ANOTHER COMMENCEMENT
 The graduating exercises for the Senior Class of 1927 were held at the Pinckney Opera House last Wednesday evening and drew the usual large house. This event to most of us is touched with a little tinge of sadness as it seems but yesterday that we too were seniors. The stage was beautifully decorated with blue and gold, the class colors, with a large sunburst effect in the rear of the stage. The boys members of the class wore gray suits and the girls white. Rev. Maycroft gave the invocation and was followed by the Salutatory or address of welcome by Hazel Smith. Next came the Class History by Ruth Evers in which she followed the class through its four years in high school, the membership growing smaller each year for many reasons. The High School Chorus then favored with two selections and then the Class Will was read by Merwin Campbell. Evelyn Soper gave the Class Prophecy in which she foretold the future of the different class members. Mrs. Clifford VanHorn then sang two solos after which Marjorie Allison presented the various class members with gifts and explained the purpose of each. Mark Nash delivered the Class Oration, taking for his subject "Restricted Emigration." Dan Nooker then favored with several songs and Mildred Haines recited the Class Poem. Elizabeth Bokros concluded the class program with the Valedictory or Class Farewell. Supt. Doyle then presented the Albert and Sarah Wilson Memorial Prize. This consists of \$15.00 in gold for the first prize and \$10.00 for the second. This is given to the two pupils whose markings in English are the highest for the four high school years. Lucius Wilson of Oak Park, Ill., is the donor of the prize. The winners this year were Elizabeth Bokros first and Harry Murphy second. The presentation of diplomas followed after which the assembled people were dismissed by Rev. Maycroft.

BARN CATCHES ON FIRE
 The barn on the old Jerry Dunn farm now owned by Frank Mowers, which is situated just west of the Pinckney-Howell road caught fire Monday morning from a pile of corn stalks nearby which were being burned to destroy corn borers. The Pinckney fire department went out there but could not use their engine as the house and other buildings have been removed years ago. Water was not accessible for the engine so it was brought from the adjoining farm in milk cans and the blaze which had started in the roof was extinguished.

PINCKNEY WINS FROM DEXTER
 Pinckney won a batting contest from Dexter Sunday by a score of 13 to 9. Each team accumulated the same number of hits, 15, but Pinckney hit harder than their opponents, VanHorn getting a home run, Bowman a triple and Lewis, Kennedy, Brown and Doyle doubles, while Dexters hits were all of the one base variety. The home team got a run in the second and three in the third when Lewis, Kennedy and Doyle doubled in succession and three more in the fifth when Lewis walked, Brown doubled and Kennedy and Doyle singled. In the sixth VanHorn hit a home run over the left field fence and Kennedy reached first on an error and scored. VanBlaricum, Bowman and Reason all hit safely in the seventh and Moffit was taken out and Richmond went in the box for Dexter. He walked VanHorn and Cox and Lewis singled, 4 runs scoring. That ended the scoring for Pinckney. Dexter hit Cox, freely all through the game but could not get their men around having eleven left on bases. They got a run in the third and another in the fourth. In the fifth they bunched four hits and put three runs across however Pinckney came to Cox's assistance with a fast double play and retired the side. Dexter got two more in the 8th and filled the bases in the ninth but only got one run.

ALUMNI REUNION
 The first annual reunion of the Pinckney High School Alumni Assoc. proved a most successful affair, some one hundred and thirty members and friends gathered on Monday evening for a banquet at the Masonic Hall which was tastefully decorated for the occasion with class pictures of former years and athletic trophies won by the school to lend added interest. After joining in old songs, an old fashioned spelling contest afforded much pleasure during the earlier evening hours, George Reason and Miss Grace Youngs of Detroit acting as leaders, and Prof. J. P. Doyle pronouncing the words. Mrs. J. P. Doyle won the honors in this contest with Miss Jessie Green a close second. With Norman Reason, always genial, as toastmaster, short addresses were given by Prof. J. P. Doyle, Hon. Lynn C. Gardner, speaker of the house of representatives, Emil Lambertson of Lansing, Miss Grace Young of Detroit, Louis Monks of Jackson, and Gerald McCluskey of the M. S. N. C. All of the speakers voiced their joy in the reunion with old classmates, their pride in the school, and their belief that next year's reunion will be still more enjoyable. At the suggestion of Louis Monks a rising vote of appreciation was accorded to Miss Jessie Green for her long and faithful service to the Pinckney Public Schools. The same officers who were chosen temporarily at the organization meeting a few weeks ago, were elected for the ensuing year, namely: Pres., P. H. Swarouth, Vice-pres., Mrs. Clifford VanHorn, Sec'y-treas., C. W. Hooker. After the serving of ice cream and cake by the Philathea Ladies, Beeler's Orchestra of Dexter furnished music for dancing. The older classes are deserving of special mention for their interest in the Alumni organization, twelve graduates of the '90's' being present. And the spirit of the whole organization may be expressed in the words of the class song written by the revered Prof. Wm. A. Sprout for the Class of 1892.

"Plus Ultra"
 We have freighted our ships with the fruitage of toil.
 In the bright days of youth glad and free;
 With a hope and a purpose that nothing shall foil
 We are launched on a limitless sea.
 There are fortunes to make, there are honors to win,
 There are homes to adorn and defend.
 There are souls to redeem from the slavery of sin,
 There's a heaven awaiting the end.
 Assemble Columbians, once more in place,
 Come Nina, and Emma and Will,
 Amelia, and Lucy, and Mollie, and Grace,
 Ere these halls be deserted and still,
 Ere our hands shall be clasped in a last warm adieu,
 And the school days shall vanish away
 Let us join in a pledge to be loyal and true,
 To the right-and each other-for aye.
 Then adieu to the shores so enchantingly fair,
 To the shrines of life's morning so fond,
 Spread the sail, weigh the anchor, a thrill's in the air.
 Plus Ultra! There's still more beyond.

BURT-CONNORS
 The marriage of Joseph L. Connors, aged 26, a former Pinckney resident, now living at 100 West Seventy-second St., New York and Miss Alice Burt, 23, of 507 West 110th St., New York, has been announced. The marriage took place June 25, in the Church of the Blessed Sacrament. Mr. Connors is a son of William and Catherine Hayes Connors and was born in Pinckney. His bride was born in LaGrange, O., and is the daughter of Alva and Carrie Jackson Burt.

GLOVER WINS MATCH
 A good number came to the wrestling match held at the Pinckney Opera House last Saturday evening. Wild Bill Hill of Pinckney took on Farmer Newton in the preliminary and made a good showing at the start. However he tired and lost the first fall in twenty minutes and the second in about ten. Max Glover of Hartland met Emiel VanDerleenden of Detroit, middleweight champion, in the main event. The prize of this contest was the championship belt donated by the Police Gazette. Glover won the first fall in twenty minutes with a double arm lock, VanDerleenden the second in eight minutes with a wrist lock. Glover the final one in twenty minutes giving him the possession of the belt. VanDerleenden was the stronger but Glover was took quick for him and broke all of his holds. Glover will take on Carl Dumler of Flint Saturday evening, July 2. Farmer Newton will also tackle Cyclone Thompson of Pinckney.

CHURCH NOTES
 The following are the delegates to the National Sunday School Convention which will be held at Cleveland, Ohio from July 1 to 8. They will leave this week Friday for there: Daniel VanSlambrook, Alonzo VanSlambrook, Mary Snively, Audra Snively, Nina Brown, Bessie Swarouth, Helen Fiedler, Lydia Schoenfelds, James Hall, Stanton Line and Rev. and Mrs. H. E. Maycroft. There will be services at the Congregational church as usual next Sunday morning.

A SAFE AND SANE
TIRE BARGAIN
 FOR YOUR TRIP OVER THE "4th"

PLAY SAFE! BE SANE!
 Here's a three-day extra vacation-where you going to drive? Roads are great, fishing and bathing dandy. Let's go!
 But-wait! What's the use of counting on a good time if your friends have to stand at the side of the road while you get all warmed up and dirty changing tires?
 The other cars will go buzzing by and your trip will be ruined if you have tire trouble, and the best way to insure a fast ride with no delays is to see that your tires are right.
 Come over to this Goodyear Service Station and let us look over your tires. Perhaps you've been putting off buying a new tire or two-or a good spare. Now is the time to do it. We have all brand new Goodyear "firsts with a tire at the price you want to pay-Goodyear All-Weather Tread Cords, made with Supertwist, for the man who wants the best and Goodyear-built Pathfinder for the man who wants the best tire at a low price will buy.
 Play safe! Buy sanely. Goodyear cost no more!

THE BUTTERFLIES

"GOOD-DAY, Mr. Sun," said the Monarch butterfly.
"You look very happy," he added after a moment.
"I am," said Mr. Sun, as he beamed brightly. "It is so wonderful to be the sun and to look down upon such a lovely world."
"No wonder people say I have a sunny nature! I cannot help but have it!"
"It is interesting to many people to know how the butterflies sleep in the winter," said the Monarch butterfly,

Smilingly Agreed to Send Some of His Bright Rays.

"or whether they are all frozen! Or what happens to them! So many people, I've been told, often ask. I wonder, if I told you, Mr. Sun, if you could send around some of your bright rays with the secrets."

Mr. Sun smilingly agreed.
"I'll see that they hear if you tell me what is to be said."

"The Swallowtail Butterflies," said the Monarch, "stay in their chrysalis state in the winter time. They like those beds best."

"And the Angle Wings all change into butterflies sometime before they go to sleep, and so they sleep as butterflies. Little Bronze Copper Butterfly spends the winter as an egg. He has lots of growing and changing to do when the spring comes! I wouldn't care for his way," the Monarch said proudly.

"So many people wonder how we disappear when the cold weather comes. In the summer I've often heard people say:

"What becomes of all the butterflies in the winter time?"

"If some one will translate for me into their language I'd like to tell them all of this."

"Most of the butterflies eat a good deal more in the fall so they can be strengthened for the cold winter weather and for their sleep, and most of the great butterfly family spend the winter bedtime as little caterpillars. The Fritillary families sleep as tiny caterpillars and don't bother to grow their full size until the spring comes when they wake up and continue growing!"

"Then there are some families where the grown-ups sleep as butterflies and where the little ones go to bed as caterpillars and don't change into butterflies until the spring comes. The Orange Sulphur and the Clouded Sulphur Butterfly families do this."

"But, oh dear, I must stop talking," the Monarch said, for as he looked about him he found that all the butterflies had disappeared.

"I've never been so late in starting for the South. I must hurry and follow the birds."

"But the butterflies and caterpillars who're staying up North and who're sleeping through the winter will be quite safe and snug. They know where the rocks and crevices are which will be the right places for them. If they're chrysalids they will know how to attach themselves safely with a fine silken cord to a tree, so the old wind won't blow them away."

"Yes, the winter time is the butterflies' bedtime and there are only a few of us who go away and stay awake! But the butterflies sleep at different stages of their growth, some as caterpillars, some as chrysalids and some as full-grown butterflies, as I've said."

"For isn't that sensible? You don't find all boys and all girls of ten years old going to sleep and all boys and all girls of twelve years old not sleeping at all!"

"And as you don't find all boys and girls doing the same just because they're of the same age or the same size—neither do you find butterflies all doing alike!"

"But before I fly I must sing the Butterflies' Bedtime Lullaby."

The Monarch looked up at Mr. Sun and smiled. Then he sang this song:

In the winter when it's cold
Do not be so very bold!
Do not freeze your pretty wings,
Do not chill your nose and things!
If you're a caterpillar or a butterfly,
In a warm place you must lie,
Covered up with silken threads,
Or in warm and leafy beds,
And sleep and sleep and sleep some more.

Such are the butterfly ways as of yore,
And as I go on my wandering way,
I wish the rest of you all a good-day,
And pleasant dreams and a good winter's rest,
So that when the spring comes you may all look your best.

For Meditation

By LEONARD A. BARRETT

THE FIVE-DAY WEEK

AMERICA'S most important economic problem is the absorption of her own production. This absorption must be made by the masses and not the classes, by the majority and not the minority. One of the important factors in absorption is leisure. If the user of merchandise is the man who produces them, then the more leisure he has to enjoy the product of his toil the more will be purchased. This is one of the advantages of the five-day week. Not only does the producer have more leisure to make use of the thing he produces, but the leisure afforded enables him to put a better spirit into his work. The element of strain, physical and moral, is an important factor in production. The right amount of leisure solves this problem.

Leisure creates "wants," and where wants are expressed, "needs" are created. When the average American feels the need for something either for himself or his family, he usually finds a way to finance the undertaking. Leisure in order to spend. The more spent, the more business, hence the larger volume of production.

Instead of losing money on a shorter week schedule, the employer of industry will really make more money. The five-day week at the same wage will create a larger production than a six-day week.

"The forty-hour week is inevitable in American labor," said William Green, in a recent address at a meeting of the American Federation of Labor in Detroit. "It is economically sound and profitable. High pressure production and the physical demands of modern industry are such that only with the shorter day can we attain notable progress in mechanical production."
(© 1937, by Western Newspaper Union.)

Do You Know That:??

"A LADDIN'S Lamp," meaning a source of wealth and good fortune.

The saying comes from the Arabian Nights' Tales. The youth, Aladdin, obtains a magic lamp and ring on rubbing which two frightful genii appear. They are the slaves of the lamp and ring, respectively, and perform the bidding of anyone who may have these in keeping. Aladdin, taking advantage of his opportunity, has a splendid palace built by the slaves of his wonderful lamp and ring. He becomes very wealthy and marries the daughter of the sultan of China. After his marriage he lets his lamp hang up and get rusty and finally loses his lamp and his palace is transported to Africa—Anna S. Turnquist.

FARM POULTRY

WATCH MARKETING EGGS AND POULTRY

"Poultry production is running wild without chart or compass, stimulated by past profits, by a tendency to shift from other nonpayment branches of agriculture to poultry raising, and by optimistic statements of those who sell supplies to poultrymen."

This is a statement of Prof. James M. Rice, head of the poultry department of the New York State College of Agriculture at Ithaca, N. Y., commenting on trends in the poultry industry.

Recent figures showing the enrollment in the correspondence courses in poultry husbandry offered by the college, bear out this statement.

Nearly five hundred New York state farmers are studying the four poultry courses, and an analysis of this figure shows that approximately fifty are studying the general management of a laying flock to one who is taking the course in marketing of eggs and poultry.

"This may indicate," say college authorities, "that the poultrymen are a great deal more interested in producing eggs and poultry than they are in marketing them so they can compete with the high-quality products shipped to eastern markets by midwest and far west producers."

"Better marketing and curtailed production," according to Professor Rice, "are necessary to save the New York state poultry industry from a serious depression."

Dirty Eggs Expensive to Careless Poultryman

Dirty eggs, especially numerous this time of year, cost farmers and poultrymen from one to three cents per dozen because of the lower grade in which they are placed, according to E. R. Menefee of Purdue university, who is investigating marketing of poultry and eggs.

Three principal causes may be assigned for the large volume of dirty eggs, Menefee found. They were: too few nests, resulting in the hens hiding their nests in dirty, wet places; unclean nests, and allowing hens free range in wet weather.

Dirty eggs can be eliminated by providing a sufficient number of clean, roomy nests, at least one to every four or five hens. These nests should be placed in a darkened part of the house to prevent egg eating and floor eggs. Do not permit hens to roost in the nests at night and change straw or shavings at frequent intervals. The wet range is the most common cause of dirty eggs. Keeping hens confined to the house in wet weather until noon, and gathering of eggs before they are let out will keep eggs clean.

Ducks Not Particular Where They Leave Eggs

Ducks lay heavily during the laying season. However, they are not particular as to where they leave the eggs. It is no uncommon sight to see duck eggs scattered here and there in the yard or hog lot. As a result of this thoughtless attitude on their part, many eggs are eaten or destroyed by dogs, swine or the ducks themselves.

The proper method of handling the ducks in order to get all the eggs laid is by keeping the ducks confined in a duck house, or an abandoned stall of the barn during the night and until eight or nine o'clock in the morning.

Poultry Items

Tobacco in some form is now generally used as a remedy for intestinal worms in poultry.

Remove all males four to five weeks of age. Furnish perching space early to prevent crowding.

You can't have thrifty chicks unless they get sunlight—either direct, or through these glass substitutes. Window glass strains out the life-giving violet rays.

The demand for fresh duck eggs is never oversupplied.

"The best hens and roosters to keep and to breed from," says one poultryman, "are the bright, nervous, 'talkative' kind, but not the 'squawks'." These are signs of vigor, and vigor means eggs.

It is the general practice not to keep breeding ducks more than three or four years, although people have kept them with good results until they were eight years old.

ANSWERED:

three vital questions you have asked about used car allowances

1 "What is my present car worth?"

Answer: Your used car has only one fundamental basis of value: that is what the dealer who accepts it in trade can get for it in the used car market.

2 "Why should dealers in different makes of cars offer me allowances that differ materially?"

Answer: Your used car has seemingly different values because competitive dealers are bidding to sell you a new car.

3 "Is it true that the largest allowance offered means the best deal for me?"

Answer: The largest allowance is not necessarily the best deal for you. Sometimes it is; sometimes it is not. An excessive allowance may mean that you are paying an excessive price for the new car in comparison with its real value.

First judge the merits of the new car in comparison with its price, including all delivery and finance charges. Then weigh any difference in allowance offered on your used car. Remember that after all you are making a purchase, not a sale.

Allen's Foot-Ease

gives comforting relief for Tired, Aching, Swollen Feet.

When your feet hurt, are tired, sore or perspire, shake into your shoes Allen's Foot-Ease, the Antiseptic, Healing powder for the feet. It takes the friction from the shoes and gives immediate relief. Makes stockings wear longer, too. Write Allen's Foot-Ease, LeRoy, N. Y., for a Free Sample. Sold at all drug and toilet goods counters.

The term "Davy Jones" is used for the evil spirit that is supposed to rule over the sea. Jones is believed to be a corruption of Jonah.

Ambition is a great urge, and it requires judgment to direct it. Have a hobby and dismiss ennui.

"Butch" Bedbug, burglar, starts his night's work

Millions of others are starting, too! Be ready for them!

MAKE NO MISTAKE! There's only one way to exterminate bedbugs. That's with a liquid. Don't waste time shooting a spray at them. No spray can possibly reach their young and eggs.

Bedbugs are in the woodwork, along the base-boards—not in the bed clothes, as you may have thought. Don't waste time using a powder. Bedbugs don't eat. They suck. That's why only a liquid can exterminate them.

Peterman's Discovery is the right liquid. It soaks down into their nests. It will exterminate all

bedbugs, all their young and eggs in any house in 48 hours.

Here is the right insecticide for each insect:

- PETERMAN'S DISCOVERY, Liquid—exterminates bedbugs.
- FLYBANE, Liquid Spray—kills flies and mosquitoes.
- PETERMAN'S ROACH FOOD—exterminates roach infestations.
- PETERMAN'S ANT FOOD—exterminates ants.
- PETERMAN'S MOTHS FOOD—protects against moths.

You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We know that is true.

Peterman's
200 Fifth Avenue, N. Y. C.

How It Started

By JEAN NEWTON

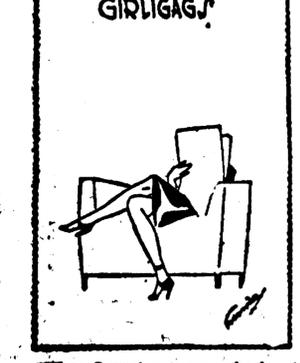

"SCAPEGOATS"

A VERY common word, familiar to everybody, to describe a person who is made to suffer or to carry blame for offenses for which others are at least partly responsible, is "scapegoat." The term had its beginning in a practice observed in Jewish antiquity.

The difference between the original scapegoat, however, and its modern counterpart is that the former escaped, whereas by the time today's scapegoat has earned the appellation he has usually been made to pay for the iniquity that has been heaped upon him!

The original "scapegoat" was a real goat, on whose head the ancient Hebrews on their Day of Atonement, symbolically placed their sins. After all had been relieved of their burdens of conscience and the transfer had been made to the goat, the animal would be released and permitted to escape into the wilderness! Hence our "scapegoat!"

THE WHY of SUPERSTITIONS

By H. IRVING KING

ASHES AND LIVE COALS

IN SOME parts of the country there is a superstition to the effect that a maiden can ascertain the name of her future husband by the following means: When she goes to bed she should hang her undergarment upon the foot of the couch and place below it a board covered with ashes, saying:

Whoever my true love be,
Come write his name in these ashes for me.

The next morning the required name will appear upon the ash-covered board. Something of the same sort is recommended for those who fancy themselves in ill luck because of some sinister magical influence at work against them—such as being bewitched, or "overlooked," as they say. In this latter case no board or ashes should be used but a live coal dropped through the garment after it is taken off. The selection of a garment which has been worn next the body is because it has, according to the idea of primitive man, acquired by the magic of contact a share in the personality of the wearer so that it represents its owner in a very real way—is, in fact, a sort of second self. Therefore what affects it affects its owner. The ashes and the live coal are both relics of fire worship.

The second superstition mentioned is a common one in some rural sections and Elworthy says of it "that the burning coal may be a relic of fire-worship and so, on the other hand, a propitiatory act of sun-worship." But fire-worship would appear to be the simpler explanation.

Of Course

The junior class was planning its annual, and very formal banquet, when they should entertain the seniors at a reception. In planning the menu the last course mentioned was demi-tasse.

"Oh," exclaimed one of the bright young girls, "let's not have demi-tasse, let's have coffee."

THIS WOMAN FOUND RELIEF

After Long Suffering by Taking Lydia E. Pinkham's Vegetable Compound

In a little town of the middle West, was a discouraged woman. For four months she had been in such poor health that she could not stoop to put on her own shoes. Unable to do her work, unable to go out of doors or enjoy a friendly chat with her neighbors, life seemed dark indeed to Mrs. Daugherty.

Then one day, a booklet was left at her front door. Idly she turned the pages. Soon she was reading with quickened interest. The little booklet was filled with letters from women in conditions similar to hers who had found better health by taking Lydia E. Pinkham's Vegetable Compound.

What Happened

"When the cyclone struck Clapboard Springs eight persons were in one room," in the crossroads store related Jig Fiddlin. "They all dived under the bed where there was only room for six people."

"What happened to 'em?" asked the merchant.

"I hain't no idy what happened to all of 'em, but four of 'em got their false teeth broke."—Kansas City Star.

Chic Dance Frock Made of Organdie

Flowers Appliqued Between Folds of Hem and on Shoulder Bow.

Crisp and flowerlike on a hot evening is this little dance frock of organdie developed either in rose tints or in larkspur coloring, writes the Woman's Home Companion. The most fascinating thing about the model is the way the flowers are appliqued between the folds of the hem on both the skirt and shoulder bow.

This dress would be very effective developed in pale rose with a deeper rose for hem and wild roses of pink with green leaves as trimming or in

Developed Either in Rose Tints or Larkspur Coloring.

larkspur blue with a deeper blue for hem and violet and yellow flowers with green leaves.

The bow on the shoulder is composed of two long strips which tie and can easily be pressed if they become mussed. The side edges are picoted.

The skirt can be any length you desire. You may like to make a period frock with quite a long skirt.

Felt Hats Reported to Be Much in Favor

Felt hats, for which retirement has been often prophesied, are apparently stronger than ever, though not for all inclusive use. The soft, adjustable high felt to which women generally have been accustomed is shown in fine quality and in all of the most charming colors. Some of these are given a feminine touch with a crush band of silk or an ornament, and a few of the prominent designers are making strikingly original hats in felt. One, in skull-cap shape in white felt, is showily trimmed with a strap of black and green felt across the crown and a flat square piece over each ear.

Fashionable sports togs include the tricorne, which some women have found so becoming, but in a new edition of the original shapes. Crocheted hats which were brought out early in the season, and have appeared sporadically for several seasons, are now flooding the market in every type.

Sugar-Bag Hat English Successor to Vagabond

The "sugar-bag" is the English spring successor to the winter's "vagabond" hat. It really looks more like the dust bag on a vacuum cleaner, but appears very smart when worn. You pull this quaint thing on so that it recedes in front, following the line of the head, and then, when you have squashed it down, you get the Dutch boy effect with the crown flat against the side of the head.

Sleeveless Coats

While a large number of the new English evening wraps are being made on the coat principle, with inset sleeves, some women prefer the sleeveless, cloak style of garment. English designers are trying hard to do away with the old stereotyped circular cape. A cape which is finished in a triangle is one of the results. It is made in velvet and fur.

Gold Roses on Gowns

Although simplicity marks the daytime mode, evening models are most elaborate. A white dinner gown embroidered with large gold roses was exhibited at the fashion show. It was worn under a white wrap also embroidered in the same gold rose design.

Cottons Printed in Designs

Among the materials which will be much in evidence are cottons in the new printed designs and in the plainer Irish dimities.

Hand-Painting Feature of Snappy Sports Frock

The hand-painted sports frock is one of the modes of the season. This two-piece frock, worn by Aileen Pringle, the charming motion picture star, in "His Brother From Brazil," has a hand-painted border in pastel shades on the short-sleeved blouse, with a border of the same coloring on the sleeves.

Particular Women Do Not Care for Extreme Styles

The small slender woman may indulge in almost any cut, fabric or color combination so long as such indulgence does not violate good taste or is not overwhelming to her figure, declares Capt. Edward Molyneux of the Paris House of Molyneux, in the Woman's Home Companion. "There is but one woman in a thousand," he says, "who can adopt striking extremes and wear them to her advantage. I should advise the small slender woman to take the middle of the road between the bizarre and the too conservative. She must tone down and temper her effects to conform with her type. The new printed silks with their small dainty patterns and softly blended colorings suit her admirably."

A "coffee coat" of gay cretonne is the latest in breakfast negligees. Any kimono pattern can be used, and the border is a simple crocheted edge in stripes of wool which pick up the colors of the cretonne. The seams are feather-stitched with the darkest shade.

Tailoring has returned. From the short rigid classic two-piece, down to the more softly treated three-part outfit, the tailored suit is once more one of the smartest possible costumes for town wear. Also because of the latitude in its development it is one of the most satisfactory. Any woman can be sure of finding one that fits her type.

Most women buy too many. This is almost as true of the woman with a moderate dress allowance as it is of the woman with an unlimited checking account. Three wisely chosen frocks a year are better than a dozen bought because they happen to appeal to the eye, or because they strike the shopper as "bargains." Nothing, no matter how cheap, is a bargain unless it fits in with her particular wardrobe scheme, or fills some special need.

Black Lace Dress Will Solve Gown Problem

The black lace dinner gown is an essential in the smart woman's wardrobe since it is the type of gown which can be worn for formal as well as informal occasions. It fits into the small home gathering without appearing overelaborate, and it also holds its own at more formal occasions amid more colorful gowns.

If one has but one dinner gown, black lace should be its medium.

Capes for Sports

Knitted military capes for sports wear are much seen in Paris. One pretty model, much approved, has three colored stripes on the small turn-over collar. The cape itself is beige, or natural colored wool. The new capes carry out the ensemble idea. They are chosen to match either skirt or sweater worn under them.

Daytime Frocks

Lemon yellow, such as mimosa, is a smart new spring color for daytime frocks. A two-toned blue crepe de chine model combines sistance, a cool gray blue with periwinkle, a blue with a touch of lavender in it. Light cameo pink sports dresses, in both jersey and silk material, are now popular.

Shade of Violins Important

Rarely has blue occupied such an important place on the color chart of fashion, and in the large and varied group of blues shown for spring the loveliest are those on the violin tones. They are equally as successful in frocks and evening wraps as they are in millinery.

Gray Combine

Smoke gray combined with dull rose or pale green is used in many tea gowns and negligees.

Know Your Sweetheart by His Handwriting

Has He Good Judgment?
to
Very
Thought.

First we must find a person who is poised and calm as well as analytical. So the writing must be steady, simple, firm and clear. This means poise.

When there are triangular shapes visible in the writing, such as a terminal brought back to make a cross, then we have the man who returns to the first premise to make his deduction. This is the analytical type. His writing will also be small and frequently the terminals will turn back above the line. Words will often be connected.

T bars will be in proper place—not flying away from upright. Down strokes will have few loops. Y's will have the down stroke brought back on the right-hand side.

There will be few indications of embellishment. The man with good judgment writes and talks to the point, consequently does not waste time putting on airs.

He takes the shortest cut and thus writes the quickest and plainest way. Writing will be on the level or slightly ascending.

Responsibility
for calculating
for every lamp
work soon
only your

Look at the letter m. If the middle section rises high, then you will find the writer who has some real responsibility, such as taking care of a family, invalid, mother or business. Often in my lectures I have questioned a writer who made his m this way and I found that he had been an orphan for years, thrown on his own resources.

The letter a will be closed tightly in the writing of one who has to watch out for others. There is no sign of the spendthrift in one who knows what responsibility means.

T bars of this type of writer are well placed and sometimes slant slightly upward.

Words are often connected. As a rule their writing is not very large. It has become small through the necessity to concentrate for sure results because of the others dependent on returns of the writer. His mind has been tied down to the problem at hand and he has positively not had time to rush here and there mentally. Thus you will find orderly writing made in the quickest way.

How Is Heart Organically?

live and let live

Romantically and organically seem to be related as far as appearance goes. However, the former must rely on the latter for existence. If a heart is not organically right, there is little else that is right. Here are some of the signs of a heart that is working under difficulties. Often relief can be experienced through diet alone. When writing appears shaky, the condition is usually the outcome of hardened arteries. This puts a strain on the heart, although it itself might be normal. But it will not remain normal long if it has to work twice as hard because you have allowed deposits of calcium to settle in your joints and thus squeeze the flow of blood.

If there are breaks in certain down strokes, resembling a marled stick, the heart should be given attention and not put to unnecessary strain.

If pressure of writing is heavy and whole appears dirty, the heart should be considered and writer should avoid anger and dispute.

Note—Do not make final judgment until other signs in writing are studied.

The Carillon

A "carillon" is the name given to a set of bells so hung and arranged as to be capable of being played upon either by manual action or by machinery, as a musical instrument—i. e., so as to give out a regularly composed melody in correct and unvarying time and rhythm in contradistinction to the wild and irregular music produced by the change-ringing on a peal of bells hung to swing in the more usual manner.—Washington Star.

Sparrow Sweeps Fields

One of the most efficient sweepers of the fields is the vesper sparrow, which we may recognize by the white outer tail feathers, says Nature Magazine. Many dwellers of the grass, insect larvae, leaf hoppers, army worms, young grasshoppers, are devoured during the summer; and innumerable weed seeds make up their fall and winter diet.

Bell-Ans Halts Over-Acidity

This Widely Used Sure Relief Can Be Depended On Every Time.

How disagreeable, how exasperating, how embarrassing to be a sufferer from gas, belching, heartburn, sick headache, nausea and other digestive disorders. BELL-ANS for Indigestion is a harmless, pleasant Sure Relief. Tested by over 30 years' use. 25c and 75c Pkgs. at all drug stores, or send for free samples to Bell & Co., Inc., Orangeburg, N. Y.—Adv.

Double Egg

A market clerk in South Portland, Maine, discovered an egg of unusual weight—it balanced the scales at 5 1/2 ounces—and broke it open out of curiosity. Inside the outer shell was found another egg, a trifle smaller than an ordinary hen's egg. The clerk's curiosity seems to have been satisfied at this point, for the smaller egg was not broken.

Just in Time

Mr. Black—Do you realize that you talked over that phone for one hour and sixteen minutes?
Mrs. Black—Yes, and I would have talked longer except that I discovered I had the wrong number.

Callouses

Quick, safe, sure relief from painful callouses on the feet. At all drug and shoe stores.

EYES HURT?

Forgetting It—

With an Electric Refrigerator in your home you do not have to give a thought to the question of the safety of your food supply.

The Electric Refrigerator demands no thought, no care, not the slightest attention. It is automatic. It maintains a steady, food-preserving cold always.

The Electric Refrigerator, although it uses no ice, will make ice for you—little cubes of purest ice for the table (you can tint them with fruit juices or freeze flowers into them, if you wish). It will produce lovely frozen desserts.

THE DETROIT EDISON COMPANY

ENJOY A REAL VACATION!

Visit Detroit and
PUT-IN-BAY

Such picturesque and historical is beautiful Put-In-Bay. There abounds interest for young and old. There is bathing, fishing, sailing, mysterious caves, picnic groves and Perry's monument beneath which the dust of heroes lies.

The palatial steamer Put-In-Bay leaves the foot of First St. (Detroit) daily at 9 a.m., returning at 8 p.m. R. T. fares: \$1.00 week days, \$1.50 Sundays. Steamer runs thru to Sandusky daily making connections with Cedar Point Ferry. Thru to Cleveland via Put-In-Bay.

Ferry Monument
Drive to Detroit and enjoy the **DANCING MOONLIGHTS**
Leave Detroit 11:30 p.m. Return 11:30 p.m.
Fare: Wednesday and Thursday, 50c; Saturday, Sunday and Holidays, 75c.

CEDAR POINT

On Fridays a steamer excursion is run to Cedar Point. Steamer stops one hour Sundays. With its huge hotels, electric park, magnificent bathing beach and board-walk it can rightfully be called the Atlantic City of the West.

Write for Folder.

ASHLEY & DUSTIN STEAMER LINE
Foot of First St. Detroit, Michigan

Fireworks on Sale Friday, July 1st.

If we do not clean out the 1st and 2nd, we will hold store open the 4th. We have this year provided material for a "safe and sane" Home Display.

LINE'S BAZAAR

Howell, Opposite Courthouse

UNADILLA

Mrs. Carl Whitehead was very pleasantly surprised Sunday afternoon when about twenty of her friends walked into her home to help her celebrate her birthday. A bountiful Bohemian dinner was served.

Mr. and Mrs. Carl Whitehead attended the Whitehead reunion at Stockbridge Wednesday.

CAUSES CHUCKLES GALORE

The man who conceived the advertising slogan "No metal can touch you," as applicable to garters couldn't have had Gertie's Garter in mind.

For Gertie's Garter was of metal entirely-solid gold in fact. Its original purchaser thought it was a bracelet and it is because of his mistake that the story of Getting Gertie's Garter, a new Metropolitan comedy starring Marie Prevost swing along at at highly hilarious pace.

Charles Ray who has the male lead buys the garter as an engagement gift for his wife-to-be, Marie Prevost, thinking it to be a bracelet and has his picture put in a little frame placed in it. Later on they quarrel and Rays frantic attempts to regain the garter which flaunts his photograph furnish laughs galore through this humorous version of Avery Hopwood's stage farce. It will be seen at the Temple Theatre next Sunday evening, July 3.

COUNTY CLUB CHAMPIONS

The County 4 H Club champions for the various projects carried on in Livingston County last year have been selected and approved by the Boys and Girls Dept. of the Michigan State College.

Daniel VanSlambrook of Pinckney who won the all-around County championship is planning now to take advantage of his short course scholarship by attending school this coming season.

Miss Helen Catrell of Gregory who has been largely responsible for the splendid work that has been carried on in Unadilla township is going to accompany the group of winners to the State Club week to be held at the Michigan State College July 11th to 16th.

The following are the Livingston County champions who will attend: Potatoe-Daniel VanSlambrook, Pinckney; Pigs-Vernon Pratt, Cohoctah; Dairy Calf-Claudine Burkhardt, Howell; Dairy Heifer-Dewitt Steinacker, Fowlerville; Dairy, third year-Wilton Griffin, Howell; Sheep, Ewe and Lamb Orville Lewis, Fenton; Sheep, Flock-Cecil Hendee, Pinckney; Canning, 1st year-Margaret Hosley, Howell; Canning, 2nd year-Evelyn Soper, Gregory; Canning, 3rd year-Gladys Wilcox, Howell; Canning, 5th year-Martha Hosley, Howell; Clothing, 1st year; Doris Olson, Fowlerville; Clothing, 2nd year-Dorothy Day, Howell; Handcraft, 1st year-Kenneth Olson, Howell. All-around County champion-Daniel VanSlambrook, Pinckney.

THE APIS OR TREE LICE

According to the County Agent's office the tree lice are doing considerable damage to the foliage of fruit trees. These insects work on the under side of the leaf and suck the sap rather than eat the leaves. This makes them hard to get at and a nicotine-sulphate spray is about the only effective method of controlling them.

For apple and cherry spraying, use ½ pint of nicotine-sulphate to 100 gallons of water, by adding 5 or 6 pounds of ordinary soap dissolved in this solution it will make it still better. Considerable pressure must be used in applying it as the spray must hit the apis in order to be effective.

Mrs. George Greiner and daughter, Marian, and Edward Sullivan of Chelsea spent Sunday with Mr. and Mrs. James Greiner of Lynden and Mrs. and Mr. John Ryan of Howell in the evening.

Mrs. George Greiner spent Wednesday with Mrs. Albert Wilson.

LOCAL AND GENERAL

J. E. Harris and wife of Ann Arbor called at the Patrick Lavey home Sunday evening.

Mr. and Mrs. M. F. Bailey of Brooklyn Ave., Ann Arbor are spending summer at their cottage at Portage Lake.

Mrs. E. Drouillard of Dexter Blvd., Detroit is spending the summer at her summer home at Portage Lake.

Mrs. J. D. White of Howell was the guest of her father, Patrick Lavey Saturday.

Mr. and Mrs. Fred Bortz, Mr. and Mrs. LaVerne Drake and family, Wm. Mulholland and daughter, Myrta, of Ypsilanti, Mr. and Mrs. Walter Mulholland and family of Ann Arbor were Sunday guests of Mr. and Mrs. John Martin.

Mr. and Mrs. Henry Johnson, Mrs. Bessie Cockran, Mrs. Waldo Titmus, the Misses Ruth Evers and Hazel Chambers, Mr. and Mrs. Robert Barnard, Albert Johnson and Mr. and Mrs. Frank Johnson spent Sunday at Silver Lake.

Miss Grace Youngs of Detroit visited Mr. and Mrs. C. J. Teeple the first of the week.

Mr. and Mrs. Will Kennedy and daughter, Lucile, were in Ann Arbor Monday.

Mr. and Mrs. Floyd Weeks and daughter of Howell were Sunday callers at the home of Mr. and Mrs. G. W. Dinkel.

Mr. and Mrs. Fred Lake were in Howell Monday.

Raymond Lavey and family of Gregory visited at the home of his father, Patrick Lavey Sunday.

Sam Koryec of Detroit spent the week end at the home of Louis Shehan.

Mrs. Irene Barlow of Detroit and Mrs. Elmer Maines and daughters of Dearborn were guest of the Haze sisters Saturday.

Mr. and Mrs. G. W. Dinkel were Ann Arbor callers Saturday.

Mr. and Mrs. Ben White and Mr. and Mrs. Eugene Dinkel and son, Junior were Jackson visitors Sunday.

Burr Fitch of Pontiac spent the week end with Mr. and Mrs. Bert Hicks.

Mr. and Mrs. Claude Reason and family visited Ann Arbor relatives Sunday.

Mrs. Sarah Reason is spending a couple of weeks with relatives in Pontiac.

Myron Wilcox of Detroit was a Sunday visitor at the home of W. C. Miller.

Mr. and Mrs. Leon Lewis and family visited her parents at Pingree Saturday.

Will Steptoe and niece, Elizabeth, visited at the F. D. Johnson home Sunday.

Met Chalker transacted business in Detroit the first of the week.

Mr. and Mrs. Ed Dreyer and daughters of Jackson were guests of Mr. and Mrs. Mark Swarthout Sunday.

Mrs. Mary Connors entertained at Sunday dinner, Mr. and Mrs. Fred Wylie and family and Mr. and Mrs. Frank Battle and family.

Mr. and Mrs. Gale Johnson of Detroit visited his parents, Mr. and Mrs. F. D. Johnson Sunday.

Mrs. Charles Runciman of Stockbridge and Mrs. Bert Hoff and daughter, Helen, of Howell visited Mrs. Eliza Gardner Sunday.

Francis Edward Shehan spent Monday in Carleton with his brother, Eugene.

Mrs. Estella Fitch of Pontiac is a guest at the home of Mr. and Mrs. Bert Hicks.

Mr. and Mrs. M. E. Darrow and family were in Howell Monday.

Mrs. Lillian Dieterle of Keego Harbor was the guest of her sister, Mrs. G. W. Dinkel last week.

W. H. Meyers was in Detroit on business Monday.

Mr. and Mrs. Matt Jeffrey of Fennel and Mr. and Mrs. Will Jeffrey of Jackson spent Sunday at the home of Mr. and Mrs. John Jeffrey.

Mrs. Louis Clinton was in Detroit Saturday.

Mr. and Mrs. Francis Martin and children of Howell were Sunday visitors at the home of Mr. and Mrs. James Martin.

Miss Beatrice Lamborne of Gregory is employed in the Barry Drug store.

The town square was mowed this week with a horse drawn lawn mower. W. C. Miller furnished the mower and John Dinkel the horse.

Barney Lynch, Pinckney's most famous sportsman was given a new steel casting rod by the Smith-Winchester Co. of Jackson in honor of his long and continued patronage of them. Less than an hour after he received it he caught a four lb. bass with it out of the mill pond.

Mr. and Mrs. Glen Darrow and son of Detroit were over Sunday guests of Mrs. Flora Darrow.

John Ledwidge of Dexter was in Pinckney Sunday.

W. H. Meyers addition to his garage is being rapidly completed. Walter Clark and George Fisk are doing the work.

Mrs. Minnie Parker, Miss Bessie and Everett Parker of Ann Arbor visited at the home of Mr. and Mrs. Clifford VanHorn last week.

Mrs. A. G. Vanderwall and children have been visiting in Grand Rapids.

Some of our exchanges are calling attention to a gang of men who are going around taking orders for linoleum. Last year these men canvassed Barry County and sold linoleum of a very inferior quality, gave short measure and charged a higher price than good linoleum could have been purchased for from home dealers. The men are now said to be working other counties.

Mrs. James Marble who is spending the summer at her home west of town was very pleasantly surprised last Wednesday when about twenty ladies from Lansing arrived, bringing well filled baskets and spent the day with her. It was an occasion to long be remembered.

Mrs. Minnie Doody and daughter, Helen, of Bay City are visiting her mother, Mrs. Alfred Monks.

Mrs. Bessie Cockran, Mrs. Waldo Titmus and Miss Ruth Evers were in Kalamazoo Sunday.

Mr. and Mrs. L. G. Devereaux and family visited at the home of Will McQuillan of Howell Sunday.

Mr. and Mrs. C. J. Clinton and family and R. Clinton were Hartland callers Sunday.

Mr. and Mrs. Ward Swarthout and daughter, Barbara, of Jackson spent the week end with Mr. and Mrs. S. E. Swarthout.

Miss Marilda Rogers is home from Detroit for the summer vacation.

Mr. and Mrs. Dave VanHorn and son of Ann Arbor and Mrs. Matt Brady of Howell and Mrs. Larue Moran of Detroit were Sunday visitors at the home of Mrs. Alice Teeple.

Mr. and Mrs. Robert Bird of Ann Arbor were guests of Mrs. Clarence Bird Sunday.

Clifford Conway of Ann Arbor is the guest of his grandfather, Peter Conway.
Lucius Wilson of Oak Park, Ill., is spending the summer at his cottage at Portage Lake.
Finley Hubbard visited his mother at Fowlerville a part of last week.

Ten young friends of Gerald Clinton helped him celebrate his birthday last Saturday. A very nice time was spent in playing games and a dainty luncheon was served.
R. Clinton of Detroit is the guest of Pinckney relatives.
John Neeley of Howell was a Pinckney visitor Saturday evening.

1—General view of the Lindbergh parade in New York as it passed up Broadway. 2—President Coolidge (indicated by arrow) speaking at dedication of Wicker park, war memorial of Lake county, Indiana. 3—New high school building in Rapid City, S. D., in which are the executive offices of the government during the President's vacation.

Farmer Claims Royal Descent

Briton, Making \$10 a Week, Traces Blood Direct to Saxon Kings.

Berden, England.—King Harold's direct family descendant, Thomas W. Goodwin, a farm laborer near here, has no regrets as to the outcome of the battle of Hastings, which crushed the Saxon rule and deprived him of the right to the British crown.

"William the Conqueror was a hustler, I imagine from what I hear," said Goodwin, "and hustling counted, even in 1066 just as it does today."

"A castle means nothing to me," went on the farmer whose ancestry goes back in an unbroken line to Earl Godwin, the father of King Harold, "and I am perfectly satisfied with my lot."

Wife Contented Also.

Mrs. Goodwin, too, is contented in her thatched roof cottage—her home since babyhood—40 miles from London. There are three children—Cyril, aged eight, is known throughout the neighborhood as "Little King Harold," "Princess" Irene is fourteen and her sister, Catherine, is four.

The Goodwins have relatives in the United States, but they lost trace of them years ago.

Goodwin first heard of the startling family news this year from the parish vicar, Rev. Kynaston Hudson, who for years has been looking up the genealogy of many of his parishioners. His lineage is vouched for by England's Doomsday book.

"I thought at first that I might gain a thousand pounds one way or another out of this 'discovery' and then I'd buy some land," said Goodwin, "but it appears now that I will never get a farthing, but still I have no complaint to make."

Earns \$10 a Week.

Goodwin, who is forty-two, earns about \$10 a week. His house rent is free. He has never owned an acre of land.

After the famous battle, fought chiefly with spears and battle axes, when Harold and all of his troops were slain, King Harold's family lost everything and few of the Goodwins since have been land owners.

"I have heard that, since my ancestry has been linked up with the last of the Saxon kings, some of my neighbors remarked that I was a high stepper," Goodwin chuckled to the interviewer who followed him about a 14-acre field while he drove

a team hauling a barley sower, "but the fact is I was always what they call a high stepper—I acquired that habit stepping over furrows in the field."

"I had a look at Buckingham palace once, but I prefer the old house on the hill, up there."

Sea-Going Showboat Holds Itself Unique

Elizabeth City, N. C.—"Showboat's at the wharf."

This cry, which often has echoed through the streets of Mississippi and Ohio river towns and caused virtual suspension of business, is no novelty to the towns and cities along the Atlantic coast of Virginia and North Carolina cape counties and up and down Chesapeake bay.

For there is the James Adams Floating Theater company, which claims to be the only deep-sea, salt-water boat theater surviving numerous attempts at such enterprises. It carries no advance man, seldom advertises and proudly boasts that it needs no publicity. The Play House carries a company of 28 and seats 700.

"We give them the old-fashioned hokum—all about mother-love, faithful and unfaithful sweethearts, the lamp in the window, the villain, and all in a play full of smiles and tears, but mostly hilarity and fun," says the owner. "They go for it strong. But it's not because these people are hicks or behind the times. Our small towns are posted on good music and shows and literature. They want clean shows and that's why they come to us."

He Ought to Be

Rome.—Signora Bruschi, twenty-eight, has had four sets of twins. Recognizing "patriotic service," Mussolini has helped the family to find a house at low rent.

Knows His Eels

Albany, N. Y.—Fred Hanson of Jersey City, N. J., knows his eels. In 1925 he sold the fish he took from the Hudson for \$1,950. In 1926 the total was \$1,504.

New Society Fad

New York.—Pottery is a society fad. An exhibition reveals that many women of social prominence are making their own.

Senate Must Have Its Snuff, Tradition Rules

Washington.—The senate holds tenaciously to its precedents, and the maintenance of an adequate supply of snuff for its members is one of them.

Two small, black embossed metallic snuff boxes resting on the wainscoting of the senate chamber on each side of the vice president's dais have attracted few devotees in recent decades of the once elegant custom of snuff taking. But when the senate extension of the capitol was constructed shortly before the Civil war, they were regarded as necessary for the convenience of the members, nearly all of whom were using snuff, and to this day one of the duties of the pages is to make sure that the boxes are supplied with the powdered tobacco.

Despite the passing of the habit from common use, efforts to have the boxes removed have been resisted by a large majority on the ground that it was a senate custom and should be honored.

Airplane Halts Stampede of Wild Reindeer Herd

Nome, Alaska.—How an airplane swooped down and turned the tide when a herd of 4,000 reindeer stampeded was told here by Eskimo herders. Up the Kuskokwim river near Bethel natives driving their herds toward new pastures faced total losses when the animals from no apparent cause sniffed the air and made off east.

Calves and yearlings were crushed by the rushing animals. Ten to fifteen miles beyond wild caribou would soon be passing on spring migrations. The native herders knew if the two types of animals merged the reindeer would be lost.

Out of the southern sky suddenly appeared an airplane bound toward Nome. The aviator sized up the situation and acted quickly. With a long swoop eastward he soared just above the milling animals. The leaders veered immediately and soon had the herds going in the direction of home corrals. The herders, more frightened than the reindeer, kept running in the opposite direction.

Looks Like Knock

Princeton, N. J.—Next to Smith and Vassar Harvard is the favorite "woman's college" of some seniors at Princeton. Of 470 members of the class '33 so voted.

NEWS REVIEW OF CURRENT EVENTS

President and Household Are Established in the Black Hills.

By EDWARD W. PICKARD

PRESIDENT AND MRS. COOLIDGE, two colts, five canaries and all the necessary household articles are now established for the summer in the South Dakota State Capitol Lodge in the Black Hills. And the executive offices of the national government are established in the new high school building at Rapid City, 32 miles away. Even though Mr. Coolidge should not regain the favor of the farmers—and he is not unlikely to—he will certainly have a delightful and restful vacation in surroundings that are entirely to his taste. The lodge is on the shores of a lake surrounded by picturesque mountains, and is so secluded that comparative privacy is assured. The Chief Executive planned to make the automobile trip to Rapid City frequently to attend to the more pressing business of his office.

On his way west the President stopped a few hours in the Calumet region of northwestern Indiana to help in the dedication of Wicker park, the war memorial of Lake county. In his address he spoke of the prosperity and growth of the country in a material way, but he mildly chided the nation for delinquencies.

"In spite of all this progress," he said, "we are still a great distance from what we would like to be. Our delinquencies are sufficient to require us to put forth all our efforts to work toward their elimination. Although our government is sound and our courts are excellent, too many of us disregard the obligations of citizenship."

the colonel as the son of one immigrant to the son of another, and pinned on his coat the city's gold medal of honor; the aviator talked briefly to the throng through the microphone; his mother was called to the front and introduced to the roaring crowd, and the procession resumed its march to Central park. At the Eternal Light at Madison square there was a pause while Lindbergh laid a wreath at the base of the memorial. At the Mall the colonel was met by Governor Smith who presented him with the state medal of valor.

Colonel Lindbergh spent most of the week in New York and was entertained extensively, though he found some time to rest. Early Thursday morning he unexpectedly flew down to Washington and returned to New York in a few hours with his transatlantic plane, and on Friday he flew in it for St. Louis, where another rousing welcome was accorded him lasting three days. Lindbergh says he hopes to visit many American cities in the "Spirit of St. Louis" for the purpose of boosting commercial aviation. To date he has signed only one contract—for a book describing his flight to Paris.

Chamberlain and Levine spent a jolly week in Germany waiting for their plane to be repaired. They visited various cities and were handsomely entertained. Commander Byrd had his Fokker monoplane America all ready at New York for a flight to Europe with Bert Acosta as his companion but was delayed by adverse weather conditions. Hope for the rescue of Nungesser and Goll sprang up when reports came that flares had been seen in the wilds of northern Quebec, but unhappily the stories were soon discredited. Commander de Pinedo, Italian "four continent flyer," completed his tour, returning from the Azores to Italy via Portugal and Spain.

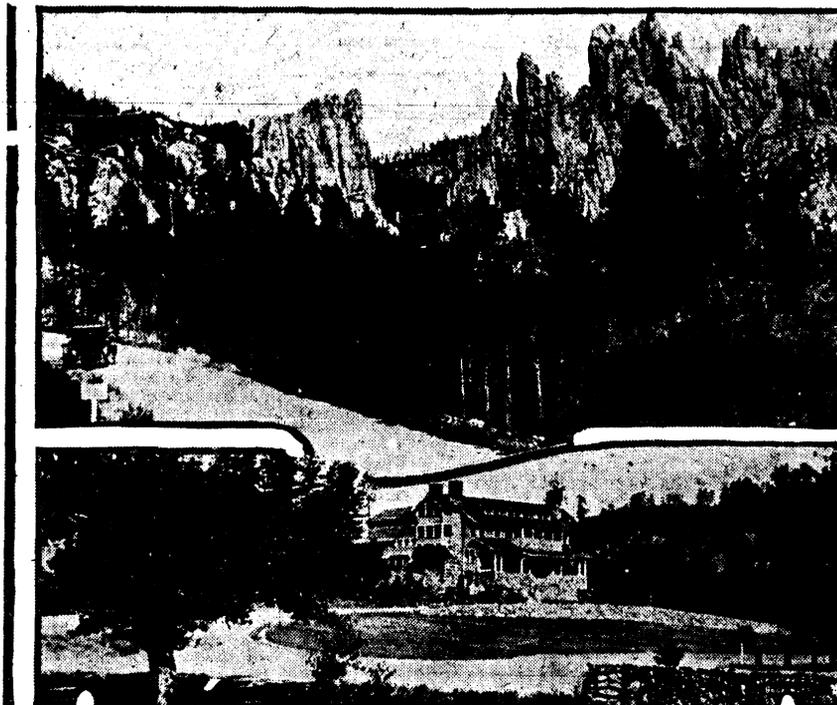

Lieuts. F. B. McConnell and C. Anderson of the army were killed during the attack on Langley field when

standard as her European neighbors. Germany notified the ambassadors' council that the forts on its eastern frontier had been demolished, as required, and demanded that the Rhineland occupational forces be reduced accordingly. France agreed to this provided Marshal Foch be permitted to examine the forts and found the German statement to be correct.

WHILE negotiations for a compromise between Chiang Kai-Shek, Chang Tso-lin and the governor of Shansi province were proceeding, the Nanking Nationalist army continued its advance toward Peking and captured the important city of Haichow near the Shantung border. The southerners, according to reports, "committed robbery and outrage in wholesale fashion." Gen. Feng Yu-hsiang has pledged allegiance to the Hankow faction of the Nationalists and has been given command of its drive on Peking. Roger Green of the Rockefeller Foundation at Peking, accompanied by 29 physicians and nurses, has gone to Hankow to help in the care of some 12,000 wounded soldiers gathered in hospitals from the Honan battlefields. Antagonism against the Japanese is steadily increasing in southern China and it is still feared they are planning to reoccupy Shantung province in order to prevent the Nationalists from driving out Chang Tso-lin. Representatives of the Japanese communities in Manchuria have sent to Tokyo demands that the government prevent the civil war from entering Manchuria and Mongolia and that all Japanese investments and nationals there be protected.

IN THE recent elections in the Irish Free State the government secured 46 seats, a net loss of 7, in the Dull Eireann; Fianna Fail (De Valera's party), 44; the Sinn Fein, 5; Labor, 22; Farmers, 11; Independent, 14; National League, 8; and Independent Republicans, 2. President Cosgrave will have only seven fewer seats than at the dissolution of the

Summer White House in Black Hills

Below is a general view of the lodge in the Black Hills reservation in South Dakota, where the President will spend his vacation. The lodge is owned by the state. Above, curious rock formation in surrounding hills.

WHITE ANTS ARE CAUSING DESTRUCTION IN MISSOURI

Kansas City Welcomes Appearance of the Red Insect, Killer of Wood Destroyer.

Kansas City, Mo.—The little red ant, anathema to the property owner and believed only useful in pointing object lessons on industry, at last has been accorded his rightful dues in the sphere of economics.

The red ant, it is said, will kill the white ant, the presence of which in Kansas City became known when two householders complained to O. C. Murphy, commissioner of sanitation, that flooring and floor supports in their homes had been eaten out by the white ants.

The field of the red ant as an eliminator of his predatory cousin is circumscribed, however, and Mr. Murphy abandoned any idea he may have had of employing armies of the red ants after reading the following from an

authority on the subject:

"Red ants will kill the white ants, but they never have the opportunity except under artificial conditions, as the white ants remain under cover at all times, boring tunnels wherever they go."

The white ants, Mr. Murphy said, came to Kansas City from the Pacific coast. They may, he said, have got their tip on the advantages of the Middle West in the public library of San Francisco, which they damaged considerably.

The white ants, or termites, are listed among the most destructive insects of North America. The sudden crumbling of bridges and wharves, caving in of mine timbers and the settling of floors in buildings frequently are caused by the borings of the termites.

"Buildings in San Francisco, Pasadena, Washington, St. Louis, Cleve-

land, New York and Southern cities frequently have been damaged seriously by the ants, Mr. Murphy said. In Boston recently cases were reported in which furniture in buildings had sunk through the floors mined by the ants.

The postmaster of Julian, Neb., recently reported the ants had eaten the floor from beneath his piano and that instrument had fallen into the basement.

Fumigation with pure calcium cyanide is the only effective method of killing the pests, Mr. Murphy said. The cyanide, in powder form, is sprinkled on papers laid on the floor and immediately HCN gas, one of the most deadly known to mankind, starts evolving.

Suzanne Spends It

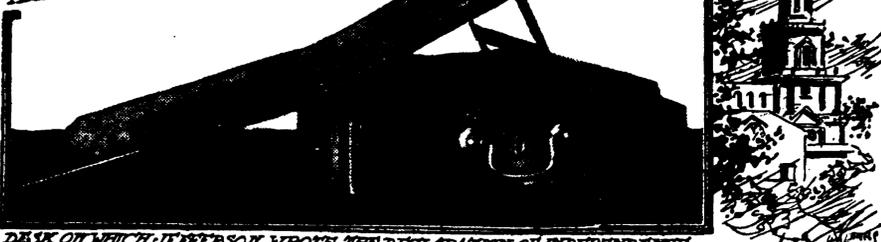

St. Cloud, France.—Suzanne Lengten is now a philatelist. She has been buying stamps with some of the beaucoup francs she made playing tennis in the U. S. A. In four days she bought \$4,000 worth. Mr. Baldwin helped her.

JULY 4, 1776

Fiction and Fact

CHARLES THOMSON

DESK ON WHICH JEFFERSON WROTE THE DECLARATION OF INDEPENDENCE

By ELMO SCOTT WATSON

ASK the average American what took place on July 4, 1776, and he, with a somewhat vague recollection of what he once learned in the history books at school and a similar remembrance of what he saw in the painting "Signing the Declaration of Independence" by John Trumbull, probably will answer you in something of this fashion:

"Why, that was the day that we declared our freedom from England, when Thomas Jefferson, the author of the Declaration of Independence, wrote that immortal document in which he said that all men are born free and equal. After he had written it he presented it to the Continental Congress and John Hancock signed it in that bold handwriting which the king of England could read without spectacles. Then the members of Congress, Washington and Franklin and John Adams and all the others signed it. After that they read it to the people outside Independence Hall and the patriots cheered and rushed away to ring the Liberty bell until it was cracked."

That, of course, is a rather free translation of a composite American idea about the historic events which gave us our greatest national holiday, the one hundred fifty-first anniversary of which is being celebrated all over the country on July 4, 1927. Like so many other composite ideas, usually characterized as "popular beliefs," it is also a composite of fiction and fact. Despite all that has been written about the Declaration of Independence and the signing thereof, few Americans, unless they be professional historians, have a clear-cut idea of just what did take place on that day. And even among the professional historians there is some disagreement, caused by difference in the interpretation of words and phrases. Here are a few facts and a bit of chronology which may make the matter clearer:

Richard Henry Lee certainly has some claim to share the title of "Author of the Declaration of Independence" with his fellow Virginian, Thomas Jefferson, for on June 7, 1776, he presented to the Continental Congress his resolution which begins:

Resolved, That these United Colonies are, and of right ought to be free and independent States; that they are absolved from all allegiance to the British Crown and that all political connection between them and the State of Great Britain is and ought to be totally dissolved.

This, as one historian has pointed out, was a "pure declaration of independence." It was promptly seconded by John Adams of Massachusetts, but when considered by a committee of the whole, no action was taken upon it because some of the members felt that the colonies were not yet ready for so radical a step. On June 10 Congress voted to postpone final action on the resolution until July 1. On June 11 a committee composed of Thomas Jefferson, Benjamin Franklin, John Adams, Roger Sherman and Robert R. Livingston was appointed to prepare a formal declaration of independence and have it ready in case it was wanted.

It was at the time of the postponement of action on a resolution of independence that Franklin uttered one of his most famous sayings. When the postponement was proposed, in order to give certain delegates time to receive instructions from their colonies as to what their attitude toward independence should be and to make sure of the necessary unanimity of action on the matter, Franklin remarked dryly, "We must all hang to-

gether or assuredly we shall all hang separately."

When the committee came to decide who was to write the Declaration, it was finally agreed that Jefferson should do it. It is said that Jefferson explained to Franklin the reason why he, as their senior, was not asked to write it was that it was feared he could not resist the temptation to put a joke into it, and the Declaration was serious business! Although stories differ on the manner of selecting the writer, the fact remains that Jefferson did write the first draft and the desk upon which he wrote it (shown above) is still preserved. It is interesting to note that this desk was for a long time in the possession of a man named Coolidge, John Coolidge of Boston, and at his death by his will it passed into the custody of Congress.

This first draft of the Declaration, which is often reproduced, shows also the handwriting of Franklin and Adams who made a few minor corrections in it. Jefferson later gave it to Richard Henry Lee and in 1825 his grandson presented it to the American Philosophical Society of Philadelphia, which later entrusted it to the custody of the patent office in Washington. After Franklin and Adams had made their changes on the first draft, Jefferson wrote a second copy, incorporating their amendments, and presented it to the committee which reported it unchanged to Congress.

On July 1, the date set by Congress for considering a declaration of independence, the original resolutions offered by Richard Henry Lee first came up for consideration before Congress acting as a committee of the whole. The formal vote was taken the next day, July 2, and the resolutions were approved by a two-thirds vote. Delegates from Delaware, Pennsylvania and South Carolina voted in the negative and those from New York, having no instructions from their colonies, did not vote. So under one interpretation, July 2 should be Independence day, for it was on that date that the colonies declared their independence and the declaration of independence which they adopted through their representatives was that written by Richard Henry Lee instead of Thomas Jefferson and was not the document so revered by Americans at all!

In fact, if the suggestion of John Adams had been followed, we would now be celebrating on July 2 instead of July 4. In commenting upon the momentous act of adopting Lee's independence resolution, Adams said, "The second day of July, 1776, will be the most memorable epocha in the history of America. . . . It ought to be commemorated, as a day of deliverance, by solemn acts of devotion to God Almighty. It ought to be solemnized with pomp and parade, with shows, games, sports, guns, bells, bonfires and illuminations, from one end of this continent to the other, from this time forward, forevermore."

July 3 and 4 were spent by Congress in discussing the draft of the declaration of independence presented by Jefferson, acting for the committee. There was a lively debate which ended in the striking out of the paragraph accusing King George of "piratical warfare" and a few other comparatively unimportant lines. Then on July 4 the delegates from 12 colonies who had been authorized to vote for independence agreed upon the final draft, after the amendment had been incorporated, which was to be printed that night in the form of a poster by John Dunlap, a printer, for public distribution. The significant feature of this poster, according to one historian, lies

in the fact that Franklin changed the small "u" in "united" to a capital, making the new nation the United States of America, instead of the United States of America.

As to the signing of the Declaration of Independence, there is where the "popular belief" is most at fault. This Declaration, adopted on July 4, 1776 was signed by just two men, John Hancock, president of Congress, and Charles Thomson, secretary. "Charles Thomson—never heard of him!" the average American would say. Yet for all that he is neglected by history he is an important character. He was secretary of both the First and Second Continental Congresses. And it was he who first read the Declaration to a group of patriots. According to one story this took place on July 4 when he stepped outside the statehouse, as soon as he and Hancock had signed the document, and read it to a handful of citizens who stood around and who made no extraordinary demonstration thereat. According to another account, this did not occur until July 8, after Congress had sent copies of the Declaration to the various colonies. Pennsylvania, of course, got her copy first, and at noon on July 8 Thomson stood on a wooden platform in the statehouse yard—it had been placed there incidentally in 1769 to enable an astronomer, one David Rittenhouse, to observe a transit of Venus—and read the Declaration to a vast crowd of citizens. These citizens cheered the reading, then sped away to pull down the royal arms in the courtroom and to ring the Liberty bell. As for the fiction of "ringing the Liberty bell until it cracked," that mishap, however, did not occur until 1835, when it was being tolled for the death of Chief Justice John Marshall.

Now, for the actual signing of the Declaration of Independence. After it had been adopted on July 4, an engrossed copy on parchment for all the delegates to sign was ordered. The man who held the pen and formed the letters on this copy—the one which is preserved today in the national shrine in the Library of Congress—was Timothy Matlack, the best penman in the office of Charles Thomson, secretary of the Continental Congress. It was completed by August 2, and on that date was signed by 54 delegates. Two others signed later. They were Thomas McKean of Delaware, who was absent with his regiment in the Continental army at the time of the signing on August 2, and Matthew Thornton of New Hampshire. Thornton was not elected to Congress until the autumn, but in November he was permitted to sign and thus made the total of the 56 signers of the Declaration of Independence.

As for the other errors in the statement of the average American quoted at the beginning of this article: The phrase "All men are born free and equal" does not occur in the Declaration. That phrase is often confused with the statement "All men are created equal," which does appear in the famous document. The "born free and equal" wording is in the constitution of Massachusetts, framed in 1780, and no doubt inspired by the statement in the Declaration. George Washington, of course, was not a signer of the Declaration of Independence. At the time the Continental Congress was in Philadelphia declaring independence, he was in Cambridge, Mass., welding together that Continental army which was to make good the Declaration. He was a signer of the Constitution after the Revolution and the fact, no doubt, that his name appears on this immortal document leads to the idea that he was also a signer of the earlier important document.

Then try it on the light; the chances are it may do service for several months longer. The fine wires of the filament have a habit of becoming disconnected. By shaking it the parts come together again, making the bulb as good as new.

What Shakespeare Said
Men are April when they woo, December when they wed; maids are May when they are maids, but the sky changes when they are wives.—As You Like It, Act 4, Scene 1.

judgment we form of them is very different from what we form of ourselves. It is therefore a right maxim, to do nothing when you are doubtful whether it is honest or unjust; for whatever is honest is self-evident, but doubt implies suspicion of injustice.—Cicero, "De Officiis."

Light Bulbs
Before discarding an electric light bulb place it on a drop light, turn on the current and shake the bulb, holding it between you and the light.

Education and Energy the Bulwark of the Country Against Radicalism

By IRVING T. BUSH, Founder of Bush Terminal.

THERE is one very reliable bulwark against radicalism of the dangerous and destructive type of business adversity. And that bulwark is intelligence. Our large and growing investment in education is the best possible defense against a lessening of our marvelous prosperity and the inroads of destructive radicalism.

It has been said that the greatest danger to the progress of modern civilization is what is described under the general heading of Bolshevism. There is nothing new about Bolshevism except the name. It is merely discontent with existing conditions.

In backward countries, a revolution may be better than the conditions which cause it. But there should be no room for that kind of discontent in the United States. We are a people who are staking our future on education. And equipped with intelligence, we shall move forward, revolution free, to greater and greater heights of prosperity. Back of our wonderful material triumph is American brains.

We are prosperous because we are intelligent. We are intelligent because we are educated. We are vibrant with energy and the spirit of the adventurer because we have created opportunity and have had the intelligence to permit the men who built this prosperity to enjoy the fruits of their labor.

Intelligence and energy make prosperity, and defeat radicalism.

Evil of Child Labor Must Be Combated Through National Legislation

By WILLIAM GREEN, President A. F. of L.

Since the United States Supreme court knocked out the federal child labor law as unconstitutional, the number of children between the ages of ten and sixteen years working for wages in the United States has increased over 2,500,000.

The successful drive of the reactionary forces in Congress to repeal the federal maternity act is to be deplored and I pledge the Federation of Labor to vigorously oppose the same group in its plan to block child welfare legislation and cripple the children's bureau.

Child labor is a national problem requiring the application of a national solution. It should be dealt with through the enactment of uniform legislation, and this can only be done through the exercise of constitutional authority conferred upon the Congress of the United States. If the nation is to be completely saved from the degrading and destroying effect of child labor, it must adopt the child labor amendment to the Constitution. In no other way can we fully and successfully cope with this evil.

Scientific Charity Systems Calculated to Foster Idea of "Statistical Christ"

By ARCHBISHOP MICHAEL J. CURLEY, of Baltimore.

I am getting tired of this scientific system in charity. I don't believe much in it. You are not to attend to the needs of a needy one unless you have an A. B. degree; you are not to engage in ministering assistance to those who need it unless you have written a thesis on this or that or have had two years' experience in such work before entering the field of welfare. I fear there is a great danger that the gentle Christ may be thus made a statistical Christ; that the great, warm-hearted, man-loving Christ may become a pale, nebulous Palestinian ghost through the tendency to introduce over-scientific methods into charity.

I would urge the Christ Child society to continue in a practical and religious manner the administration of charity as a part of the faith that has come down as a heritage of the Christian religion from the early days, when pagan onlookers were attracted to Christianity by the charity of Christians open to another, and when the words, "See how they love one another," were commonly heard as expressions from pagan lips looking on Christian lives.

Menace of Divorce Removed by the Teaching of Birth Control

By JUDGE BEN. B. LINDSEY, Denver.

Teaching birth control would do much to eliminate the present alarming menace of divorce. The real difficulty is to be found in those causes which produce divorce. Some of us are fighting the causes of divorce, while most churches are wasting their time fighting divorce. In recent years they have largely given up efforts to fight the causes of evils in society in a frenzied devotion to the supposed virtue of coercion, censorship, prohibitions through laws, laws, and more laws. Happily, this younger generation, so much wiser, franker, cleaner-minded and more moral than the older generation, will find some way to take the hypocrisy out of our marriage and divorce problem.

The only practical way out of the difficulty would be the establishment of state boards of advice that young people could come to before marriage and after marriage for learning and advice. The board would have no connection with the church. It would operate under the state. When a couple wanted a divorce they would go to the board and try to settle their difficulties.

Cost of Crime Imposing Staggering Burden Upon the United States

By JUSTICE PRICE GILBERT, Georgia Supreme Court.

Figures gathered from a reliable source show that there are no less than 2,000,000 criminals at work in this country, and it is estimated that the business done by them in their various avenues of crime amount to \$10,000,000,000 each year and the estimated annual cost to suppress crime and administer justice in the country is \$16,000,000,000.

When it is known that the total amount loaned the allied countries of Europe by the United States during the late war amounted to \$12,000,000,000 some idea may be gathered of the enormous cost to this country in combating crime.

It is the duty of every Christian to back up this government and wipe out the criminal class. America can come out from the shadows of this crime wave. It has met and overcome greater obstacles before. In the early colonial days the settlers overcame flood and field and built this great country and the same blood that flowed in the veins of those stalwart pioneers courses in the veins of the present generation.

FARM STOCK

DIPPING IMPROVES HEALTH AND WOOL

Dipping sheep immediately following shearing to control ticks, lice and scab reduces the feed cost and increases the quantity and quality of the wool.

"The operation is simple, effective and inexpensive," says R. S. Curtis, animal husbandman at the North Carolina State college. "A sheep that is constantly harassed by ticks, lice or scab, cannot do as well either for itself or for the lamb. If the flock is large, a dipping tank is needed, but for the small flock any vessel large enough to immerse a full-grown animal, is sufficient. Purchase a sufficient quantity of a standard sheep dip and mix it according to directions on the package. Cheap concoctions injure the wool growth and hurt the quality of the fleece."

Professor Curtis warns against the use of such materials as a lime-and-sulphur dip, kerosene emulsions, or anything of such nature. These may be effective but they are likely to be injurious.

Every good sheep grower dips his flock, states Professor Curtis. This should be done preferably ten days to two weeks following shearing. The flock has then passed any danger of cold or pneumonia resulting from having the wool removed. The weather has usually warmed and the dip is more effective after the wool has been clipped.

There are certain precautions to be observed, he states. Do not dip on a cold, rainy day. Wait until the middle of the forenoon and quit in time that the last sheep will be dry before night. Do not permit the lambs to nurse before the mother dries thoroughly. If the animal does not have scab, immersion for one minute is sufficient. In case there is scab present, break the scab before dipping and immerse for two minutes, dipping the head under at alternate periods.

Shipping Suggestions for Hogs in Summer

During the hot weather season haul or drive your hogs into the shipping stations in ample time to allow them to become rested and cool before loading.

Insist upon a clean car bedded with sand.

Wet down the bedding and interior of the car before loading.

Give only a light grain feeding before shipping.

Load not more than one hour before the train is to depart.

Load carefully and avoid excitement.

Load not to exceed 16,000 pounds in a standard 36-foot car.

Have cars drenched at every available point immediately after the train stops. Notify agents of this when signing contract.

Suspend ice bags from the car roof—using gunny sacks whenever possible. Six bags to a car is enough.

Grinding Ear Corn for Growing Pigs Is Waste

The labor and expense of grinding ear corn into corn-and-cob meal for growing pigs will be wasted. In fact, it has been shown by feeding trials at the Iowa experiment station that pigs made larger and more economical gains on ear corn than on corn-and-cob meal. The latter contains too much hard fibrous material which the pig's digestive tract apparently cannot utilize very well. Larger and cheaper gains will be secured by feeding skim milk or buttermilk in addition to ear corn on clover pasture. Where this is not available, a mixture of equal parts of tankage and linseed meal is an excellent supplement to corn and pasture. This mixture may be self-fed with shelled corn, free choice, in separate compartments of a self-feeder.—H. J. Brant, Wisconsin College of Agriculture.

Live Stock Squibs

One of the big little points of horse care is salt.

The outlook for sheep raising is said to be good.

Lack of sufficient protein and minerals causes sows to produce unthrifty litters.

Swine growers in 29 states produced 808 ton litters in 1926, says the United States Department of Agriculture. Tennessee placed first with 121 litters.

Pure-bred meat animals cost slightly less than scrubs to raise to maturity; pure-bred dairy cattle cost slightly more.

If you have a surplus of pasture, you can make a good investment by buying young animals that are thin to flesh. They fatten them up until fall.

Sheep are fastidious weed killers. They eat over eighty known species of weeds, and although not as good brush eaters as goats, one clean light brush land in a very few years.

HONESTY

For, to concern ourselves in other people's affairs is a delicate matter. Yet Chremes, a character in Terence, thinks that there is nothing that can befall mankind in which he does not think he has a concern. Meanwhile, because we have the quicker perception and sensation of whatever happens unfavorably or untowardly to ourselves, than to others, which we see as it were at a greater distance, the

SWEET ROSIE O'GRADY

This picture will show at the Temple Theatre, Howell, on Friday, July 1. The story concerns the discovery of a wife on the door step of the pawn broker, Ben Shapiro who becomes her guardian. Patrolman Jimmie Brady is a daily caller and the child grows up nourished by their love, the scope of her whole life limited by the environs of Second Ave. How she meets the son of a wealthy family, wins his love and is humiliated and finally emerges victorious, combines to build not only a song that sent its wistful notes down through the years, but a story that has never been quite forgotten. Owing to its tender appeal to the human nature in staging the picture the customs and costumes of the early nineties have been followed as much as possible.

GET RIGHT AIR PRESSURE

"If motorists would only realize the importance of keeping tires inflated to the correct pressure, they would get much greater mileage and have less trouble with their tires," according to F. Slayton of Slayton & Parker, Firestone dealers in Pinckney. "This is especially true of balloon tires, for when used with even four or five pounds less air than they should carry, the loss in tire life amounts to hundreds of miles. Every motorist should know the correct air pressure for his tires and can get the information from his dealer. "We recommend having the air checked at least once a week. It is an easy matter to stop at our place and have one of the men check the air pressure and inflate the tires if air is needed. This service is free to every one in this place. "It will help in maintaining proper air pressure, if the valve is always screwed down tight, the cap turned as far as it will go and a dust cap used to keep the valve in good condition."

BALL GAME HERE SUNDAY

The Pinckney Independents will play the Darlington team of Ann Arbor at Pinckney on Sunday, July 3. Game starts at 3:30 P. M. A large crowd attended last Sunday and one is expected at this game. The home team has a good record having won 5 and lost 2 games up-to-date. Come to the game we need your support.

NEIGHBORING NEWS

Fenton will hold a big home coming on July 2, 3, and 4.

Nelson Yelland who recently took over the Palace Meat Market at Howell has sold it to W. U. Eager Jr.

Frank Nixon, Dexter, Mich was the first Washtenaw county farmer to receive his corn borer check. He cleared 28 acres.

Frank Williams, a section hand at Chelsea was instantly killed near there when he was struck by the fast silk express on the M. C. tracks.

A company of 46 farmers at Stockbridge have banded together and purchased a Belgian stallion.

Work on the new football stadium at Ann Arbor is progressing nicely and it is expected to be completed in time for the Ohio State game. The seating capacity will be 90,000.

Charles Smith of Howell township won the free trip to the Michigan State Fair. His standing at the recent eighth grade examinations was the best. 198 received diplomas.

The Hotel Lincoln at Brighton has changed hands again, Thomas Leith, its former owner having repurchased it of W. W. Easterly.

FIRST COUNTY VOUCHER

Word has been received at the County Agents office that Wm. F. Newton, a farmer in Handy township, is the first farmer in Livingston County to receive a corn borer clean-up voucher sent from Washington D. C. for clean-up work done on 40 acres. It will be but a short time now before all the farmers are reimbursed for their work.

VALEDICTORY "Golden Moments"

Delivered by Elizabeth Bekros

Indeed, these are golden moments but they are fast fleeting. We, the class of 1927, wish to express our gratitude to all those whose earnest endeavor has made it possible for us to be here tonight. We are gathered here for a twofold purpose; to express our gratitude and to extend a last greeting. Our hearts are filled with happiness—happiness intermingled with sadness and we are unable to discern which is uppermost in our thoughts. Why shouldn't we be happy when we have reached a new avenue of life? Why shouldn't we be sad when we must part—part forever from our dear old school? But its sweet memories are ours—all our own. Within her peaceful walls we have had the chance to learn "the best that has been thought and known in the world." But whether we are or are not saying goodbye to each other, we must admit we are saying goodbye to the old high school days. We have promised ourselves a reunion, and are looking forward to it with hope of reviving the memories and awakening the spirit which we had in days gone by, but we know they cannot be the same, for it will be only memory, memory. And now, in what manner can we express the highest evidence of our friendship and interest in each other? Shall we desire greatest success and immunity from sorrow? No—that would be in vain for we must look forward to inevitable shadows which are bound to come our way. Nevertheless we can rejoice that we have had one of the greatest privileges of an education. The responsibilities and opportunities of these four long, yet short years have passed away never to return again. But we are prepared to take up another task for we hear the voice of Duty calling. We are glad that the man with the high aim and unselfish ambition, who longs for the ideal things of life, knows no defeat or failure. We are thankful to have learned of the noble lives after which we may pattern our own and from whom we gain inspiration. The knowledge of their lives and experiences will help us to see beyond the dark hours of our own lives. But friends, we realize now as never before that words are like leaves and we cannot verbally express our sentiments. Members of the school board; we your debtors, must take leave of you also. But we must pause to extend our heartiest thanks to you who have preserved for us a much-treasured place—treasured because within its walls we have unfolded the wonders and mysteries of this marvellous universe, we have solved our problems, we have heard both the cares and pleasures of our Alma Mater and now—Farewell. Dear Parents and Esteemed Faculty! We feel our indebtedness to you for your tender care, your guidance, your very lives. Our achievement is a result of your labor, your thoughtfulness, your kindness, we realize that although we are unable to repay you, there is someone who can and we will intrust it to Him. Beloved Faculty: With heavy hearts, we your disciples turn our thoughts toward you. Our hearts are grievous because we have fallen short of returning our debt for the endless labor you have exercised or our welfare these four years. We take this opportunity to humbly ask your forgiveness because we conceive that sometime during our career, perhaps unconsciously, we have caused you much unnecessary heartache and sadness. Again we ask your forgiveness but we have only to beg that, when we leave, you can cherish the thought that you not only made us what we are, but, inasmuch as you lived you have contributed to the welfare of all, you have done both for us and society, the greatest and holiest service possible in the world, you have prepared us for the hardships of life. But now—"Au Revoir." Members of the undergraduate body: We must take our last formal leave of you who have been fellow students with us here. The duties which once were ours we have left for you. May you take them as a solemn trust. Make our high school what it may be made—a power for good among the forces tending to uplift humanity. And as you accomplish that which we have failed to do, may it aid you to know that you have with you the heartiest sympathy of those whose place you will eventually take, we now bid you "Adieu." Classmates: The hour of parting has drawn nigh but it is not forever. As we have reached the conclusion of our high school career, leaving behind friends and our beloved place of learning—indeed—leaving each other, we are about to enter a new school, the school of experience. Should we be sad? Nay—for with education as our armor and hope, we are launching, not anchoring, the Ship of Life. We will brave the storms on our way because we have developed strength of character. This is merely a preparation for "lives broad field of battle." Tonight we must make a grave decision—we must make a choice of our life work, and after we have carefully chosen it, ask ourselves the question: "Can I best serve humanity in this capacity. Let us with all the ambition, power, and talent we possess, do everything in our power for the advancement of mankind, for after all, that is our mission. Comrades, we have met for the last time, our hearts drooping at the thought of parting, but I can say we bravely face the future because we are friends. Our ties are not severed tonight for we have learned that "to know, to esteem, to love—and then to part, makes up life's tale to many a feeling heart." It is not with us. We will love one another in days to come as we have in days now past. And now, loved ones, wishing you all this old world can give of happiness and success, I bid you not merely good-bye but good-morrow. But the last hour has struck and as we cannot linger, we now reverently, sadly breathe the parting words, good-bye.

The mountains preach the gospel of attainment to the valleys satisfied with their sheltered comfort. Our services teach the lesson of sincerity and of financial fairness.

STATE OF MICHIGAN

The Circuit Court for the County of Livingston.
IN CHANCERY
George Putt and Fren E. Putt, Plaintiffs,

vs
Marcia Williams, Lerodonna Northrop, Lucia Tomlinson, Eli Roggies, William A. Williams, and their unknown heirs, devisees, legatees and assigns, Defendants

Suit pending in the Circuit Court for the County of Livingston in Chancery at Howell, Michigan, on the 9th day of June, 1927.

It appearing from the sworn bill of complaint as filed in said cause, that the plaintiffs have not been able after diligent search and inquiry to ascertain whether the said defendants are alive or dead, or where they may reside if living or if they have any personal representatives or heirs living, or where they or any of them may claim or lien or possible right of these defendants have been assigned to any other person or persons, or whether such title, interest, claim, lien or possible right has been disposed of by will by said defendants.

And it further appearing that the plaintiffs do not know and have not been able after diligent search and inquiry to ascertain the names of the persons who are included as defendants without being named.

Upon motion, therefore of Don W. Van Winkle, attorney for plaintiffs, it is ordered that the above named defendants and their unknown heirs, devisees, legatees and assigns cause their appearance to be entered herein within three months from the date hereof and that in default thereof said bill be taken as confessed by said defendants and each and all of them.

It is further ordered that the plaintiff's cause this order to be published within forty days in the Pinckney Dispatch, a newspaper printed, published and circulating in said County, once in each week for at least six successive weeks.

A true copy
John A. Hagman, Clerk
J. B. Munsell Jr., Circuit Court Commissioner for Livingston County Michigan

The above entitled suit involves and is brought to quiet title to the following described lands, located in the Township of Unadilla, Livingston County Michigan, and more particularly described as follows, to-wit:

The southeast quarter (1/4) of the northwest quarter (1/4) and the southwest quarter (1/4) of the northwest quarter (1/4), also a piece of land commencing at the northwest corner of section number thirty-three (33) said Township and County, running thence south along the section line eighty (80) rods, thence east one hundred ten (110) rods, to the center of an old road, thence north on the line of said road to a stake about three (3) rods south from the center of Portage Creek, thence in a northerly line fifteen (15) rods to a stake near the west corner of the mill pond on said section; thence following the water's edge to the north line of said section; thence west to the place of beginning; also a piece or parcel of land being about one (1) acre of land on the northeast corner of the northwest quarter (1/4) of the northwest quarter (1/4) of section thirty-three (33), being that portion north of the Creek; also a part of the northeast quarter (1/4) of the southwest quarter (1/4) of Section thirty-three (33) being about seven (7) acres off the southeast corner of said land; all being in Section number thirty-three (33) in Township one (1) North, Range three (3) east, Livingston County, Michigan. Also lots numbered four (4) five (5), six (6), seven (7), eight (8), nine (9), ten (10), and eleven (11) of Block Three (3) of the Village of Unadilla, also known as the Village of Williamsville, Livingston County, Michigan.

Also ten (10) acres of the east end of the south end of the west one half (1/2) of the northwest quarter (1/4) of section twenty (20) except land deeded to railroad, Town one (1) North, Range three (3) west, excepting the outlet to Williamsville Lake, also a strip of land (2) rods in width on each side of said outlet.
