Michigan Mirror State News

News and Happenings of the State Told from Lansing

Not as many veterans are returning to the farms as had been expected, being attracted to the cities by high pay and short hours. This trend will probably continue.

Farm price inflation in Michigan is discouraging veterans from buying farms. Present farm prices exceed the 1920 peak by 8 percent. They are 89 percent higher than the average from 1935-39 and 47 percent higher than the 30 year average average from 1910 to 1940.

While some farmers will get farm machinery, most will not.

As for farm labor the prospect is good. Labor is now being recruited in Missouri and Arkansas and there will be plenty of Mexicans and Janitors.

The 1946 production goals are more corn, soy beans, dry beans, sugar beets, barley, flax and milk and less livestock, poultry and eggs.

Com. Figy does not think this new order will affect Michigan agriculture much. General farming is the rule in Michigan and most farmers raise their own feed. Those who buy may be caught short.

Milk production won't be cut much he added. In one case, where soy beans were fed it only declined 10 percent.

The post-war Victory garden is on its own this year without government sponsorship but people are urged by President Truman and Gov. Kelly to continue their victory gardens so more food may be shipped abroad.

25 percent of every food dollar is wasted or thrown in the garbage can. The average family wastes 3.4 lbs. of food a day a person, restaurants 6 percent and retail stores 3 percent.

China grows grain for direct food. We grow it to feed cattle, hogs and poultry. We are meat eaters.

The livestock numbers Jan. 1, 1946 were the same as last year but feed supplies were less. Therefore farmers were advised to cut stock and poultry production, maintain the milk supply and avoid feed wasting and above all not to overfeed meat animals.

RETIREES FROM POLICE FORCE

Sunday's Detroit News carried a writeup of Detective Fred Becht of Detroit who has retired from the Detroit police forces after 40 years service. He was attached to the Grand River station for 19 years and drove the horsedrawn patrol wagon or Black Maria. For the last 21 years he has been in the juvenile division. In 1927 he was made a detective. His record is spotless. The Becht family consists of a wife, four daughters and 2 sons. He expects to retire to his summer home at Patterson Lake and raise a garden.

CURRENT COMMENT

As was predicted the nations backed down at the UNO meeting at New York last week and Russia won the first round. By a vote of 11 to 2 for the resolution to postpone the consideration of the Persian question until May 4 at which time Russia promises to have all her troops out of Persia. This was the Russian demand from the start and she was bound to get it as the UNO cannot function minus Russia any more than a wagon can run with three wheels. Australia was the only country to actively oppose postponement. Russia despite her shortcomings has always sent brilliant men to world conferences. Although they lost a war with Japan Sergius Witte, their diplomat, is said to have won the peace conference. Molotov of today ranks high and the present representative, Gromyko, is evidently a man of ability. As it is rumored Russia is about to make an oil treaty with Persia the next move will be awaited with much interest.

The work of streamlining the Ford Motor Co. continues. William J. Cameron, known to millions as the commentator on the Ford Sunday evening hour has been dropped after 28 years with the organization. The company suspended Cameron's radio program some time ago. Cameron, 67, was with the Detroit News for 15 years and became famous for his editorial entitled "Don't Die on Huru", in which he applied the stealing of home by George Morarity, 3rd sacker of the Detroit Tigers to everyday life. He went with Henry Ford in 1918 and was editor of his paper, the Dearborn Independent for many years and radio commentator for 8 years.

Last year the whole city of Cairo turned out to welcome their native son, Snuffy Smith back from the war. The governor of Michigan, Ex-Senator Prentiss Brown and others were there and the hero received about every medal and award it was within the power of the nation to bestow. Now a warrant has been issued for him and Washtenaw county is seeking his extradition back to Ann Arbor from Washington D.C.

He was married twice before going in the army, then married once in the army, then married a girl in England. It seems he got in the dog house with his alimony payments and wife No. 2 claims he owes her \$2,980 in back alimony for support of their child. Such is life. A hero today and a fugitive from justice tomorrow.

Detroit enjoyed its periodical street car strike last week but despite the failure of this means of transportation most of the workers got to work by aid of friendly motorists, share-riders etc. Detroit invariably experiences a street car strike every 5 or 6 years and takes them as a matter of fact. They seldom last very long and friendly cooperation among motorists usually gets the people to work. During our 11 year residence in Detroit we went through two such strikes and were not greatly inconvenienced.

Here is a question that is far too deep for us to answer. When labor unions go out on strike they are Communists, villains, traitors of the vilest type and should be tarred and feathered according to the articles in the controlled press. But when manufacturers and industrialists lead heaven and earth to remove the strike they are and take advantage of the many things, they are patriotic and their efforts are highly commended. It seems to make a lot of difference whose ox is gored.

To Greater Farm Income

Mow curing of hay is a practical and efficient method of producing more higher-quality hay from the same field. It is a proven method which has been put to use by hundreds of farmers—and the system pays for itself in one season.

Hay is allowed to dry in the field for 4 or 5 hours, during which time the moisture content is reduced from 75% to 45%. The hay is then stored in the mow—on the same day it is cut—and the curing is completed by forcing air through it with an electrically driven fan.

Mow Cured Hay Is the Best Substitute for Fresh Pasture

Forage crops can be cut at the right stage of maturity and cured in a way that conserves the leaves and most of the green color. The result is hay with double the protein and carotene content. In your herd this higher quality hay means better physical condition, longer productive life, greater milk production, and milk of greater vitamin content—all of which means greater profit to you.

Consult our Farm Service Advisor at the nearest Detroit Edison Office. He will be glad to give you detailed advice on a mow hay curing system especially suited to your needs.

BUYING SOMETHING

Peace has come to industry once more. After several months of maneuvering on the part of labor and management all are ready to go to work and begin filling the demands brought on by the wear and tear of four years of war time restrictions on consumer goods.

Savings have been accumulated during these years and many people will be prepared to pay cash for the replacements they need.

At times it may be wise to go in debt, but the old rule of pay as you go is a good one.

Continue to save for the things you want.
