EVERYTHING YOU DO!

FROM THE MOMENT you awaken until you go to bed, almost everything you do is closely dependent upon the operation of trucks. In fact, even while you're asleep, trucks are working for you. (Beds arrive by truck, too, of course.)

Without trucks, your favorite food market would have empty shelves. Without trucks, you wouldn't find gas stations located conveniently almost everywhere you turn. Without trucks, the building of new homes, factories, and stores would slow to a walk and businesses of all kinds everywhere would suffer.

Sooner or later, everything you eat, wear, or use depends on trucks for transportation. Eventually, everything has to get to you — the consumer. So, when you consider that trucks haul three times the tonnage handled by all the other forms of transportation combined, you realize how very important they are to you!

Plenty of hot water with **DETROIT EDISON'S NEW ELECTRIC WATER-HEATING SERVICE**

New, more efficient water heaters—built to Edison's specifications. New water-heating plan from Edison. Together they make the finest hot water service ever offered in Southeastern Michigan.

Completely new, completely different, the electric water heaters for 1957 are not only the safest kind you can buy—they're the most practical, too. Built to Detroit Edison's own rigid specifications, dollar for dollar these new electric water heaters last longer than any other heater you can buy.

What's so new about the new electric water heaters? Redesigned from top to bottom to give you more hot water for your money, the new type electric water heaters for '57 now include two

higher wattage heating units that operate completely automatically. As your hot water supply goes down, one unit automatically goes on—quickly heating up more water for you to use when you need it. No waiting, no worries. There's always plenty of hot water on tap. And because of this unique new design, you can get more hot water than ever before from the same size heater. Then, too, since it's built to Edison's own specifications, you know you can rely on the quality and depend on it to operate better, last longer.

For still greater economy—Edison's new Super-Supply Plan. To make the new electric water heaters even more economical, Detroit Edison has introduced its Super-Supply Plan. This simply means that now, for a surprisingly low flat monthly rate, you can get much more hot water than ever before for just pennies per day.

Safe . . . no flame, no gas. There's automatic safety always built into an electric water heater. No flame, no gas. It's even safe enough, and good-looking enough, to go right in your kitchen or utility room. Because of its excellent insulation, it's cool to the touch—top to bottom. And only electric water heaters are so clean, noiseless and odorless.

Here is new proof that you can live better, electrically.

Roddy Kilowatt invites you to inspect these tremendous advantages of ELECTRIC water heating before you buy.
