Mrs. Santa Claus uses an EVERHOT cooker

SANTA CLAUS is good natured because he's fat, and he's fat because he's fed good, healthful cooking, and he's fed good cooking because Mrs. Santa owns an Everhot electric cooker—and there's the whole story in a nutshell, believe it or not! In strictest confidence, Saint Nick has gained twenty pounds this year over last, and it's all due to his good appetite. But who wouldn't have an appetite for the delicious meals that come out of the electric cooker? And here's a secret: the cooker uses little more current than a kitchen light, and cooks a complete meal for a family of six—two vegetables, a custard, a roast, potatoes and gravy—all at one time! Santa often uses his cooker for North Pole picnics—it keeps food hot for hours.
