PLANS COLD TRIP
SPARTA (MPA) - One Michigan man is in for a siege of cold weather this year, much longer than most state residents will experience. Jack Burley of Sparta will serve as dog driver for the government, Antarctic service expedition, which is being led by Admiral Richard E. Byrd. Burley has been called east for training and sailing preparations.

SAFETY IN GAME FORM
TRENTON (MPA) - "One run, one hit, one error," is the tag-line on the latest in a series of posters being displayed here as part of a pedestrian safety drive. Pictures accompany the phrases.

LIGHT ADAPTORS

Bare lamp bulbs cause glare and are harmful to eyesight... they should be shaded for proper illumination. Here is an inexpensive way to modernize your old-style ceiling fixtures. These clever "Light Adaptors" slip over the bare lamp and shield it, preventing any possibility of injurious glare. Used with the right size lamps, they furnish an abundance of soft, pleasant illumination, and are available in a wide range of styles and colors. The Detroit Edison Company does not sell these Light Adaptors. See them on display at department stores, hardware stores, lighting fixture stores or electrical dealers.

Conservation Dept. Notes

Land within the limits of north-ern cities and villages which will revert to the state after Nov. 3 on account of non-payment of taxes may be transferred to said cities and villages if they dedicate it to some public purpose.

The state will sell off and divide lands to 20,000 acres of state owned land on Nov. 3.

The sassafras tree may be cultivated as a game cover and food. The trees will be planted in different game reserves.

Michigan need not fear depletion of the fur supply due to high prices, caused by the war as the commission has the power to shorten the trapping season at any time.

Ten large lakes that connect with Lake Michigan have been thrown open to year around fishing. They are in Muskegon, Benzie, Charlevoix, Mason and Manistee counties.

Any person who drives a car or truck with poor brakes is violating one of the very first rules of safety. He may live to regret it.

It reminds me of the story of the farmer and his son who were working in a field where a line crew from the power company was repairing the damage done by a previous storm. Abner, the farmers son, while fussing around the operations got hold of a live wire. His father yelled to him, "Put that dwn, Abner, it don't belong to you". But Abner couldn't let go of the live wire.

Poorbrakes put you in the same position. You want to stop and apply the brakes, but they fail to hold and the result may be a serious accident and possibly death.

It's Smart to Drive Carefully.

SCHOOL MOVES TO PARSONAGE
STANTON (MPA) - Because the grade school rooms here are so crowded this year, kindergarten and first grade students are attending classes in the former Methodist parsonage. The building was rented by the school board and refitted for class use.

BIG LIVE STOCK SHOW PLANNED FOR CHICAGO
Predictions that an previous records for number of entries will be broken are made by the management of the International Live Stock Exposition for this year's show, that will be held at the Chicago Stock Yards December 2 to 9.

According to B. H. Heide, secretary-manager of the exposition, the early entry is the heaviest it has ever been and more than the usual number of stockmen have made inquiries relative to listing exhibits.

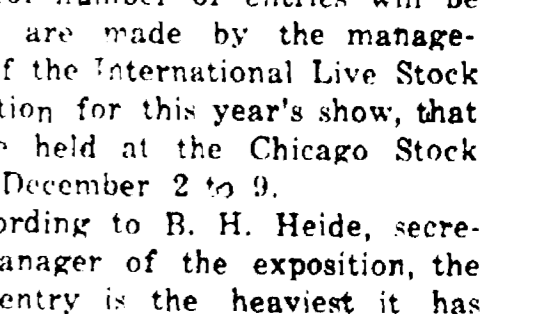

More than \$100,000 will be awarded to stockmen in cash prize. The premiums will be spread over competition for 30 different kinds of cattle, horses, sheep and swine, which will total well over 12,000 head.

An unusually large showing of Canadian live stock is expected this year, officials of the show state, owing to the cancellation of the Fall Fairs in Canada this year. In recent years, all provinces of the Dominion have been strongly represented in both the livestock and crops divisions of the exposition.

Entries for the purebred and individual fat stock classes of the exposition will be accepted until Nov. 1st, he says and for the International Grain and Hay Show, the largest annual showing of corn, small grain, seeds and hay in the country, exhibits may be entered until November 30th.

New and Important Easy-to-Do Fashions

IF YOU take a large size, then 1835 is a pattern you'll thoroughly enjoy, and make up time and again. Excellent for housework, with darted, unconfined waistline and deep armholes, it is so neatly tailored and smart looking that you can receive your supper guests in it, too, and wear it for shopping and runabout. For home wear, make it of gingham or percale. For street wear, choose thin wool or flat crepe, and omit the pockets.

Pleats Are Smart. If you spend most of your hours in an office or at college, then a dress like 1814 is a joyful neces-

ity. It's blithe, tailored, becoming and youthful, with box-pleated skirt and button-front bodice, finished with a crisp little collar to keep it always fresh and new-looking. Make it up in plaid wool or in bright-colored jersey—or in both. It's too good a design to make up only once!

No. 1835 is designed for sizes 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 4 1/2 yards of 39-inch material; 5/8 yard of contrast; 2 1/2 yards bias fold or braid.

No. 1814 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires 3 3/4 yards of 54-inch material; 1/2 yard contrast.

PUMPKIN PIES FOR HALLOWEEN
See Recipes Below.

When Witches and Goblins Roam

What night is better suited to informal entertaining than all Halloween's Eve? Candlelight, leering Jack-o-lanterns, and crepe paper decorations in orange and black create an eerie atmosphere for an evening of hilarious fun.

No one "dresses"—or, if they do, they dress in grotesque costumes which only add to the festivity.

Entertainment is simple, and easy to provide. Old fortune telling games and bobbing for apples are always fun, and a trip through a "chamber of horrors" is as much a part of Halloween as are good things to eat.

For variety, and a lull in the excitement of wilder entertainment, you might try a "paper and pencil game"—a prize to be given to the guest who can list the greatest number of superstitions, or answer the greatest number of questions in a "Cat Questionnaire" (for example, "What cat is an ancient burying place?" (catacomb) and "What cat is a plant of the mint family?" (catnip).

Food for a Halloween gathering is simple and substantial—baked beans with brown bread, cabbage slaw, and coffee; doughnuts with mulled cider, or pumpkin pies a la mode. You'll find among the following suggestions some that are old and some that are new.

Caramel Pecan Tarts. (Makes 6 tarts)
1 can sweetened condensed milk
2 tablespoons hot water
6 small tart shells
1/2 cup nut meats (cut fine)

Place the unopened can of sweetened condensed milk in a kettle of boiling water, and keep at boiling point for three hours. (Be sure to keep can covered with water.) Remove the caramelized milk from the can and blend with two tablespoons hot water, beating until smooth. Cool. Pour into baked tart shells, and sprinkle with chopped nuts. Cut pattern of cat from stiff white paper. With a sharp knife, carefully cut cats from pastry, using the paper pattern as a guide. Place on cookie sheet and bake in hot oven (450 degrees). Cool and place one on each tart before serving.

Chocolate Indians.
1/2 cup butter
1 cup granulated sugar
2 eggs
2 ozs. chocolates (melted)
1/2 cup bread flour
Dash salt
1 teaspoon vanilla extract
1/2 cup nuts (broken)

Cream the butter and add sugar slowly. Add the eggs and beat well. Add the melted chocolate, flour, salt, vanilla extract and nuts, blending lightly. Bake in a shallow layer in a well greased pan in a moderate oven (350 degrees) for 30 to 35 minutes. Remove from pan and cut in bars while hot.

Harvest Moon Doughnuts. (Makes 24 doughnuts)
1/2 cup butter
1 cup sugar
2 eggs
4 cups flour
4 teaspoons baking powder
1 teaspoon salt
1 teaspoon nutmeg
1/2 teaspoon cinnamon
1 cup milk
1 teaspoon vanilla

Fat for deep fat frying. Cream butter and sugar. Beat in eggs. Sift together dry ingredients and add alternately with milk. Add vanilla. Roll dough 1/4-inch thick

Lace by Day and Lace by Night
Continues Its Magic Dominion

By CHERIE NICHOLAS

FASHION is growing increasingly lace-inspired. As the style picture for the winter social season unfolds, the importance of lace is emphasized throughout every phase of the mode.

Time was when lace was considered a special-occasion item but as regarded today, lace becomes a positive fashion "must" in every well-planned wardrobe. It's as good style to wear lace in the daily routine of affairs as it is to array in lace for those dramatic highspot moments when every woman seeks to look her loveliest and most alluring.

To be sure in the interest of good taste discrimination must be exercised in choosing the right lace for the right place. With suits as popular as they are this winter the call for a collection of blouses becomes imperative. Of course there should be at least one lace blouse included in the list and several of varied-type lace will prove none too many. The lace blouse pictured to the right in the foreground of the illustration herewith is styled to a nicety, with a softly draped front, wide full sleeves and a peplum which has a slight bustle treatment in back. Wear it with a velvet skirt and a cunning velvet toque for any afternoon occasion which calls for a dress-up costume.

The new metallic embroidered laces make up beautifully into fitted jacket-blouse types such as you see centered in the group, and if you are going to dinner dances this winter or banqueting with socialites, a formal jacket and skirt dress becomes a necessary luxury these times. Perhaps the charming model here shown will help you in making a selection when it comes to "looking up" a correctly styled evening dress. A truly beautiful lace is this in creamy beige embel-

Evening Glamor

There is no limit to the wealth of jewelry fashion urges ladies who are style-ambitious to wear this season, especially when it comes to attending night-time functions. In the picture hand-fashioned gold plated beads strung on heavy knotted silk cord, designed by Simone Gerli, as new as the world of tomorrow, contrast dramatically with the old world elegance of an evening bag of ancient Egyptian silk brocade which is re-embroidered in gold thread. The dynamic young designer medallions the hundred-year-old Egyptian frame with butterfly motifs in Italian mosaic. The story of handbags for this season promises to be a thrilling one.

Desired Extra Bathroom
Need Take Little Space

Few houses are being built today without two bathrooms, or at least a bathroom and extra lavatory. In the modernization of an old house, consideration should be given to this feature. Plumbing authorities have found that the essential fixtures of a bathroom can be installed in a foot space which measures five feet one way and six feet the other. Space at the unused end of the hallway often may be converted into an extra bathroom, and in some cases an oversized bedroom may be converted into a guest suite by partitioning it and including a bathroom

Eyeleted Pique Is Important Style

The new eyelet embroidered piques now showing are creating a sensation. The simpler eyeleted patterns are ideal for the smart tailored shirtwaist to wear with your suit. The eyelet embroidered edgings make up beautifully in collar and cuff sets. Boleros to wear over dark crepe frocks or linen tailleurs are ever so chic in eyelet embroidered pique. Milliners are also doing clever things with the new piques. Taking it all in all it promises to be very much of a pique season this summer.

Gold Braid Favored For Accessories

Collar and cuff sets of gold braid are being displayed in the neckwear sections. You can also buy gold braid military looking frogs and epaulets for shoulder decoration on your new black dress. Effective new neckwear shows intriguing collars styled of gold kid, to wear with your afternoon black sheer wool or velvet afternoon dress.

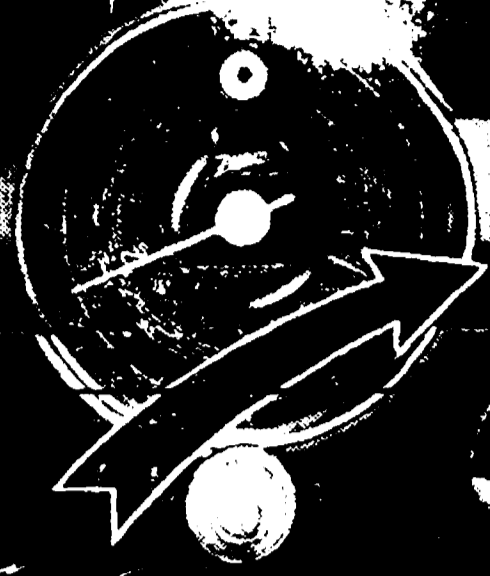

Wide Inset Belts Appear on Frocks

Many of the incoming frocks are styled with wide inset belts that accent high bustline and small waistline. The trend to jeweled girdles is also noted. Belts of gold or silver kid give a dramatic touch to black velvet gowns that stress utmost simplicity in their styling.

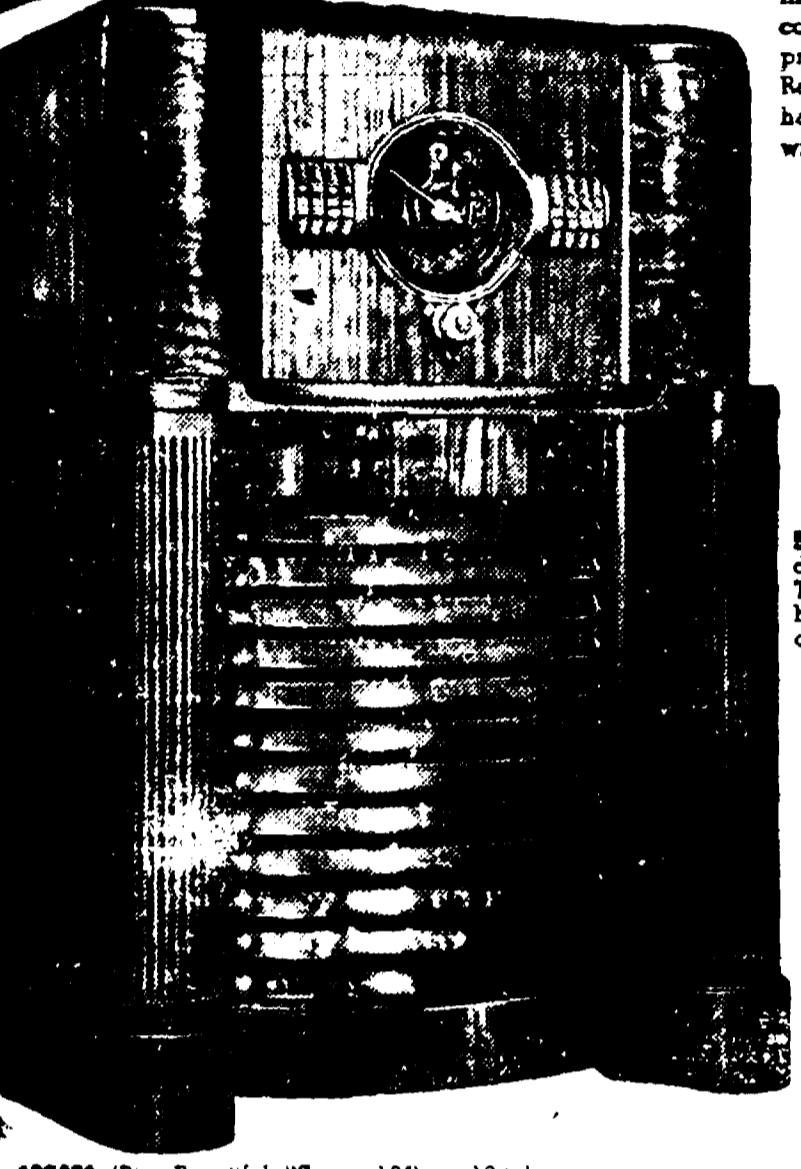

A Bow for a Belt

Trading a belt for a bow or a tassel, Bruyere features in his new collection slim beltless frocks which have a bow or a tassel poised at the waistline where a belt would ordinarily be.

The Michigan Mirror

It raises the annual query of just how long the deer herd can stand this slaughter of males and continue to reproduce.

During the summer of 1938 conservation officers in the Upper Peninsula saw and identified 4,094 deer of which 19 per cent were bucks and 49 per cent does, a sex ratio of approximately one buck for each 2.58 does. This does not seem to be a serious situation after 18 years of hunting under a "one buck" law. In the Lower Peninsula of the 4,758 deer seen and identified 766 were males or one buck for each 3.22 does. Fawn production seems to be decreasing slightly each year in comparison with the number of does seen, but it still holds to slightly less than one fawn for each 1.5 does.

Are deer decreasing in number? During the past four years it has been possible, through the vast manpower in the Civilian Conservation Corps, to obtain fairly accurate counts of deer on measured areas. These counts indicate an average of more than 15 deer per square mile in the Upper Peninsula and over 42 deer per square mile in the Lower Peninsula. If these figures are accurate, and they are certainly more desirable than mere guesses upon which deer management practices have been based in the past, the conclusion is reached that there are now more than one million deer in Michigan today.

Now comes a serious side to the deer question. After the hunters go home, deep snows completely change the picture. Deer that during November roamed the entire deer area are soon confined to the more sheltered locations by deep snows. As snow depths increase and travel becomes more and more difficult, the winter range is restricted to smaller and smaller areas. By the time the winter is half gone, food begins to run low in the more heavily used wintering areas or yards. In the Upper Peninsula only about ten per cent of the entire deer range is suitable for winter use. This restricted area is heavily grazed. In the vast Casino yard in Alger and Schoolcraft counties, for example, the present deer herd that winters there is estimated to be less than one tenth of what it was a few years ago.

Of the 253 wintering areas covering more than 1300 square miles in the Upper Peninsula investigated up to and including 1939, only 10 per cent contained an abundance of food for the deer using them. The rest of the land was either in poor or medium condition for winter browsing.

10,000 Deer Perish
The conservation department reports that lack of food caused the death of more than 7,000 deer, a great number of them fawns, in the Upper Peninsula and 3,000 in the Lower Peninsula during the winter of 1938-39.

In the Lower Peninsula serious conditions are not quite so widespread, but are much more severe they do occur because of the much heavier concentrations of deer.

But these losses are not new. They have been reported from various locations in increasing numbers for the past fifteen years. Similar conditions also prevail in Wisconsin, Minnesota, New York, Pennsylvania and other hunting states.

Artificial feeding has been found to aggravate the condition by causing increasing concentrations about the feed areas and resulting in larger and larger food bills year after year.

It has been proposed that Michigan hunters might profit from the experience of other states such as Pennsylvania or Arizona and harvest the surplus deer in the fall before they are forced to starve on inadequate range. To conservation authorities it has been evident that an insufficient number of deer are being removed under the existing buck law. We present this viewpoint not as our own, but as that of experts who have made a study of the subject.

Damage to Crops
Another increasingly serious problem arising in connection with the growth of the deer herd is damage to farm crops.

In a number of good agricultural areas farmers adjacent to wild land have actually been forced to quit farming because of the deer.

The conservation department at present is experimenting with 22 different types of deer-proof fencing. These are entirely experimental and appear far too expensive for general use. Summer trapping and removal have been contemplated, but baits are lacking which will attract deer away from the field and into traps.

DICKINSON FOR GOVERNOR
The Michigan Times, the paper edited by Frank McKay, Republican state boss came out for Governor Dickinson for re-election in 1940 in a front page article in which he praised him to the skies and declared him the key man in 1940 campaign. This article has put the other would be G. O. P. candidates on the anxious seat as Gov. Dickinson with McKay's support would be hard to beat in the primaries. Incidentally the article was signed Don Kay, said to be McKay's pen name. McKay when interviewed denied he had made up his mind to support Dickinson and said the news story was only an article. Dickinson disclaimed any knowledge of McKay's support and said as far as he knew he had never been supported by him but that if he should decide to run he would not refuse such support. Also that if he should run he would raise no campaign fund but conduct a front porch campaign.

EMORY READ
Emory Read, 58, of Detroit died suddenly of a heart attack in Dexter Sunday while visiting his sister, Mrs. Stanley Vaughn. He is survived by his widow, formerly Mildred Fisk daughter of Mr. and Mrs. Will Fisk of Pinckney, and three daughters, all married. He lived in Jackson for many years, moving to Detroit in 1934 where he was employed as a millwright by the Kelsey Wheel Co. The funeral and burial were held at Dexter today.

The public will have the pleasure of hearing Dr. Thomas E. Gibson of the Michigan State Health Dept. Monday October 30th at 2:30 in the Howell High School Auditorium. He will meet with representative people of the County, to discuss with them the various phases of health work and acquaint them with remedial measures. The public is very cordially invited to attend.

Saving

It is the natural habit of man to save. The Caveman saved berries and bits of dried meat. If he did not do this, his family starved when poor hunting occurred. Later development in culture made money an important thing to save, for money could buy the things which formerly had to be stored to keep one alive. Survival and ultimate security are the main forces driving men to save.

A small saving may be a large reserve if added to regularly and consistently. Begin now. One dollar will open a Savings Account in our bank.
