COMMUNICATION

Hunter's Point, California Hi Paul. Finally got around to writing you a few lines. I am still on the Devilfish and have plenty of work to do. We are preserfing all of the electrical motors and main engine. The Devilfish is going into reserve commission March 28. They leave them that way so a submarine can be ready for sea in 10 or 30 days.

I am sending you \$5.00 for the Veterans Memorial Field Lighting project. I think it is the best thing that ever happened to Pinckney. I hope to see some good soft ball games this summer.

I got rated electricians mate 1/c this week. I think the navy is trying hard to make me stay but I can't see it. I expect a discharge as soon as soon as the Devilfish goes out of commission.

So long Dick Amburgey P. S. Say hello to all the fellows.

A FAREWELL PARTY

A very pleasant evening was spent on Friday last, when about 90 neighbors and friends gathered at the pleasant home of Mr. and Mrs. Stanley Culver in Mar'on township. The occasion was a farewell as the Culvers are about to move on a farm they purchased in Deerfield township.

Mr. and Mrs. Culver have lived for number of years in this community and made many friendships. During the course of the evening, Lynn Hadden in behalf of their friends presented them with a handsome table lamp and a purse of money for which acknowledgments were made.

Following Mr. and Mrs. Culver's departure from the community, the couple will live at Ann Arbor.

The School Area Plan

Local School Board Members and Supt. Meader Attend Meeting at Lansing Thursday

Supt. Reader, Mrs. Clare Palmer, chairman and ye editor of the school board attended a meeting last Thursday which lasted all day, in the Dept. of Public Instruction in which the New School Area Plan was explained by Mr. Prian of the dept. who is a former school commissioner of Jackson county.

In brief the plan is this. In the case of a township the largest school would be designated the central one and the schools be united in a school area. Some of the district schools would continue to operate up to the fourth grade until other facilities were available. The pupils would be transported to the central school in four buses which would also serve the district schools in operation. This system was explained by maps and figures and a 7 mill tax spread over the district would pay the cost. Many schools at the present time pay more than that. Mr. Prian has made an exhaustive study of this system and has set up a number of these school plans. Recently he held a meeting at Dexter and will hold one at Pinckney soon. In the northern part of the school buses pick up pupils at radius of 20 miles.

In the old horse and buggy days, rural schools nobly served their purpose. Rural populations were large. Roads and transportation poor and teachers wages low. We know teachers who taught for \$20 a month. A school inspector elected each spring in the townships handled the schools. When this office was abolished and the county school commissioner put in control. This resulted in raising the teaching standards. As to this time most of the money came from the property tax. A 15 mill amendment changed this and made the schools dependent on state and federal funds for operation. This meant state control as the funds were only handed out under certain conditions. More and more schools closed each year due to diminishing population and higher wages which they could not pay.

Of late a different class has been coming into the rural districts. Many of them have been used to city schools and to them the old district school is a relic of the past that has outlived its usefulness. They want better education for their children. It was chiefly due to their demands that agriculture, shop and home economics were added to many high school courses as pressure by business firms caused the addition of typing, shorthand and bookkeeping.

Of course there is opposition to centralized control but it is hard to see how it can get anywhere as long as the state handles the money. Back in the old horse and buggy days the highway commissioner and path masters handled the roads. In the winter many roads were continuously blocked by snow and in the spring by deep mud and floods. The auto and truck killed the old path master system and the county road commission and state highway dept. took over and by means of steam shovels, bulldozers, paving and blacktop machinery built an adequate highway system for Michigan. Such is progress.

HONOR ROLL FILE

The Livingston County Honor Roll Com., have purchased a permanent card file to perpetuate the names of those on the honor roll on the court house lawn. In order that a complete service record may be made, all families having sons or daughters in the service are asked to call at the city clerk's office in Howell and get questionnaires to fill out.

O. E. S. PARTY AND AUCTION

The annual O. E. S. party and auction will be held Saturday, March 2, at the Masonic hall. All members are asked to leave their donations with Mrs. Mildred Ackley or bring them to the hall Saturday evening. Card playing will be the diversion, high-lighted by the auction sale of fancy work, baked goods and farm produce.

A charge of 25c will entitle you to a lunch and a chance at the number four prizes. Come and bring your friends.

CURKE T OMMENT

Judge Donald VanSile of recorders court, Detroit, died last Wednesday after a short illness. He was appointed to the bench by Gov. Grosbeck in 1925. The judge presided over the trial of the Five Black Legionaires who were convicted of the murder of Silas Coleman, Detroit negro, in 1937 whose body was found in the Pinckney mill pond at Nash's bridge. A large number of Pinckney people including ye editor, were witnesses at the trial which lasted 6 days. The judge was a native of Charlotte, Mich.

The big news item of the past week was that Russia had obtained the secret of the atomic bomb through Canadian sources. This has caused an uproar especially in Canada where an investigation in underway to find the source of the leak. Alarmists are predicting dire things, including the forecast that as Russia is in possession of the atomic bomb she will now proceed to conquer the world. We doubt it. We think Russia knows her capabilities and is satisfied for the present with her present territory. As to the atomic bomb or the secrets of atomic energy they were bound to become known some day anyway. It would have been impossible for United States or Canada to have kept this knowledge to themselves indefinitely. War time use is only one of the many uses of atomic energy. Scientists claim it will be possible to develop an energy from it much more powerful and cheaper than electricity. Experiments to that end should be encouraged.

Gov. Kelly's program of state building in the construction of colleges and hospitals went through with flying colors in the legislature last week and the bills to return a part of the sales tax to the cities and villages and to pay the service men a bonus were early casualties. The first measure went down to defeat because the rural members of the legislature who predominate are opposed to returning any sales tax funds to the cities although the bulk of it is collected in said cities. As to the soldiers' bonus there was not enough demand for it at the present time. With mustering out pay of \$200 and unemployment pay of \$20 a week the ex-service men are not in any immediate need consequently they did not get behind the bonus bill. However like Banquo's ghost it will return again to haunt the legislature.

The service men who married by the thousands just before and during the war so that all marriage records were broken seem to be bending their efforts in the other direction now in getting their matrimonial bonds cut. In 1940 there were 9191 divorces in Wayne county in 1945 this number had jumped to 17,666. In 1945 marriage licences jumped to 20,969 in Wayne county, materially through returning service men. Wayne county judges think there should be a tightening up of the divorce law before Michigan became a second Reno.

For some years past the Pinckney school has enjoyed a hot lunch program in common with many other schools in Michigan. This is financed largely by a federal appropriation. Last week the federal appropriation of \$65,000,000 was stalled in congress by opposition of southern members who objected to an amendment barring schools from participating who practice racial discrimination. However the bill finally passed despite southern opposition.

Senator Higgins of Ferndale would have the cigarette smokers finance the addition bonus. This he would accomplish by taxing cigarettes 3c a pack. This is anticipated would be \$44,000,000. It would mean a consumption of half a billion packages of cigarettes a year in Michigan. Of the 2,500,000 cigarette smokers in Michigan each one would have to smoke 11 cigarettes a day.

Basket ball is outdrawing all other high school and college sports. According to figures given out in Detroit the schools there are drawing an estimated attendance of 50,000 a week. Wayne U., U. of D., Lawrence Tech. and Highland Park Jr. are drawing 10,000 a week. When U. of D. plays Notre Dame at the Olympia March 2 they expect 14,000. There are several reasons for this. The basket ball season is longer than other base ball or football. All the games are played at night. The working men go to the games and these who go sit around a fire and protection from the weather.

"YOU'LL BE ABLE TO CALL MORE PEOPLE"

YOUR own telephone becomes more valuable to you as more folks you know have telephones installed. And that's just what's happening today. Michigan Bell's \$13,500,000 5-year rural expansion and improvement program is now under way.

We had started a rural program long before the war. At the suggestion of the Michigan Rural Communications Committee, a group of agricultural leaders, we included in that program in 1940 a plan providing a liberal amount of free line-construction, with small monthly payments where construction charges are involved. But during the war, the entire program had to be curtailed

because telephone manufacturers were busy supplying our armed forces.

Now we are beginning to get the materials to resume the job. Even so, the job will take time, because there is a tremendous amount of new construction to be done, and a lot of that construction is slow, painstaking hand work.

The goal of our program is not only to provide more folks with telephones. We will build more rural lines, so that there will be fewer parties per line. We will provide more of our rural customers with dial service. In short, we will make rural telephone service more valuable to more people.

THE OLD JUDGE SAYS...

HENRY: "I've heard that some thing several times lately... that alcoholics are really sick people. It was news to me. Do you agree with that statement, Judge?"

Included in that 5% is the small percentage known as alcoholics."

OLD JUDGE: "Yes, it's true, Henry. It's no notion of mine... it's a statement made by scientists who have studied the subject."

HENRY: "But why are they called sick people?"

HENRY: "What did they find out, Judge?"

OLD JUDGE: "Because it has been discovered that, in many cases, excessive drinking is a symptom of some physical or emotional maladjustment... not the cause of it."

OLD JUDGE: "Well, as a result of their medical research, they found out that approximately 95% of the people who drink, drink sensibly. 5% do so sensibly, at times."

HENRY: "Now I understand it, Judge. I am glad to hear of the modern approach to this problem and that so much is really being done to help these folks."

THE PUBLIC

The public has certain privilege which cannot be abridged. These rights are protected by an accumulation of laws and customs. When a group steps out of the pattern of law and custom many other members of the public are inconvenienced or totally disrupted in the daily process of acquiring the necessities of life.

In observing the progress of recent strikes we have wondered what public reaction would be if all business places closed their doors. It is doubtful if any businessman would enter into such a move. It is not pleasant to consider the results.

Our business has been built on the theory that we are a public servant. Our success or failure lies in the way the public accepts our way of doing business. We cannot survive without that favor.

WHY WE HAVE BEEN ABLE TO REDUCE RATES AND YET IMPROVE OUR SERVICE

You may wonder why we are able to reduce electric rates, as directed by the Michigan Public Service Commission, even while the cost of living is going up. Our answer is simple. It starts with a will to give you the best possible service at rates that are fair and reasonable. It continues with the cooperation of experienced and efficient employees. It includes planning and economizing on the part of management and engineers.

In addition, the combined savings brought about by a reduction in federal taxes and increased use of electricity contribute to this latest rate reduction.

In short, it is enterprise at work . . . enterprise with know-how and a goal. The goal is the best electric service in the world at rates that are fair and reasonable.
