### Crone Case Postponed, Barker-Bennett Jury Disagrees, White and Melott Get Judgement Against Storm

Court adjourned Friday until March 21, at which time Judge Collins will return. The case of the People vs. Wm. Crone of Patterson Lake for liquor possession was put over until then. Two cases were given jury trials last week. The case of A. D. Bennett vs. Robert Barker ended in disagreement. The jury stood about 7 to 5 for Barker. Barker rented an auto sales room of Bennett for a term of years. He later sold out to R. A. Ransome who moved out before the lease expired. Bennett sought to collect the balance of his rent from Barker. Orval Smith and Bert Hicks of Putnam were on this jury.

Saturday the suit of George B. Melott and Owen J. White vs. Arthur Storm of Detroit for \$800 due for labor on the Latson oil well in Genoa started. These men also worked on the Glennbrook well here last summer.

It seems the men started working as drill men on this well, June 25, 1930, and were to receive \$10 per day, being hired by one Henry W. Arbaugh and worked until August without receiving any pay. About this time according to the testimony of Melott, Arbaugh faded out of the picture and one Arthur S. Storm, of Detroit, became the contractor in charge. The men refused to continue working unless paid and a Mr. Keith who was personally in charge of the work promised the back pay if they would continue under Storm, which they did for three days, namely, September 6, 11 and 12 but only received a check of \$10 in payment. At that time Melott said he had \$510 due him, the work being discontinued.

The men brought suit against Storm for the full amount. Storm, it seems, held the oil lease on the Latson property and Arbaugh was the contractor who placed Mr. Keith in charge of the drilling. Melott said he had worked at oil drilling for 30 years, in Ohio and West Virginia before coming here where he also worked on the Glennbrook well in this county. He is a tool dresser by trade, and since leaving the Latson well has been working at the Zeeb oil test well near Chilson.

The suit was started as two separate ones by Melott and White but upon motion of H. R. Smith, counsel for the plaintiff's was heard as one. Shields and Smith represented the plaintiffs and Jay P. Sweeney, prosecuting attorney of this place was counsel for the defendant. Eleven men and one woman, Mrs. Arthur Roylan of Brighton, served on the case.

The jury was out 30 minutes and gave a judgement for the full amount plus interest to the date of the trial. The case was interesting as it involved considerable oil law and other legal situations.

### MASONIC & O. E. S. BANQUET

A free banquet will be given on Wednesday evening, March 25 for the Masons and Stars of Pinckney and vicinity. An interesting program will follow banquet. This in turn will be followed by a dance. All Masons and Stars of this vicinity invited.

### PHILATHEA S. S. CLASS

The class postponed its meeting at Mrs. Jesse Henry's last week, but a good attendance is expected there today.

The interest in the Sunday session together with the Ladies' Bible Class has been very encouraging during the weeks of winter. Last Sunday and even the stormy one before were not exceptions and we trust that on the coming Sunday as we study the topic, "The use and abuse of God's Gifts" we may meet the temperance problem squarely, from a Christian standpoint. The lesson is from the twelfth of Luke. Questions are often held over the further research. We have one such for next Sunday: "Mary of Bethany. Was she one of the Mary's who came to the tomb to anoint the body of Jesus?"

We are in receipt of the splendid new catalog of the Baroco Philathea Publishing Co. It's an inspiration just to glance it through and see the many good helps for class work.

## He's Gone

## Two Livingston County Pinckney Church Residents Pass Away

### Mrs. Elmer Book and Mrs. Ross Hinchey Depart from this Life.

### MARGARET ESTHER PAINTER

Margaret Esther Painter, daughter of Peter J. and Margaret Painter was born at Fostoria, Ohio, April 12, 1857 and departed this life March 12, 1931. Of a family of 8 children. All have now preceded her to the better land. She was married to George S. Poole, May 22, 1879. To this union six children were born, Chas. P. of Eugene, Oregon, Peter J. of Howell, Cleve G. of Gregory, Thomas J. of Detroit, Grace M. Hill of Detroit, and Gladys M. Gordanier of Pontiac. George S. Poole departed this life, March 8th, 1901. April 3, 1902 she married Elmer M. Book of Pinckney.

George S. and Margaret Poole began housekeeping in Genoa twp. and lived there 15 years. They then purchased the Shields farm in Unadilla twp. and this was her home for 37 years. And being a splendid cook nothing gave her greater pleasure than serving meals and making welcome whoever came under her roof.

Left to mourn our loss are her husband, six children, 8 grandchildren and a host of friends. A good woman has gone, kind hearted and true.

The funeral was held from the home Sunday at 2:00 p. m. Rev. Slaybaugh of the Gregory Baptist church officiating. Burial was in the Pinckney cemetery.

### MRS. ROSS HINCHEY

Katherine O. Webb, daughter of Rollin A. and Ella L. Webb, was born in Putnam near Pinckney, Oct. 4, 1882 and departed this life, Mar. 10, 1931, after a long illness which she patiently suffered. February 15, 1905 she was married to Ross Hinchey, also of Putnam. To this union were born three children, M. L., Velma, and Harold.

Her entire life has been spent in this one vicinity. In early life she attended the Pinckney Public School and was also an attendant and helper in the church until failing health prevented. She was of a very quiet and genial disposition, always working for the interests of her home and family and those about her by whom she will be most sadly missed.

Besides her husband and children she leaves to mourn her parting her father, Rollin G. Webb, one brother, George, and two sisters, Mrs. Nellie Briggs of Howell and Mrs. Edna Hicks, near Lansing and a host of other friends and relatives.

Funeral services were conducted at the R. G. Webb home by Rev. Esic Friday at 2 o'clock. Interment was in the Pinckney cemetery.

Mr. and Mrs. Louis Monks and the Misses Fanny Monks and Nellie Gardner were Detroit visitors Monday.

Bert Hoff and wife of Howell were Saturday callers at the home of Mrs. Eliza Gardner.

Mr. and Mrs. George Reason of Detroit were Sunday guests of Mr. and Mrs. Norman Reason.

Mr. and Mrs. John Martin, son, Lemuel, and Billy Martin attended a birthday party honoring Fred Bortz of Ypsilanti Friday evening.

Mrs. Elmer Book's passing takes one of our faithful members of the Home Department.

The church will share in making a free will offering at Easter to help make up those churches where the financial depression will not let them give as before.

Sunday an opportunity will be given those who desire to become either regular or associate members of the church, and also those who desire to take a stand for Christ, to make their desires known. There seems to be those who accept Christ as their Saviour, who have not yet attended the ordinance of baptism, neither have they come within the pews of the church. Others who are members of churches other places where they can not attend, to such we would offer you a home with us.

Class No. 7 and 5 are running close, with 7 in the lead for winning the banner in attendance for next month.

### CARD OF THANKS

We wish to thank our friends and neighbors for their many acts of kindness during our bereavement. Also for the many beautiful floral offerings and Rev. Esic for his kind words.

"I'm having wonderful success with my ELECTROCHEF\* electric range"

"I BAKED A CAKE that was the NICEST I EVER MADE"

"Baking with my Electrochef is a wonderful experience. It's so delightfully simple, and there's no guesswork. The automatic oven makes baking easy. The very first cake I baked in my Electrochef turned out perfectly. It was light and fine-grained and tempting—one of the nicest I've ever made. Electric cooking is certainly marvelous. Now I can be sure of consistent baking results every time, without fail. I'm glad I discovered electric cooking with the Electrochef electric range."

\*A study of one thousand families using the ELECTROCHEF electric range showed a cooking cost of less than one cent a meal a person.

ELECTROCHEF'S CASH PRICE IS \$105 INSTALLED including all necessary wiring, \$10 down, \$6 a month; small carrying charge. Sales under these conditions to Detroit Edison customers only.

NEIGHBORING NEWS

The timely arrival of Mrs. C. I. Cook and daughter at their home at Fowlerville recently saved the life of C. I. Cook, coal dealer. He was home sick. In some way a gas jet got turned on and his wife and daughter returning from Lansing found a gas filled house.

The city of South Lyon lost the case against the township of Lyon in a decision given by Judge Doty Friday. The city sought to compel the township to repay a portion of the highway improvement tax for the years 1925, 1926, 1927 and 1928 which was claimed to belong to the village. The court held that inasmuch as the former village officials made no protest during those years it was neither fair nor equitable to compel the township to spread another tax at this time.

BLACK AND DARK SHADES PREDOMINATE

Black and dark shades are playing an important part this spring in automobile finishes, according to reports from Oldsmobile factory officials, which indicates a style trend toward softer and more subdued shadings than has been apparent several years.

"Possibly the more extensive use of chromium plating on exterior fittings may account for this tendency toward darker finishes," says the report. "Chromium plating, which holds a lustrous blue-white finish during the life of a car, has increased effectiveness when given a dark background. We are using chromium plating on headlamps, bumpers, and cowl and hood beating on all 1931 Oldsmobiles.

"More pronounced colors continue in demand for the sport model cars. Even here, black in being used to advantage as a contrasty secondary trim color.

"The same close attention to style of finish is being displayed by the buying public in interior fittings. Oldsmobile offers a choice of whipcord or mohair upholstery and reports from the field indicates that many are taking advantage of this opportunity to select their preference. Women are particularly keen for the whipcord, admiring its softness and luxuriousness of appearance.

"Style trends in automobile finishes are just as pronounced as are those of women's habiliments—in fact it is quite probable that the two are inter-related. This would explain the preference for quieter coloring at this time when women's styles are becoming more feminine."

ENTERTAIN DAIRY DELEGATES

Delegates to the Livingston County Dairy Producers Conference at Howell on March 28 will be dinner guests of the Howell Chamber of Commerce, according to L. H. Crandall, secretary.

The results of the Dairy Producers Conference a year ago were so satisfactory that local business men are again extending this courtesy to visiting delegates from all parts of the county. They feel that the dairy industry of the county can benefit greatly from adopting the recommendations of the conference and this will result to the good of the whole community.

The 25 delegates will meet on the Wallace Agricultural Conference grounds which will be spotted near the Ann Arbor station. The meeting will open at 9:45 a. m. and continue until 12:30 p. m. with an hour's intermission at noon when the entire conference will be guests of the Chamber of Commerce.

EXTENSIVE DAIRY SURVEY

A county-wide survey is being made in Livingston county in preparation for the Dairy Producers Conference at Howell on March 28. Every dairy in the county is being interviewed by an official delegate taking notes of the own school district, says the county dairy specialist from Michigan State College.

The information when completed and compiled will give an accurate record of the dairy situation in the county. Among other things it includes the number of dairy cattle and other kinds of live stock and the acreage of the hay and pasture crops used to feed this livestock. It is expected that the delegates will find the results of the survey valuable in making their plans at the conference as it will give an accurate cross section of the dairy, livestock and feed situation.

As far as is known this is the most complete survey of its kind ever attempted in Michigan. Similar surveys are also being conducted in Benzie, Manistee, Wexford, Missaukee, Osceola, Clare, Isabella, Grand, Clinton, Shiawassee and Livingston counties in preparation for their dairy profits conference.

Elastic Clause

Clause 18, Section 8, of Article I of the Constitution is called the Elastic clause. It reads as follows: "The congress shall have the power . . . To make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the government of the United States, or in any department or officer thereof." This clause does not give congress a wide latitude in choosing means and passing laws for carrying out the powers granted elsewhere.

All Maryland Territory

The second District of Columbia, which was ten miles square, included a tract south of the Potomac ceded by Virginia. No public buildings were erected on that tract and in 1844, upon petition of the inhabitants, it was reserved by congress to the parent state. The present District of Columbia, which comprises an area of about 70 square miles, was carved entirely out of Maryland territory.—Fairbairner Magazine.

"Tiddlers" Good Fathers

The "Tiddler," in common with the male stickleback fish of every species, has remarkable parental instincts. Building a nest, guarding the ova, watching over the young fry whilst still in the nest, and then, when they are able to leave it, accompanying them as a guard until they are able to fend for themselves. Moreover, during the time that the baby "tiddlers" are in the nest, should one of them, stronger than the others, sally forth "on his own" to see what the world looks like, "papa" is after it like a flash, takes it in his mouth as a nut does a kernel and bundles it back into the nest.

**Father's Little Wish**  
Father and son were walking when the former stopped and picked up a rather nicely made glove. "There's nothing like this," he said to the boy. "I will place it in this railing, and perhaps the owner will return for it."  
They continued their walk, but a little while later the man picked up another glove.  
"Goodness me," he exclaimed, "this is the neighbor to the other glove!" He tried it on. "And my size, too. Runy back. Sonny, and fetch the other glove."

**End of Vandals as Nation**  
The Vandals were a Teutonic race which played a leading part in the disruption of the Roman empire in the fifth century. They overran Gaul and Spain, and crossing to Africa captured a kingdom there under Genseric (A. D. 429); committed all the excesses of barbaric devastation which have made their name proverbial; and wantonly destroyed works of art, monuments, and priceless treasures of literature during the sack of Rome (455). The Emperor Justinian sent Belisarius against them, and after several defeats they were eventually routed (533), and as a nation ceased to exist.

## Boys' Help

During the year 1930 the Bankers' Association of Leaside County, Wisconsin, worked out the finances for a cooperative milk plant, which entailed the raising of \$100,000, and also sponsored an active 4-H Club campaign that culminated in an "Achievement Day" program, in which upwards of 400 young people participated. The increase in the number interested in this work was 200 per cent over the past two year period.

## Had to Produce Proof of Claimed Accident

The man with a black eye and badly scratched face, who was smashing up a new, good-looking motor car with a sledge-hammer, naturally attracted a crowd. He would hit the car, pause, take a deep breath, and hit it again. He aimed blows at the running-board, mudguards, radiator and windshield.

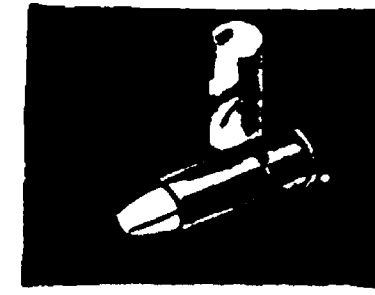

"Your car?" asked a bystander.

"My car," said the man, as he smashed a headlight.

He surveyed the ruin and grunted with satisfaction. Then he handed the hammer to a garage man who, it turned out, had lent it to him—got in the car, and drove off. As he disappeared the garage man explained what it had all been about.

"That fellow got mixed up in a fight last night," he said. "His heady knocked about, so he stayed at a hotel instead of going home. Called up his wife and told her he'd been in an accident. So—the garage man shrugged his shoulders—"so he had to have an accident."

## THE INDIVIDUAL AND HIS BANK

By ROME C. STEPHENSON  
President American Bankers Association

**BANKERS** recognize that their business carries especially heavy public responsibilities and welcome all sound measures to aid them meet the duties this imposes. Unceasing efforts to bring about continually improving methods to safeguard depositors in banks of all kinds have long been uppermost in the plans of bankers' organizations throughout the nation. They are not the outgrowth merely of the past year of business adversity, but have been carried on actively for many years and have resulted in great progress along lines of better, safer banking methods. Although banking along with all business has suffered reverses, conditions in this field have been far less severe than they would have been had not bankers been widely successful in their endeavors to develop the high standards of banking that now generally prevail.

R. C. STEPHENSON

The American Bankers Association and bankers' organizations in every state actively support the principle of government supervision of banking. The national banks, which receive their charters to do business from the federal government, are under the supervision of the Comptroller of the Currency at Washington. Through his efficient staff of expert bank examiners in every section he has the duty and powers to keep watch of the way every national bank is being conducted, to suggest desirable changes in its policies or methods and even to step in and take control for the protection of the depositors if such action is warranted. The state banks, also, which are chartered by the various state governments, are subject to similar supervision and control by state bank officials. In addition, banks in many places have long maintained voluntary clearing house associations which enforce even closer supervision over their members.

**Bankers Favor Public Supervision**  
Present laws adequately enforced contain ample provisions for government supervision. Bankers universally believe in strong, capable banking departments manned by officials with the discretion and courage to enforce these laws and act under them as the common welfare demands. They believe that these public officials should be paid sufficient salaries to command the services of men of character, ability and a resolute spirit of public service. They believe also that the banking departments should be kept free from all political or other special influences in order to be able to act at all times with single-minded independence solely for the benefit of the public interest. Although banks in the United States operating under state or national charters are thus subject to supervision of public authority, they are strictly private business enterprises. They are owned by their stockholders and administered by officials chosen through the boards of directors which their stockholders elect. No bank is owned or operated by the United States Government, nor, with one small exception in a western state, by any state government. The function of government in banking is to promote and enforce careful banking administration through the system of examination and supervision which I have described. This, however, does not relieve the individual depositor from the necessity of judging and choosing carefully as to his banking relations, just as in his other business or professional relations. He must inquire for himself into the character and type of institution and men he shall do business with, satisfying himself as to their reputation, reliability and capability. These qualities are essential to complete the element of safety and dependability in any human institution.

### An Illusory Law

The bank deposit guaranty law in any form is a snare and a delusion, declares a banker in a state where it has been tried, adding: "It is a license and encouragement to irresponsible banks and banking and penalizes capital agency and prudent banking. It creates a sense of security in the minds of the unthinking and uninformed that is false and impossible to be realized ultimately. To compare it to legitimate insurance is without reason and absurd. It jeopardizes the interests of all banks and the safety of all depositors for the theoretical safety of a few. Guaranty schemes always have been, are and always will be impotent, futile and disastrous. It is not new. It has been tried, failed and discarded at intervals for more than 100 years in this country. No well-informed, honest and intelligent mind can accept it in principle or practice. Competent bank supervision and restriction of banks to territory that will warrant sufficient capital investment and accounts is the only sane and proper course and will afford all the guaranty the depositing public is entitled to as compared with all other human affairs."

# ANNOUNCING DIXIE

### PROFIT TO FARMER IN COW TEST WORK

Many Benefits to Owner of Dairy Herd From Membership in Association.

The easiest way known for a farm family to make from 25 per cent to 50 per cent more profit on the average dairy herd, according to the De Laval Bureau of Dairying, is to join a cow testing association. These prosperity-building organizations of local dairy farmers, of which there are more than 1000 in 40 states, have the backing, cooperation and endorsement of the owners of 411,801 cows, every state college of agriculture and the U. S. Department of Agriculture. In these organizations every member is visited every month by the cow tester, who compares the monthly milk yield tests and figures out the monthly

butterfat production of each cow, works out balanced rations for the herd, tests the skim milk from the cream separator to see that the machine is not losing butterfat, etc.

Every dollar invested by the dairy farmer in cow test association work usually returns from 15 to 25 times more profit than money invested in the simplest basis on the market, states the De Laval Bureau. Directly and indirectly the benefits derived from joining a cow testing organization, the personal help and assistance and inspiration they provide makes the small yearly cost of being a member seem a mere trifle. A typical story pointing out one of the benefits of belonging to such an association is found in an item in the monthly report to the Iowa Agricultural college made by Harold Strom, tester for the Montgomery Mills (Iowa) association.

The cream separator of one of his members broke down one day, so he took the milk over to a neighbor's to have the cream separated. To his surprise he found that the milk left

25 of 1 per cent fat in the skim milk. The owner of this separator had produced close to 2000 pounds of skim milk during the month; therefore, he must have lost in the neighborhood of 20 pounds of butterfat worth nearly \$10. How much better off that neighbor would have been had he spent the \$10 which he lost in a single month from an inefficient separator, for joining a cow testing association which would check the efficiency of his separator every month!

There are an untold number of poorly constructed and badly worn separators on farms today that are "short-changing" their owners every time they are used. An effective method resorted to by some farmers to check the efficiency of their separators is to have five gallons from their separator reskimmed in a new separator of known standard quality. Like the neighbor in the above story, quite a lot of them are finding that they have been feeding their stock on skim milk that is entirely too rich for their pocketbooks. See

and to provide the facilities whereby the farmer may make a test of his separator and to furnish information on how a cow testing association can be organized in a community.

#### Habit the Cable-Tow

Habit has been well described as a cable, weaving only a thread at a time, but at last so strong that it cannot easily be broken. Eliminate in yourself every weak and undesirable habit. Take a determined stand for everything which enlarges and ennobles your life. Resolve to live your highest possible life where you are today. Take stock of your habits. Character comes from repeated choice.

### "Grail" Legend Traced to Fables of Antiquity

The origin of the Grail legend was discussed by speakers at the international Arthurian congress at Truro, England. Prof. Roger Loomis, of Columbia university, discussed the Celtic connection of the Grail legend. It was popularly supposed, he said, that this "grail" was the cup used by Christ at the Last Supper, and that the story of the quest was always a Christian story. As a matter of fact, however, the earliest form we possessed of the Grail legend was full of details quite incongruous with a Christian interpretation. It was a reasonable conclusion that this, the most fascinating of legends, gradually evolved in Ireland and Wales, and passed through Cornwall and Brittany to the French. Doctor Lewis, of St. Andrews university, suggested that the source of the Grail story was the famous legend of the House of Atreus, especially the story of Orestes, a younger of his father Agamemnon.

## INDIAN BORN IN CANADA CANNOT HUNT AND FISH

Although a treaty provision permits Indians to cross the boundary between Canada and the United States freely and without immigration restrictions, the treaty does not imply that an Indian is consequently a citizen of both countries.

Because of this fact, an Indian, born in Canada and never naturalized in the United States, is not eligible to obtain a fishing or hunting license in Michigan.

This is in substance an opinion of the office of the attorney general, given as the result of charges brought by the Department of Conservation against George E. Van Every, an Indian resident of Canada, who was found using a resident hunting license.

Van Every was born on an Indian reservation in Ontario and came to Washtenaw county, Michigan, in 1921. At his trial at Ann Arbor, Van Every said he knew he could cross the boundary line between Michigan and Ontario at will. He said he believed that under the treaty he could hunt in Michigan as well as in Canada. He said he did not think he needed a license to do so, but he bought a license "because I wanted to pay the same as anyone else." Van Every was charged with obtaining a license by false statements by claiming residence in Washtenaw county.

Although the federal law recognized the Indian's right to a certain extent, for the purpose of this prosecution, he would have to be considered an alien, even though he comes through the immigration without identification or pass as far as the federal authorities are concerned, the opinion of the attorney general's office says.

A recent decision of the Michigan supreme court held that the Indians are amenable to the same laws as the white man as far as game and fish are concerned.

### Hotel Nears Completion

Advisers from the east indicate that the new Ford hotel, being erected by Henry Ford opposite the Ford Airport at Dearborn, which will be opened soon, will be managed by the L. G. Treadway group, which operates under the corporate name of the L. G. Treadway Service Corporation. The Treadway group now operates 10 hotels, most of which are located in New England.

## BOOSTS C. M. T. C. QUOTA FOR STATE

Dates of the citizens military training camps for 1931 have been announced by Philip Newberry, civilian aide in Michigan to the secretary of war. Mr. Newberry also announced the quota for Michigan has been increased from 1,500 to 1,600. The number of applicants in 1930 was 2,163.

The camp at Fort Brady will be held from July 7 to Aug. 5, and at Camp Custer from July 30 to Aug. 28. Enrollments have started. Both camps will be devoted to infantry training. The camp at Fort Sheridan, Ill., which is devoted to cavalry and field artillery, will be conducted from July 30 to Aug. 28.

Mr. Newberry called attention to the fact that Michigan's quota was filled nearly two months before the camps opened last year and that 663 enrollments above the quota were received. He cited this as a reason for

## FEDERAL PRISON MAY BE BUILT IN WASHTENAW

Two sites close to Milan are being considered as possible locations for a \$200,000 federal prison to accommodate 600 prisoners, it has been learned, J. W. Sanford, of the Bureau of Federal Prisons, having taken the two locations under advisement.

The prison is to be built under the federal program which calls for five prisons throughout the country, to be used to segregate out-of-state prisoners who are awaiting trial for the first time. Persons to appear at the federal courts at Detroit and Toledo will be cared for in the prison to be built in this vicinity. The prison will be located not more than 40 miles and not less than 15 miles from the two cities.

A number of other sites besides those near Milan are being considered, and construction work is to start within three or four months after a definite choice is made. It is understood that a 200-acre plot north of Milan, including the Wilcox and Austin farms, is receiving careful consideration. The government requires at least 200 acres of fertile land, as prisoners will be set at performing farm work while awaiting trial.

## Mainland Visited By Keeper of Beaver Light Fourth Time

When Dominick Gallagher of Beaver island was brought to Charlevoix by airplane, en route to Chicago Marine hospital for medical treatment, it was the fourth time he had been to the mainland in 33 years. His previous visits also were emergency calls. Gallagher is keeper of the light-house at the head of the island.

## Last Marine City Salt Plant Is Wrecked

A crew of wreckers has commenced the job of dismantling the plant of the Michigan Salt works, which has been sold to a Port Huron junk firm. With the passing of the Michigan Salt company, the salt industry disappears from Marine City. There was at one time 11 salt plants in operation here.

## Select Plate Colors

White block letters on a dark blue background will be the color combination for the 1932 Michigan license plates. Committees from both houses of the legislature assisted Frank D. Fitzgerald, secretary of state, in selecting the combination. The 1931 plates, dark red on black, have been much criticized as hard to read.

## D. S. R. Reports Loss

Detroit Street Railway reported January net loss of \$223,879 after charges and sinking fund requirements, as compared with net loss of \$113,385 in January, 1930. Net loss for the 12 months ended January 31, 1931, amounted to \$2,179,605 against net income of \$106,576 in the preceding 12 months. During January a total of 30,650,001 passengers were carried by the city's street cars and buses, against a total of 42,331,548 in January, 1930.

## New Reformatory Cell Block Opened

The large new cell block at the Michigan reformatory, under construction for more than a year, and said to be the largest of its kind in the United States, was opened recently. Fire hazards have been reduced to a minimum. There was scarcely any wood used and the only inflammable material in the entire building, built of concrete and steel, are the mattresses, blankets, sheets on the beds and the wearing apparel of the inmates.

In the new building engines in place only one set of cells on each floor, with a single reinforced concrete hallway the only means of communication between floors. Two rows of 34 cells are built on each floor, back to back, with all cells facing the outside of the building. In front of each row is a 10-foot day corridor. At the end of every eight cells is a rolling steel shutter curtain that can be opened into the cell. When the shutter is open, the long corridor into seven separate rooms, with groups of eight inmates may enter in 10 or 15 hours. These shutters, which cannot both be opened and by hand, are expected to prove beneficial in preventing small groups of inmates should disorder prevail, and in case of fire will be instrumental in confining flames to a small area. When the curtains are rolled up an unimpeded view of the full length of each corridor, 100 feet long, is afforded.

The planned cellhouse, which is not finished, will add to this cellhouse at the north end and run west and will be a duplicate in construction.

## Allegan Postoffice Funds Appropriated

Word that \$90,000 has been appropriated for a federal postoffice in Allegan was received from Congressman John C. Ketcham by Postmaster Vallery W. Ferris. While provision was made some time ago for the building, congress had not made the appropriation. It is believed construction will start in the near future, but a location has not yet been selected. The postoffice department has a lease on the present postoffice building which runs two years more.

## BANK HAS 10,176 LOANS IN STATE

While Michigan leads in the number of loans made through the Federal Land bank of St. Paul, Minn., the amount loaned is the smallest of any state in the seventh federal reserve district.

The bank has 10,176 loans on farms in Michigan. These loans aggregate \$24,615,794. Nine hundred thirty-one only one set of cells on each floor, with a single reinforced concrete hallway the only means of communication between floors. Two rows of 34 cells are built on each floor, back to back, with all cells facing the outside of the building. In front of each row is a 10-foot day corridor. At the end of every eight cells is a rolling steel shutter curtain that can be opened into the cell. When the shutter is open, the long corridor into seven separate rooms, with groups of eight inmates may enter in 10 or 15 hours. These shutters, which cannot both be opened and by hand, are expected to prove beneficial in preventing small groups of inmates should disorder prevail, and in case of fire will be instrumental in confining flames to a small area. When the curtains are rolled up an unimpeded view of the full length of each corridor, 100 feet long, is afforded.

The money loaned is not government money. It was raised neither by government taxes nor by issuance of government bonds but from private investors to whom the bank has sold \$127,000,000 of its bonds. This system has made the bank only the instrument of the borrowers, through which they have been enabled to pool their individual credit, that they might obtain at a lower interest rate for a longer term period.

## There May be Poison in YOUR Bowels!

STEP out tomorrow morning with the fresh buoyancy and briskness that comes from a clean intestinal tract. Syrup Pepsin, a doctor's prescription for the bowels, will help you do this. This compound of fresh laxative herbs, with pepsin and other pure ingredients, will clear your bowels thoroughly without causing sickening or discomfort.

Poison, absorbed into the system from unclean waste in the bowels, causes that dull, headachy, sluggish, fatigued condition that the bowels, the breath, the energy, strength, and vigor force. A little of Dr. Caldwell's Syrup Pepsin will clear up trouble that is being gently, unobtrusively, in a hurry. The difference it will make in your bowels over night will prove its merit to you. Dr. Caldwell studied bowel troubles for forty-seven years. This long experience enabled him to make the best prescription just what men, women, and children need to keep their bowels help themselves. Its action, mild, thorough action and its pleasant taste, commend it to everyone. Find out why "Dr. Caldwell's Syrup Pepsin" as it is called, is the most popular laxative drugstore sell.

## Port Huron Relief Demands Grow Less

The social service organizations of Port Huron report a marked decrease in the number of requests for assistance for the month of February. The Salvation Army, according to Esquire Youngman, has had a falling off of 25 per cent. The Community service reports a small decrease, like was the Relief's Daughters. The unemployment relief committee, which was formed by Port Huron to loan money to the needy without interest, has found in demand lessened somewhat.

## Port Huron Has \$1,500,000 Program

Plans have been announced for a building program at Port Huron during 1931 which will cost about \$1,500,000 and will give employment to more than 300 men. The program includes Postoffice building, \$115,000; Bank, \$300,000; new city hospital, \$250,000; twenty new homes to be erected by Alex. Short, Jr., \$250,000; E. L. Furr home and improvements in Furr township, \$150,000; addition to First Presbyterian church, \$25,000; under construction; Gratiot turnpike, grading, two-thirds completed, \$95,000; Pine and Belle river bridges on Gratiot turnpike, \$85,000; Lapeer avenue paving, \$249,000; alterations to the Hotel Harrington.

## That COLD

Colds come suddenly. You can often end them just as quickly! Take Bayer Aspirin the moment you've caught one. A single sneeze should be the signal, or the first sign of congestion or headache, or soreness. Exposure to cold and wet isn't half so serious when you've learned to protect yourself with Bayer Aspirin. For the speedy relief of colds, headaches, neuralgic or neuritic pain, and even the acute suffering caused by rheumatism, there is nothing so sure and so safe as genuine Aspirin tablets stamped Bayer. They make a marvelous gargle, too. See proven directions in every package.

FISHING CEASES APRIL 1

Fishing will cease in Michigan's in-  
land lakes April 1, when non-trout  
rivers and streams will be open for  
spearing for certain species.

All fishing will cease April 1 in  
all inland lakes of the state until  
June 25 except on designated "pike"  
and "trout" lakes in which fishing  
will be permitted after May 1 for  
perch, wall-eyed pike, grass pike,  
muskellunge, and non-game fish, and  
all species of trout.

April 1, ice fishermen will turn  
from the lakes to the streams. For  
the second year spearing with or  
without the use of artificial or jack  
light in all non-trout rivers and  
streams will be permitted for a lim-  
ited period. From April 1 to May 31  
non game fish including bullheads,  
carp, catfish, cisco, dogfish, garfish,  
mullet, pilotfish, redhorse and white-  
fish may be taken in this manner.

Spearing for great northern pike,  
grass pike or pickerel will be per-  
mitted in non trout rivers and  
streams from May 1 to May 31, in-  
clusive.

This winter has seen the largest  
number of fishermen in years, ac-  
cording to conservation officers. In a  
great many instances the fish caught  
through the ice was one of a few  
sources of food for many families.

LAND TOO COSTLY FOR PRISON

J. W. Sanford, federal prison bu-  
reau official, who has sent consider-  
able time in these parts searching for  
a proposed site for a 200 acre federal  
detention farm, returned to Wash-  
ington Monday to confer with San-  
ford Bates, federal prison director  
and show the results of his findings.

Although Sanford had indicated  
that several sites south of Romulus  
have come the closest to approaching  
the federal specifications, it is not  
believed that the prison will be lo-  
cated in these parts because the land  
cannot be purchased at the right  
price. It is believed that \$150 per  
acre has been offered by the govern-  
ment and most of the land in this vic-  
inity is priced well above this amount.

Among the many government re-  
quirements are a water supply of  
100,000 gallons per day, plenty of  
electric power, a railroad running  
close by and that one section of the  
200 acres be higher than the re-  
sired plat, Milan Leader.

Late reports rumored are that it  
will be necessary for the prison of-  
ficials to go much farther from De-  
troit than they anticipated and it is  
possible that they may locate as far  
southwest as the village of Carleton.  
It is also possible that the govern-  
ment may start condemnation pro-  
ceedings in order to obtain the de-  
sired plat.

Importance of the Mace

The present mace in the British  
house of commons dates from the Res-  
toration, and was supplied pursuant  
to an order of the house, dated May 21,  
1690. It was made by Thomas Maun-  
dy, a London goldsmith, and cost ap-  
proximately \$738. It must always lie  
upon the table when the house is con-  
stituted with the speaker in the chair.  
When the house goes into committee  
the mace is placed on two supports  
below the table to show that the house  
is not properly constituted. After the  
election of a new parliament before a  
speaker has been chosen, the mace is  
also kept under the table, upon which  
it is placed as soon as the speaker is  
properly completed. It is lent to the  
speaker by the sovereign, who resumes  
possession of it when parliament is  
prorogued.

The Limit

An American, visiting this country  
to have a look at our poultry farms,  
did not hesitate to say how much  
further advanced was the art of poul-  
try-keeping in America, and told some  
tall yarns of his achievements. Twen-  
ty-five chickens from a dozen eggs  
appeared to be a daily occurrence in  
the United States.

Put a good old English farmer was  
game for him.

"Perhaps," said the old man, "you  
have never seen a hundred chickens  
hatched by one hen at a time?"

"Well," answered the American, "I  
can't say I have."

"Well, then," he said, "I have,"  
returned the Englishman, "I have seen  
shire wrens hatch a dozen or more  
eggs at a time."

Regardless of Cost

IN FUNERAL service and the merchandise required for it, there  
are degrees of quality and price. It would be absurd to state that  
all caskets, for example, represent exactly the same value in mat-  
erials, designs and workmanship. It would be equally foolish to fix an  
arbitrary price for the personal service involved, regardless of the  
demands made by the individual case.

Our display room offers a choice of merchandise  
in a price range to meet the needs of all; in the  
matter of personal service, we are prepared to make  
it as simple or as elaborate as it may be desired.

But whatever the price, our merchandise repre-  
sents the very best values obtainable for the money  
And our personal service is unfailingly efficient, de-  
pendable and sympathetic.
