen, Linden Leader; Beach, Fenton Independent Messers; Jacobs and Austin, Brighton Argus; Geo. Adams, Fowlerville Review; John Ryan, Democrat; Messrs. Barnes and Caverly, Republican and P. W. Curlett Pinckney Dispatch.

**SCHOOL NOTES**

The following people gave declamations last Friday: Dorothy Carr, Hazel Embody, Elizabeth Spars, Mary Stackable, Iola Haines, Mary Solter and Janet Fiedler.

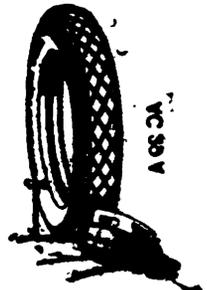

At the present time Miss Harris is spending a period a day coaching public speaking. The results so far attained by those taking the work is very satisfactory.

The magazine contest which was conducted in the school for the benefit of athletics was a great success. It is this annual contest that provides the funds to carry out an athletic program in the school. The contest was won by the team captained by Dorothy Carr, Loretta Dillingham and Wilhelminia Bourbonnais who indicated the affirmative side of the debate, vidu alhonors in the contest.

Word has been received that the Pinckney High School basketball team has been drawn to play the University of Michigan High School team at Ypsilanti during the state tournament this week. Practically every school in the state has entered a team in one of the tournaments.

**THE GOODYEAR SERVICE STATION**

**IF  
They're Worth Stealing  
They're Worth Buying**

Last Friday night our place of business was broken into and \$200 worth of GOODYEAR TIRES were stolen. These thieves certainly knew their business because they insisted on stealing GOODYEAR TIRES. Now if they are worth stealing and running the risk of a term in the penitentiary for they are worth buying and at the low prices we ask, it is cheaper to buy than to steal them. We have replaced the tires taken by the thieves and are prepared to supply you with any size or make desired of GOODYEAR TIRES.

The Sandman Story by Martha Martin

ABOUT SWANS

"OF COURSE," said the Trumpeter Swan, "my voice is interesting. Though I am in the zoo now I cannot say that I have traveled very far in order to reach this spot."

"I Am Very Tame," Said the Trumpeter Swan.

all good and kind and nice to me and so I became very tame. And then the Trumpeter Swan gave a loud, trumpetlike call, which showed how well named he was.

THE WHY of SUPERSTITIONS By H. IRVING KING

THIMBLE AT THE TABLE

IF AN unmarried woman places her thimble on the table when she sits down to eat it is a sign that she will be a widow if she marries. Some have it "she will be an old maid."

Public Utilities Waterworks lead public utilities in the percentage of plants under municipal ownership. All of the ten largest cities in the United States own their works.

"I suppose Mother Mute thinks it is as well not to dress up the little ones too much. Little ones are not apt to take such good care of their finery. And then she knows they will be beautifully dressed later on."

"No, I'm not a bad-looking swan," said the Black Swan. "If you're talking about looks you should both look at me and mention me."

"But you asked me to admire your looks. And that I will gladly do. For you are very large and very magnificent and your shiny black feathers are gorgeous and look so differently from those of other swans."

"Yes, Black Swan, I must say you have many friends and every one likes to see you and gaze upon you. So I will give you both attention and mention on account of your looks for you deserve both, most assuredly you do."

How It Started By JEAN NEWTON

SOFTLY NOW THE LIGHT OF DAY

THIS hymn, which for over three-quarters of a century has been sung all over the English-speaking world and is known affectionately as the "Even-Song," may be said to be a product of contrasts.

Sally O'Neil

Handsome Sally O'Neil, young and popular, noted for her splendid work in girl parts in motion pictures, has another flapper role in "Slide, Kelly Slide!"

For Meditation By LEONARD A. BARRETT

ACTIVE IGNORANCE

THE proprietor of a large furniture establishment recently related the conversation he had with a representative of a concern, one of whose chief merchandising products is their famous bookcases.

SAWS By Viola Brothers Shore

FOR THE GOOSE—

LAUGHIN' at a fresh kid is makin' yourself his partner. It ain't good salesmanship to show a wain't too many hats.

FOR THE GANDER—

Calamity hits you from the outside. But worry is in your own mind. You might stay an optimist through a run of bad breaks. But who ever stays a pessimist when Lady Luck smiles?

Hercules Man of Strength

Whenever the Greek gods of Mount Olympus were confronted with a hard task, they sent for Hercules, whose mighty strength could be depended upon to accomplish anything.

Diagnosis

Johnson—So your baby is ill? What's his ailment? Jackson—The doctor said it was rickets, but from the noise it makes I'm pretty sure it's rackets.

POULTRY

SUNSHINE AIDS IN EGG LAYING

Tests made at different experiment stations as well as the results of practical poultrymen have demonstrated that direct sunshine serves two useful purposes. It not only helps the hen to see, but it also enables her to make proper use of the minerals in her ration.

Recent experiments show that the sunshine not only helps in the assimilation of minerals, but that it also helps hatchability. At the Kansas station hens that were allowed access to sunshine showed a hatching record of 73 per cent as compared to 52 per cent for hens that were kept in houses with glass windows.

Early Hatched Chicks Are Best Winter Layers

Late hatched pullets rarely lay until the middle of the winter or early spring. Chickens should be hatched not later than the last of May if they are expected to lay eggs in the late fall or early winter.

Best Quality Eggs Are Produced in the Spring

Early spring is the fowl's natural breeding season and the best quality eggs are produced at this time. These high quality eggs produce strong chicks, the mortality being lower than when late hatching is practiced.

Good Test for Eggs

An egg may appear to be satisfactory, but when the contents are examined it may be found to be worthless for incubation. Some eggs may have cracked shells. These may be detected by the use of the tester or candler such as is used in testing eggs during incubation.

Goslings With Weak Legs

Goslings that are weak in the legs and very thin sometimes are infested with worms. One remedy is to mix one-fourth pound sulphur, one-fourth pound epsom salts and two ounces powdered copperas in twenty-five pounds of the mash. The mash containing the medicine is used once each day.

Spread of Diseases

One of the common causes of the spread of infectious diseases among chicks is allowing soft feed to get mixed with the litter. If flat boards are used for feeding, have them wide enough so that the feed will not be scratched or carried off. It is better still to nail strips around the boards making them tray shaped, thus to prevent any chance of trouble from this cause.

Drink Water to Help Wash Out Kidney Poison

If Your Back Hurts or Bladder Bothers You, Begin Taking Salts

When your kidneys hurt and your back feels sore don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract.

Jad Salts is inexpensive, cannot injure; makes a delightful effervescent light-water drink, which everyone should take now and then to help keep their kidneys clean and active.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 26 years.

Where He Belonged

"Smith," roared the boss, "you ought to be in a lunatic asylum. Go into my office at once."—Good Hardware.

Girl Writes Backwards

Left-handed in everything except sewing, Nellie Apps, a thirteen-year-old girl of Colford, England, is called the "mystery girl" because she reads a book held upside down and writes backwards unless directed by her teachers.

Always Ahead

Elwood, Ind.—"After reading a number of testimonials from different people who have been benefited by using Dr. Pierce's Golden Medical Discovery, I may also say that I found it with benefit. I tried a good many tonics before being advised to take the 'Golden Medical Discovery' and I am glad to say that I am surprised at the results. It has helped me beyond my expectations. I most heartily recommend it to others as I am absolutely certain it will do for them what it has done for me."—Albert E. Goslin, 1823 So. 1st St.

FITS

Encouraging News for Epileptics. Read the following letter—then write us for more. TOWN'S REMEDY CO., Lansing, Mich., Feb. 11, 1927. Dear Sir: It affords me the greatest pleasure to mail you my testimonial as your medicine has made a new person of me. Am holding a position with the State, and can meet the people any time or place and am perfectly sure of myself. And your medicine deserves the credit. (Signed) Hazel Deolittle, 500 N. Walnut St., Milwaukee, Wis.

COUGHS

Throat tickle, sorethroat, huskiness and similar troubles quickly relieved with LUDEN'S MENTHOL COUGH SYRUP. 5¢

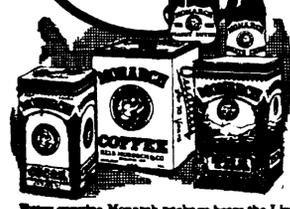

FOR INFLAMED JOINTS

### Power Sent Over Ocean

A circular bank of high power vacuum tubes, capable of delivering 2,000,000 watts of power, is the final amplifier through which the voice of a person telephoning by wireless from New York is forced through the ether over the Atlantic to London. The coils encircling the base of the bank carry gallons of ice-cold water to the base of the tubes, thereby preventing tubes from melting under the tremendous heat they generate.

No Wonder Olive—you are dreadfully pale! Something terrible must have happened! Mae—Yes, the drug store was closed.

It isn't the old song that makes you weep. It is where the memories it arouses takes you to.

### DIURETIC STIMULANT TO THE KIDNEYS

Standard for Generations "About fifteen years ago I used Dodd's Pills and was relieved of a very stubborn case of kidney trouble. Since then I use six boxes a year as a preventive. Am nearly 65, and never feel any symptoms of the old trouble. I can and do conscientiously recommend Dodd's Pills." Signed, Samuel P. Benton, Hot Springs, Ark. ### NEW WING PLANNED FOR U. S. CAPITOL

Building, Begun in 1783, to Have Extension.

Washington.—The capitol, as it stands today, is a symbol of the nation's growth. It has passed through three major stages of expansion, and is yet to be completed through extension of the central part of the east front to give it better architectural balance with the present senate and house sections.

This vast white monument, covering 153,113 square feet, embraces the first capitol of the United States, a modest, almost plain structure about 120 feet long and 100 feet wide, once large enough to accommodate the senate, the house, the Supreme court and the Library of Congress, but now too small for the court and its library.

Funds were scarce when the young government set out in 1793 to build its capitol after a design by Dr. William Thornton, calling for a domed rotunda, a portico and two wings, so it was decided to erect first only the north wing. That was completed in 1800 and congress, the court and the library moved in. "The Oven," a temporary round brick structure, was put up the next year on the site of the house wing, the permanent structure of which was not finished until 1811, three years before both wings were burned by the British. After repairs had been made, work was begun on the rotunda, and the capitol envisioned by Thornton was completed in 1827.

It then proved adequate until shortly before the Civil war, when it became necessary to build the present senate and house extensions. Subsequently the library was given a building of its own, and large office buildings were erected for senators and representatives. The library and the house office building are already overcrowded.

When the senate moved into its extension in 1859, the Supreme court acquired the old senate chamber, and only recently have its members been willing to contemplate leaving that room where Webster, Clay, Calhoun, many of the great of the early republic, made history with words. A new site has been selected for a Supreme court building east of the capitol, near the Library of Congress.

### Depicts Future Man as Bodily Ugly, Brains

Philadelphia.—"A bald-headed, toothless, chinless, thin-shouldered, spindlegged individual," was the futuristic portrait of the average person of the next generation painted for the Philadelphia Physical Education association by James E. Rogers, director of the National Physical Education Service of New York City.

But the man of the future, though he may have lost all claim to beauty, will be well equipped with brains, Mr. Rogers added.

The one way to avoid having his futuristic sketch become a reality, the speaker added, was for the present generation to return to its "natural heritage of climbing, swimming and running." He indicated that a school day lengthened to conform with the present business day, to provide a more complete recreation program and foster "educational athletics as against spectator athletics," would be a welcome step in American educational methods.

### 45 Days on Trail to Get to Seat in Legislature

Nome, Alaska.—State legislators who complain of over-night travel to reach the capital, have only one forty-fifth the troubles of Thomas Gaffney, representative-elect to the Alaska legislature. Gaffney is now mushing outboard from here with dogs. When he reaches Nenana behind his team he will take the government railroad to Seward. From there it is a steamer ride to Juneau. The legislature convenes at Juneau the first Tuesday in March and Gaffney calculates with 45 days start to just about make it.

### London Street Is Paved With Blocks of Rubber

Washington.—The first thoroughfare to be constructed of rubber is now in use in London. Blocks consisting of rubber caps, vulcanized to a brick base, have been laid in New Bridge street, a road subjected to heavy traffic, and, according to cable reports to the Department of Commerce, have proved successful.

### Famous Irish Castle Will Be Abandoned

Belfast.—A recent decision of the war office to abolish Carrickfergus castle as a military station makes very uncertain the future of one of the most historic spots in the British Isles.

The castle is situated on the shore of Belfast lough and was founded in 1128 by Sir John de Courcy, one of the Norman invaders, and was for centuries the scene of much strife between Ireland and England. King William the Third landed there in 1690 on his way to the Boyne and some years later the French privateer Thurot was captured there.

### U. S. LONGEST TUNNEL NEARING COMPLETION

Greatest Engineering Feat of Modern Times.

Tolland, Colo.—When drillers boring from each side of the Continental divide near Tolland meet in the center of James peak within the next few weeks, consummation of one of the greatest engineering feats of modern times will have taken place.

A force of 700 men is laboring daily to rush completion of the gigantic project known as Moffatt tunnel this spring. When finished it will extend slightly more than six miles, making it the longest tunnel in the United States. Passing directly under one of the highest peaks of the Continental divide, it will open up the long isolated Moffatt country, a virgin territory larger than the state of New York, and will save approximately twelve hours' running time between Denver and Salt Lake City, on opposite side of the Rocky mountain range.

To Be Ready July 1.

Unless more unforeseen difficulties arise, the tunnel will be ready for the first train to pass through it on July 1. At present trains crossing the divide are forced to climb a winding mountain trail more than 30 miles long before they arrive at Corona, on top of the range, 11,966 feet above sea level. Trains passing through Corona, a town which consists merely of a telegraph operator's hut, entirely enclosed by a snow shed, move on the highest standard-gauge tracks in the world.

For several months in the year traffic often is stopped for days at a time because of heavy snowfalls on the right of way. The chief operating expense of the line, according to its annual report, is caused by the necessity for almost constant use of snow-removal equipment.

When the Moffatt tunnel is completed all of these difficulties will be eliminated. Trains will travel on almost level ground until they come to the entrance of the tunnel. There they will start climbing a gentle grade straight through the Continental divide and more than two miles below ground. When they get to the middle of the tunnel the grade will change and they will gradually go downward and out into the open country beyond.

The tunnel, expected to cost \$10,000,000 before it is completed, is being financed by the counties it will serve. The railroad using the bore, in turn, will repay the counties affected. The rental scale will be graduated to provide for the expected increased earning capacity of the road after the new route has been in use several years.

Almost insurmountable difficulties have been passed so far by engineers constructing the mammoth hole. Such obstacles as soft rock, requiring extensive and permanent timbering, and underground rivers, which had to be pumped away, have faced the contractors almost constantly.

### Strike Subterranean River

At one place, for instance, an unknown subterranean river was struck. It filled the tunnel as rapidly as the pumps would empty it. Finally it was noticed that Crater lake, high up in the mountains, was becoming lower. Engineers dropped several tons of coloring matter into the lake. When they went down to the tunnel they discovered that the water swirling through it was the same color as that in the lake above. The lake almost vanished before the contractors were able to stop its rushing flow through the tunnel.

Some idea of the stupendous size of the project may be gained from the latest construction figures. Seven hundred miles of holes have been drilled; 2,500,000 pounds of blasting powder used; 11,000,000 board feet of timber, corresponding to 2,000 miles of planks an inch thick and a foot wide, have been put in place; 800,000 pounds of drill steel have been consumed, and more than 3,000,000,000 tons of rock have been removed.

### Alberta's Silver Foxes Found of High Value

Clairmont, Alb.—Silver foxes reared in the Peace river country of northern Alberta are attaining a remarkable reputation for quality, and fox farms in many sections of the United States and Canada now have stock taken from this district.

Alfred Fraser, a prominent New Yorker, once saw in New York four pelts from the ranch of F. E. Turner of Clairmont consigned to London, and was so struck with their quality that he delegated a representative to the Peace river country to secure live silver foxes. A big trade has since been built up in supplying breeding foxes. Last year Turner shipped 80 consignments to all parts of the continent.

### 100 Eagles Attack Flock of Sheep, Kill Forty-two

Moscow.—A great flock of mountain eagles, darkening the sky, swooped down on the meadows of the Dagestan republic and killed forty-two sheep in one mass attack, according to word received by the Soviet commissary of agriculture. The terrified shepherds, accustomed to beating off the attacks of single eagles, fled when the big birds descended on their flocks in mass formation. It was estimated that at least 100 eagles participated in the raid from the sky.

### TENANTS CHARGED BY YARD IN RUSSIA

Landlord Also Considers the Size of Salaries.

Moscow.—In Russia rooms are rented by the yard and paid for on the basis of a tenant's weekly wage. Bolshevism has evolved a rent law unparaleled anywhere else.

The commissioner of health established a minimum space necessary for a wholesome life for one person. This is called the "minimum norm." Any worker is entitled to this living space, and pays for it in proportion to his salary.

When two or more persons live together, all earning money, the rate of rent for their room is fixed by the largest salary earned by one of its inhabitants. This makes the "nepmen," or private business men, extremely unpopular as tenants, because it drives up the rent of all in their apartments to the higher level of their incomes.

But the "nepmen" are popular among co-operative house-building organizations, of which there are now 450 in Moscow. To make both ends meet on the small payment of \$50 required of members of co-operatives, one-tenth of the available living space in co-operative houses usually is sold or rented to nonmembers. Naturally, "nepmen" are preferred because, compared to others, they have such a large amount of money.

Besides what they can get from the "nepmen," the housing co-operatives are assisted by state funds, which are generally loaned to them at 2 per cent interest, with repayment in forty-five years.

The "minimum norm" officially declared able to support one life in good condition is fixed at about 7 by 7 feet, which can under certain conditions be increased to about 10 by 10 feet. Many concessions and exceptions are made, such as for students, whose rent is only five cents a month for each "minimum norm" they occupy.

### Tapestries, Once Pope's, May Come to New York

New York.—Tapestries which once decorated the palace of a pope, and which are valued at \$300,000, soon may be hung in St. Patrick's cathedral here. The World learned recently that wealthy New York Catholics are considering purchase of one or more of the tapestries for presentation to the cathedral.

Woven in the Seventeenth century on the pre-Gobelin looms of De la Planche from designs drawn by Rubens, the set was presented by Louis XIII of France to Cardinal Barberini, who later became Pope Urban VIII. For years they hung in the Barberini palace at Rome.

The set, of which seven survive, were brought to this country by Mrs. Rosa Lewis, English hotel owner, who acquired them from Mrs. Benjamin Guinness of the English brewing family, who bought them from the descendants of the Barberini family. Mrs. Lewis brought them here to sell, and has already received offers for individual pieces, but it is hoped to keep the whole set together.

The seven tapestries, all excellently preserved, represent scenes from the life of the Emperor Constantine, first Christian ruler of the world. Nearly a century was needed to complete the entire set, one of the first famous tapestries made in France.

The sum needed to purchase the tapestries would be about \$300,000. Until they are sold five of them are on exhibition at the Grand Central Art galleries.

### Says Friends Know You by Noise of Your Face

London.—"It is possible to distinguish your face from other people's faces by the noise it makes," said J. L. Baird, the television inventor, in a lecture here the other night. He then proceeded to demonstrate.

He explained that he had discovered that transmissions of pictures by the television system were received as sounds by telephone or radiophone, each object or scene having its corresponding vibration.

In his demonstration he used pictures of various persons, and then of a matchbox, a pair of scissors, a hat and a cabbage. One face made a sound like a saw, another like a pneumatic riveter, while the hat purred softly. The cabbage's image emitted a noise like a man gargling.

These sounds, Mr. Baird said, formed permanent records from which the original images could be reproduced.

### Factory Hands Better Paid Than Office Help

New York.—Factory workers and other manual laborers receive an average higher wage than office employees, according to a survey of the national industrial conference board, made public here recently. Weekly wages of the first type of employees averaged \$2 a week more than those of clerical workers, the analysis revealed. The office salary study was based on earnings in twenty occupational classifications of office workers. The data for the survey was gathered in eighteen cities and was collected separately for men and women.

# ASPIRIN

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists. Aspirin is the trade mark of Bayer Manufacturer of Monocysticacidester of Salicylicacid

BALDNESS MEN you have been looking for something that will grow HAIR on a BALD HEAD. Here it is in FORST'S Original Bare-to-Hair grows hair and will save what you have. It's a world's sensation. W. H. FORST, Mfg. Scottsdale, Pa.

Just Dropped In Just the Same Just as a peasant of Breslau, Germany, was about to partake of a large bowl of pea soup, he was interrupted by two women landing squarely on top of the table. The women, who had entered the cottage at the foot of a mountain through the open window, had been coasting down the mountain and had lost control of the sled.

### House and Lot Offered as Payment for Health

Tanlac Instead Returned Health Lost by Indigestion and Run-Down Condition

Herbert Fisher, 1265 Crawford Avenue, Detroit, says: "Above all things a glassworker must have good health. When I was run-down, nervous and unable to keep going, I would have given my house and lot for good health."

"Was not able to eat without suffering from pains and indigestion. Sluggish liver and constipation sapped my strength, and wore me down. Still I dragged through the days, getting weaker, more discouraged and all tucked out. Vacation and time off failed to help me. "My brother-in-law from Wisconsin told me to try Tanlac which I did. The results amazed me. I began to sleep better, eat my food with relish and without suffering from indigestion pains. I gained weight and have again the thrill of good health. "I sleep like a child, and work all day at high speed without tiring. But I have not stopped taking Tanlac for it is the one remedy for continued good health, for keeping strong. "Tanlac has helped thousands of men and women. It is Nature's own

remedy made from roots, barks and herbs. The first bottle usually brings wonderful relief from pain. Keep up the treatment and troubles vanish, you grow stronger, healthier, more robust. Don't neglect your health, don't suffer from pain needlessly, begin taking this wonder tonic now. Ask your druggist for Tanlac—today! Over 40 million bottles sold.

Not a Matter of Mind "There's one time when a man's brain don't count."

Ten Thousand Messages Ten thousand bottle messages were released upon the waters of the New York harbor to determine tide and current actions. In the bottles were slips requesting finders to write in the date and place of discovery.

"When is that?" "When he's punching the adding machine."—Good Hardware.

When a married man has no mind of his own his wife is likely to give him a piece of hers.

"Rush" on an envelope looks funny without the kind of stamp that insures its being rushed."

The plea of ignorance will never take away our responsibilities.—Ruskin.

You believe that easily, which you hope for earnestly.—Terrence.

Winter chills bring varied ills —the time good elimination is most important

COLDS, chills and changes in temperature impose extra strain on our kidneys. Sluggishness of function is often evidenced by scanty or burning secretions. At such times a stimulant diuretic to the kidneys is indicated. Doan's Pills have been winning friends for more than forty years. Ask your neighbor! Doan's Pills Stimulant Diuretic to the Kidneys

All Prices Cash Price Includes Delivery and License on all models.  
In addition to these low prices Chevrolet's delivery service includes the lowest handling and financing charges available.

Because it provides elements of style, quality and performance comparable to the costliest cars, and because it is offered at amazingly reduced prices--the Most Beautiful Chevrolet is everywhere acclaimed as the greatest sensation of America's greatest industry.

Come in! See and drive this greatest triumph of the world's largest builder of gearshift automobiles. Learn for yourself what amazing value is offered in the Most Beautiful Chevrolet--how closely, in style, quality and performance, it compares with the costliest cars.

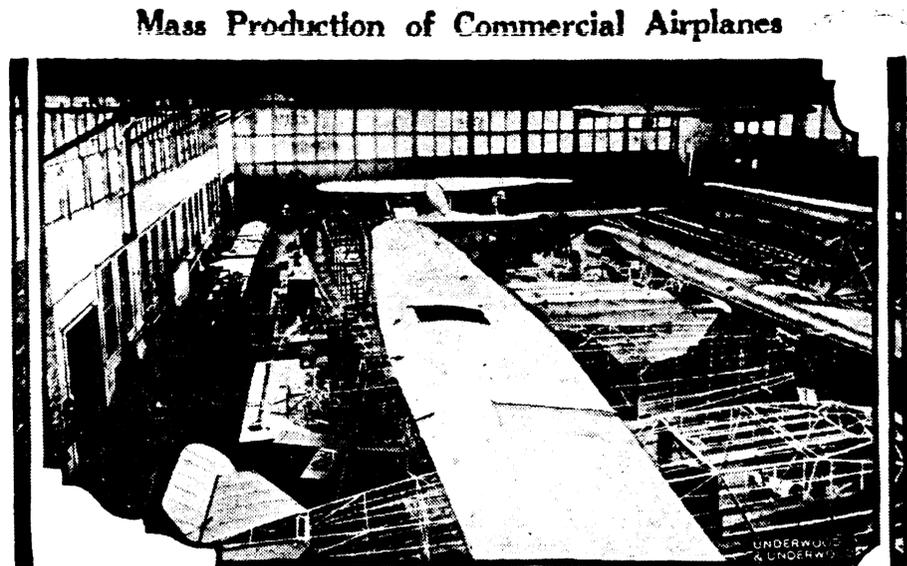

## SLAYTON & PARKER

Local Dealers  
Pinckney, Mich.

CARD OF THANKS  
I wish to thank my many friends who remembered me on my birthday with cards.

Mrs. A. H. Isham

Alfred Pomeroy of Brighton is the guest of Mr. and Mrs. Sam Pomeroy. Mrs. John Horvath who has been caring for relatives at Grand for the past three months returned home Sunday.

1—Armed native soldiers marching through British concession in Hankow, China, for the first time. 2—President Coolidge's household goods being moved into the temporary White House. 3—Scene at Long Beach, Long Island, after the storm that swept the North Atlantic seaboard.

Airplanes for the Colonial Air Transport company in the Fokker plant at Hasbrouck Heights, N. J., which are being rushed to completion for use in a huge network of air lines for passengers, United States mails and expresses which open this spring, linking Montreal and intermediate cities with New York and Chicago.

## NEWS REVIEW OF CURRENT EVENTS

### President Coolidge Vetoes the Farm Relief Bill—Crisis at Shanghai.

By EDWARD W. PICKARD

PRESIDENT COOLIDGE on Friday vetoed the McNary-Haugen farm relief bill, and all hope for governmental relief for the agriculturists was abandoned until the next congress shall meet. The chief executive, in one of the longest veto messages ever received by congress, repeated his already well-known reasons for considering the bill economically unsound and fallacious. He said it was a price fixing scheme indirectly and would put the government into buying and selling. He condemned the equalization fee as a tax on some farmers for the benefit of others. He asserted the plan would increase production and lower the world price to a point that would result in flooding the country with foreign farm product imports over the tariff wall. The President appended an opinion by Attorney General Sargent holding the bill unconstitutional in numerous particulars.

Whatever may be the opinion of the soundness of Mr. Coolidge's reasons for vetoing the bill or of his political wisdom in this respect, there is no question of his consistency and his courage in the matter. In the central West the immediate reaction to the veto was a definite determination to put Frank O. Lowden in the running for the Presidential nomination at the next national convention. The Democrats in congress saw an opportunity to win the farmer votes for tariff reduction.

MATTERS in China moved rapidly toward a crisis last week. Following his crushing defeat at Hangchow by the Nationalists, Marshal Sun Chuan-fang, hitherto ruler of Kiangsu province, gave up Hangchow, Kaohsiang and Ningpo, second largest port in Chekiang province, and retired on Shanghai. At the same time the Nationalists in Shanghai started a general strike which, though nominally directed against Sun, was actually an anti-foreign demonstration and pretty effectually tied up business and traffic in the city. The Chinese officials tried to curb it by the summary execution of scores of leaders and student agitators whose heads were sliced off and stuck on poles in the streets. In the midst of the ruction Sun decided he was beaten and practically surrendered leadership of the anti-Canton forces there to Gen. Chang Chung-chang, boss of Fengtien, who entered the lower Yangtze valley with a large army. Crews of two of Sun's gunboats anchored in the Whangpoo river rebelled and began firing three-inch shells in the direction of the Shanghai arsenal. Owing to poor marksmanship nearly all the shells fell in the French concession, where several residences were struck. French gunboats speedily put an end to this performance. On Thursday the Nationalists called off the strike, partly because they were running out of funds and partly because of the terrorism of the executions. The beheadings ceased and most of the workers returned to their jobs.

Twelve hundred American marines arrived from San Diego on the transport Chautauq but not disembark. That made the total of American armed forces there about 2,300. Five American warships were at anchor in the Whangpoo and four more destroyers were on the way there. The British forces were constantly being strengthened, and the French were reinforced. All these may be needed when the expected struggle for possession of Shanghai starts between the Cantonese and the armies of Marshal Chang Tso-lin which are moving from the north.

By a vote of 208 to 172 the house accepted the senate amendment to the navy appropriation bill providing money for beginning the three light cruisers whose construction the Pres-

ident has insisted should be delayed. The house reduced the amount from \$1,200,000 to \$450,000, and the senate acquiesced in this change.

IN ORDER to provide a place of refuge for British subjects imperiled by the civil warfare in Nicaragua, the British government decided to send a cruiser to the Central American republic. This plan was adopted after the British charge d'affaires at Managua had notified the government that President Diaz and the American minister, Mr. Eberhardt, had stated they could not guarantee to protect British lives and property in case of renewed street fighting. It was stated in London that the sending of the warship does not indicate a change in the British policy in Latin America nor a change in attitude toward the Monroe doctrine. Secretary of State Kellogg in a formal statement said that "Admiral Latimer has been instructed from the beginning to protect foreign as well as American lives and property and is doing everything he can to do so."

Seemingly determined to put an end to the Sacasa rebellion, the American government sent more marines to Nicaragua and Admiral Latimer created new neutral zones for the purpose of keeping the railway in operation and of protecting the cities. Dispatches from Managua said President Diaz was about to submit to the Nicaraguan congress a proposal for a 100 year alliance with the United States which would mean practically the creation of a protectorate.

ITALY'S formal reply to President Coolidge's naval disarmament proposal was transmitted to Washington. It was a politely worded but flat rejection, and was drafted by Premier Mussolini himself. Before being a military or even political problem, naval defense is for Italy one of existence, the note says. Geography establishes characteristics which cannot be disregarded. Italy's position in Europe is determined entirely by the fact that her territorial limits are within one body of water, outlets of which are entirely controlled by other nations.

The note declares that so far as the European continent is concerned, there is an inalienable interdependence of all categories of armaments of every single power and that it is impossible to adopt the measure for only the five great naval powers.

Japan, on the other hand, has accepted the Coolidge proposal and says its delegates at Geneva will have full power to negotiate an agreement extending the limitation to all classes of fighting ships. But the Japanese reply makes it plain that the government is unwilling to extend the 5-5-3 ratio to cruisers, destroyers and submarines. For these vessels it wants a ratio nearer a parity with America and Great Britain.

SOVIET Russia has been twisting the British lion's tail too persistently, and last week it received from the British government a blunt warning that all relations between the two nations would be broken off unless it mended its ways at once. In the note, called one of the most outspoken ever formulated by the British foreign office, Sir Austen Chamberlain, foreign secretary, says that the relations between the British government and the union of soviet socialist republics "continue notoriously of an unsatisfactory nature." He declares that "there are limits beyond which it is dangerous to drive public opinion in Great Britain" and that a continuance of the breaches of the agreement sooner or later will cause a break between the two countries.

All Russia celebrated the ninth anniversary of the establishment of the Red army, and the press carried articles by leading soviet authorities asserting that the army was prepared to meet all eventualities.

WITH only a few days remaining before the end of the session, congressmen made an effort to rush through a lot of legislation. In the senate this was hampered by the filibuster carried on for the purpose of defeating the bill to dam the Colorado river in Boulder canyon. Ashurst of Arizona led this filibuster and frustrated all efforts of Johnson of California, author of the bill, to bring it to a vote. As the house steering committee had decided the measure should

not be taken up in the house unless acted on by the senate, it was considered practically dead so far as this congress was concerned.

In its intervals of real work the senate passed the house bill authorizing the veterans' bureau to make loans to veterans on their adjusted service certificates. The house passed the James bill authorizing an appropriation of \$8,491,000 for new barracks at various army posts. President Coolidge signed the radio act and the army appropriation bill.

WHEN Samuel Insull of Chicago appeared before the Reed committee in Washington he answered most of the questions concerning his contributions to the Illinois primary campaign funds, but flatly refused to tell to whom he gave \$40,000 for local political campaigns. Nor would he permit his attorney to reveal this. The public utilities magnate was instructed to return to the committee room at the end of the week, and it was expected that he would persist in his refusal to reply to the question. Then, probably he will be cited for contempt, as will be Thomas W. Cunningham of Philadelphia, who would not reveal the source of \$50,000 he contributed to the Vard-Beldeman fund. State's Attorney Crowe of Chicago avoided citation by answering all questions.

SENATOR LA FOLLETTE of Wisconsin took the occasion of Washington's birthday to introduce in the senate this resolution:

"Resolved, That it is the sense of the senate that the precedent established by Washington and other Presidents of the United States in retiring from Presidential office after their second term, has become, by universal concurrence, a part of our republican system of government, and that any departure from this time-honored custom would be unwise, unpatriotic and fraught with peril to our free institutions."

In the house Representative Fairchild of New York introduced a resolution for amending the federal Constitution so that "no person shall be eligible to the office of President who has previously served two terms, whether by election or by succession due to the removal, death, resignation or inability of the President where the term of succession shall have continued for a period of two years or more."

Under the terms of the La Follette resolution, Mr. Coolidge would be ineligible for re-election next year. Under the Fairchild plan, he would be eligible.

COMMANDER FRANCESCO DI PINEDO of Italy, for the glory of Fascism, flew across the Atlantic ocean last week. He started from the Cape Verde Islands, off the coast of Africa, and flew direct to Fernando Noronha Island, Brazil. He passed on with the intention of making the main land but encountered heavy seas off the coast and was forced to return to the island. After his plane is repaired, Di Pinedo plans to fly to Jamaica, Cuba, New Orleans, St. Louis, Chicago and New York.

FOR two days and nights the North Atlantic seaboard was swept by furious winds and tremendous seas, and before the storm subsided it had taken nearly two score lives. Boats were wrecked, beach structures razed and sea walls smashed. Far out at sea the transatlantic shipping was crippled and the great liners were all many hours late.

COAL operators and miners in conference at Miami failed to agree on a wage scale for the bituminous field. The workers consistently refused to consider a reduction of wages. It is supposed generally that this means a strike on April 1, but authorities assert there will not be a complete cessation of production in the field.

OHIO lost one of her most distinguished sons in the death of Judson Harmon, who passed away unexpectedly in Cincinnati at the age of eighty-one years. Mr. Harmon was twice governor of Ohio, once attorney general of the United States, and several times a prominent possibility for the Democratic Presidential nomination.

## Use New Rays as Aid to Man

### Scientists Employ Them in Radio, Surgery and Many Inventions.

Washington.—The same day's news carried a story from London that ultra-violet rays are making the animals of the zoo more contented, and a story from Camden, New Jersey, that seeds and tubers treated with X-rays produce greater yields. These are additional evidences of the world's debt to rays, many of them little known. A bulletin from the Washington headquarters of the National Geographic society deals further with this subject.

"Rays are not abstractions of physicists or unusual phenomena to be dealt with only in laboratories," says the bulletin. "They are more truly the mainspring of the earth, making life in all its forms possible."

**Make Life Possible.**  
"The sun's rays are the prerequisite for the world as we know it. But for the warmth and light flowing to us through 93,000,000 miles of 'space' the earth would be a lifeless cinder, without vegetation and without even the lowest animate forms. As it is, the rays or waves of heat and light flow to us in a mighty stream, for all practical purposes unending, and in this continual bath of life-giving rays we very truly 'live and move and have our being.'"

**Our essential diet of rays is fresh as well as potent.** Because of the almost inconceivable speed of light and heat waves (186,000 miles per second), the sunbeam which strikes you this instant left its far-away source only eight minutes ago.

**Plants Need Rays.**

"It is not only by warming us di-

rectly and by keeping our seas and streams from being eternally frozen that the sun's rays benefit us. Every good thing that we have, except some of the minerals and ores, can be traced to their beneficent work. The soil upon which our plants live has been washed from the original cheerless lump of ash and stone by the rain which the sun's rays lifted from the seas and cast down on the land.

"Plants which grow in the soil can themselves live only when bathed by sunshine. Plants not only exist because of heat and light waves from the sun, but, fortunately for mankind and the animals, they contrived millions of years ago an ingenious trap for extra energy from the rays which they store away. This trap is a mysterious substance called chlorophyll, the green coloring matter in all soil-growing plant leaves. When the rays strike chlorophyll they manufacture cellulose, starch, and sugars—and on these products the life of the animal world is built. Every plant, then, is in reality a separate factory, operated by waves of energy from a 'power house,' 93,000,000 miles away, through its chlorophyll 'motor.'"

**Each Plant a Factory.**  
"These factories turn out directly various commodities that man must have: vegetables, fruits, and nuts that make up a large part of our diet; cotton, flax and other fibers which contribute largely to our clothing and draperies; the woods which help to build our houses and implements; and many other substances which are necessary in our daily life. Indirectly these 'factories' supply our remaining food and clothing; for our food animals produce our meat from a vegetable diet, and so, too, our wool and silk mohair are the indirect products of the ray-built vegetable world."

"It is not only the rays of the present that contribute to our well being. Sunbeams that millions of years ago built tropical vegetation which was fossilized into coal today warm our houses and turn the wheels of our factories. The rays that left the sun weeks or months or at most years ago are helping us in still another way. They evaporated water from the sea which fell as rain and was stored up behind dams. When this imprisoned water is made to turn dynamos the electricity that comes to us over wires to light our homes and toast our bread is only the beneficent sunbeam in another form."

**Heat and Radio Waves.**

"How we turn heat rays to account is well known. They fly from our radiators to make our homes livable in winter; they cook our food; they produce steam for many of our powerhouses; and in numerous other ways they are harnessed for man's benefit. "Within recent years we have harnessed another group of waves which

Missouri and Kansas Coeds Let Hair Grow

Kansas City, Mo.—Coeds at the University of Kansas, Lawrence, and the University of Missouri, Columbia, seem to be competing in letting the hitherto popular locks grow long again.

Girls at both institutions started to let their hair grow, much to the disgust of tonsorial artists in both towns.

A recent check-up on the Missouri campus revealed that 60 per cent of the girls either had long hair or were "expecting to have in the near future." At Kansas the percentage is slightly larger, and exponents of lengthened tresses are gaining new cohorts daily.

## BERING SEA ICE FLOES BIG AID IN HUNTING THE POLAR BEAR

Hair Seal Is Favorite Food of These Animals and Nature Helps Them in Chase.

St. Michael, Alaska.—Heavy weather, with tremendously large ice floes in Bering sea, promises the natives of Kotzebue sound the most favorable polar-bear hunting in a generation.

A good market exists this year for the fine white polar bear skins, and these arctic nomads are so plentiful a good catch is anticipated. The white King of the Arctic regions is a combined hunter-sailor-hobo. He has no fixed habitat, but goes where food is most plentiful, coming down with the ice pack of the North when seal, walrus and whale move.

Unlike any other animal, the polar bear keeps to the ice and will seek shore only when cut off from open water. It is the best swimmer of the animal world. Loose jointed, ungainly,

and by keeping our seas and streams from being eternally frozen that the sun's rays benefit us. Every good thing that we have, except some of the minerals and ores, can be traced to their beneficent work. The soil upon which our plants live has been washed from the original cheerless lump of ash and stone by the rain which the sun's rays lifted from the seas and cast down on the land.

"Plants which grow in the soil can themselves live only when bathed by sunshine. When this imprisoned water is made to turn dynamos the electricity that comes to us over wires to light our homes and toast our bread is only the beneficent sunbeam in another form."

**Heat and Radio Waves.**

"How we turn heat rays to account is well known. They fly from our radiators to make our homes livable in winter; they cook our food; they produce steam for many of our powerhouses; and in numerous other ways they are harnessed for man's benefit. "Within recent years we have harnessed another group of waves which

before this time, since the beginning of the world, went unused by man. These are the Hertzian or radio waves which now all over the world are carrying their burden of music and the spoken word, and even are transferring photographs. Inventors are seeking to place other burdens on the strong young shoulders of the radio waves and assert that it is only a question of time until they will carry motion pictures and even power which may turn wheels far from the source of energy.

**Unshackling the Ultra-Violet.**

"Even the little known waves, shorter than those of light, are now doing their bit to push man's civilization forward. The ultra-violet ray has for many years played an important part in photography. Now its value in improving human and animal health is being recognized. Ordinary window glass does not permit ultra-violet rays to pass through; so that in reality our windows, made to admit light and warmth, are barriers against one of Nature's chief life-giving forces. Special glasses which permit ultra-violet rays to pass are coming into wider use, especially in hospitals where patients may thus be given the benefit of one more force to help them to health."

"Since its discovery a generation ago, the X-ray has performed innumerable services, chiefly in permitting photographs to be taken of flesh-covered bones and internal organs, and in the direct treatment of certain diseased conditions. But the X-ray is so potent that it can bring harm as well as good, causing tissues to wither away or become infected when exposed too long to the powerful waves. Man has learned to tame this ray, however, and is even finding new uses for it as is indicated by recent experiments which show that seeds exposed to X-rays produce greater yields than those untreated."

**Tiniest Ray Most Penetrating.**  
"One of the rays to become known most recently is the Gamma-ray thrown off by radium. This is in reality a super-X-ray and has found its greatest field in carrying farther the work of its close relative."

"One of the rays to become known most recently is the Gamma-ray thrown off by radium. This is in reality a super-X-ray and has found its greatest field in carrying farther the work of its close relative."

**Real Realism**  
Moscow.—This must be real realism. A brilliant film producer has lost his government job because he was too extravagant with a picture depicting American extravagance.

**Find Stone-Age Village**  
Kuban, Russia.—A large village of the Stone age of prehistoric antiquity has been discovered here. Bones of mastodon and many stone implements were unearthed.

## Menace to Journalism in Commercialism of the Press of the Nation

By DON C. SEITZ, Outlook Editorial Staff.

STRIKING the popular chord has become one of the menaces in journalism. Big interests buy up groups of papers, and they are run according to a formula. Commercialism has come into play by which newspapers are captured and submerged. No woman will buy anything now unless she sees it widely advertised in the papers. This condition does not dominate the paper in morals, but it puts upon its physical side such a load that the intellectual side becomes smaller. The submergence of the daily press and the equal leanness of the cultural press mark a different path.

The press has no means of reaching the vacant mind, unless you make it feel that there is something higher than the baseball score to read, and that the age you live in is always the golden age.

The only real criticism that prevails in America today is that we are too slow. Every precaution has been taken to reduce thinking to its lowest. We have become a nation of button pushers, and we forget that under all this convenience is a vast servitude. The public relies upon the clergyman, the teacher and the editor to do the thinking it won't do. The editor has the most difficult tasks in some respects. He has to coax subscribers, entertain them by all kinds of things, and he does this frequently in the dark. The cultural publication has to reach a public widely scattered, but it is the saving grace in the making of American journalism.

## Too Many Seem to Have Lost Sense of Their Relationship to God

By REV. RALPH W. SOCKMAN, Methodist Episcopal.

Too many persons are spiritual orphans. Our sense of relationship to God is like that of a lad whose parents had died before the boy was old enough to know them. The orphan knows from pictures on his wall and the accounts which he has heard that his parents had lived, but he has not the joy of their companionship.

Likewise, many people believe that there was a God who created the universe and that there was a Jesus who lived in Galilee, but they have no feeling of personal relationship.

To such persons Christmas is a second-hand affair, like the impersonal festivity arranged for orphan children by some institution.

The spontaneous joy and personal devotion which characterized apostolic religion are missing in so many of our churches today. Just as the adult goes through the same motions, but not the same emotions as does the child at the appearance of that bewhiskered gen<sup>o</sup>man called Santa Claus, so the modern churchman goes through the same motions, but not the same emotions as did the First-century follower of Christ.

Formalized and organized religion has lost so much of its lilt and thrill. It is as if we had kept the words of the Hallelujah chorus without the music.

## First Five Years of Life Really Determine Mental Condition of the Adult

By PROF. ARNOLD GESELL, Director Yale Psycho-Clinic.

The first five years of a child's life have more weight in determining the mental condition of the adult than any equal length of time from the age of five to twenty-four.

By making extensive studies of a number of children from the age of one month to five years, and discovering what most children are able to do at a given age, it will be possible to lay down rules as to what a normal child's reaction is.

When we have established these rules, we will be able, by testing children in the light of them, to discover whether or not a child is normal, subnormal or above normal.

It is our hope to gather a great deal of knowledge of child life and to apply it in remedying the children who need special training during the very early years of their lives. It is then that they are more plastic. We do not believe that all the mental weaknesses of later life are predestined. We believe that they are, to some extent at least, plastic; that it is largely a matter of proper regulation and habit formation in the pre-school period.

## Nation Must Have Better Parents Before It Can Have Better Children

By L. A. PECHSTEIN, Dean of University of Cincinnati.

We shall have better children when we are better parents. Human nature changes not and all education is as water passing through a sieve so far as nature's biological mandate is concerned.

The tangible things of our evolving civilization, such as industry, custom, literature, law, home, invention, et al, change, and in adjusting to these, youth seems different.

Society's major institutions for shaping character have been first, the home, second, that of work. Formerly tied together, now hopelessly separated, a void is created which literally cannot be filled.

If a home is always a place where the companions of one's children are welcome; if it exists for their wholesome enjoyment; if parents can enter into the group sports and activities with a pleasure belying their years; if they seek ways of keeping their children unsophisticated as long as possible so that all the thrills of life may not become exhausted while the juvenile still exists, then energies, which will out, become directed into channels worthy of approval.

## Apathy of Public Opinion Over Crime Conditions Must Be Overcome

By NEWTON D. BAKER, Ex-Secretary of War.

Less maudlin sympathy by the public for criminals and more sympathy with law enforcement are needed to control crime conditions. To day, instead of making the world safe for democracy, we must make our cities safe to live in. To do this we must organize public opinion to overcome apathy for crime conditions and the maudlin sympathy displayed for the criminal.

There must be more sympathy for the victim of the criminal, for the police, the prosecutor and the judge who bend their efforts to bring him to justice.

Crime in this country can be curbed only when there is adequate legislation by all states and the federal government to regulate the sale and distribution of all firearms.

## Normal Waistline Slowly Returning

Divides Silhouette into Two Units Once More—Dolman Outline.

There is one sharp distinction between the slender silhouette as it shall be practiced this spring and the slim outline which was in vogue several years ago—in the older versions the slender contour was completely uninterrupted; in the modern interpretation there is to be a clearly marked waistline placed at the normal sphere or just below it. This tendency to raise and mark the waistline, observes a fashion writer in the New York Herald-Tribune, is one which has been going on for several years. Since feminine styles have been gradually returning to favor the waistline has not only become more pronounced but has been gradually and certainly ascending. Despite occasional mid-season rebuffs its progress has been satisfactory and the prognosis of the mode is that during the coming season it will occupy a normal or nearly normal line and, while it may not disturb the silhouette as it did in the days of waspish waists. It is nevertheless to be uncompromisingly marked.

The matter of the waistline being decided, it becomes evident that emphasizing it divides the silhouette in two units once more, bodice and skirt. You will recollect the once modish mold-and-flare outline. It consisted of a close-fitting bodice and a skirt which was full all the way and terminated in a hem-line flare. Despite the eclipse of the flare and the passing of the molded bodice, the spring season's smart outline may be again referred to as the mold-and-flare. Only this season it is the skirt that is molded while the bodice is full. The general effect is that of a dolman outline. The bodice fullness is principally arrived at by means of bloused treatments, although not infrequently the chic bolero effect of last season is resorted to. This bolero, incidentally, as well as an emphasis upon multiple

Afternoon Gown, Black Crepe Georgette, Emphasizing Natural Waistline.

belts, is one of the approved manners of stressing the high waistline. Box and side plaits, as well as occasional flat tiers, will be Paris features on the new spring skirts, but they will always be sufficiently delicate to maintain the semi-conforming outline of the skirt.

Spring's color list, like the flowers of the early months, are pale and delicate—again pastel tones for sports and daytime wear. Gray is one of the leaders in pearl and silver, basically speaking, and from those two points one may radiate widely in the allies of these shades. Palest green, like the wing of a dragon fly, is another important color, and banana, such as Premet shows, is important along with pinks. Porcelain blue is prominent in the blue list. Champagne and duck greens are to be noted and periwinkle creeps in.

## Smart Gowns Aglitter With Gold and Silver

Nothing is considered too glittering this season, and thus the gown combined of gold and silver lame is not deemed too blatant. One such gown combines a silver lame bodice of long-waisted lines with slender sleeves and a silver lame skirt adorned with four plaited and scalloped panels of gold lame. The neckline of this gown is cut square in front and slightly rounded at the back. A flat gridle of silver extends about the waistline.

## Handmade Dresses From Paris

Among the newest frocks from Paris are one-piece models made entirely by hand. Hand-pressed plaits, fine tucks, drawn-work and embroidery done in infinitesimal stitches are effective methods of decoration which contribute to the general effect of exquisite

## Flattering Styling in the New Tubable Frocks

It is characteristic of the new wash-goods modes for spring that they be endowed with the airs and graces which usually feature the more pretentious silks and woolsens. This season's tubable frocks for morning and porch wear express outstanding modishness. It is the cunning peplum made of a wide bias fold of the material which imparts "style" to this dainty frock in the picture. The new rayon and cotton mixtures are lovely in coloring and design. They launder exquisitely. The silken sheen of the rayon seems to grow more lustrous with each tubbing.

## Paris Fashion Notes of Interest to Women

Fashion notes from Paris as reported in the Fashionable Dress Magazine read:

One might say of the color scheme black and reds lead, with black and white showing a keen disposition to overtake them.

The double waistline, especially as Jenny defines it, is much seen. This is oftenest just two belts a few inches apart.

There is a new fashion of running a little tie, not more than a shoestring, across an open neck at the base of the throat.

Yokes are really tremendously important. From simple sports dress to elaborate evening gown, the yoke runs the gamut in its individual way.

Skirts do not become fuller around the hip, only at the hem and they do not lengthen perceptibly.

Perhaps the fun plaiting is to succeed the kick plait.

## How Skins Are Used in Coats for Sports Wear

It is not alone the fact that fur coats are much more luxurious and infinitely smarter than they have ever been or that skins never before used for feminine attire are employed in the fashioning of their wraps, that attracts the attention. More than a little interest is attached to the clever and ingenious way in which the skins are put together.

One sees this even in the less expensive coats made of fur suitable for sports wear, and it is more pronounced in wraps which are in the luxury class.

## Belts and Necklines Coming to the Front

Belts and necklines are again coming to the front. For a time dresses seemed to be one straight piece, but now the narrow belt is the thing. It is worn rather snug at the hip and gives a slight hoose effect to what Paris terms a "neut" frock.

A square neck in front and a tab yoke in back is the newest of the new concerning the neckline.

The jacket blouse with a narrow belt is the latest thing for sports wear.

## Tailored Suit Always Included in Wardrobe

In a season when the fur-trimmed coat or suit is universally worn, a model which depends entirely upon its material and line for chic is of more than passing interest. Every woman who makes any pretense to keeping up with the mode always includes in her wardrobe the suit of tailored aspect. In some cases it is so cleverly cut and so unobtrusive in its details that even in the second year it does not seem out of style.

## Elbows Fashionable

Elbows are again fashionable. A considerable number of new coats have buttoned elbows and the attention given the elbow trimmings by dress designers, in all sorts of garments, is a leading point of the latest fashions.

## Know Your Sweetheart by His Handwriting

By EDNA PURDY WALSH  
Editor, Character Reading Magazine.

(Copyright.)

Is He Sarcastic?

*promptly and the*

The ability to sting with the tongue for mere love of taunting is seen in writing that is exceptionally angular and has such pronounced keys as y and f loops pointed—wasp-like.

T bars will also have a sharp point to the right. When such point is seen in writing that has many rounded letters it means simply that the writer is easily discouraged and loses interest in things readily.

T bars that point down at the right and top-roots, parts of the letters that run down toward the line below, both indicate the sarcastic writer.

Extremely heavy lines in the writing are signs of temper, and, of course, when temper rules, we must expect to find a sharp cutting tongue.

Then the t bar that is pointed both at the beginning and end with a slight curve toward the top of the page, like an inverted bowl, tells of a writer who is unappreciative of others and hurts them without thought.

Terminals that turn down or back underneath are accurate signs of the person who hurts others easily.

Is He Fond of Travel?

*I'm a  
I'll go  
for you*

When an indication of motion is to be found in the writing we find then that the writer is a natural-born traveler. T bars will go on toward the right of the page with considerable pressure. Terminals will flow in the same direction. Writing will also lean toward the direction of travel.

The lower part of the capital I will have a long base resembling a boat, which means that the writer will bring his boat along with him so that he can travel.

I dots flying off to the right or missing entirely and dashes between words both speak of action and movement, a desire to go on.

When letters are well-rounded, you may deduce that they could not have been made in a hurry. This type of writer is content to go easy and not very far. Therefore the opposite to this, a writing that flows on to such a degree that the letters are misshapen, indicates a person who is constantly on the go—at least subconsciously.

Writing made up of letters of various sizes shows nerve energy, and when this is manifest we have the restless writer who is always on the go.

Is He Tenacious?

*lets turn*

Has he the bulldog grip? Has he this grip on the purpose of life or some fancy a bulldog grip on him? Tenacity of purpose is a rare quality. Often some people are tenacious when they should not be and not enough so when they should be. Then they are called stubborn.

If you would know a writer's mental attitude on this subject without engaging him in argument, simply look for the t bar hook. If you find that at the end of a dash, t bar or terminal he makes a little hook, similar to a fish-hook, the conclusion may be safely recorded that this writer hangs on to his own ideas with a grip that is almost furious. If this writer could get a grip on his life work as he has on some of his pet hobbies or theories, he would be a winner.

If the lower loop of the letter f is brought up to its finish on the left-hand side of the down stroke, the writer has little tenacity and is easily influenced—especially when under emotional strain. Heavy down strokes also indicate tenacity.

Note—Do not make final judgment until other signs in writing are studied.

Supreme in Size

The largest city in the world is London (Greater) with a population of 7,470,168. The Nile river, in Africa, is 4,000 miles in length; the Amazon, in South America, is 3,900 miles, and the Mississippi river, in the United States, connects with the Mississippi 20 miles above St. Louis, and its total length from source to the Gulf of Mexico is 4,221 miles.

Dr. Williams

De reason some folks don't act wise is kaze wisdom don't stay wid 'em long 'nuff ter git good acquainted.—Atlanta Constitution.

## BABIES CRY FOR "CASTORIA"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

Wm. H. Fletcher

## Congressional Pairing

The first known instance of pairing in the congress of the United States was in 1840. John Quincy Adams prepared a resolution declaring that it violated the Constitution, an express rule of the house and the duties of both parties. The resolution was never voted upon and the practice became very common.

## "DANDELION BUTTER COLOR"

A harmless vegetable butter color used by millions for 50 years. Drug stores and general stores sell bottles of "Dandelion" for 35 cents—Adv.

## His Wife His Guardian

Because James A. Merron, twenty, of Brooklyn, N. Y., lacks one year of his majority, Supreme Court Justice Dunne has appointed his wife, Mrs. Mae Merron, twenty-one, as his legal guardian to bring an action for him to recover damages for injuries he suffered through being run down by an automobile.

## Sure Relief

## SKIN IRRITATIONS

For their immediate relief and healing doctors prescribe

## Resinol

Keep it handy for burns, cuts, sores, wounds, bruises, chapped and cracked skin, boils, piles and fains. A good local application to relieve a cold on the chest, cramp, lumbago, varicose veins and eczema. Made with lanoline (pure wool fat) combined with anti-septic, healing, pain-relieving drugs. The Geo. H. Keadle Co., Meran, O., since 1871.

## Versailles in Danger

The palace of Versailles, one of the greatest historic treasures of France, is threatened with destruction by the ravages of a small kind of woodstool, which is eating away the woodwork. Since 1922 the palace has been under observation, and it has been found that practically the whole of the woodwork is being turned into a powdery dust. Repairs begun in 1925 have cost \$500,000, and much more will have to be spent to save the rest of the building from destruction.

## About Jan. 3d.

## The World's Most Powerful Sedan of It's Size and Weight and the Safest Now \$1335

To prove the ability of this Studebaker Custom Sedan, get behind the wheel yourself. Feel the power of its quiet L-head motor--most powerful in any car of its size and weight in the world. See how slowly you can idle along in high, how smoothly it accelerates, how easily it shoots through traffic, soars up steep hill and speeds arrowswift down the free stretches.

### Luxury for Your Wife

Then turn the wheel over to your wife. Let her learn what restful driving really means--the pleasure that comes from the finger tip response in steering--the ease of gear shifting--the feather light pressure on the positive-acting 4 wheel brakes. And she will like the complete custom luxury of its richly

upholstered, roomy interior.

### Fused Steel Assures Safety

This smart-looking Studebaker steel body saves gasoline and tires because it's lighter than wood--safer because it permits wider visibility than wood--also because it has been fused by electricity into a practically indestructible unit of steel-welded, not riveted--and longer-lived because steel wears while wood wears out.

### A One-Profite Price

At its new low price, 1335-- including over \$100 worth of extra equipment--this Studebaker Custom Sedan shatters all former standards of motor car value, thanks to the One-Profite manufacture! See it--drive it--now.

**Charles J. Hoff**  
HOWELL, MICH.

### NEIGHBORING NEWS

Nicholas Walsh, aged 81 years, a resident of Webster township, died at St. Joseph's Hospital, Ann Arbor on March 2.

The Dexter Chamber of Commerce hold a banquet soon which will be the opening of their membership drive. They will also endeavor to raise funds for the erection of a civic center.

The Dexter waterworks tank is nearly completed. It has a height of 60 ft. and a capacity of 75,000 gallons.

Orton Bush of Howell has started a lumber yard at Brighton.

Game Warden A. C. Wilkinson of South Lyon has been appointed District Warden of the State Dept. of Conservation. He has charge of 8 counties--Livingston, Ingham, Shiawassee, Genesee, Gratiot, Clinton, Ionia, Montcalm.

Over 60 cottages at Lake Orion were broken into and robbed in two weeks.

The South Lyon Board of Commerce held their annual election of officers and banquet last Friday evening.

Charles G. Jewett, former Howell business man died at Chicago Feb. 25. The burial was at Howell.

Bill Cooper has sold his restaurant at Howell to John Hildebrand and started to get in shape for the baseball season.

Contracts have been let for the new school building at Grass Lake. It will cost \$2,000.

### CHICK STARTNA

When your baby chicks are hatched let us furnish you their feed. You save 90 cts of your chicks and get the growth of grain fed chicks in the first six weeks. Don't take chances on unknown quality feeds when you can get from us the most nearly perfect ration available.

### Remedy for Myopia

Myopia, or short-sightedness, is a condition in which the rays from a distance are focused in front of the retina of the eye, which results in the image being blurred. Such an eye is permanently focused for near objects, but may be corrected by the wearing of concave lenses which diverge the rays and in this way prevent their coming to a focus too soon.

### MORTGAGE SALE

Default having been made in the conditions of a certain mortgage, dated February 21, 1921, executed by George R. Lewis and Nellie G. Lewis, his wife, of the city of St. Louis, Missouri, mortgagors unto Minnie A. Purdy of Fowlerville, Livingston County, Michigan, mortgagee, which said mortgage was recorded in the office of register of deeds for Livingston County, Michigan, in Liber 118 at page 84, and

WHEREAS, the full amount of the principal and interest having been due and remaining unpaid since February 21, 1926, and

WHEREAS, the amount due at the date hereof is the sum of four thousand one hundred sixty-three dollars and eighty-six cents (\$4163.86) principal and interest, and the sum of fifty (\$50.00) dollars as an attorney fee stipulated in said mortgage, and no suit or proceeding having been instituted at law or in equity to recover said debt, or any part thereof, and

WHEREAS, by reason of said default the power of sale contained in said mortgage has become operative.

NOW THEREFORE, notice is hereby given that by virtue of said power of sale and in pursuance of the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises therein described, at public auction to the highest bidder at the west front door of the Court House in the City of Howell, Michigan, on the 31st day of March 1927, at ten o'clock in the forenoon of said day.

The premises are described in said mortgage as follows: Land situated in the Township of Conway, County of Livingston, State of Michigan, described as the Northwest twenty-six (26) Township number four (4) North of Range number three (3) East, Michigan.

Minnie A. Purdy, Mortgagee. Dated December 17, 1926. J. B. Munsell Jr. and A. E. Cole Attorneys for mortgagee. Business address Fowlerville, Mich.

### Harmfulness of Fear

Human fear is unnatural, writes Edward Marie Pariston in *Nature's Path*. Anything unnatural is unwise and unsafe.

Fear is falsehood. We do not entertain it unless some one has lied to us, or we have lied to ourselves. The truest people are always the most fearless. In this fact is the primary lesson for those tormented by fear.

No link on earth equals the bogeyman created by fear. He makes us look for the worst in what may prove the best, and invites all sorts of ill on ourselves by our stilly, cowardly, weak and foolish state of mind. What we fear we fasten on ourselves, by the law of psycho-mental attraction.

### "Gadsooks," Indian Oath

A Hyatt Verill, a collector for the Museum of American Indians, has discovered that "gadsooks," supposed an oath of the good old Elizabethan days in England, is used commonly by the Panama Indians. The reason is that the oath was carried to the tribe by the English expedition known as Bartholomew Sharp's buccaners, in 1600. This expedition left also a number of other English words that have been appropriated and corrupted by the Panama tribes which came into contact with the newcomers at the time.

**FATHER KREBS, THUMB MISSIONARY, BURIED**

Beloved Priest Founded Parishes in Many Michigan Towns

Nearly 100 priests from Detroit and the surrounding district gathered in St. Peter & Paul's Cathedral, recently, to pay their final respects to the Rev. Fr. Clements T. B. Krebs, veteran missionary of the Thumb territory, who died following an illness of several weeks.

The Rt. Rev. Joseph C. Flanagan, D. D., auxiliary Bishop of Detroit, pontificated the funeral Mass and the sermon was delivered by the Rt. Rev. Msgr. Francis J. Van Antwerp, V. G., whose friendship with the late missionary extended over a period of a century. Fr. Krebs founded parishes at Gageton, Port Huron, Reese, Imlay City, North Branch, Clifford, Bad Axe, Uby, Caseville, Sheridan and Pigeon.

He was born in Westphalia, Germany, in 1851. In 1879 he was ordained, at Sandwich, Ont., by the late Bishop Borgess and for 35 years braved the dangers and discomforts of the then sparsely settled Thumb district. Other services were also held at St. Agatha's church, Gageton, and the interment was made at Gageton, the scene of Father Krebs' first labors as a priest.

**PETOSKEY BUILDS FINE NEW PAROCHIAL SCHOOL**

Brick and Stone Fireproof Structure to Cost \$82,000

A contract for the new \$82,000 St. Francis parochial school building, at Petoskey, Mich., to replace the present frame structure, was awarded recently. Work on the new building will start immediately according to an announcement by the Rev. John Curry, pastor, and it will be ready for occupancy by next autumn.

The new school will be of the most modern brick and stone fireproof construction throughout. Eight class rooms, assembly room, cloak rooms, dining room, a gymnasium and a room and kitchen for the teaching Sisters have all been provided for. For the past two years, members of the congregation have been working on a financing plan for the new school and it is hoped to have the obligation well in hand by the time the building is completed.

The present building will be razed and the new structure erected on its site. The new school will accommodate about 300 pupils.

Plans for a \$60,000 parish convent home to be built by St. James Parish, Ferndale, were recently announced. According to the Rev. Fr. James O'Brien, pastor, the convent will be of modern brick and stone fireproof construction throughout and will accommodate the 24 Nuns who are teachers in the parochial school.

**Making Sure**

A certain financier is a great believer in punctuality, and on a recent occasion, when an early conference was in prospect, which he had to come to town to attend, he so impressed a page boy with the importance of calling him early that the lad decided separate measures were needed.

Hence, at an unearthly hour there came a prodigious hammering on the financier's bedroom door and a voice called loudly:

"Parcel for you, sir!"

Wondering what the parcel could be the financier took it in and, seated at the edge of his bed, unwrapped it. Imagine his indignation upon reading the neatly printed placard it contained: "Nearly time to get up."

**Use for Ill Nature**

Though I carry always some ill nature about me, yet it is, I hope, more than is in this world necessary for a preservative.—Marvell

**LOCAL NEWS**

Mrs. Fred Carpenter of Pontiac visited Mrs. Claude Reassa Tuesday.

Rev. Dupuydt of Brighton was a Pinckney caller Monday evening.

**PLAINFIELD**

Ellen Wasson was home from Howell for the week end with her parents, Mr. and Mrs. H. A. Wasson.

James Walker who has been visiting his son, Chas. in Fresno, California, returned home Thursday.

Dr. Braley and little daughters of Highland Park were Sunday callers at the home of E. N. Braley.

The W. F. M. S. of the M. P. church held a meeting at the Braley home Wednesday afternoon with Mrs. Braley and Mrs. Florence Dutton as hostesses. A program was given followed by a supper.

Mr. and Mrs. S. G. Topping, Mr. and Mrs. E. L. Topping, Mrs. J. Emerson Kinsey and Norman Topping were in Pinckney Tuesday afternoon to attend the funeral of H. W. Crofoot.

Harry Wiley and family of Milan were Saturday night guests at the home of Frank Lidgard.

Art. Watterhouse now occupies the Jacobs house next to the Maccabee hall.

Norman Topping was at the home of his parents, Mr. and Mrs. E. L. Topping Sunday for his birthday dinner and had as guests: Ward Hutton, J. Emerson Kinsey and Mrs. Kinsey and two little daughters.

Mr. and Mrs. Keith Hughes of Chelsea spent part of last week at the Lidgard home.

Rev. Clark is doing some carpenter work for A. L. Dutton in the house recently purchased by him and James Higgins of Gregory is also busy there with interior decorating.

Ferris Caskey who has been having a mild case of scarlet fever is now a chicken pox patient.

**The Humble Thimble**

Thimbles are said to have been found in the ruins of the Latin city of Herculaneum, buried by the eruption of Vesuvius that destroyed Pompeii 79 A. D. Thimbles were made in Amsterdam, Holland, in the seventeenth century by Nicolas van Benachoten. The art of making them was carried to England by John Lofting a mechanic from Holland, about the year 1685. His first manufactory was at Letchworth.

**Israelitish Theocracy**

Theocracy, meaning a direct government of a people by God, existed among the Israelites from the time of their going out of Egypt until Saul was made king about the year 1050 B. C. Saul was the only king of his line. The throne passed to David.

**MORTGAGE SALE**

Default having been made in the conditions of a certain mortgage whereby the power therein conferred to sell has become operative, made by The Keystone Realty Company, a Corporation of Detroit, Michigan, to Carl F. Bollinger, dated October 8, 1925 and recorded in the office of the Register of Deeds for the County of Livingston, State of Michigan, April 22, 1926 in Liber 108 of Mortgages at page 422 thereof, upon which mortgage there is claimed to be due at the date of this notice the sum of Ten Hundred Seventy-one Dollars and Thirty-three Cents (\$1071.33) and no suit or proceedings at law having been instituted to recover the said debt now remaining secured by said mortgage or any part thereof, notice is therefore hereby given that on Friday the eleventh day of March, A. D., 1927 at ten o'clock in the forenoon of said day, Eastern Standard time, at the west front door of the Court House in the City of Howell County of Livingston, State of Michigan, (that being the place of holding the Circuit Court in the County in which the mortgaged premises to be sold are situated, the said mortgage will be foreclosed by sale at public vendue to the highest bidder of the premises contained in said mortgage or so much thereof as may be necessary to satisfy the amount due with interest and legal costs including an attorney fee of Thirty-five (\$35) that is to say all that certain piece or parcel of land situated and being in the Township of Putnam, Livingston County, Michigan described as follows, to-wit:

Lot number eighty-five (85) of Lakewoods Subdivision Number one (1) of a part of the northeast quarter of the southeast quarter of Section number thirty-six (36), Town one (1) North of Range three (3) east, Michigan and the northwest quarter of the southwest fractional (1/4) of Section number one (1), Town one (1) North of Range four (4) east, Michigan.  
Carl F. Bollinger, Mortgagee.

Howell, Mich. 12-3-26

**STATE OF MICHIGAN**

The Probate Court for the County of Livingston.

At a session of said Court held at the Probate Office in the City of Howell in said County, on the 12th day of February, A. D. 1927.

Present, Hon. Joseph H. Collins, Presiding Judge of Probate.

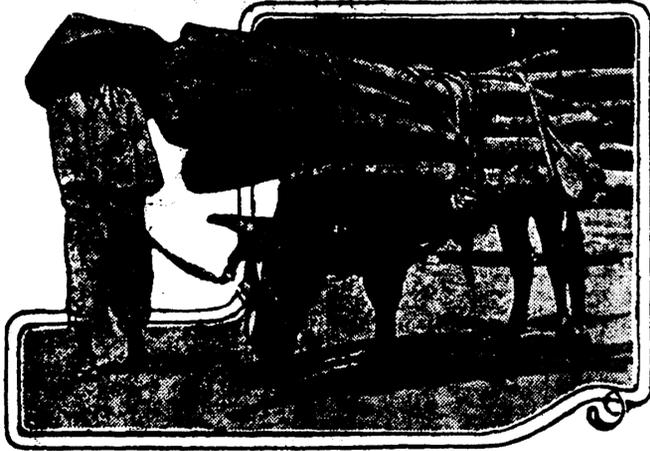

In the Matter of the Estate of Mary F. Read, Deceased.

It appearing to the court that the time for presentation of claims against said estate should be limited, and that a time and place be appointed to receive, examine and adjust all claims and demands against said deceased by and before said court:

It is Ordered That creditors of said deceased are required to present their claims to said court at said Probate Office on or before the 20th day of June A. D. 1927, at ten o'clock in the forenoon, said time and place being hereby appointed for the examination and adjustment of all claims and demands against said deceased.

It is Further Ordered. That public notice thereof be given by publication of a copy of this order for three

# Sights In COREA

Corean Peasant With Laden Bullock.

(Prepared by the National Geographic Society, Washington, D. C.)

THE recent death of the former emperor of Korea, who had lived since 1910 as a ward of the Japanese government, severs the last tie that connected Chosen, province of Japan, with Korea, one-time independent kingdom and empire. The names, however, do not tell the whole story. "Chosen" is the older name, and by it the kingdom was known many hundreds of years ago. The empire, which dated from 1897, existed entirely under the name "Korea," and this, too, had been applied to the kingdom since it had had contacts with the Western world. To the Japanese the country is now "Chosen," but the inhabitants have made a sort of patriotic issue out of the names and like the people of the West, usually employ the name "Korea."

Due to the incessant activity of the Japanese since 1910, in business, public works, and governmental development, Korea has changed in many ways in outward appearance. But a population of 20,000,000 does not have its ways changed in a day; so behind the railways, telegraphs and power houses, the vast mass of the Koreans continue to live the lives of their fathers.

Since Korea is so full of unusual scenes and strange customs it attracts many of the tourists who find themselves in that part of the world. One of the commonest routes into the country is from Japan across the Korea or Chosen strait to Fusan.

The long dock at which one's steamer lands at Fusan will be found alive with people, most of them coolies, in white clothing and with long hair in an untidy coil, worn on top of their heads, waiting to transfer baggage to the railway station. This is done by means of peculiar racks carried on the back, in which not only baggage is borne, but every conceivable thing, even to live animals. Were the tourist to journey to Fusan alone, he would feel amply rewarded for visiting this gateway city, even if the crossing proved as rough as is sometimes experienced.

## Corea Really an Island.

Before visiting the points of interest in Seoul, which is the seat of government, let us consider briefly some facts pertaining to Corea as a country. Corea, although classed as a peninsula, is in ultimate analysis an island, 175 miles of its northern boundary being the River Yalu and the remainder of the River Turnen, both of which are outlets of the same lake in the Northern mountains, the former flowing west and the latter east. The dimensions of Corea are about 135 by 600 miles, with an area, including its numerous small islands, of about 100,000 square miles—not far from the size of New York and Pennsylvania. The arable land comprises only about one-quarter of its surface, a range of exceedingly barren mountains and scantily clad hills extending its entire length. Its population is a little under 20,000,000 or slightly in excess of 200 to each square mile. As a comparison, the density of English population is 500; Japanese, 284; German, 250, and the United States, 21.

Raising of rice is the chief occupation of the people, although Corea is said to be the fifth largest cotton-producing country in the world. In customs and looks the people resemble the Japanese in some ways, and although they have many noticeable peculiarities, laziness, as some writers have charged, is not one of them. Many varieties of fruit thrive and the country is rich in coal and nearly all mineral products.

White clothing is the emblem of mourning in Corea, as it is in Japan and China; the mourning period is three years. The distinguishing feature in the clothing of the male Korean mourner is the material, which is unbleached linen or sackcloth bound at the waist with a rope girdle for the

loss of a father, or one made of strips of cloth for a mother. In his hands the mourner holds a sackcloth screen about one foot square with which to hide his face when passing along the street. The mourning hat, while enormous, must be much more comfortable than the everyday fly-trap sort. It consists of a creation of straw and bamboo, shaped like a wooden chopping bowl, the edge of the rim being a coarse scallop.

The conventional clothing of the Korean gentleman is more striking than comfortable. The foot is crowded into a cloth stocking not the shape of the member it is designed to fit, but, like the shoe, narrow at the toe and turned up to a point similar to a clown's foot covering. The dry-weather shoes, of coarse black cloth, low as slippers, their snug fit being depended upon to hold them in place, were found extremely uncomfortable.

The trousers consist of a pair of pillow-cases having a wide waistband, not too uncomfortable in warm weather were there some other arrangements for holding them in place less confining than the narrow braid which is used as a belt. The padded waist is covered with a green silk waistcoat, the long unlined overgarment being of thin, gauzelike material, almost transparent, in a delicate blue, reaching below the knees. From the belt on the left side are hung two cases, one containing a small knife and a pair of chop-sticks, the other a pair of grotesque spectacles of smoked glass the size of silver dollars, set in a clumsy bone frame. On the right hang bags for money and tobacco. All of these cases are embroidered in bright colors.

In the hand is carried a plain fan, while the outfit is crowned by an absurd little pill-box hat, which is perched on a tightly coiled queue and tied under the chin with a plain black tape, supplemented in the case of men of wealth or distinction by a chain constructed of two-inch pieces of the smallest-sized bamboo separated by amber beads, hanging from either side of the hat under the chin and thence to the waist. The rim of the hat is of fine bamboo, while the upright part is of horsehair, so loosely braided as to expose the hair of the wearer to view. For rainy weather they have as a covering for the hat, a peculiar round, helmet-shaped oil-paper, pointed at the top, which is drawn on and tied under the chin. When not in use this covering is folded in plaits like a fan and carried in the folds of the waistcoat. The clothing of the more wealthy Korean is of the same cut, but differs from the above simply in cost of the material.

## Garb of the Women.

The dress of the laboring class of women consists of a jacket or waist which extends about three inches below the armpits, while the skirt has only a tightly drawn band, thus exposing to view several inches of dark-brown skin between the waist and skirt-band. But women of the middle class never appear on the street without wearing a white skirt over the head and face in such a manner as to enable them to see their way without exposing even their faces to view, while others wear a green or red long-coat, hung in the same way and reaching to the knees; this garment, although having sleeves, is only worn as a veil. The higher class women seldom appear on the street except with the seclusion of the closely curtained chair borne by coolies.

In place of the street covering for the head, some of the reformers carry open umbrellas both in daylight and darkness, not as a protection from rain, but as a screen from the gaze of the men. This seems rather amusing, since the purpose for which men carry fans is said to be to protect them from the eyes of the women. In their home life the women wear very bright, solid colors, without regard for harmony, waist, skirt, silk purse and other ornaments being all at variance.

## IT WAS ALL FOR OLGA

By J. R. McCARTHY

(© 1924, Western Newspaper Union.)

THE morning that Olga Southern stepped into the polished rooms occupied by the Wike Office Supply company was a little epoch all by itself. Some people might have said it was because the sun was brighter that day, the sky bluer, business better and the office cheerier. But Jack Neff, the star salesman, knew better. He knew it was all because of that glorious hair, like chestnuts browned by frost. The brightness of Olga Southern's clear-carved little face had something to do with it, too, perhaps; and the way she held her wise little head—just a trifle higher than anybody else's.

For Olga Southern, the new secretary to Mr. Wike, the chief, was distinctly a personage. And Jack Neff, who was star salesman because he was not readily smitten by anything except work, fell like a brick house in an earthquake. Jack, you should know, was too big and solid to be likened to anything but a house, and the entrance of Olga Southern was too startling and exciting an event to suggest anything less astounding than an earthquake.

Jack demanded and secured an immediate introduction, but a fine lot of good that introduction brought him! When he returned to the office in the evening, Jack went smugly about the task of completing his conquest.

"Good evening, Miss Southern! My car is outside. Will you let me drive you—"

"I am not accustomed to being driven. Let's see, your business is—?"

Jack was properly put in his place. "Excuse me, Miss Southern. My business is selling office supplies for this illustrious company. At your service. And," this very seriously, "I'll try to make no more errors."

That won him a smile. Not an unbending smile, it must be admitted, but quite enough to make the whole of Jack's husky frame tingle. A good enough sales record for one day, he figured, as he dragged himself away.

But Jack's sales record with the charming Olga didn't improve at all at the days passed. A word now and then, a smile at rare intervals; just enough to make the big fellow as nervous and impatient as a schoolboy. It did not make him feel any better, either, when he found that the dapper, pomaded office manager, Simon Roller, was boasting of having taken the cool beauty out to lunch.

This last was really a good deal of a blow. Jack had as healthy a contempt for a ladies' man as he had respect for women. What on earth did Miss Southern mean, letting herself be seen with a fellow like Simon Roller? Jack couldn't understand it. Must have been accidental, he decided. No girl like Miss Southern would deliberately go out with that rat, Roller. So Jack held determinedly to his opinion of the new secretary, and to his assaults upon the citadel of her favor.

Persistence had its reward. One Saturday afternoon the cool Olga said, "Now, I'm free. I'll play. I love tennis."

She was a little whirlwind, too, on the other side of the net. Nothing cold about her playing, at any rate. If she should ever go in for a fellow as she went in for a game, that fellow would be in luck. Jack, driving Olga home, was more determined than ever to "beat that fellow."

Monday morning she smiled at him, actually smiled and said "Good morning" first. Jack walked on the wind. Even the fact that she likewise smiled at and "good-morninged" the pomaded Simon Roller did not lessen his delight.

At three o'clock Monday afternoon Jack, having made his calls in record time, returned to the office. Just as he approached the building a roadster drew up. Mr. Wike, the chief; nothing unusual about that. But Mr. Wike, in tweeds, got out, held open the door, and Miss Olga Southern, sailing across the pavement, stepped in.

"I'm ready for nineteen holes," Jack heard her say. And he heard Mr. Wike laugh out a boisterous "Fine!"

The roadster sped away. Lifelessly, Jack let the elevator lift him to the polished rooms of the Wike Office Supply company. There he found a minor confusion. Some one had seen the departure, and noted Mr. Wike's toga, from a front window.

"Miss Southern going to play golf with the boss!" came an excited whisper.

What would the jealous Mrs. Wike think of that? came another.

Jack Neff, star salesman, paid no attention to the whispers. He stalked to his desk and sat there for half an hour. His broad shoulders humped. When he noticed the office manager, Simon Roller, examining him with

sharp, quick blue even Roller. The whom he high clear halfway Roller, b into the ing with By Tu mere the Southern answered Then ha Return was sun presence into the Southern mer-furr coldly.

"What this?" holding Jack Wike— tary, M this af As no is likely necessa J. M. a Jack's His han "Well? "Well, "Isn't t "It is."

All but the face thing at I'd write a letter for m is no place for m

Wike's hand was on his star salesman's shoulder in an instant. "Of course I didn't think it, and don't think it. I have my suspicions. But this thing's got to be cleared up with my wife. And it's up to you. You'll come up tonight, won't you, for dinner? Tell her it's a joke. Anything. You know how Mrs. Wike is! You'll come, won't you?"

There was nothing to do but promise. As Jack returned to his desk he heard the office boy tell a stenographer, "Miss Southern's fired! Somebody wrote a letter to the boss' wife." Well, it was a good thing, Jack thought. If he didn't have to see that chestnut-haired witch every day he'd have an easier time getting back to normal. And no more girls for him—never again! He turned to Simon Roller's desk. Might as well have it out with that rat. But the rat was not to be seen. Desk clear, as though for the night. Had Roller gone out with Miss Southern? In spite of himself, in spite of his opinion of women in general and the fallen Olga in particular, Jack felt a glow of anger.

At six-thirty that evening Jack Neff, accounted for dinner, mentally prepared to do his best for the boss and appease the jealous Mrs. Wike with whatever polite misstatements seemed necessary, drew up before the Wike home. Back in his head, however, were two grim intentions. One was for a reckoning with Simon Roller, scheduled for nine o'clock the next morning. The other was to remove all trace of a certain cool beauty from his mind for all time and a day.

Jack was ushered by a lackey into a big room. Through curtains at the far end came a form.

"Good evening!" trilled the voice of Olga Southern.

"H—'s bells!" ejaculated Jack Neff, immaculate star salesman.

And then it was that Olga laughed warmly, and held out her hand. "If it wouldn't insult you to compare you with a fellow who had just resigned a good job and probably left the city, I'd tell you that you look as blank as that Mr. Simon Roller did the day he sat down at a table where I was lunching and I refused to recognize him."

"So that was that! Jack smiled for the first time in hours which had seemed years.

"Mrs. Wike will be here in a minute," volunteered Olga.

"Are you her sister?" asked Jack weakly.

"No."

"Her cousin?"

"No. Nor her aunt! But," she added, mischievously, as Mr. and Mrs. Wike the latter with a twinkle in her eye entered the room, "I used to be a friend of hers before her husband's band discharged me."

"Never mind," comforted Jack, "some day I'll get you back into the firm—drawing checks by proxy."

## Guns in Civil War.

The Civil war began with muzzle-loading guns and ended with breech-loaders. Although the breech-loading gun had been invented long before the outbreak of the Civil war, it was not up to that time proved very popular and had not generally been used for military uses.

## Legal Fraternities

The oldest legal fraternity in existence is Phi Delta Phi, which was founded in the University of Michigan in 1800. Other legal fraternities are Delta Theta Phi, Gamma Eta Gamma Phi Alpha Delta, Phi Delta Delta (legal women), Sigma Delta Kappa, Sigma Nu Phi.
