THE PINCKNEY DISPATCH Wednesday, April 8, 1959

The Michigan Mirror Election Results

Industry is booming in Michigan. The state with the so called problem of economic climate had 4th biggest industrial growth last year and the future looks brighter.

The Consumer's Power Co. is planning a \$100,000,000 electric generating plant at the mouth of the Big Pigeon river, 50 miles west of Grand Rapids. It required a special act of the legislature to give them use of state submerged lands. They were granted an easement of 63 acres of state submerged lands in Port Sheldon township. The plant will serve Grand Rapids, Muskegon, Kalamazoo and a 61 county area. Coal to fuel the plant will be delivered by boat. It will be necessary to dredge out a channel for the boats. Preliminary construction has started and it will be ready for use in 1962.

Gov. William is non committal on his intentions for 1960 but his wife is on a world tour for the United Nations Good Health Organization says he will not run for governor again. Mentioned as his successor are Sen. of State Hare, Lt. Gov. Swanson and Supreme Court Judge George Ed. wards.

Automobiles Michigan's most important industry is reaching for a record year despite the inroads made by foreign cars. The industry predicts a 6000 unit year.

Universities are getting worried about finances. Even if they receive their appropriation pressing needs may prevent the salary increases long overdue.

Michigan has 30,000 state employees 800 miles of state trunk lines and 11,000 inland lakes.

CONSERVATION NOTES

If birds are a harbinger of spring it is not far away. 6000 Canadian geese arrived at Jack Miner's Sanctuary last week and 3500 swan. This is their stopping place before going into Canada.

Michigan receives more than \$1,000,000 for Wild Life Program from the Pittman-Dean fund. This is a tax on firearms, ammunition and fishing tackle.

Dogs are expert fishermen. One caught 3 rainbow trout last week. method was to chase them into shallow water and pounce on them.

The spring breakup has lessened the threat of continued deer starvation. Browse cuttings are still continuing in 125 locations.

Now is the time to remove your fishing shanty from the ice. Failure to do so means a \$50 fine.

The state paid \$5,810 in February in bounties on foxes coyot and bobcats.

The Bearcat Creek Mining Co. wants a wildlife mining lease to explore public lands for minerals principally the Ottawa National Forest.

An injunction has been issued to prevent Mr. and Mrs. George Town of Ludington from filling a bottom lands.

The smelt dipping campaign is expected to start this week or next.

The conservation dept. now has 2 aircraft. 2 twin winged Beechcraft have been added, obtained from the army surplus at Tucson, Arizona.

OUR DEMOCRACY AS DAY IS FROM NIGHT

A LARGE PART OF THE TWENTIETH CENTURY HAS SEEN TOTALITARIAN SYSTEMS TRIED IN VARIOUS PARTS OF THE WORLD. DARKNESS HAS DESCENDED UPON THOSE PEOPLES, AND CLOSED OFF THE BORDERS OF SEVERAL FORMERLY FREE AND INDEPENDENT NATIONS.

IN OUR DEMOCRACY, WE STRIVE EVER TO BROADEN THE SPIRITUAL, POLITICAL AND ECONOMIC BASE ON WHICH WE STAND, AND TO BRIGHTEN THE RAYS OF ENLIGHTENMENT INSTEAD OF DARKENING THE MINDS OF MEN.

AS DEWITT CLINTON SAID IN 1826: 'A GENERAL DIFFUSION OF KNOWLEDGE IS THE PRECURSOR AND PROTECTOR OF REPUBLICAN INSTITUTIONS; AND IN IT WE MUST CONFIDE AS THE CONSERVATIVE POWER THAT WILL WATCH OVER OUR LIBERTIES.'

Current Comment

Application has been made at Washington D. C. for a patent on a medical toothbrush. This plays a tune while you are brushing your teeth. The music is caused by rotation of part of the brush handle. It only plays if the teeth are brushed vertically.

We supposed spankings were permitted in all schools at the discretion of the teacher. Back in the old back, school days the chief equipment of a teacher was a hickory stick. They had few degrees in those days and few of them had over an 8th grade education. It was not uncommon for the pupils to throw the teacher out. Teachers were hired for their ability to keep quiet. One favorite saying was "No hickory, No Learning." The refrain of the song School Days was taught to the Tune of a Hickory Stick. The New York legislature passed a bill legalizing spankings in public schools and sent it to Gov. Rockefeller for his signature. It reads "No school board or board of education shall promulgate or continue a rule, regulation or by-law which shall prohibit the use of force." Ye editor was witty in a law suit at Brighton some year ago where Hamburg parent had teacher arrested for spanking his child.

The veterans march on Lansing to prevent the legislature mortgaging the veterans fund last week was a mistake as only 75 of Michigan's million veterans showed up. The bill to mortgage the fund passed with 65 votes to spare. 12 Republicans voted for it. The going may be harder in the senate but we doubt if the Republic will go before the voters April 6 as sponsors of pay raise paydays. This prospect has killed business in Ann Arbor where there are a large number of University employees. The prospect of devalued business and they have been holding meetings. A prominent business man on the other day the Legislature could settle the financial matter in one day if they forgot their by-laws and get down to business. The Legislature called a small group of Republicans are out to get the Governor. The Legislature even if they ruin the state in accomplishing their object. The Senator recently called him a snake and another a snake. Both apologized.

Years ago many fraternal organizations met on or before the full of the moon. This was in the horse and buggy days and they wanted moonlight nights to travel in. Some lodges still retain this in their by-laws. They are called Full moon lodges. We of this area were not so much. Some times it rains March 12 and then other years it rains April 17. Our ancient ancestors got the moon and the early Hebrew calendar was based on it. The Romans wanted the moonlight to be over the desert to help the Christians. Christians wanted Eastertide on a Sunday as that was the day that Pope Gregory's calendar for the year now in use. A year has 13 moon cycles. He took the first one after the spring when the days and night are of equal length for Easter. The moon and the sun vary. When they come together the Easter is in April. When they come apart after Easter is in March.

Michigan will get two more seats in congress under the 1960 census. 7 states will gain and 19 will lose. California will gain 7, Texas 2, Hawaii 2, Alaska 1. New York loses 2, Pennsylvania 3, Mass, Maine, Minnesota, Iowa, Kansas and the southern states each 1. The legislatures will reapportion the congressional districts.

Russia has won a kind of victory by forcing the Western powers to agree to a summit conference to take place here this summer some time President Eisenhower did not want one under any circumstances, did not seek one and is not agreed on the program to be discussed. McMillan's sole purpose in coming here was to get this country in an such a conference. Great Britain does not want war. This was McMillan's purpose in going to Russia. His theme is, although chances of success of such a conference are not bright, no war should be left unturned to avert the World War.

CARD OF THANKS

The Democratic Party of Hamburg Township wishes to thank the voters for their fine support at the Spring Election April 6th.

dish after dish after dish...

there's always plenty of hot water

the new electric water heater way

GET IT HOT... GET A LOT to put that sparkle back into china and glassware. Dishwashing is easier and quicker when the water's really hot, and there's plenty of it for rinsing.

Thanks to Edison's Super Supply Plan, a new electric water heater is always on the alert—day or night—to supply hot water for all family needs. Here's the convenient, modern way to **GET IT HOT... GET A LOT** for an operating cost as low as \$3.88 per month.

Only electric water heaters give you all these important advantages:

- Efficient—the heat goes into the water
- Install anywhere—need not be near a chimney
- Long life—meet Edison's rigid standards
- Automatic—all the time
- Fast—new, more efficient heating units
- Outer shell—cool to the touch all over
- Edison maintains electrical parts without charge
- Safe—clean—quiet—modern
