## The Michigan Mirror

Senator Faulkner of Berrien said longrange employment problems will require some cooperation by industry and labor before they're resolved. He referred to the fact that the state has had a reduction in the number of jobs in the first machines boosted production and the consumer received part of the value of automation. Recent automation has resulted in no such benefit. Instead, prices have increased. If industry and labor keep all the benefit for themselves it can only mean fewer jobs and higher prices.

Jobs will be available for 2000 more qualified teachers next Sept. and 11,000 positions now filled should be filled by better trained personnel.

The enrollment in elementary schools is growing at the rate of 70,000 a year. This requires 2000 more class rooms a year to handle them. Because of a teacher shortage 11,000 partially qualified teachers have been employed on temporary permits. There are now 55,000 teachers in the elementary schools. This will be increased by 2000 this fall. Starting salary for a teacher with a 4 year college degree is \$4100 a year. One with special training gets \$200 to \$400 more a year. One with 15 years experience might earn \$8000 a year. About half the teachers leave the teaching field each year. Some for marriage. Some for better jobs. There is one thing to remember. Very few teachers have been replaced by machines.

## ALBERT TOMASIK

The funeral of Albert Tomasik, 83, who died in Detroit was held there last Wednesday. He came here in 1932 when he bought the Orla Jackson farm on the Dexter Road. ## SCHOOL NEWS

### Good Attendance at School Panel Held Last Wednesday Night

A good turnout was present at the panel discussion at the Pinckney Elementary school on the future of the school last Wednesday night. When the meeting recessed for coffee and crumpets at 10:30 questions were still being asked. The school board were all there and the president, Mr. Hollingsworth, answered all the questions.

He said the present facilities of the school will be sufficient for some years to come. That 32 graduate this year and there are 45 to come from the grade school to the high school building, an increase of 13 which can be handled all right.

In regard to putting the school out of the red. (It has been necessary to borrow funds from next year's receipts for a couple of years) he said he thought the increased revenues from the newly annexed Hicks district would put the school out of the red.

He said many economies had been instituted. Art, which cost \$4500 a year had been dropped, one janitor was released and the athletic coaches no longer get paid for coaching.

He also thought the birth rate was leveling off and no big increases in attendance was in prospect. The parochial school will add two more grades next year and has 130 pupils.

In regard to use of the old high school building. (There have been reports that the state was going to condemn it), he said there was nothing definite on that. That these reports have been in circulation for years.

He also said all the elementary teachers had majored in the subjects they were teaching.

### REGULAR BOARD MEETING MARCH 6, 1958

## Current Comment

We have been deluged with letters from Senator Potter and Cong. Chamberlain in regard to bills to cut the excise tax off autos and trucks. This would amount to \$150 per car. They said they had assurances from the car dealers they would pass the cuts to the peoples in the way of reduced car prices. Senator Potter appealed to both the president and vice president and got the old runaround. They told him to wait a couple of months and the depression would level off. Senator Potter said his bill would put purchasing power in the hands of the people, stimulate car sales and increase employment. He never the less introduced it without the administration's support but it only got 11 votes. Only 2 Republicans voted for it. Potter and Langer of North Dakota. The other 11 were Democrats. The bill would also have cut income taxes 10%. Senator Potter says he will try again.

If our armies of occupation stay in the foreign countries and the indications are they will for many years to come. They may Americanize the world for us. Thousands of war orphans, the illegitimate children of Japanese, Korean and Okinawan girls by American soldiers have been brought to this country for adoption by churches, societies and organizations. Now we read there are in Germany 67,753 deserted orphans, born to German girls by American soldiers out of wedlock who will be up for adoption.

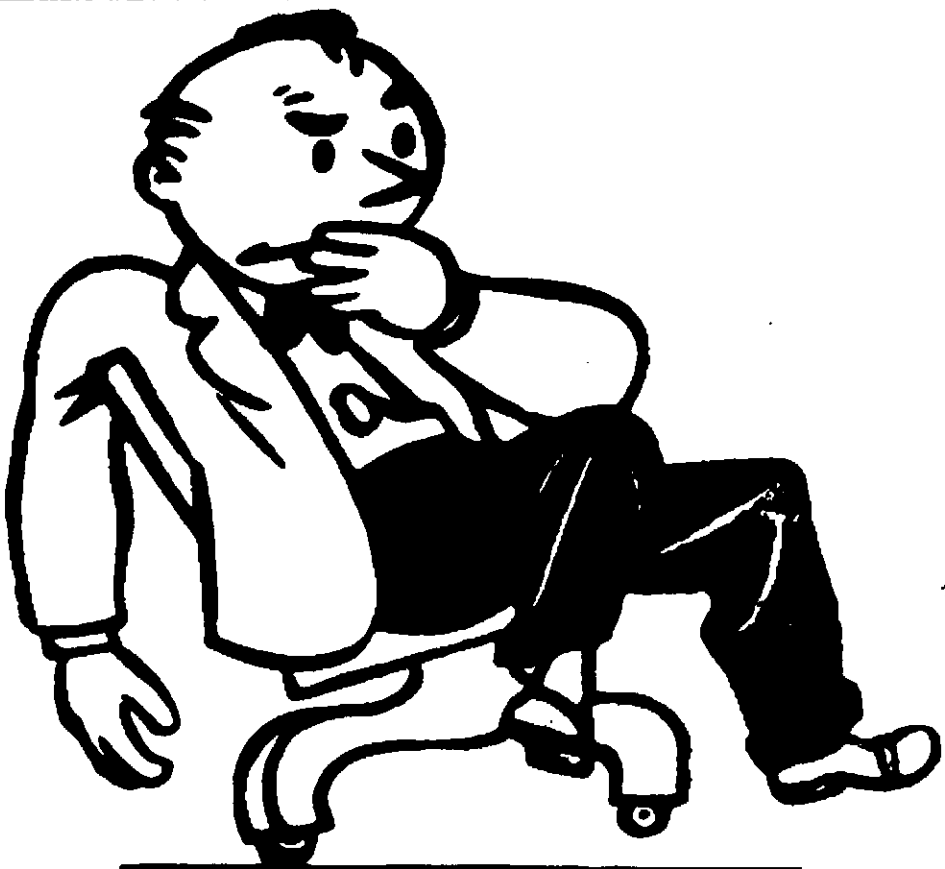

An army atomic bomb was accidentally dropped from a plane in North Carolina last week. But it was duds and did not explode. Otherwise there would have been another Hiroshima. As it was a home was demolished and a number of people injured. We wonder why these experiments are conducted in thickly settled areas? We thought all these experiments were to be in the vastness of the Arizona desert.

In regard to the Brown-McClaren closing last week all the papers but the South Lyon Herald, printed only the statement of Morris Bond, company president, blaming high taxes and refusal of the employees to get out production as the cause of closing. They ignored the statement of group of employees all of whom had been there over 20 yrs. who blamed incompetence of Bond and his dismissal of the experienced supervisory employees. Everyone knew that the affairs at Hamburg had not been going well for 3 or 4 years. The number of employees dropped from 500 to 125. Supplng ussq anqu uem au pur in d es. The taxes were not over heavy and the wages paid were not the highest despite Bonds' statement. George Van-Pursem who has been trying to get up enough nerve to run against Gov. Williams, swallowed Bonds statement whole, must have nearly choked him, and sent it out as campaign material. He ignored the statement of the employees. The plant was not unionized.

Third Grade, Mrs. Post Rhoda Baxter says hypnotizes animas. Lawrence Hughes aunt is in the hospital. Donald Hollister visited Ronald Lentz in Ann Arbor over the week end.

Sixth Grade, Mrs. Tasch Last Wednesday we had a spelling bee on words we have had. Friday we all painted, mostly Easter things. We are all reading a book and will give book reports. Soon we start a unit Scandinavian countries. Fifth and Seventh, Mrs. Meyer Scharme Baxter was sick last week. Gloria Bond had company from Wayne. Nancy Hollister visited her grandmother. Williams Judy Schroeder's sister, Shirley Lafever from the north, is going to visit her. Allen Stuck en visited his grandmother Nick els, Detroit. Larry Baughm got a field mouse Saturday.

### WHAT'S A VIGINTILLIONTH?

TRYING TO PICTURE Avigintillionth of anything is beyond the comprehension of most of us.

Almost as inconceivable for many is what life in America would be like without our motor truck.

Mass production and sub-assembly operations—the very heart of our technological economy—would be utterly impossible without materials and parts trucks now provide.

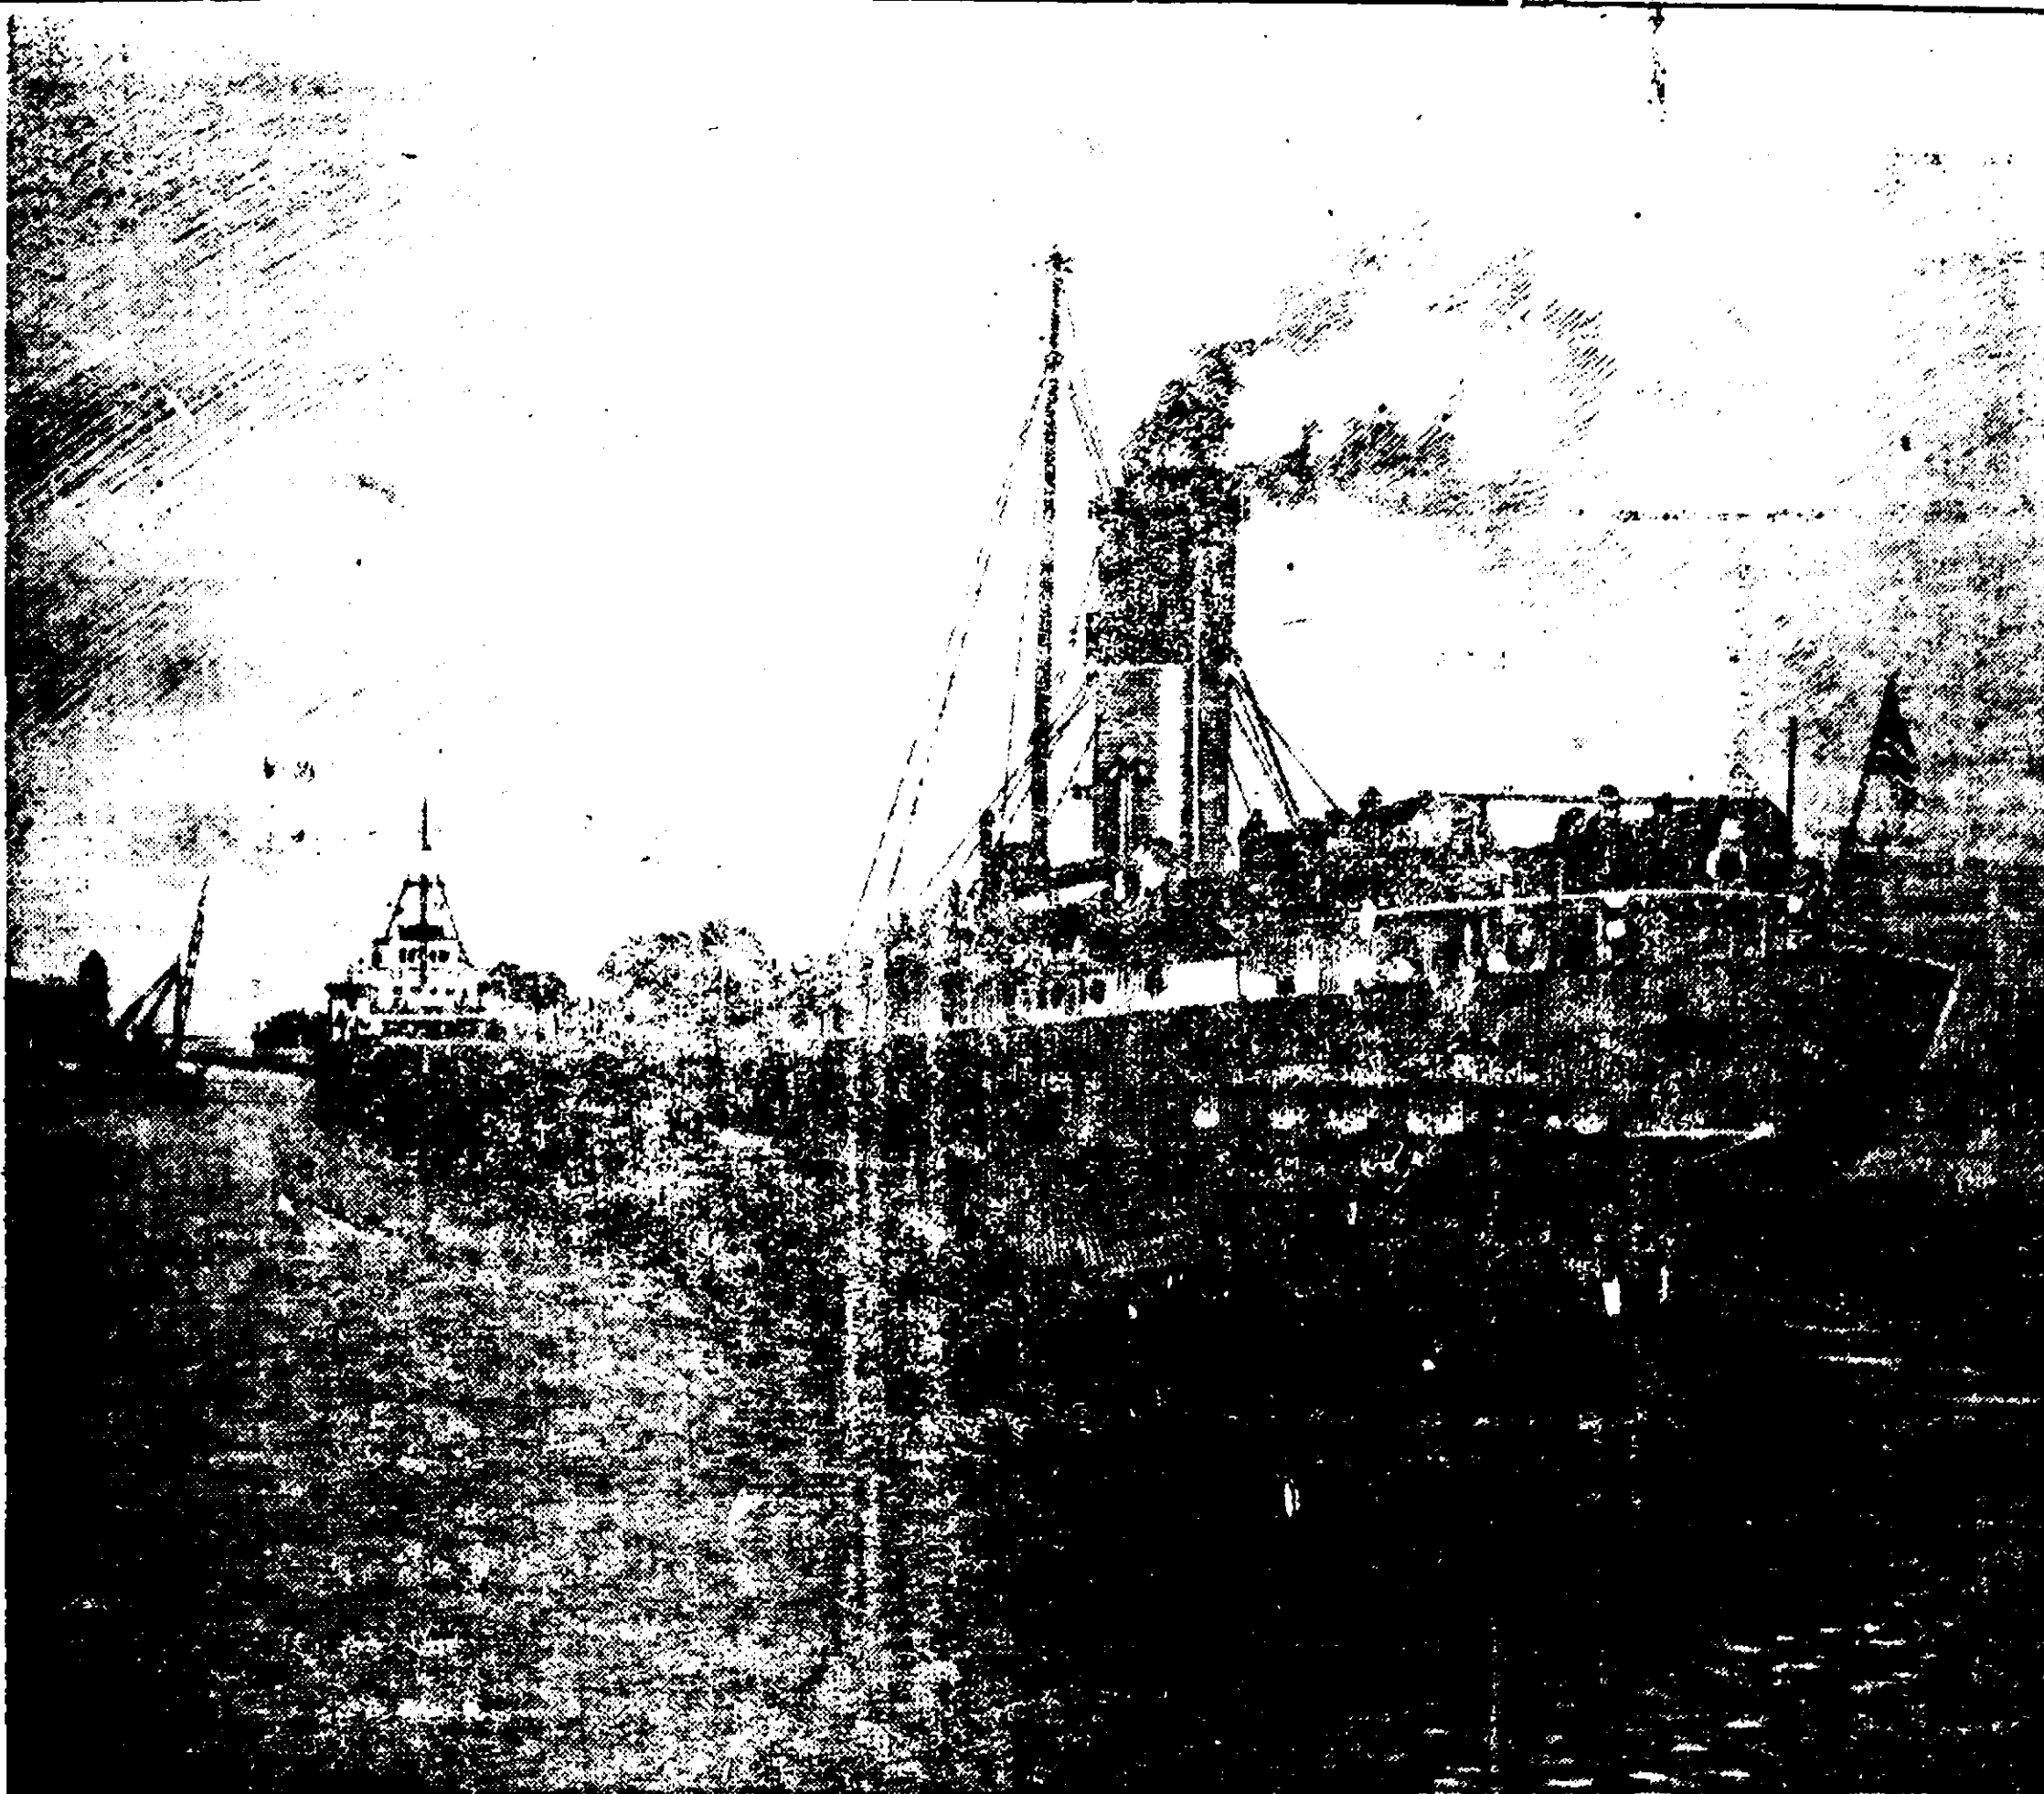

And certainly there would be a tremendous "change" in our eating habits if trucks were removed from the picture because everything that comes from the farm—including meat depends on truck transport for on the hoof and dairy products distribution to retailer and consumer.

Roads, buildings, public services, national defense—all these as we know and rely on them—reflect the indispensability of the motor truck. and we could go on and on.

So next time you see a truck on the street or highway remember its there because it has a job to do for you and 135 other Americans.

From where I sit... by Joe Marsh

"Sound Idea"—But—

Hap Wilson is a young fellow on our paper—and crazy about that little daughter of his. But like all of us he's learned that kids can present problems.

"Every night I have to read her the same story," he complained. "The most sugary one in the book—about Billy Bumblebee!" So I finally recorded the story on a tape recorder. Showed her how to play it whenever she wants.

"Know what she says? That it sounds fine but that she

can't sit on the machine's lap!"

From where I sit, Hap had good intentions, but he has to understand his daughter's point of view, too. Many of us often make the same mistake. For instance, you may like tea, I prefer a glass of temperate beer. The important thing is that we both understand each other's point of view. There are two sides to every "story!"
